

**BROWNING**  
The Best There Is

2008

## Browning: the most sensitive of passions

Since 1897, the date of birth of the first Browning gun, millions, even tens of millions, of shotguns and rifles for hunting or target-shooting have created and signed by Browning. The inventor of the semi-automatic shotgun, the semi-automatic rifle and, the most recent innovation, an over-and-under gun with the lowest action/frame and fastest firing system on the market has left its mark on the history of gun-making with a profusion of models, all different, but with one thing in common – their reliability and their unequalled levels of performance.

Every day throughout the world, Browning guns, old and new, continue to give their owners great pleasure. Browning guns have a much deserved reputation for quality and reliability which gives their owners complete confidence in our products. John Moses Browning was dedicated to excellence, quality and reliability and this philosophy continues throughout Browning – today and going forward into the future.

Browning guns have an unrivalled reputation for quality and reliability, a tradition which Browning continues to build on. We are mighty proud of our history and work hard to ensure that those who choose Browning benefit from our years of experience, skill and dedication to quality. Browning, Simply - The Best there is.

Browning recommends  
the use of ammunition by  
Browning and Winchester

## John Moses Browning: a life of invention

John Moses Browning was born on 23 January 1855 in Ogden, Utah. He was one of the 22 children of Jonathan Browning, who, being a good Mormon, had three wives.

Gun making ran in the family of the young John Moses, as his father was a gunsmith who had already been responsible for a number of innovations in the field. As a young boy, he spent his time in his father's workshop, and knew the name of every part of a gun before he could read. From the age of 6, he made fishing accessories from scraps of metal which he hammered into shape on an improvised, child-sized work bench made from a wooden crate. Even his father, a man well known for his patience, found it difficult to conceal his impatience at the incessant stream of questions from the young John Moses which disturbed him in his work...

The 19th Century American boyhood of John Moses Browning abounds with anecdotes, all of which share a point in common : they all point, towards him becoming an internationally renowned inventor of genius. Numerous authors compare Browning with Thomas Edison, another self-taught genius of that time.

At the age of 23, John Moses lodged his first patent, for the "J.M. Browning Single Shot Rifle". The drafting of the text of the patent in the required form caused him more difficulty than the invention itself. This invention consisted of a simplification of the percussion mechanism, making it more durable and reliable.

It was at about this time that Browning married Rachel Teresa Child, who would remain his life-long companion.

Shortly before his death, his father handed over his business to the

young Browning who, in association with his brother Matt, despite having less than one thousand dollars in the bank and no experience of machine-tool operation, transformed the humble store into a small gun making workshop employing seven people. But from the start, the remoteness of their location. A lack of a ready supply of customers, and the lack of capital meant that the business struggled to survive until, that is, luck intervened to make the inventor known. A representative of the Winchester company having chanced upon a gun made by the Browning brothers in another state and, considering its design to be of interest, bought it from its owner and sent it to his superiors in the company's head office. So impressed were they that the managing director of Winchester himself set out straight away on a six day journey to what, at that time, was still the wild West, to meet the Browning brothers. Despite his astonishment at finding two young men in their twenties in a rustic workshop, he was perceptive enough to not be fooled by appearances and conclude commercial deals with them which would last for several decades.

Over the years, Browning granted licenses to several manufacturers for dozens of inventions and firearms developed by him. It is no exaggeration to say that he invented almost everything in the field of firearms. What is more, it should be noted that the vast majority of his technological innovations have not been able to be bettered or replaced since the beginning of this century, a clear demonstration of the level of perfection achieved.

In 1897, it was another manager with flair, this time from the Fabrique Nationale (National Weapons Factory) at Herstal in Belgium, who noticed a 7.65 Browning pistol incorporating a novel locking mechanism. The FN obtained the manufacturing licence, and thus began an uninterrupted period of collaboration between the inventor from the Great Salt Lake and the factory on the banks of the river Meuse.

Browning reached the peak of his art with the Auto-5 semi-automatic shotgun, which was a considerable commercial success and prompted his first visit to the Herstal works.

But his world-wide acclaim is without doubt due to the 9 mm Hi-Power semi-automatic pistol, of which over 10 million have been made and which, since 1907, has been adopted by the majority of the world's police forces and armies. Browning has indeed become the generic name for this type of gun.

None of Browning's success is due to chance : like all of the American pioneers he turned luck to his advantage only through an enormous amount of hard work. His strength of character and the steadfastness of his principles were out of the ordinary. Thus it was that, towards the end of his life, when offered an honorary title by a university, he refused it for

the simple reason that "he had made it a rule never to accept anything that he had not gained as a result of his own work".

He died of a heart attack as he worked in his office at Herstal, during the course of his 61st visit to Belgium in 1926. His final words, as he lay dying in the arms of his son, Val, were : "Son, I wouldn't be surprised if I were dying..." Work stopped and the workers paid homage to the man who had entrusted their company with the task of turning so many of his inventions into reality. His body was repatriated to the United States, where he was buried with full military honours. His son Val continued his collaboration with the Belgian factory without interruption. A collaboration that continues to this very day.

*John M. Browning*

## THE WORTHY HEIR TO B25

### B5·25

In 1925, John Moses Browning put the finishing touches to an over-and-under shotgun that was to change the history of hunting shotguns. Once his prototype was finished, our man purely and simply called it the B 25 for Browning 1925.

83 years later, the B 525 is the latest evolution, the ultimate development to this legendary gun. It is, at the same time, the heir to the original model and its most modern, most highly perfected version, which has benefited from all the technological progress made on Browning hunting and target-shooting arms throughout the 20th century and since the beginning of the 21st century.

The B 525 was created in 2003 and it is the fifth generation of Browning over-and-under guns. The previous models, which have all made their contribution to its creation, are the B 125, which appeared in 1985, the B 325 born in 1991, and the B 425 unveiled in 1995. In one way or another, all these different versions, all these evolutions, have given birth to the B 525 and enabled it to become one of the most valued and most popular steel action frame fitted over-and-under hunting guns in the world.

Numerous improvements, Invector chokes, a massive single-piece binder, a single selective trigger, adjustable to three positions on certain models, etc., the B 525 has remained faithful to the model and the principles created by John Moses Browning, which are just as many guarantees of solidity, reliability and better performance. To the point where the robust forged steel action frame is guaranteed for 10 years, the proof of the confidence we have in this shotgun.

The B 525 now forms two families one for target-shooting the other for hunting, 21 models in all, three calibres, four barrel lengths, two types of action frame, steel or alloy and finally dozens of possible combinations to be sure of finding the right gun to accompany you for years and years of successful hunting.

