WINCHESTER SHORT MAGNUM

WSM CONCEPT

WSM CONCEPT

Browning and Winchester, the undisputed leaders in the field of weapons and ammunition are pleased to present two new Winchester Short Magnum calibre in 2003: the 270 WSM and the 7mm WSM, which will be added to the enormously successful 300 WSM.

The trend in rifle design over the past few years has been towards lighter weight guns. With the introduction of WSM calibres, developed in close collaboration with, Browning proposes a new concept that combines compact, lightweight guns with a calibre providing the exceptional level of ballistic performance that until now has been reserved to the most powerful magnum calibres.

These WSM calibres will allow you to use ammunition offering even better performance than a conventional or standard magnum calibre, in terms of velocity, energy and trajectory.

In 2003, Browning will be offering this new, revolutionary calibre on 3 A-Bolt rifles: The A-Bolt Medallion, the A-Bolt Stainless and the A-Bolt Stalker. (scope not supplied)

Calibre	Weight (Grains)	Size of cartridge (mm)	Velocity m/s	Drop (cm) at 300 m (adjusted for 200m)	Energy (Joules)

THE BROWNING CHARTER

The Safety Charter

Whatever the country they are supplied to, Browning guns come equipped with the "Gun Lock" and the "Trigger Lock".

Browning encourages and supports responsible gun owners, and offers other products in addition to guns, that are specifically geared towards safety, in particular specially designed gun safes.

Browning guns are subject to the strictest standards of production and testing in the business (drop tests, etc.) The BACO standards constitute a very severe test.

The Ethical Charter

The guns produced and marketed by Browning meet the ethical requirements of all of the different shooting disciplines.

Browning hunting guns also comply with the art and the ethics of hunting, as well as with the laws of each country.

Guns of an aggressive or paramilitary nature are not allowed.

All Browning products are manufactured in countries where human rights are guaranteed and which never use child labour.

"Dealer Browning Partner" Exclusives

The products marked with this label are exclusive to the "Dealer Browning Partner:" in U.K. (www.browningint.com)

The Young Persons' Charter

Browning actively supports young shooters through its programme of sponsoring official "Browning" teams.

Browning also carries out sponsorship operations on behalf of national shooting federations.

The Craftsman's Charter

Hand made, using techniques that retain all the best aspects of the traditional methods, each gun produced by the "Custom Shop" at Herstal is unique.

The close ties that exist between Browning and the School of gunsmithing of Liege guarantee that these age-old skills will continue to be passed down for the benefit of future generations.

The Consumers' Charter

The Browning name is synonymous of quality. All our firearms carry a 3 year warranty.

The action frames of all Browning over-and-under shotguns are guaranteed for 10 years.

Brownings' world-wide distribution network ensures that its customers receive a reliable, high quality of service, and guarantees that only original manufacturers' spare parts are used.

Environmental Charter

The environment is a constant concern for Browning.

This is demonstrated, for example, in Brownings' decision to restrict the use of toxic products in its production processes. All the cutting oil from our numerically controlled machines is filtered and reused within a closed circuit.

Brownings' back-bored barrels with interchangeable Invector Plus chokes allow the use of cartridges loaded with non-toxic shot, thus reducing lead pollution, in particular in wet-land areas.

Browning cartridges are fitted with wads made of a special, photodegradable plastic material. Under the action of UV rays, this wad decomposes in a matter of months rather than the decades taken by traditional wads.

Finally, with the aim of reducing visual pollution, Browning recommends that you pick up your empty cartridge cases, a simple gesture but an important one for the future of our sport.

Opaline Label

We provide a 100% guarantee on the 10 following qualitative criteria :

1. Using European walnut at least 150 years old.
2. With a hand-produced oil-rubbed finish.
3. With hand-cut checkering .
4. Wooden parts fitted by highly qualified craftsmen.
5. Action frames fitted using the lampblacking technique.
6. Pitch and twist of all stocks checked with millimeter precision.
7. Electronic measurement of ballistic performance and calculation of centre of gravity of the shot pattern.
8. Diameter and length of the firing pin checked with micron accuracy.
9. Trigger pull measured twice (once after mounting trigger assembly and again after the shooting test) to the nearest gram.
10. Supplied in a special carry case.

Dura-Touch Label

Browning introduces Dura-Touch, a unique wood treatment, specially designed to improve the grip and the handling of your gun. Dura-Touch is also an exclusive finish that will perfectly protect the wooden parts of your gun against bad weather, as well as providing an exceptionally smooth and pleasing feel. This treatment will be offered on various guns in our range to allow you to derive even greater pleasure from using your Browning gun.

Back-Bored • Invector

Guns equipped with back-bored barrels with Invector+ chokes will give a reduction in recoil, an improved shot pattern and an increased penetration velocity. (see page 33 for further details)

B25 B2G

B25 Special Game 20 Side plates EI

Special Game with 71 cm (28") barrel and a 6 mm vented rib. An English stock and tulip fore-end make this a refined, elegant and lightweight gun. Available in 12 and 20 gauge versions

B25 Special Duck

Model designed for optimum power and long range shooting. 76 cm barrels chambered 3" (76 mm) with an 8mm vented rib – rubber buffered pistol grip with an insert for good handling and comfort – even with very powerful cartridges.

B25 Special Woodcock

A gun specifically designed for walked-up game shooting, that is above all light (2.750 kg) for an all steel 12 gauge shotgun. It is also very easy to handle with its 67 cm barrels, no top rib, and with a semi-back bored Long Forcing cone for reduced recoil. In order to avoid abandoning your spent cartridges in the countryside, this gun is only provided with extractors, but the ejection system can be fitted upon request.

Sporting 206 Grade CII

**B25 Trap Evolution 2**

A genuine shooting machine, the B25 Trap has 76 cm long barrels and a 16 mm vented rib and is equipped with an adjustable trigger, disengageable ejectors, a luminescent front sight and a "Decelerator" anti recoil butt plate.

B25 Trap Evolution 2

**B25 Sporting 207 GOLD 25**

Mainly designed for sporting clays, the GOLD 25 could also be perfect for hunting, thanks in particular to its 8 mm vented rib and its 76 mm chamber that can fire magnum cartridges. With an anti-recoil butt plate providing great shooting comfort, it is also characterised by its special "GOLD 25" engraving.

B25 Sporting 207 Gold 25

**B25 Skeet 105 Grade BII**

This shotgun has 71 cm long barrels and a 12 mm vented rib, plus skeet/skeet chokes. Pistol grip stock and semi-beavertail fore-end in oil-rubbed French walnut.

B25 Skeet 105 Grade BII

B25 Sporting 206 Grade C11

This model has 76 cm long barrels, a 12 mm vented rib and fixed chokes, but also exists in 71 cm (Sporting 205) or 81 cm (Sporting 208) versions. Its pistol grip stock and tulip fore-end are made of oil-rubbed European walnut. It is available in different grades with or without side-plates.

BMM African

Based on the Mauser system and developed in conjunction with Ernest Dumoulin the great bolt-action specialist, this rifle has been oversized to adapt it to the African calibres : the diameter of the 3 lug rotary bolt has been increased to 19 mm. The reinforced breech box has been countersunk and prepared for scope mounting. The integral magazine can hold 4 cartridges and is equipped with a hinged floor plate with a transverse cut-off, exclusive to Browning. The Browning Mauser Magnum is notably manufactured in .416 Rigby, .500 Jeffrey and .505 Gibbs calibres.

