BROWNING A PASSION

BROWNING A PASSION

I have been obsessed with shooting since I was a small boy, my first experiences of the sport being pigeon shooting with my Father on the family farm. His shotgun of choice was a “humpback” Browning Auto 5 and that gun had a profound effect on me – if it was good enough for Dad then I wanted one too.

While I was at university, shooting took a back seat to study, but when I graduated my Father bought me a new Auto 5 as a gift, a gun I treasure to this day. Other shotguns have passed through my hands, but none have held a place in my affections like that old auto.

After I became Editor of the Shooting Times and Country Magazine, a post I held until 1998, I became involved with the famous Rolex Grand Prix trap shoot held at the North Wales Shooting School. Although many makes of guns were represented at this prestigious event, many of the top scorers were using Browning's. Never a full-time trap shooter, I would always borrow guns for the event, and a Browning GTI trap gun with 32” barrels helped me turn in many respectable scores during my association with that gruelling competition.

My first loves have, however, remained gameshooting and wild-fowling, and one of the best duck guns I ever had was a 10 gauge Browning BPS. The big pump gun was purchased after a trip to the legendary wildfowling areas around Stuttgart, Arkansas in the USA. My guide on the trip, Todd Brittain, was inseparable from his 10 gauge BPS with a short, 24” barrel, a gun he used it to great effect on the thousands of mallards and snow geese we saw on that trip. That gun was Todd's constant companion and had been carried so often it was shiny silver where the finish had worn away.

When I got back to England I had to have one of those guns, and bought a synthetic stocked version. The gun may not have been as pretty as my Auto5, but it was a great companion on the marsh or in the hide. I had many memorable mornings shooting geese with that wonderful big gun.

Another trip abroad involved 10 days in Zimbabwe in 1999. We were based with Roger Whittall not far from the Save Valley, and spent our time stalking plains game with a Browning .30-06 Acera. The rifle performed flawlessly under very tough conditions in the bush, giving me total confidence in my gun throughout that adventure.

Looking through the latest Browning catalogue at the fantastic selection, my mouth waters at the models available for game and target shooters alike. The 3.5 inch chambered 12 gauge waterfowl special over and under would be great on my beloved geese, as would the 10 gauge Gold semi-auto.

However, I look longingly also at the superb B25s and BSL guns and hope that one day I'll be able to call one of those magnificent firearms my own.

Let's not forget Browning clothing and accessories too, many examples of which I've owned over the years, and always with great satisfaction. The company's clothing line and accessories have unfailingly given me the best performance in the field.

Browning firearms have been companions throughout my shooting life, from my days as a young boy shooting with my Father at home on the farm, to more recent adventures in exotic parts of the world. It is a brand of which I am very fond, and one I hope to maintain an association with for many years to come.

J-M. BROWNING THE STORY OF

SPRIT OF JOHN MOSES BROWNING

John Moses Browning: a life of invention

John Moses Browning was born on 23 January 1855 in Ogden, Utah. He was one of the 22 children of Jonathan Browning, who, being a good Mormon, had three wives.

Gun making ran in the family of the young John Moses, as his father was a gunsmith who had already been responsible for a number of innovations in the field. As a young boy, he spent his time in his father's workshop, and knew the name of every part of a gun before he could read. From the age of 6, he made fishing accessories from scraps of metal which he hammered into shape on an improvised, child-sized work bench made from a wooden crate. Even his father, a man well known for his patience, found it difficult to conceal his impatience at the incessant stream of questions from the young John Moses which disturbed him in his work...

The 19th Century American boyhood of John Moses Browning abounds with anecdotes, all of which share a point in common : they all point, with a few years advance, towards him becoming an internationally renowned inventor of genius. Numerous authors compare Browning with Thomas Edison, another self-taught genius of that time.

At the age of 23, John Moses lodged his first patent, for the «J.M. Browning Single Shot Rifle». The drafting of the text of the patent in the required form caused him more difficulty than the invention itself. This invention consisted of a simplification of the percussion mechanism, making it more durable and reliable.

It was at about this time that Browning married Rachel Teresa Child, who would remain his life-long companion.

Shortly before his death, his father handed over his business to the young Browning who, in association with his brother Matt, despite having less

than one thousand dollars in the bank and no experience of machine-tool operation, transformed the humble store into a small gun making workshop employing seven people. But from the start, the remoteness of their location, thus a lack of a ready supply of customers, and the lack of capital meant that the business struggled to survive until, that is, luck intervened to make the inventor known... A representative of the Winchester company having chanced upon a gun made by the Browning brothers in another state and, considering its design to be of interest, bought it from its owner and sent it to his superiors in the company's head office. So impressed were they that the managing director of Winchester himself set out straight away on a six day journey to what, at that time, was still the wild West, to meet the Browning brothers. Despite his astonishment at finding two young men in their twenties in a rustic workshop, he was perceptive enough to not be fooled by appearances and conclude commercial deals with them which would last for several decades.

Over the years, Browning granted licenses to several manufacturers for dozens of inventions and firearms developed by him. It is no exaggeration to say that he invented everything in the field of firearms. What is more, it should be noted that the vast majority of his technological innovations have not been able to be bettered or replaced since the beginning of this century, a clear demonstration of the level of perfection achieved.

In 1897, it was another manager with flair, this time from the Fabrique Nationale (National Weapons Factory) at Herstal in Belgium, who noticed a 7.65 Browning pistol incorporating a novel locking mechanism. The FN obtained the manufacturing licence, and thus began an uninterrupted period of collaboration between the inventor from the Great Salt Lake and the factory on the banks of the river Meuse.

Browning reached the peak of his art with the Auto-5 semi-automatic shotgun, which was a considerable commercial success and prompted his first visit to the Herstal works.

But his world-wide acclaim is without doubt due to the 9 mm Hi-Power semi-automatic pistol, of which over 10 million have been made and which, since 1907, has been adopted by the majority of the world's police forces and armies. Browning has indeed become the generic name for this type of gun.

None of Browning's success is due to chance : like all of the American pioneers he turned luck to his advantage only through an enormous amount of hard work. His strength of character and the steadfastness of his principles were out of the ordinary. Thus it was that, towards the end of his life, when offered an honorary title by a university, he refused it for the simple reason that «he had made it a rule never to accept anything that he had not gained as a result of his own work».

He died of a heart attack as he worked in his office at Herstal, during the course of his 61st visit to Belgium in 1926. His final words, as he lay dying in the arms of his son, Val, were : «Son, I wouldn't be surprised if I were dying...» Work stopped and the workers paid homage to the man who had entrusted their company with the task of turning so many of his inventions into reality. His body was repatriated to the United States, where he was buried with full military honours. His son Val continued his collaboration with the Belgian factory without interruption a collaboration that continues until this very day.

John M. Browning

In 1966, Bruce Browning, the grandson of John Moses, created a semi-automatic big hunting rifle in collaboration with the FN. The initial project was called the «66 model rifle».

Borrowing his famous grandfather's name purely for its reputation, the B.A.R. gunner rifle (Browning Automatic Rifle, mod. 1917), the BAR was born. Although it used a similar gas-operated and rotating bolt system, calling it automatic was not justified because it didn't fire in bursts (it was in fact a semi-automatic gun whose trigger had to be released between each shot).

This innovative combination in hunting guns allowed a light, reliable rifle to be designed, without sacrificing rigidity (a guarantee of accuracy) or its lifespan (high pressure of Magnum calibres). In addition, the gas-operated system considerably reduces the sensation of recoil.

Elegant, accurate, powerful and reliable, the Browning BAR was born.

Produced since 1967 in a wide variety of calibres, it has become the reference in the semi-auto gun market and is the world's bestseller. Its success has never been refuted; the proof; over a million units have been produced to date...

Yet for 40 years, the Browning BAR hasn't stopped evolving to remain ahead of its competitors at the front of the pack. Thus, various mechanical or conceptual transitions followed, which have enabled Browning BAR to remain ahead of its time:

1967: The first BAR leaves the FN production workshops and is put on the market.

1976: Assembly is transferred to the Browning subsidiary in Viana in Portugal. The rifle becomes known as the BAR Mk 1.

1994: Important changes take place and the BAR MK 2 is born

- Box and stock strengthening.
- Revision of the gas cylinder to allow the gas operation to be adjusted using a screw.
- Addition of a manual bolt catch.
- Floating mass system at the side's head to improve operation.
- Introduction of the B.O.S.S. (Ballistic Optimizing Shooting System) system, which enables the rifle to adjust quickly to given ammunition.