*BROWNING HAS BEEN DEVELOPING HUNTING GUNS THAT ARE AS HARDWEARING AS THEY ARE ELEGANT FOR OVER 125 YEARS. OUR GREAT EXPERIENCE HAS ALLOWED US TO CREATE A PERFECT UNION OF TRADITIONAL GUNMAKING SKILLS AND THE LATEST TECHNOLOGIES. MADE BY HUNTERS FOR HUNTERS, BROWNING GUNS ARE MORE THAN EVER A GUARANTEE OF QUALITY AND RELIABILITY. BECAUSE WE ARE WILLING TO LISTEN TO YOUR REQUIREMENTS, YOUR DESIRES AND THE EVOLUTION OF HUNTING WE DRAW ON TRADITION TO CONSTANTLY CREATE NEW PRODUCTS THAT ARE WORTHY OF THE BRAND'S PRESTIGIOUS HERITAGE.*

### 1. Quality / reliability

The legendary quality of Browning guns results from the care that is taken with every manufacturing stage for example:

- Today, a fleet of ultramodern, computer controlled machines assures the highest precision.

- A 3-dimensional reading machine guarantees infallible production checking and unrivalled respect for tolerances to provide increased manufacturing precision.

- Thanks to PVD technology, metal surfaces are given micro-coverings in a titanium nitrate, chrome nitrate or tungsten carbide air vacuum. The advantage of this technique is that it increases the hardness and long-life of the parts and their resistance to corrosion.

More modern materials, from the aeronautic and automobile industries state-of-the-art sectors, accompany noble, traditional materials. On our guns, walnut and steel are henceforth associated with aluminium, composite materials and carbon fibre for improved performance and reliability that are in keeping with the brand's outstanding reputation.

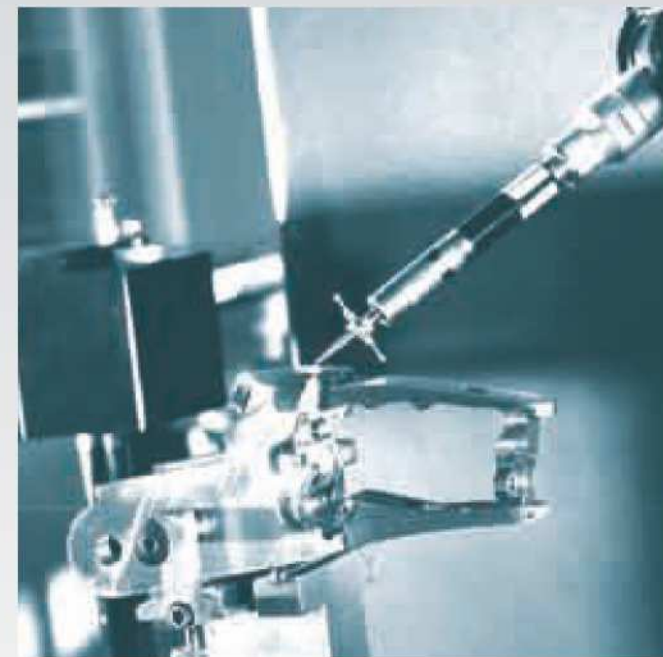

### 2. Innovation / modernity

Because a gun should be both attractive and practical we turn to the most advanced creation techniques to constantly push back the frontiers of design but without forgetting that efficiency is most important in the field.

Some of the numerous recent inventions are shown below:

- The new compact magnum calibres (Winchester Short Magnum, Winchester Super Short Magnum), which are more powerful but generate less recoil than classic magnums, have been developed in association with Winchester, the other great Browning International group brand. The miniature magnums satisfy hunters who desire lighter, more manageable guns perfectly.

The success of this new ammunition has resulted in it being adopted by

the entire armoury industry, which has adapted its guns to our cartridges. Browning has chosen to develop new exclusive, specific, patented gun systems to further satisfy these new calibres' specific requirements in order to optimise their performance with total operational safety.

- The B.O.S.S. system

This device integrates a muzzle brake to reduce a rifle's recoil whilst improving its accuracy by harmonising the barrel's vibrations with specific ammunition. [p. 49]

- BACK BORE technology

This exclusive back-boring process, which many have attempted to imitate, improves the smooth barrels' ballistic performance and reduces recoil.

[p. 34]

#### - CYNERGY

This stylish, competition gun has revolutionised the target-shooting world, it is the Formula 1 of shotguns. [p. 68]

#### SHORT & LONG TRACK

The semi-automatic B.A.R. rifle, which celebrates 40 years of experience, has been joined by a completely new rifle, developed and designed specially for the new WSM (SHORT TRAC) calibres. Fans of conventional calibres can use this new arrival with the LONG TRAC model. [p.48]

#### - FUSION EVOLVE

When you are the inventor of the semi-automatic rifle, you have a duty to employ state-of-the-art technology, the FUSION EVOLVE, with a gas-operated mechanism, is perfectly robust and reliable. It incorporates BACK BORE technology. [p. 36]

### 3. Performance / efficiency

Since the beginning of the last century, the Browning brand has become legendary as the source of the greatest innovations in the firearm industry.

These innovations saw the light of day thanks to research and development teams based in Europe and the United States (Browning and FN) and using the most modern technologies such as Computer Aided Design (C.A.D.), high frequency cameras at 25.000 images/second...

all of this associated with a stringent final quality check which guarantees maximum reliability and performance.

Furthermore each product development is the subject of a series of "studies per finished element" that aims to ensure that the gun has been correctly checked and meets our exacting standards.

#### B25 Trap Evolution 2

A genuine shooting machine, the B25 Trap has 76 cm long barrels and a 16 mm vented rib and is equipped with an adjustable trigger, disengageable ejectors, a luminescent front sight and a "Decelerator" anti recoil butt pad.

#### B25 Trap Evolution Taylor Made

This model is a prime example of everything you can have when you let the Custom Shop create that essential target-shooting weapon: a tailor-made gun. The Custom Shop lets you choose from a large number of practical and aesthetic options (made-to-measure stock, 3-piece fore-end, the grade of wood, chequering style, etc). Why leave anything to chance when it comes to improving your score, when you can stack the odds in your favour by using a gun that is perfectly crafted to give you exactly what you want?

BROWNING ARMS COMPANY (B.A.C.O.)

**BROWNING**

The Best There Is

2008

NEW

### Cynergy Hunter Light Grade 3

A stock in oil-rubbed grade-3 walnut, a steel action frame with animal scenes, two ducks taking flight on the right, two partridges on the left, together with a nickel-plated finish form the Cynergy Hunter's magnificent hunting finery. But the Cynergy's shape, design and performance are still the same. The Cynergy Hunter is the best of the latest generation of target shooting guns adapted for hunting.

### CYNERGY

80 YEARS AFTER THE INVENTION OF THE B 25, WITH THE CYNERGY, BROWNING HAS CREATED YET ANOTHER REVOLUTION IN THE WORLD OF OVER-AND-UNDER SHOTGUNS. YEARS OF RESEARCH AND TESTING HAVE BEEN REQUIRED FOR DEVELOPING THIS RELIABLE, HIGH-PERFORMANCE, ELEGANT SHOTGUN. THREE YEARS AFTER THE BIRTH OF THE CYNERGY SPORT, BROWNING TAKES MUCH PRIDE AND PLEASURE IN ANNOUNCING THE BIRTH OF THE CYNERGY HUNTING GUN, SO THAT ALL HUNTERS CAN BENEFIT FROM THE TECHNOLOGY AND BALLISTIC PERFORMANCES OF A SHOTGUN THAT IS UNIQUE.