H U N T I N G

B525 CLASSIC

OVER-AND-UNDER SHOTGUNS

THAT SOMETHING THAT MAKES THE DIFFERENCE

Black, 100% recyclable polypropylene carry case marked with the Browning logo in gold colour.

1 Large sized bolt

The bolt is large and made of one piece. It is adjusted to suit the action frame that receives it to guarantee play-free action.

The bolt is adjusted to bear at precisely where it should: on the bottom face of the groove of the barrel locking lug.

The bolt lever is adjusted in such a way that the shooter can tell from its angle to the line of sight that the bolt is bearing correctly and is not fully closed.

2 Positive, powerful ejection

Cartridges are ejected by means of a hammer-operated mechanism, the only system which guarantees positive, powerful and regular ejection. Only spent cartridges are ejected, thanks to an ingenious system of rods operated by the hammers as they drop.

3 Chrome-plated barrels

Barrels are chrome-plated internally : for hunting under the worst conditions...

4 Highly durable hinge pin

The hinge pin is made of one piece and has a large surface area which ensures that the sliding and rotation forces induced during opening and closing are evenly distributed, thus ensuring maximum resistance to wear.

5 Forged steel action frame

The action frame is machined from a block of forged steel. It is able to resist pressures several times greater than those actually used in the Belgium Proof House at Liege.

6 Single selective trigger

The single selective trigger allows you to select the upper or lower barrel for the first cartridge

THE PINNACLE OF ACHIEVEMENT IN UNDER AND OVER SHOTGUN DESIGN

In 2003, Browning is launching a hunting version of the B525 Classic, the 5th generation of the original under-and-over shotguns designed by John Moses Browning.

This model retains all the characteristics that have made Browning under-and-over shotguns the most appreciated guns in the market.

Its handling, its balance and its reliability testify to the care taken by Browning in the making of its guns. The B525 Classic combines the very best of the traditional gun maker's craft with the most advanced production techniques.

For the B525 Classic, Browning has gone even further, to ensure that each hunter experiences greater satisfaction when using its guns. A great deal of work has gone into the firing mechanism, to improve its accuracy while at the same time retaining all the unique safety features associated with Browning guns. Particular attention has been paid to the finish of the wooden elements and the checkering has been redesigned for improved handling. The barrels have been revised to enable all "invector" models to fire steel shot cartridges, as guaranteed by means of a test certified by the Liege Test Bench (BEL) label. Finally, the design of the action frame incorporates a small shell on the top, giving it a particular elegance and a unique identity within the Browning range.

7 Firing system

The new, more direct firing system gives you a more precise, safer and more consistent shot.

8 Wood and checkering

A choice of woods and new, higher quality finishes. Ideally situated checkered areas ensure accurate and comfortable handling.

9 Shells

The top of the action frame incorporates a shell that gives this model a certain elegance and makes it special.

Browning recommends the use of ammunition by Browning and Winchester

B525 Classic Cal. 12 Magnum Gr 1

B525 Classic 12 Gauge Magnum Elite Gr 3

B525 Classic 12 Gauge Magnum Elite Gr 3

Sobriety and elegance characterise the B525 in its Elite (Gr3) version : its engraving, the meticulously selected walnut and oil-rubbed finish make this an ideal compromise between traditional looks and personality. It has a 3" Magnum barrel, just like the Gr 1 model.

B525 Classic Cal 12 Magnum Prestige Gr 5

B525 Classic 12 Gauge Magnum Prestige Gr 5

The charm of the Prestige (Gr 5) is more discrete. The fit of the barrels, the engraving and the very attractive old silver colour of its action frame make this an elegant gun of the best possible taste. It comes in an Opaline case. This model has a stock with teardrops, and a multi-purpose 3" Magnum barrel like that of the Gr 1.

B525 Classic 12 Gauge Magnum Gr I

The multi-purpose gun par excellence as it incorporates a 3" barrel that can fire both 70 mm (2 3/4") and 76 mm (3") cartridges, while at the same time being low in weight for the comfort of the shooter.

Only B525s equipped with an invector choke are tested for steel shot.

B525 CLASSIC

OVER-AND-UNDER SHOTGUNS

B525 Classic Cal 20M Gr I

B525 Classic Cal 20M Gr I

This model represents the traditional compromise between efficiency and weight. A steel 20 gauge action frame and barrels chambered for 3" Magnum allow optimum efficiency while keeping the weight deliberately low, which is a considerable advantage during a long day's hunting.

B525 Classic 20 Gauge Magnum Elite Gr 3

Particular attention has been paid to the choice of wood, the finish of the action frame and the type of engraving (incorporating new game scenes), all of which give this model a refined elegance while retaining the advantages of the basic model.

B525 Classic Cal 20 Elite Gr 3

B525 Classic Cal 20 Elite Gr 3

B525 Classic Light Cal 12 Gr I

B525 Classic Light 12 Gauge Gr I

The gun of the 3rd millennium for the demanding hunter. All of the developments introduced with each new generation of Browning light models are incorporated in the B525 Light which constitutes the ultimate synthesis of efficiency, weight and good looks. An action frame made of a lightweight "Aircraft" grade alloy reinforced with high strength steel inserts, a suitably profiled barrel and a suitable choice of wood and form result in a lightweight gun with perfect handling and balance, as well as an unequalled elegance, further enhanced by game scene engravings.

B425 Light 20M

This gun represents a perfect combination of lightness, looks and strength. Its action frame is made of 7075 alloy with a stainless steel toner insert. Its new, narrower, tulip fore-end and semi pistol grip stock make this a particularly ergonomic gun.

B425 Elite Light 28

Sober and elegant : a new, original engraving, meticulously selected walnut with an oil-rubbed finish make this an ideal compromise between traditional looks and personality. This gun will provide maximum pleasure by allowing you to attempt a novel experience: sporting clays with a 28 !

B425 Elite Light 410

Let yourself be seduced by the surprising efficiency of the famous B425 shotgun in its .410 gauge version. This gun combines high performance with a brand new stock and a new fore-end, which give it very a fluid line and great finesse. This shotgun also has a new, profiled rib.

Engraving B425 Light Elite 28 and .410

B425 Privilege Hunting Cal. 12

B425 Esprit 12 gauge

The B425 Esprit has removable plates and a newly dimensioned action frame. The swan-neck shaped stock, in the purest Browning style, is a perfect compromise between fineness of line and sureness of grip. An additional set of blank plates supplied with the gun, can be engraved with the scene of your choice. Available in Scroll and Dog versions.

B425 Esprit Scroll Cal. 12

B425 Light Special Woodcock Cal. 12

B425 Light Special Woodcock 12

The principal feature of this gun is that it has a 61 cm barrel with a rifled lower tube, while the upper tube is fitted with an Invector. It will work wonders in the undergrowth : its rib, which gives it its flowing lines, makes it extremely quick firing. A special engraving represents the "painter's quill" so coveted by hunters of woodcock.

B425 Special Waterfowl Cal. 12 Mag

DURA-TOUCH
Armor Coating

B425 Privilege Hunting 12

A "fine" firearm in the true sense of the word, the Privilege is one of the key products of Browning's know-how. The walnut used is a 4 star quality wood that is then oil rub finished by hand. The side-plate engraving combines deep engraving, decorative motifs and game scenes. This gun comes in an Opaline case.

Opaline case

Developed exclusively for our OPALINE label, this superb case with its laminated structure and highly resistant polymer-coated fabric finish is fitted with two combination locks. Providing perfect protection when transporting your gun, it combines modern design and refined elegance.