1998: Introduction of the BAR Light with its light alloy receiver.

2003: Development of the BAR Shorttrac / Longtrack

- Modernisation of the design;
- Shorttrac: the first semi-auto rifle specifically developed for the new WSM (Winchester Short Magnum) calibres;
- Longtrack: the same modern design adapted to conventional calibres.
- Stock inserts to modify the pitch and the advantage;
- New sighting systems and butt plate, stock variants and fore-end made of composite material.

THE UNDISPUTED LEADER OF ITS MARKET, THE EVER-PRESENT BROWNING BAR RIFLE IS AVAILABLE TODAY IN 10 MODELS AND 12 CALIBRES.

BROWNING

THE BEST THERE IS

Browning has been developing hunting guns that are as hardwearing as they are elegant for over 125 years. Our great experience has allowed us to create a perfect union of ancestral armoury traditions and up-to-the minute technologies. Made by hunters for hunters, Browning guns are more than ever a guarantee of quality and reliability. Because we are willing to listen to your requirements, your desires and the evolution of hunting we draw on tradition to constantly create new products that are worthy of the brand's prestigious heritage.

1. Quality / reliability

The legendary quality of Browning guns results from the care that is taken with every manufacturing stage for example:

- Today, a fleet of ultramodern, numerically controlled machines assures mechanisation.

- A 3-dimensional reading machine guarantees infallible production checking and unrivalled respect for tolerances to provide increased manufacturing rigour.

- Thanks to PVD technology, metal surfaces are given micro-coverings in a titanium nitrate, chrome nitrate or tungsten carbide air vacuum. The advantage of this technique is that it increases the hardness and long-life of the parts and their resistance to corrosion

More modern materials, from the aeronautic and automobile industries state-of-the-art sectors, accompany noble, traditional materials. On our guns, walnut and steel are henceforth associated with aluminium, composite materials and carbon fibre for improved performance and reliability that are in keeping with the brand's reputation.

2 Innovation / modernity

Because a gun should be both attractive and useful we turn to the most advanced creation techniques to constantly push back the frontiers of design but without forgetting that efficiency prevails in the field.

Some of the numerous recent inventions are shown below:

- The new compact magnum calibres (Winchester Short Magnum, Winchester Super Short Magnum), which are more powerful but generate less recoil than classic magnums, have been developed in association with Winchester, the other great Browning International group brand. The miniature magnums satisfy hunters who desire lighter, more manageable guns perfectly.

The success of this new ammunition has resulted in it being adopted by the entire armoury industry, which has adapted its guns to our cartridges. Browning has chosen to develop new exclusive, specific, patented gun systems to further satisfy these new calibres' specific constraints and thus to optimise their performance with total operational safety.

- The B.O.S.S. system

This device integrates a muzzle brake to reduce a rifle's recoil whilst improving its accuracy by harmonising the barrel's vibrations with specific ammunition. (p. 49)

- BACK BORE technology

This exclusive back-boring process, which many have attempted to imitate, improves the smooth barrels' ballistic performance. (p. 34)

- CYNERGY

This smooth, competition rifle has revolutionised the target-shooting world, it is the Formula 1 of rifles. (p. 68)

SHORT & LONG TRACK

The semi-automatic B.A.R. rifle, which celebrates 40 years of experience, has been joined by a completely new rifle, developed and designed specially for the new WSM (SHORT TRAC) calibres. Fans of conventional calibres can use this new arrival with the LONG TRAC model. (p.48)

- FUSION EVOLVE

When you are the inventor of the semi-automatic rifle, you have a duty to employ state-of-the-art technology, the FUSION EVOLVE, with a gas-operated mechanism, is perfectly robust and reliable. It incorporates BACK BORE technology. (p. 36)

3 Performance / efficiency

Since the beginning of the last century, the Browning brand has become legendary as the source of the greatest innovations in the armoury industry.

These innovations saw the light of day thanks to research and development teams based in Europe and the United States (Browning and FN) and using the most modern technologies such as Computer Aided Design (C.A.D.), high frequency cameras at 25.000 images/second... ;

all of this associated with a intransigent final quality check which guarantees maximum reliability as far as performance is concerned.

Furthermore each product development is the subject of a series of «studies per finished element» that aims to check that the gun has been correctly dimensioned as well as the gun's operation and mobile parts.

DIANA VAN DER VALK

B25

B2G Sporter

The B 25 B2G has become a great classic and is one of the most appreciated models. In its sporting class version, it is generally fitted with long 76 or 81 cm barrels, with a 12 mm ventilated rib and an intermediary foresight.

All this so that the 25/25s become a habit.

B25

Trap Evolution 2

A genuine shooting machine, the B25 Trap has 76 cm long barrels and a 16 mm vented rib and is equipped with an adjustable trigger, disengageable ejectors, a luminescent front sight and a «Decelerator» anti recoil butt plate.

B25

Sporting 207 GOLD 25

Mainly designed for sporting clays, the GOLD 25 could also be perfect for hunting, thanks in particular to its 8 mm vented rib and its 76 mm chamber that can fire magnum cartridges. With an anti-recoil butt plate providing great shooting comfort, it is

also characterised by its special "Gold 25" engraving

Express CCS 25

Fitted with side plates, this rifle exists in a "Custom" version having 65 cm barrels with a battue-type rib and a folding «ear shaped» leaf rear sight. It has a 3 piece fore-end and a pistol grip stock with teardrops and with a hidden butt plate, in walnut specially selected for the direction of its grain. The CCS 25 exists in numerous calibres, such as .270W, .30-06, .30R Blaser, 7X65R, 8X57JRS, 9.2X62 and 9.3X74R. It is also available in a box-lock version with a wide selection of engravings.

side-plate "Custom"

Express Herstal Cal. 8 x 57 JRS ou 9,3 x 74R

This version offers the quality of the CCS 25 adapted for large game. It includes a battue-type rib incorporating the fixing locations for the base of a universal pivot scope mount (allowing a scope to be mounted in a matter of minutes and at lesser cost), a pistol grip stock with an insert type anti-recoil pad and a tulip fore-end made from beautiful French walnut with an oil-rubbed finish. Medallion engraving featuring boar and deer, grey-tempered action frame. Available only in calibres 8X57JRS and 9.3X74R.

BSL The BSL side-by-side By Lebeau Courally

A traditional side lock action shotgun equipped with "Holland & Holland" type locks with double trigger and automatic ejectors. This gun, which is assembled and finished by Lebeau Courally, exists in 12 or 20 gauge versions and can be chambered to 2 3/4" or 3". The barrel lengths are 69 cm (20 gauge) or 71 cm (12 gauge). Two levels of engraved finish are offered : LC1, with a greyed action frame and decorative engraving or LC2, with a grey-tempered action frame, decorated with hunting scenes.

BAR Semi-automatic rifles Grade D

This is the luxury version of the BAR MK1, assembled in the Custom Shop. It is available in all the usual calibres in "Battue" or "Affût" versions.

SA .22 Semi-Automatic rifle Grade 2

The best known and most copied .22 Semi-Automatic. This gun is particularly light and efficient. The barrel is removed in a trice. Produced by the Custom Shop using original parts, it is available in grades II, III and IV.

*THE BEST PERFORMING
AND MOST RELIABLE SHOTGUN*

BROWNING MAKES ALL

The archetype of the OVER-AND-UNDER shotgun, credibility and a fabulous image in the hunting and shooting world. A symbol of **quality, reliability and innovation**, it is the 5th generation of the legendary B25.

B525
HUNTING
OVER-AND-UNDER SHOTGUNS

1. Faultless mechanics

▲ 1.2

▲ 1.3

1.1 Action frame made of indestructible forged steel.

1.2 Wide flat bolt which guarantees locking surfaces which are three times greater than other systems.

1.3 A unique hinge pin, wide diameter, guarantees optimal resistance to wear. A guarantee of long-life.

1.4 Impact wheel ejectors : straighter, more powerful ejection than retaining ejectors.

1.5 Chromed barrels and chambers, don't rust, easy maintenance.

2. Hand-made product

◀ 2.3 ▶

◀ 2.1

2.1 Exceptional high quality of manufacture. Each gun is adjusted by hand like a B25

2.2 The only industrial shotgun with this level of performance.

2.3 Barrel action frame/ action frame made in carbon black.

2.4 Wood/metal adjustment with red ochre.

2.5 Each set of parts is peculiar to a particular gun and follows this gun throughout the manufacturing process.

2.5 ▶

ALL THE DIFFERENCE

3.