The Cynergy is:

- The lowest action frame on the market: 60 mm;
- A modern design;
- The fastest second barrel: 0,0019 s ;
- High-performance steel-shot tested Back-Bored Magnum barrels.

The low action frame with its integrated hinge gives this incomparable gun exceptional balance and incredible strength. Just to prove it, the Cynergy's action frame is guaranteed for ten years.

Shouldering the Cynergy is a perfect, fluid, rapid movement; comfort when firing is exceptional, you are in line with a weapon that has virtually no recoil, and the muzzle flip between two shots is so low that the second shot is even faster. The Cynergy is also a model of aesthetics, both modern and attractive, a novel design characterised by its smooth flowing lines, a slim silhouette.

The Cynergy's single trigger action will give a sensation that you have never experienced before; incredibly fast, crisp shooting, in fact the fastest in the world. Thanks to the special firing mechanism on this shotgun - in a class of its own - the time between first and second shots is only 0.0019 seconds, against 0.0031 for our leading competitors.

The Cynergy is now available as a hunting gun, in calibre 12 Magnum with a steel or light alloy action frame and in calibre 20 Magnum with a steel action frame. The Cynergy hunting gun's extremely elegant lines are set off by the quality of its grade 3, oil-finished wood, but also by the hunting scene engravings on its nickel-plated action frame.

The Cynergy back-bored barrels also let you fire high-performance steel shot cartridges.

#### Cynergy Hunter Grade 3 20M

For lovers of small calibres and guns with elegant lines, the Cynergy Hunter 20 with its steel action frame has been made just for you! With its low action frame height, its tulip fore-end and its straight cheek-piece, this shotgun is a real 20 magnum calibre in the body of a 28.

Browning recommends  
the use of ammunition by  
Browning and Winchester.

NEW

## Heritage Hunter

Here is Browning's new top-range over-and-under hunting gun. The Heritage is the direct descendent of the side-plated B 25 and has inherited all its elegance. The engraving on its action-frame is a creation by Cesare Giovannelli, the Italian master who has trained most of the engravers in Italy today. The stock is made from carefully oil-finished top-quality walnut. With its rounded half-pistol stock and its tulip fore-end, this shotgun pays real homage to the B25, of which it is a worthy cousin. The Browning Heritage is luxury and reliability available to all.

## B525

*THE B525 IS ABOVE ALL A SYMBOL OF PERFECT MECHANICS THAT ARE IMPOSSIBLE TO FAULT. FROM THE FORGED-STEEL ACTION-FRAME TO THE WIDE FLAT BOLT PASSING VIA THE MASSIVE HINGE PIN OR THE BARRELS' CHROMED BORES, EVERYTHING ON THIS GUN IS ULTRA-RESISTANT, INCREDIBLY RELIABLE AND MADE TO GIVE YOU THE SAME EXCELLENT PERFORMANCE SEASON AFTER SEASON. SEMI-TRADITIONAL MANUFACTURE OF THIS WEAPON EXPLAINS THIS IMPECCABLE QUALITY. THE WORLD OF HAND-MADE CONSTRUCTION REIGNS OVER THIS SHOTGUN, WHICH IS ASSEMBLED A FIRST TIME - IN A DUMMY RUN - BEFORE BEING POLISHED, ENGRAVED, HARDENED AND THEN RE-ASSEMBLED. AT EVERY ASSEMBLY OPERATION, CONTACT SURFACES ARE CHECKED USING RED OCHRE ON BOTH METAL AND THE WOOD AND THEN HAND-FILED FOR PERFECT FITTING. IT IS THIS ATTENTION FOR DETAIL, THIS QUEST FOR PERFECTION AND FOR HONOURING GUNSMITHS' TRADITIONS, THAT GIVES THE B525 ITS WELL-JUSTIFIED REPUTATION FOR LONG LIFE. THE B 525, THE FIFTH GENERATION OF BROWNING'S OVER-AND-UNDER HUNTING GUN BUILT ON THE BASIS OF THE FAMOUS B25, ALL OF BROWNING'S HISTORY AND TRADITION COMBINED TOGETHER IN A SINGLE SHOT-GUN.*

B525

HUNTING

B525

Over-and-under shotguns

*THE BEST PERFORMING AND MOST RELIABLE SHOTGUN*

**B525 Hunter Prestige**

*A SYMBOL OF QUALITY AND RELIABILITY, A MODEL OF WHAT AN OVER-AND-UNDER SHOTGUN SHOULD BE.*

## 1. FAULTLESS MECHANICS

- Action frame made of robust forged steel.
- Wide flat bolt which guarantees locking surfaces which are three times greater than other systems.
- A unique hinge pin, wide diameter; gives optimal resistance to wear and a long life.
- Impact wheel ejectors : straighter, more powerful ejection than retaining ejectors.
- Chromed barrels and chambers, resist rust, easier maintenance.

## 2. HAND-MADE PRODUCT

- Exceptional high quality of manufacture. Each gun is assembled and fitted by hand like a B25
- The only factory made shotgun with this level of gunsmithing.
- Barrel action frame/ action frame made from steel.
- Wood/metal adjustment with red ochre.
- Each set of parts is exclusive to a particular gun and follows that gun throughout the manufacturing process.

## 3. GUARANTEED 10 YEARS

- The only shotgun whose action frame is guaranteed for 10 years.

## 4. ESSENTIAL FEATURES

- Excellent balance.
- Selective mono-trigger.
- Adjustable trigger with 3 positions on sporting models which allows you to adjust the trigger and length of pull.
- All hunting or sporting shotguns (over-and-under or semi-auto guns) by Browning, fitted with original chokes (Invector, Steel Invector Plus, Stainless steel Invector Plus, Teague, Briley, Midas, Diamond, Signature chokes) can fire "high performance" steel shot cartridges.

### B525 Hunter Prestige 12M

The charm of the prestige (Gr 5) is more discrete. The fit of the barrels, the hand finished engraving and the very attractive old silver Nitrate colour of its action frame make this an elegant gun in the best possible taste. It comes in an Opaline case.

This model has a stock with teardrops, and a multi-purpose 3" Magnum barrel like that of the Gr 1.

**B525 Hunter Light 12****B525 Hunter Light Advance 12****5 x Invector**

All over-and-under guns in the Browning and Hunter & Sporter ranges are delivered with 5 chokes.

#### **B525 Hunter Light Advance 12M**

The B525 Light range is expanded with this Advance model that offers a more comprehensive and detailed engraving which is finished by hand as well as grade 3 oil-finished walnut.