B425 Special Waterfowl 12Mag

Designed for intensive use in natural aquatic environments, the Waterfowl will follow you on your duck and goose hunting expeditions with less risk of damage. Its stock is protected with the new Dura-Touch. It is chambered for 3" cartridges, and its barrel can accept steel shot and high load cartridges without any problem. The 62 mm "Invector Plus" Chokes ensure the best ballistic efficiency.

Fusion Cal 12 M

1 **Perfectly ergonomic**

Stock: the more marked cheek piece and asymmetric pistol grip guarantee a gun of unmatched ergonomic quality.

2 **Safe**

Easy-to-reach transverse safety lever, reversible to suit left-handed shooters

3 **Easy to maintain**

A Trigger assembly removed simply by popping out two pins from the receiver for quick and easy cleaning of the mechanism.

4 **Flowing lines**

The narrower fore-end with a particularly well designed shape and magazine plug make this a flowing and extremely elegant gun.

5 **Optimum aim**

New sighting rib and optical fibre fore sight for an unequalled quality of shot. Set of 6 interchangeable optical fibre foresights provided.

"BACK-BORE"

Browning reveals the professionals' secret: back-bored barrels.

First used in 1992, back-boring is a technical breakthrough that has allowed our shooters to win numerous medals.

Better impact and higher velocities for improved shooting accuracy. A "back-bored" barrel is one whose internal diameter (the bore diameter) has been increased beyond traditional specifications.

• Increased penetration velocity

Back-boring ensures that there is less friction between the shot and the wall of the barrel. Instead of having to overcome friction, more of the energy generated by the gunpowder gasses serves to propel the cartridge, thus increasing the velocity of the load.

The shot retains its ballistic quality.

The force of contraction or the pressure exerted by the barrel wall on the load is reduced, thus reducing the number of deformed pellets fired.

• Improved shot pattern

The ballistic characteristics are improved and you achieve exceptionally uniform shots with many more effective pellets hitting the target.

• Reduced recoil

A reduction in recoil means improved shooting comfort. In a back-bored barrel, the load passes more easily reducing the amount of recoil felt by the shooter, thus improving his shooting comfort.

THAT SOMETHING THAT MAKES THE DIFFERENCE

Other accessories provided:

1. Stock care oil
2. Trigger guard lock for increased safety
3. 50 mm barrel extension

Fully adjustable stock
Quick and easy to adjust to your measurements thanks to the 6 inserts provided.

Magazine cut-off for quick load switching. When engaged, this device is able to block the cartridges in the magazine so as to only load the cartridge located in the chamber.

It also has the advantage of enabling you to keep the breech of your fusion open with cartridges in the magazine by engaging the cut-off and ejecting the cartridge contained in the chamber.

To quickly reload, release the cut-off and the breech will move forward to feed a new cartridge in the chamber.

EXCLUSIVE

The "Speed-loading" system allows you to load more quickly. With the breech in the rear-most position, simply slide a shell into the magazine and it is automatically sent to the chamber, ready to fire.

An extra flat carry case allows you to easily carry all the accessories you need with you, and thus perfectly adapt the gun to all hunting conditions.

Works perfectly with 24 to 57 g. cartridges.

The Fusion 20 gauge also exists in a deluxe version, with a superb anthracite gray receiver edged in fine gold and a new engraving. The oil-rubbed walnut stock and fore end contribute to the superior quality of this gun.

BROWNING: THE INVENTOR OF THE SEMI-AUTOMATIC SHOTGUN

Fusion Ultimate 12 M

A superb deluxe version of the Fusion. Anthracite grey receiver, finely engraved and edged with 24 carat gold edging and a very attractive oil-rubbed walnut stock and fore-end.

Fusion Ultimate 12 M

Fusion Ultimate 12 M

Fusion Cal 12 M (p33) - Fusion Grade 3 Cal 12 M

The more marked cheek piece, the more pronounced pistol grip, the longer, narrower fore-end all make for exceptional handling. Its new shape and new sighting rib give it ideal balance. All the receivers are countersunk for mounting a scope. The very high quality European walnut has an oil-rubbed finish. Accurately shoots all cartridges from 24 to 57g thanks to a regulating valve incorporated within the gas operated mechanism.

Its new back bored barrel allows it to shoot all cartridges available on the market without exception, even steel shot cartridges. This 12M gauge shotgun only weighs 2.9 kg.

The new Grade 3 Fusion uses specially selected Turkish walnut with an oil finish, featuring superb chequering.

Fusion Cal 20 M

The Fusion range is being expanded in 2003 with the introduction of the Fusion 20M. In addition to the qualities of the 12 gauge, the Fusion 20M also provides lightness and ease of handling. The narrower receiver has been scaled to suit the gauge. The quality of the shot pattern is ensured by the 62 mm long Invector Plus chokes. The 3" chambering of this gun allows it to fire all 20 bore cartridges, regardless of length or load.

Fusion Combo

Gold Hunter Cal. 12 3"1/2

Gold Camo Cal. 12 3"1/2

Gold 10 Gauge Light

Gold Hunter Cal. 12 3 1/2"/89 mm chambering

This is a gun that is intended for those wishing to shoot heavy loads, and is ideal for hunting waterfowl and migratory birds. The Gold is a very versatile gun and is able to shoot 2 3/4" cartridges of 28 g, allowing a very broad field of action.

Gold Camo Cal. 12 3 1/2"

An impressive gun under extreme conditions. The stock and fore-end, made of composite material, are extremely hard-wearing and totally unaffected by changes in temperature.

Gold 10 Gauge Light

Intended above all for wildfowlers, the 10 gauge is without doubt the ideal solution in those regions requiring the use of steel shot. Our new light version retains a comfortable recoil (ventilated butt plate, anti-recoil).

BROWNING: THE INVENTOR OF THE SEMI-AUTOMATIC SHOTGUN

CCS 525

Browning has been the leading producer of express under and over rifles for decades. With the introduction of the CCS 525 in the 525 range, Browning wanted to provide the demanding hunter with a gun that is attractive, while at the same time guaranteeing flawless operation and unequalled accuracy, and that can be easily adjusted to receive the different types of cartridge available on the market.

BROWNING HAS REINVENTED THE EXPRESS RIFLE.

The barrels, the essential part of this gun, are both traditional and original. A spacer on the upper barrel ensures the accuracy of the vertical convergence of the barrels, while lateral convergence is ensured by the design of the barrel itself, which incorporates a unique "Cradle" strip. Once the ammunition has been chosen, a spacer ring is recommended and inserted securely under the foresight on the upper barrel, guaranteeing unequalled accuracy. (*).

The weight and balance are perfect for current hunting conditions.

The action frame has been strengthened by means of high strength stainless steel inserts.

Very special attention has been paid to every detail of this gun: a "hog's back" stock with a Bavarian cheek piece, an accentuated tulip-shaped forearm for greater elegance, a fluorescent optical fibre foresight and a traditional battue rib allowing a scope to be mounted by a gunsmith in minimum time. The animal engravings with which it is decorated make this a very special and unique rifle.

(*) It is essential that this operation is carried out by your gunsmith.

BAR SHORTTRAC

SEMI-AUTOMATIC RIFLES

Browning recommends the use of ammunition by Browning and Winchester

SHORTTRAC

X RE-DESIGN!!!

THE **BAR SHORTTRAC**: STREETS AHEAD

NEW

In 1966, Browning launched the BAR (Browning Automatic Rifle) that was to quickly become THE market reference. In spite of severe but often ineffective, competition, the BAR became the leading semi-automatic rifle in Europe.

In 2002, in close collaboration with Winchester, Browning developed the WSM (Winchester Short Magnum) calibres, combining the power and the accuracy of classic "magnum" calibres with a smaller cartridge.