Guaranteed 10 years

3.1 The only shotgun whose action frame is guaranteed for 10 years.

4.

Essential features:

▲ 4.3

▲ 4.4

4.1 Excellent balance.

4.2 Selective mono-trigger.

4.3 Adjustable trigger with 3 positions on sporting models which allows you to change the trigger and make a final stock length adjustment.

4.4 All hunting or sporting shotguns (over-and-under or semi-auto guns) by Browning, Winchester and Miroku fitted with original chokes (Invector, Steel Invector Plus, Stainless steel Invector Plus, Teague, Briley, Midas, Diamond, Signature chokes) can fire «high performance» steel shot cartridges.

THE BEST PERFORMING AND MOST RELIABLE SHOTGUN

B525 Classic Cal 12 M

The multi-purpose gun par excellence as it incorporates a 3" chambered barrel that can fire both 70 mm (2"3/4) and 76 mm (3") cartridges, while at the same time being low in weight for the comfort of the shooter.

B525 Classic cal 12M Advance

Intermediary model between the classic and Elite versions, the B525 classic Advance is declared to be the best value for money in the 525 range with in particular its grade 2.5 wood and beautiful hunting scene engraving

B525 Classic Cal 12M Elite Gr 3

Sobriety and elegance best describe this new Elite version of the B 525 that offers a brand new, far more sumptuous hunting scene engraving that is altered by hand. This innovation, a very meticulous choice of wood finish make this an ideal compromise between traditional looks and personality. It has a 3" Magnum barrel, just like the Classic model.

B525 Classic Cal 12 M Prestige Gr 5

The charm of the prestige (Gr 5) is more discrete. The fit of the barrels, the engraving and the very attractive old silver colour of its action frame make this an elegant gun of the best possible taste. It comes in an Opaline case. This model has a stock with teardrops, and a multi-purpose 3" Magnum barrel like that of the Gr 1.

B525 classic cal 12M

Only B525s equipped with an inventor choke are proofed for steel shot.

THE BEST PERFORMING AND MOST RELIABLE SHOTGUN

B525 Classic Cal 20M Elite Gr 3

Whilst retaining all the advantages of a 20 calibre: fineness, lightness and manoeuvrability, this Elite version demonstrates refined elegance thanks to the selection of its wood and its brand new hand-finished engraving.

B525 Classic Cal 20M

This model represents the traditional compromise between efficiency and weight. A steel 20 gauge action frame and barrels chambered for 3" Magnum allow optimum efficiency while keeping the weight deliberately low, which is a considerable advantage during a long day's hunting.

B525 Classic Cal 20M Prestige Gr 5

The top of the range of the B525 Cal 20, this grade 5 Prestige model will seduce you with the quality of its walnut and the depth of its engraving which is retouched by hand.

B525 Classic Cal 20M English Grip

Continuing the features of the Classic, this B525 distinguishes itself thanks to its English grip which gives it immaculate contours.

B525 Classic Light Cal 12

B525 Classic Light Advance

new

B525 Classic Light Cal 12

The gun of the 3rd millennium for the demanding hunter. All of the developments introduced with each new generation of Browning light models are incorporated in the B525 Light which constitutes the ultimate synthesis of efficiency, weight and good looks. An action frame made of a lightweight «Aircraft» grade alloy reinforced with high strength steel inserts, a suitably profiled barrel and a suitable choice of wood and form result in a lightweight gun with perfect handling and balance, as well as an unequalled elegance, further enhanced by game scene engravings.

B525 Classic Light Advance

The B525 Light range fleshes out with this Advance model that offers a more sumptuous and lavish engraving which is finished by hand as well as grade3 oil-finished walnut.

THE BEST PERFORMING AND MOST RELIABLE SHOTGUN

B425 SMALL CALIBRES OVER-AND-UNDER SHOTGUNS

B425 Privilège Hunting Cal 20M

A «fine» firearm in the true sense of the word, the Privilège is one of the key products of Browning's know-how. The walnut used is a 4 star quality wood that is then oil rub finished by hand. The side-plate engraving combines deep engraving, decorative motifs and game scenes. This gun comes in an Opaline case.

B425 Light 20M

This gun represents a perfect combination of lightness, looks and strength. Its action frame is made of 7075 alloy with a stainless steel toner insert. Its new, narrower, tulip fore-end and semi pistol grip stock make this a particularly ergonomic gun.

B425 Light Elite 28

Sober and elegant : an, original engraving, meticulously selected walnut with an oil-rubbed finish make this an ideal compromise between traditional looks and personality. This gun will provide maximum pleasure by allowing you to try a new experience: sporting clays with a 28 !

B425 Privilège Hunting Cal 20M & Cal 12M

B425 Light 20M

B425 Light Elite 28

All over-and-under guns in the Browning and Hunter & Sporter ranges are delivered with 5 chokes.

«BACK-BORED» BARRELS

Browning reveals the professionals' secret: back-bored barrels. First used in 1990, "back-bored" is a technical breakthrough that has allowed our shooters to win numerous medals. Better impact and higher velocities for improved shooting accuracy. A «back-bored» barrel is one whose internal diameter (the bore diameter) has been increased beyond traditional specifications.

BROWNING MAKES ALL THE DIFFERENCE

1. Increased penetration velocity

1.

"Back-bored" ensures that there is less friction between the shot and the wall of the barrel. Instead of having to overcome friction, more of the energy generated by the gunpowder gases serves to propel the cartridge, thus increasing the velocity of the load.

The shot retains its ballistic quality.

The force of contraction or the pressure exerted by the barrel wall on the load is reduced, thus reducing the number of deformed pellets fired

2. Improved shot pattern

2.

The ballistic characteristics are improved and you achieve exceptionally uniform shots with many more effective pellets hitting the target.

- Tested and approved by the Browning Research & Development department.
- "Back-Bored Technology" barrels allow you to get the very best performance out of the cartridge.

3. A 6% reduction in recoil

3.

A reduction in recoil means improved shooting comfort. In a back-bored barrel, the load passes more easily reducing the amount of recoil felt by the shooter, thus improving his shooting comfort.

THE MOST EFFICIENT SHOTGUN IN THE FIELD

BROWNING MAKES ALL

1. Reliability & Versatility

The Fusion's piston has an "Active Valve system" regulating valve inside it. This regulating valve works independently of the piston, which make it more efficient than other gas operated systems and means that it lasts longer.

28g

36g

56g

- With **light loads**, the piston uses most of the energy generated by the **gases** for perfect operation.
- With **heavy loads**, the excess gas is rejected through the piston's side ventilation holes.
- Operates perfectly with all cartridges from **28 g to 56g**.
- The regulating valve has 3 segments which ensure that it is perfectly tight and that the magazine tube **is clean for excellent operation**.
- The piston's extremely short stroke limits the quantity of gas given off by the device.

2. Exceptional barrel

- The Fusion Evolve's Back-Bored barrel and its new, ventilated rib which is silver-welded are synonymous with great rigidity. The advantage of this strength when firing is that the points of impact are perfectly consistent and regular. Your shot pattern isn't scattered.
- The Fusion semi-automatic shotguns' barrels are completely interchangeable, so you can change them easily. Depending on your type of hunting, you could use a 61cm, 66cm, 71 cm or 76cm barrel on the same gun.

3. Speed Loading™

The exclusive Speed Loading (*) and Cut Off combination gives Browning semi-automatic shotguns the following advantages:

- Express loading • Instantaneous cartridge loading in the chamber • Complete safety with the breech open
- Immediate reloading by disabling the Cut Off

Express loading system

- Ultra fast
- Extremely simple to load
- Just one action is required to load your gun: with the breech open, simply insert a cartridge into the magazine tube and it will be chambered automatically.

(*) Speed Loading is available for the entire Browning range except for the 10 calibre and Phoenix models.

ALL THE DIFFERENCE

4.