#### **B525 Hunter Light Classic 20M & 28**

Only 2.7 kg! The B525 Classic Light calibre 20 or 28 is Browning's lightest over-and-under hunting gun. Use of a light-alloy action-frame with its steel toner insert and an expert choice in oil-finished wood are the secrets behind the gun's remarkably lightness. The B525 Classic Light calibre 20 or 28 has all the joys of small calibre shooting combined with lightweight handling.

**B425 Waterfowl Camo 12 Super Mag**

Now chambered in 89 mm or 3 1/2", this version which is equipped with new Mossy Oak® Break up™ camouflage and Dura-touch coating, to give you unrivalled efficiency and comfortable use.

**B425 Waterfowl 12 Super Mag**

Designed for intensive use in natural aquatic environments, the Waterfowl will follow you on your duck and goose hunting expeditions with less risk of damage. Its stock is protected with the new Dura-Touch. It is chambered for 3 1/2" cartridges, and its barrel can accept steel shot and high load cartridges without any problem. The 62 mm "Invector Plus" Chokes ensure the best patterns possible.

## BACK-BORED BARRELS

**BROWNING REVEALS THE PROFESSIONALS' SECRET: BACK-BORED BARRELS.**

**FIRST USED IN 1990, "BACK-BORED" IS A TECHNICAL BREAKTHROUGH THAT HAS ALLOWED OUR SHOOTERS TO WIN NUMEROUS MEDALS.**

**BETTER IMPACT AND HIGHER VELOCITIES FOR IMPROVED SHOOTING ACCURACY. A "BACK-BORED" BARREL IS ONE WHOSE INTERNAL DIAMETER (THE BORE DIAMETER) HAS BEEN INCREASED BEYOND TRADITIONAL SPECIFICATIONS.**

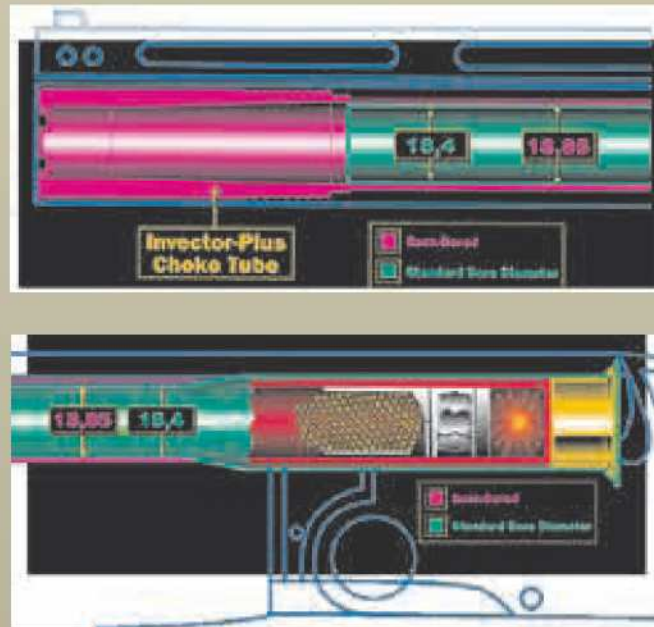

## 1. INCREASED PENETRATION VELOCITY

"Back-bored" ensures that there is less friction between the shot and the wall of the barrel. Instead of having to overcome friction, more of the energy generated by the gunpowder gases serves to propel the cartridge, thus increasing the velocity of the load.

The shot retains its ballistic quality.

The force of the pressure exerted by the barrel wall on the load is reduced, thus reducing the number of deformed pellets fired

## 2. IMPROVED SHOT PATTERN

The ballistic characteristics are improved and you achieve exceptionally uniform shot patterns with many more effective pellets hitting the target.

- **TESTED AND APPROVED BY THE BROWNING RESEARCH & DEVELOPMENT DEPARTMENT.**
- **"BACK-BORED TECHNOLOGY" BARRELS ALLOW YOU TO GET THE VERY BEST PERFORMANCE OUT OF THE CARTRIDGE.**

## 3. A 6% REDUCTION IN RECOIL

A reduction in recoil means improved shooting comfort. In a back-bored barrel, the load passes more easily reducing the amount of recoil felt by the shooter, thus improving his shooting comfort.

Fusion Evolve II Gold 12M

**FUSION EVOLVE**

THE **FUSION EVOLVE** IS WITHOUT DOUBT THE MOST SOPHISTICATED AND THE MOST "INTELLIGENT" OF ALL THE SEMI-AUTOMATIC SHOTGUNS ON THE MARKET. WITH ITS **ACTIVE VALVE PILOTED GAS-OPERATED SYSTEM**, IT CAN FIRE CALIBRE 12 CARTRIDGES FROM 28 TO 56 G, OR ORDINARY N° 12s (70 MM) OR 12 MAGNUMS (76 MM) WITHOUT ANY MANUAL ADJUSTMENTS BEING REQUIRED. THE ACTIVE VALVE ONLY USES A STRICT MINIMUM OF GAS TO GUARANTEE PERFECT RE-LOADING AND THE LONGEST POSSIBLE MECHANICAL LIFE.

**SPEED LOADING** GUARANTEES ULTRA-FAST LOADING, WHEN YOU NEED TO FIRE AN EXTRA CARTRIDGE JUST AS QUICKLY AS POSSIBLE. IN JUST ONE MOVEMENT, SLIDE THE CARTRIDGE INTO THE MAGAZINE TUBE AND IT IS CHAMBERED IMMEDIATELY. ASSOCIATED WITH THE CUT OFF, **SPEED LOADING** EVEN LETS YOU CHANGE A CARTRIDGE ALREADY IN THE CHAMBER FOR ANOTHER ONE THAT YOU SLIDE INTO THE EJECTION OPENING WITHOUT MOVING ANY OF THE CARTRIDGES IN THE MAGAZINE. IT IS A SURE, FAST AND SIMPLE SYSTEM. FOR ALL THESE REASONS AND, OF COURSE, BECAUSE THIS **BROWNING** SHOTGUN POSSESSES A HIGH-PERFORMANCE STEEL-SHOT TESTED **BACK-BORED BARREL**. TOGETHER WITH STOCK ADJUSTER SHIMS, INTERCHANGEABLE FLUORESCENT FRONT SIGHTS AND A CARRYING CASE FOR ALL THE CHOKES AND OTHER ACCESSORIES, THE **FUSION EVOLVE** IS WITHOUT ANY DOUBT THE MOST COMPLETE AND EFFICIENT SEMI-AUTOMATIC IN THE WORLD.