In 2003, Browning is launching the BAR **SHORTTRAC**, the first semi-automatic rifle on the market to be developed specially for WSM calibres. The smaller dimensions of the WSM cartridges have made it possible to create a lightweight, compact gun that guarantees "Magnum" performance.

The BAR **SHORTTRAC** incorporates all the experience of the BAR gained by our Research and Development departments over a period of almost 40 years for your maximum satisfaction.

SHORTTRAC

THE DESIGN

THE BAR SHORTTRAC: STREETS AHEAD.

1. A reliable and regular gas-operated system ensuring sound semi-automatic operation and a consistent shot.
2. A 7 lug bolt engaging in the barrel, for maximum safety.
3. Highly compact, making it easier to swing the gun and keep the prey in your sights.
4. An aircraft grade aluminum alloy receiver, plus a trigger assembly and magazine floor plate made of composite material for optimum weight.
5. An adjustable stock to adapt the gun to suit your preferences and your build, for maximum comfort.
6. Wooden elements in keeping with the rifle's resolutely modern design.
7. Perfect handling, for a smooth mount and a fast aim.
8. An ergonomic magazine catch allowing easy access to the hinged magazine holder and easier loading.
9. A bolt catch allowing cartridges to be quickly and safely loaded into the chamber.
10. A cold-hammered barrel produced by FN Herstal in Belgium, the guarantee of perfect accuracy.
11. A vertically adjustable battue rib and a front sight with crosswise adjustment guarantee absolute shooting efficiency.

Bar Evolve

Bar Light Battue

In its battue version, the BAR Light is the absolute weapon. Easy to mount and incredibly accurate, all it needs is a hunter with the reflexes to match.

Fibre optic front sight of unequalled brightness.

Bar Light Affût

This model is designed to provide still hunters the pleasure of a light, reliable and extremely accurate gun.

The seven lug rotating bolt is the key to the BAR's strength and reliability.

THE BEST KNOWN SEMI-AUTOMATIC RIFLE IN THE WORLD

Bar Evolve

The shaped Monte Carlo stock, the more marked pistol grip and the narrower tulip fore-end will ensure excellent handling and incomparable comfort.

Particular care has also been taken in the selection and finish of the wood, most particularly the magnificent "Scottish" checkering.

Fore-end for better handling, all enhanced with a magnificent "Scottish" checkering.

- The Monte Carlo stock provides unequalled shooting comfort, even when using a scope.
- The grip of the stock is much more marked for a better hold.

Adjustable battue-type rib. Its truncated rib affords you a better view of the target. A fine white stripe perfectly guides your eye to the target.

Fixed or removable hinged magazine holder according to regulations applying. The bolt release lever facilitates fast and easy loading. Simply close the loaded magazine and depress the bolt release lever, and the cartridge is automatically delivered to the chamber.

The receiver is drilled and tapped for scope mounting.

THE BEST KNOWN SEMI-AUTOMATIC RIFLE IN THE WORLD

Bar Light Battue Luxe

This model has been produced to answer the demands of those who no longer wish to have to choose between functionality and looks. With its nickel-plated old silver receiver and its animal motif engravings embellished with fine 24 carat gold subjects, its wood made of oil-rubbed European walnut, the Bar Light Deluxe is truly an object of great beauty. It comes in an Opaline carry case that will certainly not disgrace it.

Bar Light Stalker

The Bar light requires no introduction. This new version, with its composite stock and fore-end is virtually indestructible. When hunting in the undergrowth, it will be less likely to damage.

Bar Acier Battue

BAR BOSS "Affut" system

The addition of the Boss system produces two particularly interesting effects : reduced recoil (in the region of 30 to 50 %) and improved accuracy. The performance of the BAR is thus improved when using a scope or firing long range shots.

Bar Acier Affût BOSS

Reduced recoil

The BOSS™ system allows the bullet to leave the barrel at the ideal moment, i.e. in the "peak" or the "valley" of the vibration wave when the muzzle is virtually motionless.

Improved accuracy

The BOSS™ system allows the rifle to be quickly adjusted to the desired load. Each barrel equipped with the BOSS™ is marked with 10 incremental markings, and a table of average settings is supplied for each calibre.

THE BEST KNOWN SEMI-AUTOMATIC RIFLE IN THE WORLD

Bar Acier Battue

With its more compact barrel, its battue type rib and its fluorescent fore sight, this gun is exceptionally effective and easy to handle in battue or stalking situations.

BAR Acier Affût

This version is fitted with a vertically and horizontally adjustable rear sight The fine metal foresight ensures a perfect accuracy of aim.

Dualis

Particularly ergonomic release lever. Simply press to unload instantly

New drop-down magazine. It's asymmetric design allows extremely quick and accurate pointing

Underneath the fore-end is the key to the unique reliability, accuracy and good looks of the Dualis. No part is in contact with the barrel which is thus free floating. Its 2 dimensional movement is perfectly ergonomic.

ABSOLUTE SPEED

DUALIS Battue

A perfect alternative to the semi-automatic

Totally different from normal pump-action rifles, the Dualis reloads in record time. The fore-end moves along 2 axis: you draw it towards you, and it moves backwards and downwards, forming a circular motion and nestling comfortably under the magazine.

No visible cams, a silent action and a superb, highly fluid line. This gun is extremely effective with its floating cold-hammered (FN Herstal made) barrel, its drop-down magazine and its modern optical fibre fore-sight.

Adjustable "Battue" type rib. Its truncated rib affords you a better view of the target. A fine white stripe perfectly guides your eye to the target.

Fibre optic front sight :
New, increased brightness for more accurate and faster battue shooting.

BLR Battue

The Battue version, with its rib and its 47 cm barrel is extremely compact and efficient for this type of hunting. With its external hammer, it is also an excellent stalking gun.

BLR Affût

Its aluminum receiver makes this a light, well balanced gun. The lever is linked to a rack-operated mechanism that is extremely smooth and progressive. An important detail, the trigger shoe follows the movement of the lever.

ACERA

STRAIGHT-PULL ACTION RIFLES

Acera

Acera Elite

Deluxe version of the Acera with superb oil rubbed walnut and rosewood on the ends of the pistol grip and the forestock. The obturation plate is finely corked. Comes in an Opaline carry case.

Acera Elite

Acera Stutzen

Brand new Stutzen long forestock version with perfectly floating 51 cm barrel. With its superb lines, its lightness and ease of handling, you will be able to shoot shot after shot with exemplary accuracy. FN-Herstal cold hammered barrel. Comes in a black ABS carry case.

Acera Stutzen

Acera Affût

Designed more for walk-up or still hunting, this new version has a 58 cm barrel with the appropriate sights. Easy scope mounting thanks to the steel inserts on the breech box. Comes in a black ABS carry case.

Acera Affût

THE ONLY BOLT ACTION RIFLE IN THE WORLD TO HAVE ITS BREECH BLOCK

COMPLETELY ENCLOSED WITHIN THE RECEIVER

Receiver drilled and tapped for scope mounting

Walnut "hog's back" stock. The Bavarian cheek piece adds to its already good looks.

Drop-down magazine for speed and ease of loading.

The seven lug rotating bolt engages directly into the barrel extension, making it particularly strong and reliable.

ACERA

With the Acera, reloading simply involves a straight-pull action: a straight back-and-forth movement along the line of the gun is all that is required. But its other major advantage is that the bolt is completely enclosed in the receiver. There is therefore no risk of receiving the bolt in the eye: the hunter is thus able to keep the target in his sights while reloading. Available in calibre 270 win, 7X64, 7RM, 30.06 and 300 WM

Comes in a black ABS carry case.