Cut Off Magazine

◀ CUT OFF engaged

Fig. A - B

Cut Off engaged. The cartridges are blocked in the magazine tube

It is the **Speed Loading-Cut Off** association that makes **Browning semi-automatics**, the **fastest, easiest to use and safest shotguns**.

◀ CUT OFF released

A) Allows you to change the chambered cartridge quickly.

B) Gives great handling safety in the breech open position.

C) If you subsequently release the Cut Off, the first cartridge held in the magazine tube will be chambered automatically thanks to the Speed Loading.

5.

Essential features

- Barrel and frame manufactured by the Fabrique Nationale (National Factory) in Herstal.

- Excellent balance and ergonomy.
- Ambidextrous safety devices, quick, easy adaptation.
- Hammer safety device exclusive to Browning, safer than simply a trigger safety device.

- All hunting or sport shotguns (over-and-under or semi-auto guns) by Browning, Winchester and Miroku fitted with original chokes (Invector, Steel Invector Plus, Stainless steel Invector Plus, Teague, Briley, Midas, Diamond, Signature chokes) can fire «high performance» steel shot cartridges.

- Very high quality assembly and finish.
- In removable version total capacity of 5 cartridges.
- Hi-Viz foresight with a set of 7 additional foresights
- Adjustable stock because of 6 inserts which allow pitches and advantages to be adjusted depending on your requirements

- Back Bore Technology barrels allow you to get the very best performance out of the cartridge:
 - An increase in speed and penetration
 - Improved shot patterns
 - A 6% reduction in recoil (see page 30)

- An extra flat carry case allows you to easily carry all the accessories you need with you, and thus perfectly adapt the gun to all shooting conditions.

THE MOST EFFICIENT SHOTGUN IN THE FIELD

Fusion Evolve II Gold Cal 12 M

Based on the Fusion Evolve II, the « Gold » version, as its name suggests is characterised by two magnificent gold inlays here and there on its nickel-plated receiver.

Fusion Evolve II Cal 12 M

Animal engravings and a nickeled frame are in the best possible taste and give a very special character to this gun which will be your favourite ally during your long hunting trips.

Fusion Evolve Elite Cal 12 M

A dual tone frame with Browning markings associated with magnificent grade 3 walnut are the main features of this Elite version.

Fusion Evolve Plus Cal 12 M

With all the Fusion Evolve family features, this standard version is characterised by its grade 2 gloss varnished walnut, A dual tone frame and its matt-finished barrel.

Fusion Combo Cal 12 M

Fusion Cal 20 M

Fusion Ultimate 20M

The Fusion 20 gauge also exists in a deluxe version, with a superb anthracite grey receiver edged in fine gold and a new engraving. The oil-rubbed walnut stock and fore end contribute to the superior quality of this gun.

Fusion Combo Cal 12M

The aim of the Fusion Combo is provide a gun that can be adapted to any type of hunting, all in one kit. It consists of a Fusion 12M with a countersunk receiver, a 71 cm barrel, a Slug barrel and a 50 mm choke extension. Like all Fusions, it comes with many accessories.

Fusion Cal 20 M

The Fusion range includes the Fusion 20M. In addition to the qualities of the 12 gauge, the Fusion 20M also provides lightness and ease of handling. The narrower receiver has been scaled to suit the gauge. The quality of the shot pattern is ensured by the 62 mm long Invector Plus chokes. The 3" chambering of this gun allows it to fire all 20 bore cartridges, regardless of length or load.

THE PHOENIX SEMI-AUTOMATIC SHOTGUN, IS BROWNING QUALITY AT THE BEST PRICE.

Phoenix Top cote Cal 12 M

The Phoenix Top Cote is an improved version of the Phoenix with a special wood-lubrication treatment that also gives improved resistance to dampness. As for the receiver, it has a special black coating.

Phoenix

The Phoenix gives you access to Browning quality at the best price. 3" Back-Bore barrels fitted with removable Invector + chokes, high performance steel shot and the exclusive gas operated system « Active Valve System » make this gun a machine which can be fired in any conditions. Furthermore, its receiver decorated with a magnificent Phoenix is fitted with a special coating that gives superior resistance in saline conditions. Tests in saline mist, which are extremely demanding, have shown a resistance greater than 200h compared to a classic finish.

Cal 12 M

Phoenix Composite cal.12 Super Mag 3.5"

This model's stock and composite hand pad make it an extremely robust, all-purpose gun. With its Back Bore barrel chambered in 89 mm (3.5"), you can fire any type of cartridge from light 32g loads to 63g heavy loads that in particular enables you to shoot geese.

1. The qualification of new products

Before they are launched onto the market, Browning guns undergo numerous, very strict Browning internal tests. No product will be validated if it fails to completely fulfil the following requirements:

B.A.C.O.
BROWNING ARMS COMPANY
QUALITY PROCEDURE

1.1

Operation and endurance tests

- Minimum of 2 000 shots for rifles
- Minimum of 5 000 shots for hunting shotguns
- Minimum of 10 000 shots for sports shotguns
- Test conditions: the gun is cooled down every 50 shots and cleaned every 500 shots
- The full range of cartridges of different makes is used.
- No part breakage is tolerated.
- Once the test has been completed, none of the parts should be excessively worn.

1.2

Tests in adverse conditions

- The gun should operate at extreme temperatures : from -30°C to $+50^{\circ}\text{C}$

1.3

«Torture tests»

All of these torture tests are carried out in extreme conditions that greatly exceed those of the conventional C.I.P. standards. Browning guns' legendary solidity and reliability are largely due to them passing all of these tests.

- Overload tests for all guns
- Obstruction tests for rifles
- Safety tests : drop tests for all guns

2. 100% systematic inspection of mass produced guns

Browning's extremely stringent quality checks impose a systematic inspection of each serial gun which is screened during numerous checks and tests.

2.1

Gun checks

- Visual inspection of each product : gun + packaging
- Systematic measuring of certain points : headspace, chamber dimensions, weight, specific dimensions...

2.2

Gun tests

- Manual operation tests.
- Shooting tests : operation and accuracy.

2.3

Accuracy tests

- For rifles: very precise check on shot patterns.
- For shotguns:
 - P.O.I. (Point Of Impact) test which is the shot pattern's average point or centre of gravity.
 - This test is carried out at 35 m with different points of aim depending on the product's family and therefore its use:
 - For under-and-over shotguns, the maximum difference between 2 shot patterns' centres of gravity should not exceed 10 cm with a convergence set at 35m.
- Systematic check on the quality of the lead shot patterns using computerised analysis to guarantee operation and extreme reliability.

◀ CCS525

(*) Average values

BROWNING HAS REINVENTED THE EXPRESS RIFLE

CCS

The Elite version of the CCS 525 has brand new engraving on the steel action frame, which is richer and deeper and will be finished by hand. The grade 3 walnut stock has also been re-worked to give it a more traditional, finer design. Good looks and handling along with this double express rifle's technical qualities make it the ideal battue gun.

525 Elite

CCS

Browning has been the leading producer of express over and under rifles for decades. With the introduction of the CCS 525 in the 525 range, Browning wanted to provide the demanding hunter with a gun that is attractive, while at the same time guaranteeing flawless operation and unequalled accuracy, and that can be easily adjusted to accept the different types of cartridge available on the market.

525

Browning

has reinvented the Express Rifle

The barrels, the essential part of this gun, are both traditional and original. A spacer on the upper barrel ensures the accuracy of the vertical convergence of the barrels, while lateral convergence is ensured by the design of the barrel itself, which incorporates a unique «Cradle» strip. Once the ammunition has been chosen, a spacer ring is recommended and inserted securely under the foresight on the upper barrel, guaranteeing unequalled accuracy. (*)

The weight and balance are perfect for current hunting conditions. The action frame has been strengthened by means of high strength stainless steel inserts.

Very special attention has been paid to every detail of this gun: a «hog's back» stock with a Bavarian cheek piece, an accentuated tulip-shaped forearm for greater elegance, a fluorescent optical fibre foresight and a traditional battue rib allowing a scope to be mounted by a gunsmith in minimum time. The animal engravings with which it is decorated make this a very special and unique rifle.

(*) It is essential that this operation is carried out by your gunsmith.

CCS 525 Elite

CCS 525

40 x 44 cm

CCS 525 factory setting to 60 m

CCS 525

Exclusive barrel convergence adjustment system: Cannot be unset and can be adapted to different types of ammunition.