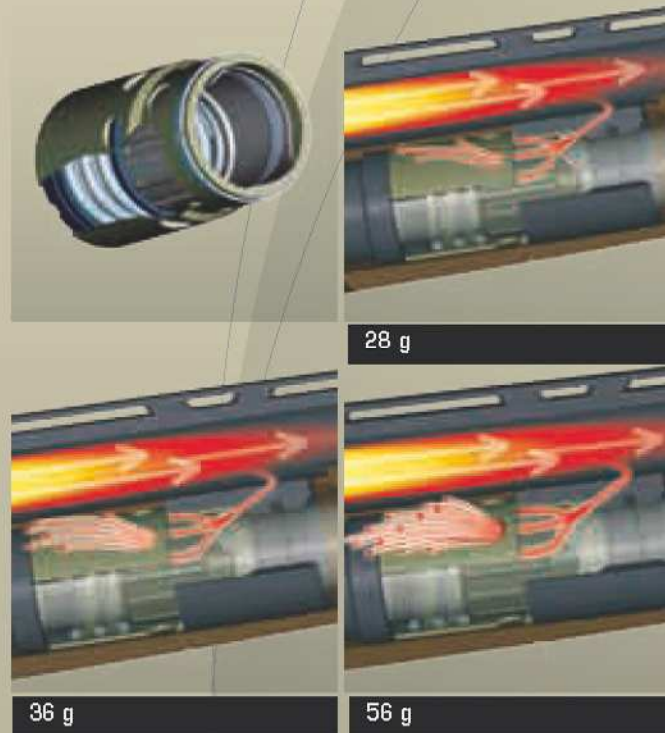

**fusion evolve**

### 1. RELIABILITY & VERSATILITY

The Fusion's piston has an "Active Valve system" regulating valve inside it. This regulating valve works independently of the piston, which makes it more efficient than other gas operated systems and means that it lasts longer.

- With light loads, the piston uses most of the energy generated by the gases for perfect operation.
- With heavy loads, the excess gas is rejected through the piston's side ventilation holes.
- Operates perfectly with all cartridges from 28 g to 56g.
- The regulating valve has 3 segments which ensure that it is perfectly tight and that the magazine tube is clean for excellent operation.
- The piston's extremely short stroke limits the quantity of gas given off.

### 2. EXCEPTIONAL BARREL

- The Fusion Evolve's Back-Bored barrel and its new, ventilated rib which is silver-welded are synonymous with great rigidity. The advantage of this strength when firing is that the points of impact are perfectly consistent and regular. Your shot pattern isn't scattered.
- The Fusion Evolve semi-automatic shotguns' barrels are completely interchangeable, so you can change them easily. Depending on your type of hunting, you could use a 61cm, 66cm, 71 cm or 76cm barrel on the same gun.

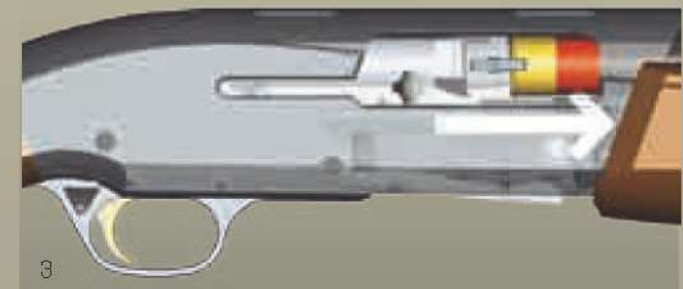

### 3. SPEED LOADING™

Express loading system

The exclusive Speed Loading [\*] and Cut Off combination gives Browning semi-automatic shotguns the following advantages:

- Express loading • Instantaneous cartridge loading in the chamber • Complete safety with the breech open
- Immediate reloading by disabling the Cut Off
- Ultra fast
- Extremely simple to load
- Just one action is required to load your gun: with the breech open, simply insert a cartridge into the magazine tube and it will be chambered automatically.

#### 4. CUT OFF MAGAZINE

It is the Speed Loading-Cut Off association that makes Browning semi-automatics, the fastest, easiest to use and safest shotguns.

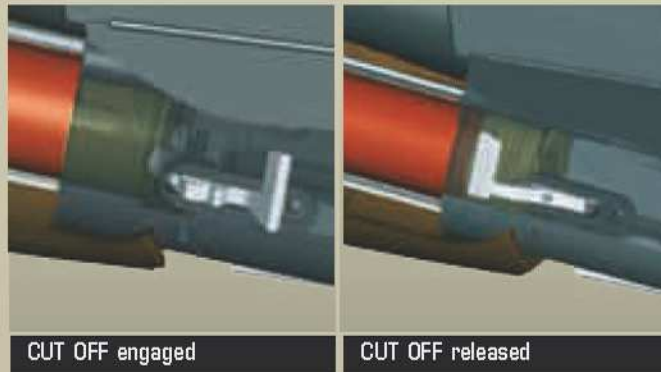

Fig. A - B

Cut Off engaged. The cartridges are blocked in the magazine tube.

A) Allows you to change the chambered cartridge quickly.

B) Gives great handling safety in the breech open position.

C) If you subsequently release the Cut Off, the first cartridge held in the magazine tube will be chambered automatically thanks to the Speed Loading.

#### 5. ESSENTIAL FEATURES

- Barrel and frame manufactured by the Fabrique Nationale (National Factory) in Herstal.
- Excellent balance and ergonomics.
- Ambidextrous safety devices, quick, easy adaptation.
- Hammer safety device exclusive to Browning, safer than simply a trigger safety device.
- All hunting or sport shotguns (over-and-under or semi-auto guns) by Browning, Winchester and Miroku fitted with original chokes (Invector, Steel Invector Plus, Stainless steel Invector Plus, Teague, Briley, Midas, Diamond, Signature chokes) can fire "high performance" steel shot cartridges.

- Very high quality assembly and finish.
- In removable version total capacity of 5 cartridges.
- Hi-Viz foresight with a set of 7 additional foresights
- Adjustable stock because of 6 inserts which allow it to be adjusted depending on your requirements

- Back Bore Technology barrels allow you to get the very best performance out of the cartridge:
- An increase in velocity and penetration
- Improved shot patterns
- A 6% reduction in recoil (see page 34)

- An extra flat carry case allows you to easily carry all the accessories you need with you.

Fusion Evolve II Gold 12M

Based on the Fusion Evolve II, the "Gold" version, as its name suggests is characterised by two magnificent gold inlays on its nickel-plated receiver.

Fusion Evolve New Elite Topcote 12M

Browning recommends the use of ammunition by Browning and Winchester

#### Fusion Evolve II 12M

Animal engravings and a nicked frame are done to a high standard and give a very special character to this gun which will be your favourite during your hunting trips.

#### Fusion Evolve New Elite Topcote 12M

Contemporary engraving with gold inlay and anthracite grey nickel plating capture the spirit of this new Elite finish, now available as part of the Fusion range. Another vital aspect is the Topcote finish that gives the stock and forend a high quality walnut appearance.

#### Fusion Evolve Plus 12M

With all the Fusion Evolve family features, this standard version is characterised by its grade 2 oil finished walnut, A dual tone frame and its matt-finished barrel.