Fibre optic front sight : unequalled brightness, the quality of your shot depends on it.

New cocking handle

Browning recommends the use of ammunition by Browning and Winchester

REPEATING RIFLES

A-Bolt Stainless Stalker

Ideal for target shooting, vermin or game, the stainless stalker seduces as much by the intrinsic qualities of its materials as by its looks. Its composite fibreglass/graphite stock, together with its stainless steel barrel and action make it a gun that is perfectly suited to all kinds of weather.

DURA-TOUCH
Armor Coating

A-Bolt Medallion

A reduced 60° bolt action makes reloading the A-Bolt rifle quicker and easier, especially with a scope mounted. Its push button safety catch is ideally located at the top of the grip. Available in small calibres, it is ideally suited to hunting vermin, but will appeal to the most demanding shooters.

A-Bolt Composite Stalker

Sharing the same characteristics as the rest of the A-Bolt range, this new Stalker version, with its composite stock, will withstand the most severe conditions. It will also meet every expectation of both hunters and target shooters.

DURA-TOUCH
Armor Coating

Eurobolt

Without doubt the most versatile rifle on the market. Indeed, the Eurobolt is unique in that it is provided with interchangeable sights. The gun can thus be easily modified from a still hunting rifle (with a rear leaf sight) into a battue rifle (with a quarter rib). The trigger has a "stetcher" (set trigger) mechanism, allowing the gun to be fired with a very light trigger pull (hair trigger) for very accurate shots. The Bavarian "hog's back" stock is always perfect, both for sighting with open sites and with a scope.

Supplied with 2 sights: affect rearsight + battue rib: to be mounted according to choice (Scope not supplied).)

Eurobolt:

Interchangeable Battue-type rib and rearsight.

Browning, the world's leading gun producer wanted to pass on the benefit of its experience of hunting and target shooting by developing the "Optalens" scope range. This range has been designed, down to its minutest details, to meet your highest standards.

All Optalens scopes are guaranteed 30 years*.

* Except Optapoint and Optasight.

Optasight

The Optasight is one of the very latest generation of sights based on the principle of a projected reticule. This revolutionary sight does not have its equal on the market: it incorporates a sensor that measures the ambient light level and adjusts the brightness of the reticule accordingly. The constant need to manually adjust the brightness when passing from bright sunshine to shade is now a thing of the past. The Optasight provides a choice between four reticules, simply by operating a selector knob. It is equipped with a large window (22 x 28 mm), providing the perfect compromise between a wide field of vision, lightness and compactness.

(Powered by a CR 2032 lithium battery) – Guaranteed 3 years.

1

Multi-coat

Anti-reflection and anti-scratch treatment.

4

Quick, easy assembly.

2

Location of CR2032 battery

5

Self regulating brightness sensor

7

Reticule selector
(choice of 4)

3

Vertical and sideways reticule adjustment

6

WINDOW	22 x 28
MAGNIFICATION	1
RETICULE	
AUTONOMY (hours)	60-80

Red Point

The symbol of speed

**Optalens Optapoint**

This illuminated dot scope provides 1x magnification, which is ideal for quick firing. The brightness can be adjusted and the definition of the dot is always perfect (no edge iridescence). The 33 mm diameter tube gives a vast field of vision. This model comes with an adjustable polarising filter, a lithium/manganese battery and a mount that is compatible with 16.5 mm wide rails. The Optapoint is guaranteed for 1 year.

OPTALENS

1-4 x 24

Ideal qualities for battue hunting

reticule 4**Optalens Model 1-4 x 24**

Battue hunting requires the use of a scope having very specific optical qualities. The 1-4 x 24 scope (total length 263 mm), with its qualities of lightness and maneuverability, is the perfect answer. It combines a wide field of vision with a reticle No. 4 for rapid firing.

The care taken in its manufacture and the multi-coat treatment of the lens ensures perfect brightness in even the most unfavourable conditions. Its one-piece alloy body also makes it particularly robust.

OPTALENS

1-4 x 26 MRE

Perfect definition under all circumstances

reticules**Optalens Model 1-4 x 26 MRE**

For firing quickly on the hop from a path, in scrub land or in foggy conditions, an illuminated reticle is just the solution for a battue hunter.

The 1-4 x 26 scope offers a choice of 6 easily selectable reticules, simply by operating the selector. The adjustable brightness guarantees perfect definition under all circumstances. Particularly light, compact and genuinely strong, this scope is the ideal companion for all your hunting trips.

MODEL	OPTAPOINT	1-4 x 24	1-4 x 26 MRE

FIELD OF VISION (in m at 100m)	-	28,5-8	25,4-8
LENGTH	119	253	250

OPTALENS

1,5-6 x 42

The universal

**Optalens Model 1,5-6 x 42**

A virtually universal scope, the 1,5-6 x 42 combines a short length (only 298 mm), a large magnification range (1.5 to 6 times) and a reticle 4. It thus constitutes a high performance, extremely versatile scope. Like all Optalens scopes, its inside is filled with nitrogen to prevent fogging due to changing temperatures.

**reticle 4**

MODEL	1,5-6 x 42	1,5-6 x 42 IS	3-9 x 40
MAGNIFICATION	1,5-6	1,5-6	3-9

FIELD OF VISION (in m at 100m)	21,1-5,2	21,1-5,2	11,3-3,3
LENGTH	295	294	327

OPTALENS

1,5-6 x 42 IS

For use in any weather, under all circumstances

**Optalens Model 1,5-6 x 42 IS**

The disconnectable illuminated reticle of the 1,5-6 x 42 IS is ideal for sighting the target when shooting in poor light (twilight) or where the shot requires to be fired extremely quickly. The red dot at the center of the very fine reticle No. 4, with its well defined edge, is combined with a brightness adjustment system to avoid excessive pupil dilation.

**reticle 4IS**

OPTALENS

3-9 x 40

For hunting in the mountains

**Optalens Model 3-9 x 40**

The combination of a large magnification range (from 3 to 9 times) and a lens diameter of 40 mm make this an ideal scope for use in the mountains, and more generally in all cases where the key advantage is a compromise between weight and magnification. The reticle No. 14 is really perfect for long range shots. The little dot situated beneath the intersection of the cross hairs allows the point of impact to be determined, and thus compensates for the trajectory of the projectile. The very high quality multi-coat treatment and the aperture diameter (which goes up to 13.3 mm) make this a very effective scope for selective shooting. It also ensures perfect colour rendition.

**reticle 14**

OPTALENS

3-12 x 56

One of the best Stalking scopes

reticule 14

**Optalens Model 3-12 x 56**

Designed for still hunting, from a stand, the 3-12 x 56 scope provides maximum visual comfort. The very high quality multi-coat lens treatment makes this one of the very best scopes in the world where colour transmission and restitution of form are concerned. With twilight factors from 12.9 to 25.9, your scope remains perfectly useable, even under conditions of very poor or low light. The reticule No. 14 (with an additional dot beneath the intersection) is ideal. The scope is assembled with meticulous care in a clean room and is filled with nitrogen to avoid all risk of fogging or sensitivity to variations in temperature.

OPTALENS

3-12 x 56 IS

A must in poor light conditions

reticule 30/30

**Optalens Model 3-12 x 56 IS**

Perfectly adapted to still hunting, this illuminated reticule version of the 3-12 x 56 is at its best at twilight or in very bad light. The very fine red dot, with its very well defined edge, ensures unequalled efficiency. Its meticulous construction, its one-piece alloy housing (of total length not exceeding 377 mm) and silent fine adjustment screws make this an extremely strong scope that is guaranteed for 30 years, like the whole of the OPTALENS range.