Thanks to this system, the double Express CCS525 rifles are originally set to 60m by the Liège Test Bench and the 2 impacts should be within a square of 5 cm to the side. The ammunition used is respectively Winchester Partition 12.96 g and 18.53 g for 8x57JRS and 9.3x74R calibres, for the 30R Blaser, it is Blaser CDP 10.7 g ammunition. If you would like to use different ammunition you should adapt your gun using one of the 7 adjusting rings that are delivered with your gun.

adjustment wedge system

System operation:

Whatever the diameter of the adjusting ring mounted at the gun's muzzle, the barrel convergence angle maintains a natural pressure and therefore a permanent contact between the muzzle of the upper barrel and the barrel spacer wedge.

As this wedge is itself silver-brazed on the lower barrel, we are certain during firing that the position of the upper barrel's muzzle in relation to the lower barrel will be constantly maintained.

THE BEST SELLING SEMI-AUTOMATIC RIFLE IN THE WORLD.

- The undisputed leader, Browning is the semi-automatic rifle specialist.
- 40 years' experience, the first BAR was launched in 1966.
- Over 1.000.000 BARs sold in the world

In 1966, Browning launched the BAR (Browning Automatic Rifle) that was to quickly become THE market reference. In spite of severe but often ineffective, competition, the BAR became the leading semi-automatic rifle in Europe. In 2002, in close collaboration with Winchester, Browning developed the WSM (Winchester Short Magnum) calibres, combining the power and the accuracy of classic «magnum» calibres with a smaller cartridge.

In 2003, Browning launched the *ShortTrac*, the first semi-automatic rifle on the market to be developed specially for WSM calibres. The smaller dimensions of the WSM cartridges have made it possible to create a lightweight, compact gun that guarantees «Magnum» performance.

The *ShortTrac* incorporates all the experience of the BAR gained by our Research and Development departments over a period of almost 40 years for your maximum satisfaction.

**BAR ShortTrac /
BAR LongTrac /
BAR
SEMI-AUTOMATIC
RIFLES**

The most reliable rifle on the market, 40 years' experience

1.

1.1 Chromed chamber and gas cylinder, do not rust and make ammunition extraction easier.

1.2 The Browning gas-operated system is adjustable; it therefore enables you to adapt the gun to the type of ammunition used. This operation must be carried out by your Browning gunsmith.

1.3 Welded gas cylinder, perfectly watertight.

1.4 Breech damping system, reduces mechanical parts' wear and stress.

1.5 The regulating system's floating mass ensures regular supply and more reliability.

2.

ALL THE DIFFERENCE

3.

Great accuracy

◀ 3.1

3.1 Locking occurs in the barrel by means of 7 lugs which engage in an extremely rigid way. This gives excellent shooting accuracy and the possibility of firing magnum cartridges.

3.2 One piece barrel: better rigidity than bound barrels.

3.3 Hammered barrel manufactured by the Fabrique Nationale (National Factory) in Herstal, a guarantee of quality.

3.4 The barrel is breeched in the frame which gives great rigidity.

4.

Essential features

◀ 4.2 ▶

4.7 ▼

4.4 ▶

4.8 ▼

4.12 ▼

◀ 4.10

4.9 ▶

4.11 ▶

4.1 Very high quality finish and assembly.

4.2 Exclusive Browning B.O.S.S (Ballistic Optimizing Shooting System) system: Improved accuracy
The BOSS™ system allows the rifle to be quickly adjusted to the desired load. Each barrel equipped with the BOSS™ is marked with 10 incremental markings, and a table of average settings is supplied for each calibre.

Reduced recoil

The BOSS™ system allows the bullet to leave the barrel at the ideal moment, i.e. in the «peak» or the «valley» of the vibration wave when the muzzle is virtually motionless.

4.3 Reversible safety device for left-handed users.

4.4 Height- and side-adjustable stock on Short & LongTrac using 5 inserts.

4.5 Innovative design

4.6 Recoil sensation much softer than with bolt action rifles.

4.7 Drop-down magazine

4.8 Drop-down magazine set

4.9 For countries where the legislation allows it, a removable drop-down magazine with a 6 shot capacity is available as an accessory.

4.10 There are 3 buttplates of different sizes (1.3cm - 2 cm - 2.5cm), which enable you to adjust the length of your gun to suit your build. The original gun is delivered with the 2 cm intermediary butt plate.

4.11 This red dot on the receiver acts as a gun-locking indicator for increased reliability. You can also load your gun in silence, safe in the knowledge that it is locked properly.

4.12 An ergonomic magazine catch allowing easy access to the hinged magazine holder and easier loading.

THE BEST SELLING SEMI-AUTOMATIC RIFLE IN THE WORLD.

Bar ShortTrac/LongTrac **New Elite**

Numerous aesthetic innovations make this « new Elite » a complete success. Firstly, regarding its receiver endowed with brand new grey anthracite nickel-plating that is far more resistant, which bears a modern engraving with a gold inlay (by Ch. Perrin). Another essential point, the wood benefits from an all-new glossing treatment « Top Cote », which also gives greater resistance to dampness.

TOPCOTE™

Bar ShortTrac/LongTrac **Standard**

Here in standard version, the ShortTrac was the first semi-automatic rifle on the market developed specifically for Winchester Short Magnum calibres. As for the LongTrac it offers conventional calibres whilst adopting the same innovative design.

Bar ShortTrac/LongTrac **Eclipse**

A first for this Eclipse ShortTrac and LongTrac finish whose nicked frame is decorated with a magnificent hunting scene engraving and selected oil-rubbed walnut.

Bar ShortTrac/LongTrac **Eclipse Gold**

Continuing the Eclipse model's features, the Eclipse Gold version is characterised by golden subjects, wild boar and deer, on each side of the receiver. Furthermore, it has a beautifully piped barrel, which facilitates the barrel's cooling.

Bar Acier Battue

With its more compact barrel, its battue type rib and its fluorescent fore sight, this gun is exceptionally effective and easy to handle in battue or stalking situations.

Bar Acier Affût BOSS™

The addition of the BOSS™ system produces two particularly interesting effects : reduced recoil (in the region of 30 to 50 %) and improved accuracy. The performance of the BAR is thus improved when using a scope or firing long range shots.

Bar Acier Affût

This version is fitted with a vertically and horizontally adjustable rear sight. The fine metal foresight ensures a perfect accuracy of aim.

DUALIS/BLR

REPEATING RIFLES

ABSOLUTE SPEED

Dualis

A perfect alternative to the semi-automatic Totally different from normal pump-action rifles, the Dualis reloads in record time. The fore-end moves along 2 axis: you draw it towards you, and it moves backwards and downwards, forming a circular motion and nestling comfortably under the magazine. No visible cams, a silent action and a superb, highly fluid line. This gun is extremely effective with its floating cold-hammered (FN Herstal made) barrel, its drop-down magazine and its modern optical fibre foresight.

Battue

BLR

A classic look for this BLR model 81 which offers increased manoeuvrability thanks to its lightened aluminium frame and its semi-pistol stock. Its various versions allow you to shoot conventional calibres as well as magnum calibres. Furthermore the BLR is characterised by its extremely fluid operation, its safe use, its drop-down magazine and its rotating bolt.

Dualis Battue

BLR

Drop-down magazine. Its asymmetric design allows extremely quick and accurate pointing.

HUNTING

EUROBOLT / A-BOLT REPEATING RIFLES

Eurobolt

Eurobolt

Without doubt the most versatile rifle on the market. Indeed, the Eurobolt is unique in that it is provided with interchangeable sights. The gun can thus be easily modified from a still hunting rifle (with a rear leaf sight) into a battue riffle (with a quarter rib). The trigger has a «stetcher» (set trigger) mechanism, allowing the gun to be fired with a very light trigger pull (hair trigger) for very accurate shots. The Bavarian «hog's back» stock is always perfect, both for sighting with open sites and with a scope. Supplied with 2 sights: affect rearsight + battue rib: to be mounted according to choice.

Eurobolt

Interchangeable Battue-type rib and rearsight.

A-Bolt

Hunter Field

A very European look for this A-Bolt Hunter Field whose essential element is a Monte Carlo stock, with a matt finish, which gives greater comfort when firing with scope.

A-Bolt Composite Stalker

Sharing the same characteristics as the rest of the A-Bolt range, this new Stalker version, with its composite stock, will withstand the most severe conditions. It will also meet every expectation of both hunters and target shooters.