Phoenix Topcote 12M

## PHOENIX

THREE YEARS HAVE PAST SINCE THE PHOENIX JOINED BROWNING'S RANGE OF SEMI-AUTOMATIC SHOTGUNS. THE PHOENIX FAMILY HAS GROWN EVERY YEAR AND NOW INCLUDES FIVE DIFFERENT MODELS. THE IDEA BEHIND THIS GUN IS TO OFFER BROWNING QUALITY AT AN ECONOMICAL PRICE. THIS "SHOOTING MACHINE" IS AT EASE ON ALL TERRAINS UNDER ALL SORTS OF WEATHER CONDITIONS, BECAUSE OF THE SPECIAL TREATMENT GIVEN TO ITS RECEIVER OR ITS WOODEN ELEMENTS AND BECAUSE YOU HAVE THE OPTION OF A COMPOSITE STOCK. IT INCLUDES THE ACTIVE VALVE SYSTEM AND BACK-BORED BARRELS, WITHOUT FORGETTING THE INVECTOR PLUS CHOKES THAT HAVE MADE BROWNING SEMI-AUTOMATICS SO SUCCESSFUL. PHOENIX, AN UNBEATABLE QUALITY-TO-PRICE GUN WHICH MAINTAINS OUR REPUTATION FOR QUALITY AND RELIABILITY.

phoenix

### Phoenix Topcote 12M

The Phoenix Top Cote is an improved version of the Phoenix with a special wood-coating treatment that also gives improved resistance to moisture. As for the receiver, it has a special black coating.

### Phoenix 12M

The Phoenix gives you access to Browning quality at the best price. 3" Back-Bore barrels fitted with removable Invector + chokes, high performance steel shot and the exclusive gas operated system "Active Valve System" make this gun a machine which can be fired in any conditions. Furthermore, its receiver decorated with a magnificent Phoenix is fitted with a special coating that gives superior resistance in saline conditions. Tests in saline mist, which are extremely demanding, have shown that the finish resisting corrosion for a considerably larger period than a similar gun with a classic finish.

### Phoenix 12M

### Phoenix Camo 12M Super Mag 3,5"

ALL PHOENIXES HAVE A DOVETAIL RECEIVER TO FACILITATE SCOPE MOUNTING.

**Phoenix Composite 12 Super Mag 3.5"**

This model's composite stock make it an extremely robust, all-purpose gun. With its Back Bore barrel chambered in 89 mm (3.5"), you can fire any type of cartridge from light 32g loads to 63g heavy loads which is particular useful for Goose shooting.

**Phoenix Camo 12 Super Mag 3.5"**

The distinctive "full camo" look of the Phoenix Camo distinguishes it from other semi automatic shotguns and it also proves highly effective when the success of your hunt depends on discretion and the ability to blend into the background. Ideal for hunting waterfowl and pigeons.

**Phoenix Special Canard 12 Super Mag 3.5"**

The Phoenix Special Duck is the waterfowl specialists' semi-automatic shotgun at a price accessible to all. It has all the technical characteristics of the Phoenix, but with its 3 1/2" chamber it can fire 89 mm super magnum cartridges. The receiver on this special model is black and decorated with a silver duck.

Browning recommends  
the use of ammunition by  
Browning and Winchester

## 1. THE QUALIFICATION OF NEW PRODUCTS

Before they are launched onto the market, Browning guns undergo numerous, very strict Browning internal tests. No product will be validated if it fails to completely fulfil the following requirements:

### 1.1 OPERATION AND ENDURANCE TESTS

- Minimum of 2 000 shots for rifles
- Minimum of 5 000 shots for hunting shotguns
- Minimum of 10 000 shots for sports shotguns
- Test conditions: the gun is cooled down every 50 shots and cleaned every 500 shots
- The full range of cartridges of different makes is used.
- No part breakage is tolerated.
- Once the test has been completed, none of the parts should be excessively worn..

### 1.2 TESTS IN ADVERSE CONDITIONS

- The gun should operate at extreme temperatures : from -30°C to +50°C

### 1.3 "TORTURE TESTS"

All of these torture tests are carried out in extreme conditions that greatly exceed those of the conventional C.I.P. standards. Browning guns' legendary solidity and reliability are largely due to them passing all of these tests.

- Overload tests for all guns
- Obstruction tests for rifles
- Safety tests : drop tests for all guns

## 2. 100% SYSTEMATIC INSPECTION OF MASS PRODUCED GUNS

Browning's extremely stringent quality checks impose a systematic inspection of each serial gun which is screened during numerous checks and tests.

### 2.1 GUN CHECKS

- Visual inspection of each product : gun + packaging
- Systematic measuring of certain points : headspace, chamber dimensions, weight, specific dimensions...

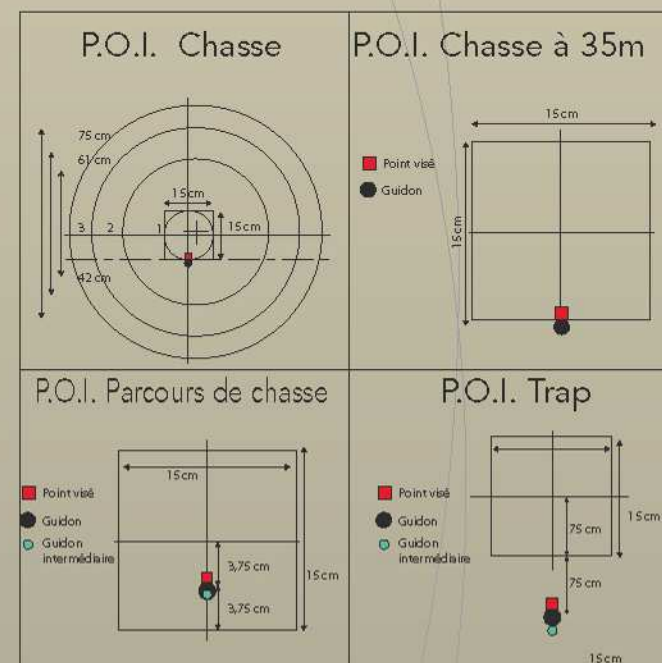

### 2.2 GUN TESTS

- Manual operation tests.
- Shooting tests : operation and accuracy.

### 2.3 ACCURACY TESTS

- For rifles: very precise check on bullet grouping.
- For shotguns:
  - P.O.I. ( Point Of Impact) test which is the shot pattern's average point or centre of aim.
  - This test is carried out at 35 m with different points of aim depending on the product and therefore its use:
- For under-and-over shotguns, the maximum difference between 2 shot patterns' centres should not exceed 10 cm with a convergence set at 35m.
- Systematic check on the quality of the lead shot patterns using computerised analysis to guarantee operation and extreme reliability.

### CCS 525 Elite

The Elite version of the CCS 525 has brand new engraving on the steel action frame, which is richer and deeper and is finished by hand. The grade 3 walnut stock has also been re-worked to give it a more traditional, finer design. Good looks and handling along with this double express rifle's technical qualities make it the ideal battue gun.

CCS 525 Elite

CCS 525

Works adjustment of CCS 525 at 60 m

- Tartan chequering.
- Battue strip which facilitates sight assembly.
- 56 cm barrels equipped with an exclusive convergence system : Easy, reliable adjustment of your weapon's accuracy depending on the ammunition or the sight used.