MODEL	3-12 x 56	3-12 x 56 IS

GTS Cal. 12M "Elite"

**GTS Cal. 12 Grade I**

This is the ideal model for sporting clays and for hunting. Its back-bored barrel, its 10 mm rib and its ability to shoot any type of cartridge (including steel shot) make it an incredibly efficient gun, without loss of comfort, for hunting waterfowl and migrating birds.

The GTS also come in a 12 Magnum version. It has removable butt swivel rings, its stock is made from a very attractive selected European walnut with an oil-rubbed finish.

GTS Cal. 12 Grade I

INVECTOR+
Long choke

GTS Cal. 12M "Elite"

With its superb engraving, this version of the GTS gains in distinction and elegance. The engraving is based on the distinctive GTS design (of a duck gradually being transformed by "morphing" into a clay), further enhanced with 24 carat gold and additional decorative engraving, and superb oil-rubbed European walnut.

OVER-AND-UNDER SHOTGUNS

Strong and elegant, this aluminum carry case is ideal for transporting your gun in all situations, even by plane. Its four latches ensure faultless reliability.

THAT SOMETHING THAT MAKES THE DIFFERENCE

ULTRA XS • XSH • XTR MIDAS

Removable Midas chokes, easily identified by means of the colour codes applied by anodizing. Removal and installation without need of a wrench. Unequalled ballistic performance.

MIDAS
Long choke

3

1 Large sized bolt

Very large flat bolt. It bears on the under locking lug of the barrels with a bearing surface of 36 mm². Able to withstand forces several times those of the Liege test bench. Unequalled durability.

2 Positive, powerful ejection

Positive and powerful ejection ensured by a hammer mechanism. This mechanism provides unequalled durability compared to spring-operated ejectors which weaken over time.

3 Back-Bored barrel

Back bored barrel (exclusive Browning patented design). Gives all demanding shooters:

- reduced recoil;
- increased shot velocity;
- improved shot pattern;
- increased penetration. (see page 33)

4 European walnut

Superb European walnut with an oil-rubbed finish.

5 Highly durable hinge pin

One-piece hinge bolt. Forces are distributed over a bearing surface 3 times greater than that of guns with trunnions. Maximum resistance to wear.

6 Sport engraving

Very attractive sport theme engraving on grey action frame. Very striking gold edging.

7 Single selective trigger

Single adjustable selective trigger. Supplied with 3 different triggers. Quick and accurate, as its position can be adjusted to suit the size of your hand.

8 Perfectly ergonomic

Asymmetric grip for perfect handling.

1

Large sized bolt

Discover: the new revolutionary adjustable stock of the Ultra X.

New adjustable cheek piece

Undo the single adjustable screw through the butt plate, move the cheek piece to the desired position and retighten the screw. You are now ready to fire.

Ultra XTR Midas Cal. 12

Ultra XT

Ultra XTR

Ultra XSH

CONCENTRATED TECHNOLOGY ...

Ultra XTR Midas 12 gauge

This well known Trap model is now also available with keyless removable Midas chokes, giving it greater versatility for the different trap disciplines (Olympic trap, Universal trap, double trap, etc.) and unequalled ballistic efficiency.

Midas(*) Chokes:

Easily replaced without need for a wrench. They provide maximum ballistic performance.

(*) Developed in conjunction with Briley.

Ultra XT

The Ultra XT (T for Trap) version is a gun of undoubted efficiency. The adjustment range of its cheek piece allows it to be adapted to all angles of clay. The semi-beavertail fore-end, the symmetrical grip and its extraordinary balance give it impeccable handling. Comes in an aluminum carry case.

Ultra XTR

This model is provided with a rubber cheek piece that is non-slip silky smooth to the touch. This gun allows millimeter accuracy of aim with a level of comfort never before achieved. It is intended above all for very intensive use. Comes in an aluminum carry case.

Ultra XSH

Intended for trap shooters seeking maximum versatility between disciplines (trap – double trap and helice (ZZ bird), this Ultra XSH is equipped with removable Midas chokes and has 74 or 76 cm barrels. Comes in an aluminum carry case.

Ultra XS Sporter Midas Dura-Touch 12 gauge

The Ultra XS Sporter Midas already had all the characteristics required by sporting clay shooters. Browning has added a Dura Touch finish to the stock and forearm in order to further improve its handling and to protect the wooden elements against damp in poor weather conditions.

Ultra XS Sporter Ported

With its ported barrels, this gun is the very best there is in terms of efficiency, technology and comfort. By significantly reducing recoil and muzzle flip during shooting, the gun allows a second shot to be fired more quickly and more accurately. Comes in an aluminum carry case.

Ultra XS Sporter cal 20

Following the success of the Ultra XS 12, there has been the introduction of a 20 gauge version of this popular gun. Equipped with Invictor Plus chokes, a 10 mm sighting rib and a magnificent oil-rubbed wood finish, the Ultra XS 20 is the ideal gun for sports shooters.

CONCENTRATED TECHNOLOGY ...

MIDAS
Long choke

Midas(*) Chokes:

Easily replaced without need for a wrench.
They provide maximum ballistic performance.

(*) Developed in conjunction with Briley.

Ultra XS Sporter

Sporting clays is an increasingly technical discipline with a very wide range of trajectories. A field course, a wood course, with a majority of incoming and going away clays... It is therefore necessary to be able to alter the configuration of the stock in a matter of seconds. The XS Sporter version is equipped with Midas chokes and the Sporting version has fixed chokes. Comes in an aluminum carry case.

Ultra Trap

This model aims above all to provide efficiency. Its finely polished 76 or 81 cm long barrels (30" or 32"), its streamlined, floating rib provide a particularly pleasing and accurate sighting line. The trigger can be adjusted to 3 positions.

(Also available, in left-handed version)

Ultra Skeet

The Skeet version of the Ultra has a rounded fore-end ensuring an excellent grip, regardless of how it is held. The barrels are fitted with Investor Plus chokes, and the stock is designed especially for this discipline.

Ultra Sporting/Sporter

In its Sporting (fixed chokes) or Sporter (with Invictor Plus chokes) versions, this gun is intended for sporting clay or Compact Sporting. The Sporter comes with 4 Invictor Plus chokes. The fore-end is tulip shaped. (Also available, in left-handed version)

B425 Sporting Grade I

**B425 Trap**

With its 10 mm rib, its 76 or 81 cm barrels and its ideal balance, this gun provides excellent performance. Stock and half beavertail fore-end of European walnut. (Also available, in left-handed version) • (Dura-Touch version available)

B425 Trap

DURA-TOUCH
Armor Coating**B425 Sporter Prestige 20 gauge**

The sporting clays version has a tulip shaped fore-end. The trigger can be adjusted to 3 positions. This Prestige version, with its engraving and walnut wood selected according to very strict criteria, is truly superb to see. It comes in an Opaline carry case.

B425 Sporter Prestige 20 gauge

**B425 Sporter 20 gauge**

A gun that combines the pleasure of sporting clays with that of a 20 gauge shotgun..

B425 Sporter 20 gauge

B425 Sporting Grade I

Typically, the Sporting Grade I version of the B425 gets straight to the point : to provide the services of a powerful, reliable and enjoyable sports gun. The Sporting is equipped with a 10 mm sighting rib and an adjustable trigger. The action frame is finely engraved with decorative motifs and has a surface finish that allows it to be used in the most severe weather conditions without affecting its durability. Its European walnut stock and fore-end have an oil-rubbed finish.