A-Bolt

Medallion

A reduced 60° bolt action makes reloading the A-Bolt rifle quicker and easier, especially with a scope mounted. It's push button safety catch is ideally located at the top of the grip. Available in small calibres, it is ideally suited to hunting vermin, but will appeal to the most demanding shooters.

A-Bolt Mountain Titanium

Everything has been studied to make this rifle a genuine featherweight : 100% Titanium casing, a breech made of composite materials, a super light stock specifically developed by Bell and Carlson which is the result of a combination of composite materials and fibreglass. A Pachmayr Decelerator butt plate softens the recoil.

2,5 Kg

A-Bolt Stainless Stalker

Ideal for target shooting, vermin or game, the stainless stalker seduces as much by its looks. Its composite fibreglass/graphite stock, together with its stainless steel barrel and action make it a gun that is perfectly suited to all kinds of weather.

*THE ONLY BOLT ACTION RIFLE IN THE WORLD TO HAVE
ITS BREECH BLOCK COMPLETELY ENCLOSED WITHIN THE RECEIVER*

Acera

With the Acera, reloading simply involves a straight-pull action: a straight back-and-forth movement along the line of the gun is all that is required. But its other major advantage is that the bolt is completely enclosed in the receiver. There is therefore no risk of receiving the bolt in the eye: the hunter is thus able to keep the target in his sights while reloading. Available in calibre 270 win, 7X64, 7RM, 30.06 and 300 WM. Comes in a black ABS carry case.

Acera

The seven lug rotating bolt engages directly into the barrel extension, making it particularly strong and reliable.

Drop-down magazine for speed and ease of loading.

Walnut «hog's back» stock. The Bavarian cheek piece adds to its already good looks.

SCOPES

OPTALENS OPTASIGHT / OPTAPOINT / OPTADOT

Optapoint

The symbol of speed

This illuminated dot scope provides 1x magnification, which is ideal for quick firing. The brightness can be adjusted and the definition of the dot is always perfect (no edge iridescence). The 33 mm diameter tube gives a vast field of vision. This model comes with an adjustable polarising filter, a lithium/manganese battery and a mount that is compatible with 16.5 mm wide rails. The Optapoint is guaranteed for 1 year.

Optadot

new

Optadot

Extremely compact and water resistant, the « Optadot » projected reticule aiming system offers all the advantages required for fast, accurate firing both for hunting and shooting. It also has an automatic red dot intensity adjustment device, depending on the ambient lighting. Its integrated fastening system means that it can be easily mounted on all types of gun. The Optadot is very reliable and complies fully with the Optalens Quality standards. During our tests, 1000 bullets were fired with a BAR rifle onto which the Optadot had been mounted, without the slightest malfunction.

Browning, the world's leading gun producer wanted to pass on the benefit of its experience of hunting and target shooting by developing the "Optalens" scope range. This range has been designed, down to its minutest details, to meet your highest standards. All Optalens scopes are guaranteed 30 years. Except Optapoint and Optasight.

Optasight

Quick, accurate, perfect

OPTASIGHT

The Optasight is one of the very latest generation of sights based on the principle of a projected reticule. This revolutionary sight does not have its equal on the market: it incorporates a sensor that measures the ambient light level and adjusts the brightness of the reticule accordingly. The constant need to manually adjust the brightness when passing from bright sunshine to shade is now a thing of the past. The Optasight provides a choice between four reticules, simply by operating a selector knob. It is equipped with a large window (22 x 28mm), providing the perfect compromise between a wide field of vision, lightness and compactness. (Powered by a CR 2032 lithium battery) – Guaranteed 3 years.

- 1• Multi-coat Anti-reflection and anti-scratch treatment.
- 2• Location of CR2032 battery
- 3• Vertical and sideways reticule adjustment
- 4• Quick, easy assembly.
- 5• Self regulating brightness sensor
- 6• Reticule brightness adjustment thumbwheels (choice of 7)
- 7• Reticule selector (choice of 4)
- 8• After adjustment on the target, firmly tighten this screw to avoid any ill-timed shifting of the reticule.

new

Optalens

Model 1-4 x 24

Ideal qualities for battue hunting

Battue hunting requires the use of a scope having very specific optical qualities. The 1-4 x 24 scope (total length 263 mm), with its qualities of lightness and maneuverability, is the perfect answer. It combines a wide field of vision with

a reticule No. 4 for rapid firing

The care taken in its manufacture and the multi-coat treatment of the lens ensures perfect brightness in even the most unfavourable conditions. Its one-piece alloy body also makes it particularly robust.

reticule 4

new GENERATION

1-4 x 24

1-4 x 26 MRE

Optalens Model 1-4 x 26 MRE

Perfect definition under all circumstances

For firing quickly on the hop from a path, in scrub land or in foggy conditions, an illuminated reticule is just the solution for a battue hunter.

The 1-4 x 26 scope offers a choice of 6 easily selectable reticules, simply by operating the selector. The adjustable brightness guarantees perfect definition under all circumstances. Particularly light, compact and genuinely strong, this scope is the ideal companion for all your hunting trips.

reticules

Optalens Model 1,5-6 x 42

The universal

A virtually universal scope, the 1,5-6 x 42 combines a short length (only 298 mm), a large magnification range (1,5 to 6 times) and a reticule 4. It thus constitutes a high performance, extremely versatile scope. Like all Optalens scopes, its inside is filled with nitrogen to prevent fogging due to changing temperatures.

reticule 4

1,5-6 x 42

1,5-6 x 42 IS

Optalens Model 1,5-6 x 42 IS

For use in any weather, under all circumstances

The disconnectable illuminated reticule of the 1,5-6 x 42 IS is ideal for sighting the target when shooting in poor light (twilight) or where the shot requires to be fired extremely quickly. The red dot at the center of the very fine reticule No. 4, with its well defined edge, is combined with a brightness adjustment system to avoid excessive pupil dilation.

3-9 x 40

3-12 x 56

3-12 x 56 IS

Optalens Model 3-9 x 40

For hunting in the mountains

The combination of a large magnification range (from 3 to 9 times) and a lens diameter of 40 mm make this an ideal scope for use in the mountains, and more generally in all cases where the key advantage is a compromise between weight and magnification. The reticle No. 14 is really perfect for long range shots. The little dot situated beneath the intersection of the cross hairs allows the point of impact to be determined, and thus compensates for the trajectory of the projectile. The very high quality multi-coat treatment and the aperture diameter (which goes up to 13.3 mm) make this a very effective scope for selective shooting. It also ensures perfect colour rendition.

reticule 14

Optalens Model 3-12 x 56

One of the best Stalking scopes

Designed for still hunting, from a stand, the 3-12 x 56 scope provides maximum visual comfort. The very high quality multi-coat lens treatment makes this one of the very best scopes in the world where colour transmission and restitution of form are concerned. With twilight factors from 12.9 to 25.9, your scope remains perfectly useable, even under conditions of very poor or low light. The reticle No. 14 (with an additional dot beneath the intersection) is ideal. The scope is assembled with meticulous care in a clean room and is filled with nitrogen to avoid all risk of fogging or sensitivity to variations in temperature.

reticule 14

Optalens Model 3-12 x 56 IS

A must in poor light conditions

Perfectly adapted to still hunting, this illuminated reticle version of the 3-12 x 56 is at its best at twilight or in very bad light. The very fine red dot, with its very well defined edge, ensures unequalled efficiency. Its meticulous construction, its one-piece alloy housing (of total length not exceeding 377 mm) and silent fine adjustment screws make this an extremely strong scope that is guaranteed for 30 years, like the whole of the OPTALENS range.

GAME & TARGET SHOOTING

GTS

Cal 12M Elite

With its superb engraving, this version of the GTS gains in distinction and elegance. The engraving is based on the distinctive GTS design (of a duck gradually being transformed by «morphing» into a clay), further enhanced with 24 carat gold and additional decorative engraving, and superb oil-rubbed European walnut.

GTS Cal 12M Elite

GTS

Cal 12M Grade 1

This is the ideal model for both sporting clays and hunting. Its back-bored barrel, its 10 mm rib and its ability to shoot any type of cartridge (including steel shot) make it an incredibly efficient gun, without loss of comfort, for hunting waterfowl and migrating birds. It has removable butt swivel rings, its stock is made from very attractive selected European walnut with an oil-rubbed finish.