Browning recommends the use of ammunition by Browning and Winchester

### Browning has reinvented the Express Rifle

The barrels, the essential part of this gun, are both traditional and original. A spacer on the upper barrel ensures the accuracy of the vertical convergence of the barrels, while lateral convergence is ensured by the design of the barrel itself, which incorporates a unique "Cradle" strip. Once the ammunition has been chosen, a spacer ring is recommended and inserted securely under the foresight on the upper barrel, guaranteeing unequalled accuracy. (\*).

The weight and balance are perfect for current hunting conditions.

The action frame has been strengthened by means of high strength stainless steel inserts.

Very special attention has been paid to every detail of this gun: a "hog's back" stock with a Bavarian cheek piece, an accentuated tulip-shaped forearm for greater elegance, a fluorescent optical fibre foresight and a traditional battue rib allowing a scope to be mounted by a gunsmith in minimum time. The animal engravings with which it is decorated make this a very special and unique rifle.

(\*) It is essential that this operation is carried out by your gunsmith.

### CCS 525

Browning has been the leading producer of express over and under rifles for decades. With the introduction of the CCS 525 in the 525 range, Browning wanted to provide the demanding hunter with a gun that is attractive, while at the same time guaranteeing flawless operation and unequalled accuracy, and that can be easily adjusted to accept the different types of cartridge available on the market.

### CCS 525 adjustment wedge system

Exclusive barrel convergence adjustment system: Cannot be unset and can be adapted to different types of ammunition.

Thanks to this system, the double Express CCS525 rifles are originally set to 60m by the Liège Test Bench and the 2 impacts should be within a 5 cm square. The ammunition used is Winchester Partition 12.96 g and 18.53 g for 8x57JRS and 9.3x74R calibres, for the 30R Blaser, it is Blaser CDP 10.7 g ammunition. If you would like to use different ammunition you should adapt your gun using one of the 7 adjusting rings that are delivered with your gun.

### System operation:

Whatever the diameter of the adjusting ring mounted at the gun's muzzle, the barrel convergence angle maintains a natural pressure and therefore a permanent contact between the muzzle of the upper barrel and the barrel spacer wedge.

As this wedge is itself silver-brazed on the lower barrel, we are certain during firing that the position of the upper barrel's muzzle in relation to the lower barrel will be constantly maintained.

### Bar ShortTrac / LongTrac Luxe

The ultimate in refinement, the Bar Luxe plays a real trump-card in elegance with its new ultra-realistic animal engraving finished off by our best engravers. On this top-range model, the very best walnut has been chosen for the magnificent stock with its slight hog's back, Bavarian cheek-piece and tulip fore-end. The Bar Luxe is delivered in its own specially designed Opaline case.

## BAR

Does the **BAR**, even with its real name, the **BROWNING AUTOMATIC RIFLE**, still need to be presented? With the **BAR** a new generation of firearms was born, semi-automatic rifles for big-game hunting. Since it was created in 1966, by a certain **BRUCE BROWNING**, **JOHN MOSES BROWNING'S** grandson, which is real proof that it runs in the family, the **BAR'S** success has been unfailing. With over a million rifles sold in 42 years, the **BAR** is the unchallenged leader, the reference in semi-automatic rifles. It owes this title to the quality of its mechanism, to the smoothness of its gas-operated system, which reduces recoil sensations to a minimum, to its reliability, but also to the fact that it has been continuously improved to offer you better and better performance.

As the seasons go by, the **BAR** has been regularly improved and benefited from mechanical or aesthetic modifications to remain the best rifle in its category. Today, twelve different versions exist, offered in twelve different calibres. Whether you opt for a **SHORTTRAC**, a **LONGTRAC** or a traditional **BAR** with a steel or light alloy receiver, you will surely profit from over forty year's know-how, shooting and excellence.

# ShortTrac LongTrac

- The undisputed leader; Browning is the semi-automatic rifle specialist.
- 42 years' experience, the first BAR was launched in 1966.
- Over 1.000.000 BARs sold in the world

In 1966, Browning launched the BAR (Browning Automatic Rifle) that was to quickly become THE market reference. In spite of severe but often ineffective, competition, the BAR became the leading semi-automatic rifle in Europe. In 2002, in close collaboration with Winchester, Browning developed the WSM (Winchester Short Magnum) calibres, combining the power and the accuracy of classic "magnum" calibres with a smaller cartridge.

In 2003, Browning launched the ShortTrac, the first semi-automatic rifle on the market to be developed specially for WSM calibres. The smaller dimensions of the WSM cartridges have made it possible to create a lightweight, compact gun that guarantees "Magnum" performance. The ShortTrac incorporates all the experience of the BAR gained by our Research and Development departments over a period of almost 40 years for your maximum satisfaction.

## 2. THE MOST RELIABLE RIFLE ON THE MARKET 40 YEARS' EXPERIENCE

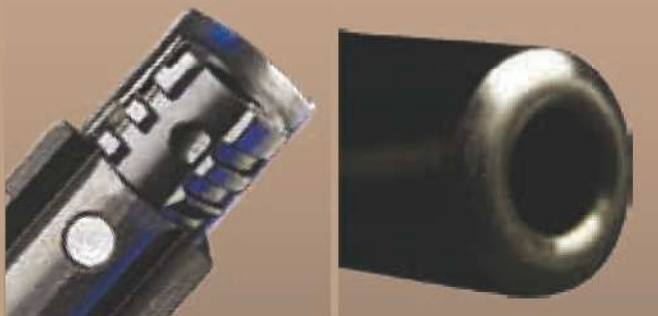

- Chromed chamber and gas cylinder; do not rust and make ammunition extraction easier.

- The Browning gas-operated system is adjustable; it therefore enables you to adapt the gun to the type of ammunition used. This operation must be carried out by your Browning gunsmith.
- Welded gas cylinder; perfectly watertight.
- Breech damping system, reduces mechanical parts' wear and stress.
- The regulating system's floating mass ensures regular supply and more reliability.

## 3. GREAT ACCURACY

- Locking occurs in the barrel by means of 7 lugs which engage in an extremely rigid way. This gives excellent shooting accuracy and the possibility of firing magnum cartridges.
- One piece barrel: better rigidity than bound barrels.
- Hammered barrel manufactured by the Fabrique Nationale (National Factory) in Herstal, a guarantee of quality.
- The barrel is breeched in the frame which gives great rigidity.

## 4. ESSENTIAL FEATURES

- Very high quality finish and assembly.
- Exclusive Browning B.O.S.S (Ballistic Optimizing Shooting System) system: Improved accuracy

The BOSS™ system allows the rifle to be quickly adjusted to the desired load. Each barrel equipped with the BOSS™ is marked with 10 incremental markings, and a table of average settings is supplied for each calibre.

Reduced recoil

The BOSS™ system allows the bullet to leave the barrel at the ideal moment, i.e. in the "peak" or the "valley" of the vibration wave when the muzzle is virtually motionless.