GOLD SPORTING CLAYS

SEMI-AUTOMATIC SHOTGUNS

Gold Sporting Clays

This latest generation gun has benefited from modifications that significantly improve its performance : a stock with a more pronounced cheek piece having a wider top edge for increased comfort under intensive use. The gun comes in a new aluminum carry case with 4 latches.

“Back Bored technology”
invented by Browning.
... never equaled (p. 33)

Gold Sporting Clays Dura-Touch

Based on the Gold Sporting Clays, this Dura-Touch model will delight you with its original look. The synthetic stock and forearm are covered with a brand new finish that alternates between shades of green and blue, depending on the angle from which it is viewed. The exclusive Dura-Touch treatment also ensures excellent handling and is very comfortable and efficient in bad weather.

A brand new line for the stock: the more marked cheek piece and asymmetric pistol grip guarantee a gun of unmatched ergonomic quality.

Invector Plus

Strong and elegant, this aluminum carry case is ideal for all transporting your gun in all situations, even by plane. Its four latches ensure faultless reliability.

Buck Mark Rifle

This is without doubt one of our very favourite Browning products. With its exceptional, highly accurate and reliable design, this gun provides a vast range of possibilities of use.

Buck Mark Classic Target Rifle

This is the latest addition to the Buck Mark Rifle range. It has been designed to give the shooter the maximum possible accuracy through the use of a heavy large diameter Match type barrel. The laminated wooden stock and forearm give it a special and highly distinctive look.

BL .22

This gun, with its undeniable "Wild West" charm features a very short travel lever (33°), external hammer and magazine tube. It also allows the possibility of mixing all types of cartridge (long, long-rifle, short) without risk of jamming.

Semi-auto .22

This much copied, never equalled rifle has been continually produced since 1924 and has something for everyone: operation in "blow-back" mode (unlocked breech operated by gas)

- automatic ejection, cocking and loading
- loading through the stock (the magazine tube is pulled to the rear and the cartridges are dropped one at a time into an opening in the stock)
- bottom ejection
- barrel take-down with wear adjustment

 **Pro 9**
The Pro 9 handgun is the result of lengthy research aimed at developing a gun that precisely meets the needs of the market. This classic double action handgun (double action for first shot, single action for the others), which was jointly developed by FN Herstal and Browning, is not only a highly reliable gun but also a unique solution in terms of ergonomics, safety and modularity.
The expertise of FN Herstal and Browning in handgun design and the care taken in developing the Pro 9 have already made it a "Standard" of reliability, like its predecessor the celebrated HP.
This gun incorporates highly sophisticated technological solutions:
The steel slide sits on a steel mechanical cradle, which is itself housed in a receiver made of synthetic material, thus combining strength, weight and balance.
The firing mechanism is housed in an easily replaceable "firing box", for ease of servicing, both for yourself and your gunsmith.
A medium-sized handgun, the handle can be adapted to suit the hand of each user
Safety has not been ignored. The Pro 9 handgun is equipped with the most modern systems:
• Firing pin safety to avoid the gun accidentally firing without first pulling the trigger.
• A safety lever to make the gun safe and to deactivate the hammer with or without a cartridge in the chamber.
Finally, it is fitted with a rail which is able to receive an extensive range of accessories, such as flash lights, laser designators, etc.

**GP MK III S**

The HP MK III S combines all the qualities of the original HP with an ambidextrous safety and a weight (910 g) that makes it a safer and more accurate gun to handle. It is also fitted with Pachmayr grips for improved handling. A handsome gun with its blued and chrome finishes.

**GP Vigilante adjustable**

The latest standard version of the HP handgun incorporating new low profile sights.

**GP Practical adjustable**

The GP Practical has been developed to meet the stringent demands of "Practical Shooting". It includes numerous improvements, such as :

- Adjustable, low profile sights
- Particularly crisp trigger pull
- Ultra precise handling through the use of Pachmayr chequered rubber grips
- Hammer redesigned to avoid getting caught when drawing
- Increased weight and improved stability
- Ambidextrous (left/right) with retained magazine safety
- Larger magazine entry in the frame
- Ejectable magazine equipped with Pachmayr rubber buffer
- Particularly corrosion resistant finishes

**Browning BDA**

The new BDA is an extremely reliable gun which is very robust and provides maximum safety. It incorporates the results of decades of experience gained with the famous HP pistol and includes numerous innovations, both in terms of the materials used and the design of certain parts.

The BDA offers the following features :

- Greater strength of parts
- Lower weight and increased compactness
- Improved extraction, ejection and feeding
- Automatic firing pin safety
- Fixed sights
- Reversible magazine stop
- New magazine
- Better grip.

**GP Silver Chrome**

The GP also exists in a Silver Chrome version, equipped with an adjustable backsight that can be adjusted for both windage and elevation and a sport foresight with a rounded base. It is also fitted with Pachmayr grips to provide improved handling. A handsome gun with its blued and chrome finishes.

BUCK MARK

.22 HAND GUNS

Buck Mark Standard

A cut above the rest, this is Browning's version of a basic pistol. It can easily compete with the best .22 calibre target shooting guns. Hundreds of HMSA winners are there to prove it. Its features include a thumb-operated magazine release, a 10-shot magazine, a bull barrel and "Pro-Target" sight.

Buck Mark Bullseye

According to the old adage, it's the shooter that counts, not the gun. But the shooter also knows that he wouldn't have been able to win without his gun. It is for this reason that many sports shooters have chosen the Browning Buck Mark Bullseye. Its accuracy and reliability make it the perfect choice for Compton shooting. It is very well balanced, and is available with a rosewood or a rubber grip.

Buck Mark Standard Nickel

Black rubber and bronzed steel combine to make this a particularly tough-looking pistol. The nickel plating on the slide and barrel provide increased protection. The grips provide sure handling. An extremely reliable and accurate pistol.

Buck Mark Target 5.5 blued finish

Identical to the Buck Mark Target 5.5 Gold, but with the original Target blued finish.

Buck Mark Plus

The Buck Mark Plus has exactly the same features as the standard model, with the addition of laminated wooden pistol grips make for a naturally warm feeling of warmth and great looks.

Micro Buck Mark Plus Nickel

Nickel-plated finish on the 102mm barrel and the slide. The nickel-plating is highly abrasion and weather resistant, making it ideal for use in the field. The laminated wood pistol grips, which are shaped to suit the hand, combine the pleasant, comfortable feel of natural wood with a toughness equal to that of composite materials.

Browning recommends the use of ammunition by Browning and Winchester

Vectis

Comfortable to use, even under intensive conditions.
All 4 rifles are provided with a rubber butt plate.
Great looks and handling thanks to the chequered stocks.

Adjustable vernier rearsite

Allowing adjustment of windage and elevation:
Browning's hallmark attention to detail

Vectis 026

Cold-hammered barrel

With 11 right-hand bore grooves the height of precision.

Vectis 032

Double-action lever

(50% spring compression forward, 50% back), that greatly simplifies cocking and requires less effort. 14 click non-return system.

Vectis 220

Accurate, durable locking

of our break-open barrels thanks to a ball type design. Perfectly airtight. (Vectis 026, Vectis 026, Vectis 032)

Double interleaved spring compression system.

This unique design consists in having not one, but two springs in compression. With a coil pitch two times greater than that of the standard springs used by our competitors, our two springs are subject to less stress, slackening by less than 25%. They thus provide durable power that does not tail off with use.