GTS Cal 12M Grade 1

THE BIGGEST REVOLUTION SINCE
THE CREATION OF THE B 25

BROWNING MAKES A

Since the introduction of John M. Browning's famed Superposed, the name Browning has been synonymous with innovative and reliable over and under shotguns. The best-selling B525 followed, successfully bearing the flag of Browning shotgun superiority and further solidifying Browning's place as the pre-eminent over and under shotgun company. Continuing with the Browning tradition of quality and advanced technology, 2006 is the year of the Cynergy™ — a totally new low profile shotgun destined to have its place among the rich lineage of Browning shotguns. Like the Superposed and B525, the Cynergy is more than just another shotgun, it is uniquely Browning, The Best There Is™.

1. Innovative Design

- 1.1 The most innovative over-and-under shotgun on the market.
- 1.2 Developed by THE creator of the over-and-under shotgun.
- 1.3 A silhouette which is classically elegant, modern and radically different

2. The lowest action frame profile : 60mm

Its exclusive integrated hinge system offers an ultra low action frame:

- 2.1 A natural extension of the shooter
- 2.2 Reduced recoil sensation.
- 2.3 Reduces the barrel flip, allowing a faster 2nd shot.

3. Fastest firing : 0.0019 seconds

▲ 3.2 & 3.3

- 3.1 0.0019 seconds as opposed to 0.0031 for the competitors.
- 3.2 New exclusive inversed firing system.
- 3.3 Use of rocker arms to inverse the direction of the impact going from the impact wheels to the firing pins.
- 3.4 Reduction in the stroke of moving parts
- 3.5 Gives sharper, faster shooting.

ALL THE DIFFERENCE

4.

25% less recoil

▲ 4.1

▲ 4.4

▲ 4.4

- 4.1 «Inflex» butt plate, its design and material means that more recoil is absorbed than with any other butt plate.
- 4.2 The plate's exclusive structure allows 1.5 to 2 times more absorption than with a traditional plate.

- 4.3 Excellent shooting comfort, ideal for women and young shooters.
- 4.4 Easy to adjust and economical stock length as there are 3 butt plates and an insert.
- 4.5 6 possible configurations give an adjustment range of 32mm

	Short	Short & Spacer	Medium	Medium & Spacer	Long	Long & Spacer

◀ 5.2

5.4 ▶

- 5.1 Exceptional long-life and robustness thanks to its design and the integrated hinge system.
- 5.2 Larger action frame surface, reduces both wear and rubbing.
- 5.3 Mechanical inertial triggers, avoids double firing and guarantees the 2nd shot in any case.
- 5.4 Adjustable trigger with 3 positions on target shooting models which allows you to change the trigger and make a final stock length adjustment.

- 5.8 New «Diamond» Titanium chokes, Titanium PVD-treated chokes which give excellent ballistic quality as well as perfect resistance to wear and corrosion.
- 5.9 Chromed barrels and chambers: do not rust and makes maintenance easier.
- 5.10 Steel Shot proofed for the hunting class models.
- 5.11 2 flat bolts located on the barrels ensure excellent locking.

5.7 ▼

5.8 ▼

5.5 ▼

- 5.5 Linear impact wheel ejectors : straight, powerful ejection.
- 5.6 Maximum safety : the only shotgun with this level of safety with both a trigger safety device, a group firing safety device and a rocker arm safety device.
- 5.7 Back-bored barrels with a lightened profile : lighter and faster swing. (see page 30)

THE BIGGEST REVOLUTION SINCE THE CREATION OF THE B 25

Cynergy

Specially designed for target shooting, the Cynergy Sporter stands out in particular because of its exclusive Diamond Titanium external chokes which offer excellent ballistic quality. Its look and revolutionary design without a doubt give the shooting world a real revival.

Sporter Inflex

Cynergy

The Cynergy «Pro Sport» range offers guns fitted with conventional stocks with adapted dimensions.

Pro Sport

All over-and-under guns in the Browning and Hunter & Sporter ranges are delivered with 5 chokes.

Cynergy

Composite Black Ice

Its futuristic appearance will be the talk of the shooting grounds. Stock and fore-end made of composite materials with rubber inserts give this shotgun a significant look and great resistance to the elements. 3 adjustable cheek-pieces are delivered with the gun enabling you to modify the stock's cast as you wish.

THE BIGGEST REVOLUTION SINCE THE CREATION OF THE B 25

Cynergy

The stock dimensions have been closely studied, a grip that more than ever leaves its mark and a slightly fluted fore-end make the Cynergy Trap extremely effective in the various Trap disciplines and this at the highest level. Secondly, the Cynergy's very design with its low action frame and its revolutionary shooting allows you to fire 2nd shots extremely quickly and in complete comfort. A real first.

Trap Inflex

Cynergy

The «Pro Trap» range offers conventional stocks that have been specially made by the Italian stockmaker Esseviere for the various Trap disciplines.

Pro Trap

All over-and-under guns in the Browning and Hunter & Sporter ranges are delivered with 5 chokes.

Cynergy "Uncut"

To enable you to adjust your stock to your dimensions perfectly and to choose your own standards, we offer you this Uncut version of the Cynergy with uncut stock. Perfection is yours...

B525 SPORT

OVER-AND-UNDER SHOTGUNS

B525 Sport

Following the introduction of the hunting B525 in 2003, the range is naturally being developed this year in the Sports shooting field. In fact, it is a complete range of B525 Sport which see the light of day with numerous models which reveal major innovations:

- The new barrels are now chambered in 3" which allow steel shot to be fired, in the models fitted with adjustable, «Invector» type chokes. These same «Invector» are also new, as they are going to be made of «stainless steel» from now on, which makes them light and sturdy to improve patterns.
- Another change, the trigger weights which have been re-worked to become both lighter and more accurate.
- The B525 Sport line is resolutely innovative

with a specific re-filing of the action frame and the barrel wings. All the models are also fitted with lateral ventilated ribs which improve the guns handling in particular.

- The wood benefits from an all new oil finish which is far brighter.
- All over-and-under guns in the Browning and Hunter & Sporter ranges are delivered with 5 chokes.

Buck Mark

Rifle

This is without doubt one of our very favourite Browning products. With its exceptional, highly accurate and reliable design, this gun provides a vast range of possibilities of use.

Buck Mark Classic Target Rifle

This is the latest addition to the Buck Mark Rifle range. It has been designed to give the shooter the maximum possible accuracy through the use of a heavy large diameter Match type barrel. The laminated wooden stock and forearm give it a special and highly distinctive look.

BL.22

This gun, with its undeniable «Wild West» charm features a very short travel lever (33°), external hammer and magazine tube. It also allows the possibility of mixing all types of cartridge (long, long-rifle, short) without risk of jamming.

SA.22

This much copied, never equalled rifle has been continually produced since 1924 and has something for everyone:

operation in «blow-back» mode (unlocked breech operated by gas)

- automatic ejection, cocking and loading
- loading through the stock (the magazine tube is pulled to the rear and the cartridges are dropped one at a time into an opening in the stock)
- bottom ejection
- barrel take-down with wear adjustment

The Pro 9 handgun is the result of lengthy research aimed at developing a gun that precisely meets the needs of the market. This classic double action handgun (double action for first shot, single action for the others), which was jointly developed by FN Herstal and Browning, is not only a highly reliable gun but also a unique solution in terms of ergonomics, safety and modularity.

The expertise of FN Herstal and Browning in handgun design and the care taken in developing the Pro 9 have already made it a «Standard» of reliability, like its predecessor the celebrated HP.

This gun incorporates highly sophisticated technological solutions:

- The steel slide sits on a steel mechanical cradle, which is itself housed in a receiver made of synthetic material, thus combining strength, weight and balance.

Pro 9

• The firing mechanism is housed in an easily replaceable «firing box», for ease of servicing, both for yourself and your gunsmith.

• A medium-sized handgun, the handle can be adapted to suit the hand of each user (Photo1)

Safety has not been ignored. The Pro 9 handgun is equipped with the most modern systems:

- Firing pin safety to avoid the gun accidentally firing without first pulling the trigger.
- A safety lever to make the gun safe and to deactivate the hammer with or without a cartridge in the chamber.
- Finally, it is fitted with a rail which is able to receive an extensive range of accessories, such as flash lights, laser designators, etc.