Hi-Viz Comp Sights

The Browning HI-VIZ® Comp-Sight has a metal base that threads directly into the bead-hole of your shotgun for a more permanent sight picture

- Interchangeable light pipes allow the shooter to match light pipe diameter and color to the shooting conditions
- The new HI-VIZ® Comp-Sight permits proper "barrel-management", enabling the shooter to know exactly where the barrel is in relation to the target.

ACCESSORIES

Electronic Ear Protection

- The electronic model features a low frequency "lift", which enables the shooter to hear more bass detail whilst at the same time the treble response is gently rolled off, eliminating distracting and unwanted high-pitch sounds
- When shooting, sound below the 75 dB safe level is heard normally
- As the gun is fired, this threshold is exceeded and the sound output is cut to zero but quickly returns back to normal.

With charger 220-230 V:
Black EM15

Toe Rest

- You can use this accessory to let the barrels of your gun lie on the top of your shoes.

Browning Special Care Products

Our gas-free pump-action system and the adherence of our low volatility oils, make the LEGIA SPRAY 25% more efficient than traditional gun oils.

1. LEGIA SPRAY (Red) : cleaning oil for barrels and receivers : excellent for maintenance and protection.
2. STOCK PROTECTION (Green) : the ideal product for protecting and maintaining precious woods. Nourishes and increases the impermeability of all "oil rubbed" finishes.
3. LONGLIFE (Grey) : Low volatility oil. The oil film remains on the gun longer, making it the ideal product for use in extreme conditions (salty, damp, etc.)
4. COMBINATION PLUS : New generation (synthetic base) ceramic-enriched oil (very high lubrication). Extreme temperature resistance (-30°C to +150°C). Very good early rust dissolving properties (contains anti-corrosion and oxidation additives). Principally for use on internal and friction parts.

1. Legia standard 200ml 579302 • 750ml 625117
2. Stockcare 200ml 579303
3. Longlife 200ml 579304
4. Combination Plus 200ml 579290

BROWNING
OUTDOOR EQUIPMENT

LITES - KNIVES

Thunder Bug™

- The Thunder Bug incorporates all the features of the original Lightning Bug with the addition of a large 2,5 cm diameter modified spot reflector module.
- A handy clip lets you attach it to your belt, shirt pocket, fishing vest or even the peak of your hat.
- A flexible lens head allows you to set the light beam at any vertical angle for an unbeatable hands-free portable light source.
- Both lights are constructed of rugged Xenox resin to resist breakage, even when extremely cold.
- Operated by two "AA" batteries. Available in non-glare Black.

DURA-TOUCH
Armor Coating

Featherweight

These knives weigh as little as some sheaths, yet they are designed for hard work. Their AUS-8A (440C-type) stainless steel blades take an edge better and hold it longer than others. Impact-resistant Zytel® frames with laminated wood inserts combine light weight, durability and attractiveness.

Signature

- Signature knives exhibit Browning's signature colours in a top quality knife. All the Signature knives have a AUS-8A (440C-type) stainless steel blade that resists rust, holds a sharp edge and resharps easily. Every model has an upfront lock, release for one-handed closing.
- A lightweight Zytel® frame gives them strength and durability
- A textured surface provides a positive grip
- The 726 and 708 feature one-hand operation that is reversible for either right-or left-hand use
- They also have half-serrated blades for tough cutting jobs.

Kodiak F.D.T.™

- Kodiak F.D.T.s (Field Dressing Tool) are multi-bladed knives that are ideal for dressing big game in the field
- Each blade is made from AUS-8A (440C-type) stainless steel. All blades lock in place for stability and security
- Impact-resistant Zytel® handles feature checkered rubber inlays
- Unlike most pocket saws, the Kodiak's blade is designed to cut on the push stroke as well as the pull
- The unique push/pull hide-cutter blade can be used as a standard blade when pushed under the hide or pulled as a hide-splitter.

645

Swivel-Lok Hunter

This is a versatile field dressing knife that can be used as a traditional hunting knife or as a T-handle guthook to give you a better grip when cutting through heavy hides. You also have the option of skinning from either position. The 10 cm skinning blade with guthook is made from AUS-BA (440C-type) steel and locks in both positions. The Zytel® handle with rubber inlays is durable, lightweight and provides a sure grip. Sheath included.

CASES

Dura-Wax Series case

Very resistant to abrasion and scuffing, Browning Dura-Wax will also protect your gun against bad weather and knocks. Gun positioning blocks hold your gun securely in place.

For 76 cm shotguns barrel length 1215DW (green)

For 81 cm shotguns barrel length 1515DW (green)

European Collector's Series Cases

The 1,000 denier Cordura fabric exterior is highly resistant to abrasion and scuffing. A special compartment is provided for Invector choke tubes. The case is provided with corner reinforcement and combination locks.

For 76 cm shotguns only 595863

595863

Carry case (leather/canvas range)

- Thick leather handle, leather corner reinforcement
- Interior lined in soft fabric marked with the Browning logo.
- Removable spacers according to the length of the barrels (66cm to 81cm)
- 2 combination locks plus 2 leather closing straps

142410

Carry case (leather range)

- Very high quality hand-made 100% leather carry case for exceptional guns.
- Thick leather handle, leather corner reinforcement
- 2 combination locks plus 2 leather closing straps
- Wooden base
- Removable spacers according to the length of the barrels (66cm to 81cm)).

142311

Travelling case

When travelling, a gun case must be able to stand up to large variations in temperature and humidity. That is why our Travel Vaults provide a perfect seal, so much so that a purge valve is provided to allow you to equalise internal pressure before opening.

1. A special inset O-ring completely seals out water, humidity, dirt and sand to totally protect your guns and equipment.
2. Because Travel Vaults seal 100% airtight when closed, it is necessary to have a purge valve in order to equalize internal pressure after you change altitude. Lesser cases don't need a purge valve because they don't seal 100% tight.
3. Travel Vaults seal so tightly they'll float, even when fully loaded with gear. This makes them ideal for transporting gear when rafting, canoeing, etc. Small models are great for keeping personal valuables safe and dry.

LEGIA PHOENIX

Legia Phoenix game cartridges

Browning is proud to present its Phoenix range of high quality hunting cartridges. Retaining the essential features that were so appreciated in the old Legia range, this new cartridge will give entire satisfaction for hunting all types of game. The Phoenix range of cartridges are available in the following weights: 34g, 36g Ni, 42g Ni and 53g Ni. All of the cartridges are provided with a 20mm nickel-plated head to avoid any risk of corrosion and thus ensure that your cartridges remain in perfect working order even after several seasons at the bottom of your cartridge bag. Because we are concerned for the environment, all of the cartridges in the Phoenix range are provided with a photodegradable wad which decomposes much faster than traditional Polyethylene ones.

Legia Phoenix Super 36g Ni

The ideal cartridge for "difficult" birds such as pigeon, duck and high flying pheasant, as well as for hare. Its 36g nickel-plated shot load ensures an exceptional shot pattern and high penetration.

Legia Phoenix Magnum 53g Ni

12/76 mm Magnum cartridge for firing from long-range or for hunting migratory birds such as ducks and geese. Only to be used in Magnum shotguns.

Legia Phoenix Classic 34g

This 12/70mm cartridge loaded with 34 g of hardened lead offers an excellent compromise for hunting all types of game throughout the hunting season. Available in shot sizes 4-5-6-7-8

Legia Phoenix Semi-magnum 42g Ni

This 12/70 mm cartridge is capable of firing a 42g load of nickel-plated shot. It will satisfy the needs of all wild waterfowl hunters who shoot ducks from a longer range. Only to be used in shotguns that have been double tested to 1300 bars.