TARGET

GP - BUCK MARK

GP

Practical ajustable

The GP Practical has been developed to meet the stringent demands of «Practical Shooting». It includes numerous improvements, such as :

- Adjustable, low profile sights
- Particularly crisp trigger pull
- Ultra precise handling through the use of Pachmayr chequered rubber grips
- Hammer redesigned to avoid getting caught when drawing
- Increased weight and improved stability
- Ambidextrous (left/right) with retained magazine safety
- Larger magazine entry in the frame
- Ejectable magazine equipped with Pachmayr rubber buffer
- Particularly corrosion resistant finishes

GP

Sport

The latest standard version of the HP handgun incorporating new low profile sights.

GP

MK III S

The GP MK III S combines all the qualities of the original HP with an ambidextrous safety and a weight (910 g) that makes it a safer and more accurate gun to handle. It is also fitted with Pachmayr grips for improved handling. A handsome gun with its blued and chrome finishes.

GP

Silver Chrome

The GP also exists in a Silver Chrome version, equipped with an adjustable backsight that can be adjusted for both windage and elevation and a sport foresight with a rounded base. It is also fitted with Pachmayr grips to provide improved handling. A handsome gun with its blued and chrome finishes.

HAND GUNS

Buck Mark

Standard

A cut above the rest, this is Browning's version of a basic pistol. It can easily compete with the best .22 calibre target shooting guns. Hundreds of HMSA winners are there to prove it. Its features include a thumb-operated magazine release, a 10-shot magazine, a bull barrel and «Pro-Target» sight.

Buck Mark

Standard Nickel

Black rubber and bronzed steel combine to make this a particularly tough-looking pistol. The nickel plating on the slide and barrel provide increased protection. The grips provide sure handling. An extremely reliable and accurate pistol.

Buck Mark

Plus

The Buck Mark Plus has exactly the same features as the standard model, with the addition of laminated wooden pistol grips make for a naturally warm feeling and great looks.

Buck Mark

Bullseye

According to the old adage, it's the shooter that counts, not the gun. But the shooter also knows that he wouldn't have been able to win without his gun. It is for this reason that many sports shooters have chosen the Browning Buck Mark Bullseye. Its accuracy and reliability make it the perfect choice for Compton shooting. It is very well balanced, and is available with a rosewood or a rubber grip.

Buck Mark

Target 5.5 blued finish

Identical to the Buck Mark Target 5.5 Gold, but with the original Target blued finish.

The Best There Is

BROWNING QUALITY

CLOTHING/ ACCESSORIES

1. PRE-VENT™ STAY DRY AND COMFORTABLE

WATERPROOF, WINDPROOF, BREATHABLE

Browning's latest development in outdoor gear draws upon every feature dedicated hunters demand of their performance clothing. The new Pre-Vent™ fabric is **waterproof, windproof and breathable**, not to mention lightweight, durable and highly affordable. Pre-Vent fabric is 100% Waterproof, a feature most outdoor enthusiasts insist upon, and at the same time prevents the chilling winds of autumn from cutting through the

garment. And for those times when the temperatures or activity levels rise, Pre-Vent is highly breathable, wicking moisture away from the body, leaving hunters dry regardless of the weather. Pre-Vent is featured in a wide range of Browning outdoor gear. From cold-weather parkas and jackets to lightweight raingear, Pre-Vent is the choice for any hunter, any person, in any environment, in any condition and in any weather.

The hang tag on Pre-Vent outdoor gear explains the benefits of this performance and value

driven technology.

2. POCKET EXPANDER SYSTEM

A NECESSARY CONVENIENCE

The new Browning Pocket Expander System is the latest convenience found in Browning parkas and jackets. The pocket Expander System allows for a shell loop flap to be tucked inside the large bellows pockets to protect shells against the elements, or placed on the outside for easier, faster access. This unique design also allows for access to the bellows pockets even

when using the shell loop flap on the outside. Count on Browning's innovation to design hunting clothing that make a day in the field far more comfortable and convenient.

3. GEAR TRIEVER™ SYSTEM

121011

PROTECTION AND CONVENIENCE

Available in a Call Lanyard model with four slip-knot lanyard, or an Accessory model, with split-ring attachment, the Gear 'Trievers™ attaches to a specialised tab inside the pockets of this year's parkas and jackets.

The Gear 'Trievers' retractable cable keeps gear, such as calls, torches and GPS units, tucked inside the side pockets until they are ready to be used. Sold separately.

CLOTHING/ ACCESSORIES

Browning Special Care Products

Our gas-free pump-action system and the adherence of our low volatility oils, make the LEGIA SPRAY 25% more efficient than traditional gun oils.

- LEGIA SPRAY Standard (Red): cleaning oil for barrels and receivers: excellent for maintenance and protection.
- LEGIA SPRAY Stockcare (Green): the ideal product for protecting and maintaining precious woods. Nourishes and increases the impermeability of all «oil rubbed» finishes.
- LEGIA SPRAY Longlife (Grey): Low volatility oil. The oil film remains on the gun longer, making it the ideal product for use in extreme conditions (salty, damp, etc.)

new

Gun-cleaning mat

The safe way to protect both firearms and furniture. The soft, felt-like fabric won't damage firearms and has a waterproof Zorb Tech™ backing. Zorb Tech stops spills from spreading and inhibits the soak through of cleaners. The mat is also **washable, dryable** and highly stain resistant.

40,64 x 137,16 cm

12420 - Black

Barrel-cleaning kit

The Browning Barrel Weasel™ is a simple tool that thoroughly and effectively cleans your rifles and shotguns in about ten seconds. Bronze bristles, embedded in the nylon cord, loosen deposits while the cord itself wipes away deposits in a way cleaning patches can't equal. Constructed from durable nylon cord, the Barrel Weasel is **washable and reusable for several years.**

Hearing Protector Deluxe

- Comfortable, extra-wide padded headband
- Adjustable stainless steel wires
- NRR 22 dB

12632

Hearing Protector US Electronic

- Electronically eliminates unwanted sound.
- Enhances weaker sounds normally not audible when using hearing protection.
- NRR 19dB

12639

Solar Powered Hearing Protector

- **No batteries** or charging required, solar powered
- Cut-away cups for buttstock clearance
- **300-hour** energy reserve for use on cloudy days
- Independent circuit units and volume control in each ear cup
- Sudden impact noise is reduced while normal speech can still be heard
- Allows you to hear which direction noise is coming from
- NRR 25dB
- Ideal for shooting schools, clay pigeons, waterfowl-ing and target practice
- Only available from Browning

126320

new

Profile Electronic Ear Protection

- The electronic model features a low frequency "lift", which enables the shooter to hear more bass detail whilst at the same time the treble response is gently rolled off, eliminating distracting and unwanted high-pitch sounds
- When shooting, sound below the 75 dB safe level is heard normally
- As the gun is fired, this threshold is exceeded and the sound output is cut to zero but quickly returns back to normal.

With charger 220-230-240 V.

12648 - Black 220V

12641 - Black 240V (UK)

12645 - Charger 2 Pins plug (E)

12652 - Charger 3 Pins plug (UK)

Profile Passive Ear Protection

- Noise reducing is approximately 24 dB
- They may be comfortably worn with glasses, are lightweight and feature padded seals and a cushioned headband

Hi-Viz® Magni-Opti Sight

- Patent pending technology makes the sight visible in the periphery of shooting eye only
- Enables any shotgunner to shoot with both eyes open for improved target acquisition and better hand/eye coordination
- Improves shooters of all levels by refining shooting form and head-to-rib alignment
- Solves cross-eye dominance - a condition that unknowingly affects as many as 40% of shooters.

12854

new

Hi-Viz® Comp Sight

- Metal base threads directly into the bead of shotguns for a more permanent sight picture
- Interchangeable LitePipes allow shooter to match light pipe diameter and colour to shooting conditions
- Includes eight LitePipes of different diameters and colours
- Allows the shooter to know exactly where the barrel is in relation to the target
- Key and custom carrying case included

12850

Hi-Viz® Bird Buster magnetic shotgun sights

- All Browning HiViz® Bird Buster magnetic sights come with four interchangeable LitePipes of different diameters for different light conditions
- Includes three different sizes magnetic bases to fit the rib on any shotgun
- Fits all BROWNING Shotguns