- Reversible safety device for left-handed users.
- Height- and side-adjustable stock on Short & LongTrac using 5 inserts.
- Innovative design
- Recoil sensation much softer than with bolt action rifles.
- Drop-down magazine set
- For countries where the legislation allows it, a removable drop-down magazine with a 6 shot capacity is available as an accessory.
- There are 3 buttplates of different sizes [1.3cm - 2 cm - 2.5cm], which enable you to adjust the length of your gun to suit your build. The original gun is delivered with the 2 cm intermediary butt plate.
- This red dot on the receiver acts as a gun-locking indicator for increased reliability. You can also load your gun in silence, safe in the knowledge that it is locked properly.

- An ergonomic magazine catch allowing easy access to the hinged magazine holder and easier loading.

TOPCOTE

**Bar ShortTrac/Bar LongTrac Eclipse Gold**

Continuing the Eclipse model's features, the Eclipse Gold version is characterised by golden subjects, wild boar and deer, on each side of the receiver. Furthermore, it has a beautifully piped barrel, which facilitates the barrel's cooling.

**BAR ShortTrac** SPECIALLY DESIGNED FOR THE NEW  
"WINCHESTER SHORT MAGNUM" CALIBRES

**BAR LongTrac** SPECIALLY DESIGNED FOR  
CONVENTIONAL CALIBRES

#### Bar ShortTrac/Bar LongTrac Elite Topcote

Numerous aesthetic innovations make this "new Elite" a complete success. Firstly, regarding its receiver endowed with brand new grey anthracite nickel-plating that is far more resistant, which bears a modern engraving with a gold inlay (by Ch. Perrin). Another essential point, the wood benefits from an all-new glossing treatment "Top Cote", which also gives greater resistance to moisture.

#### Bar ShortTrac/Bar LongTrac Plus

With its tone-on-tone Browning stamp on the receiver, oil-rubbed walnut finish, the Standard Plus model is a refined version of the standard model. The Bar ShortTrac and LongTrac Standard Plus is available in the most popular gauges and comes with an ABS carry case.

Browning recommends  
the use of ammunition by  
Browning and Winchester

### Bar ShortTrac / Bar LongTrac Composite

The stock and pistol grip made of composite materials make this gun extremely robust in any conditions. Also, the rubber over-moulding affixed to some essential parts give superior and very comfortable handling and grip.

### Stock adaptability

Different types of freely interchangeable stocks and fore-ends are available as spare parts for fitting to your ShortTrac/LongTrac rifle.

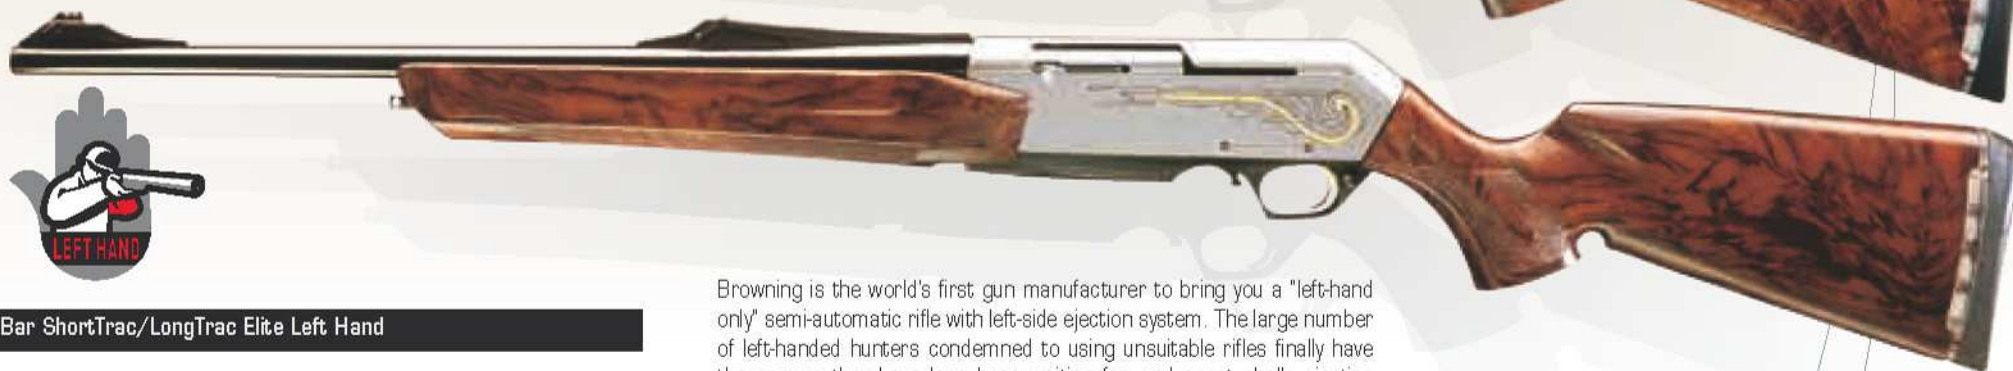

**Bar ShortTrac / Bar LongTrac Camo**

This ShortTrac/LongTrac camo version has an all-over Mossy Oak® Break Up™ pattern to blend in perfectly with the undergrowth, and is best used in conjunction with camouflage clothing. Highly effective for big-game hunting.

Scope not provided

**Bar ShortTrac/LongTrac Eclipse Gold Left Hand**

**Bar ShortTrac/LongTrac Elite Left Hand**

**Bar ShortTrac/LongTrac Left Hand**

Browning is the world's first gun manufacturer to bring you a "left-hand only" semi-automatic rifle with left-side ejection system. The large number of left-handed hunters condemned to using unsuitable rifles finally have the answer they have long been waiting for, and spent shells ejecting close to their eyes or burning their arms are now a thing of the past. Comes in two versions: New Elite and Eclipse Gold.

**Bar Acier Affût BOSS™**

The addition of the BOSS™ system produces two particularly interesting effects : reduced recoil (in the region of 30 to 50 %) and improved accuracy.

The performance of the BAR is thus improved when using a scope or firing long range shots.

Also exists with a traditional barrel.

**Bar Acier Battue**

With its more compact barrel, its battue type rib and its fluorescent fore sight, this gun is exceptionally effective and easy to handle in battue or stalking situations.

**Bar Light Affût**

This model is designed so that still hunters too can enjoy a weapon that is light, reliable and extremely accurate.

Scope not provided

#### Eurobolt

Without doubt the most versatile rifle on the market. Indeed, the Eurobolt is unique in that it is provided with interchangeable sights. The gun can thus be easily modified from a stalking rifle (with a rear leaf sight) into a driven game rifle (with a quarter rib). The trigger has a "stetcher" (set trigger) mechanism, allowing the gun to be fired with a very light trigger pull (hair trigger) for very accurate shots. The Bavarian "hog's back" stock is always perfect, both for sighting with open sites and with a scope. Supplied with 2 sights: rearsight + battue rib: to be mounted according to choice.

Interchangeable Battue-type rib and rearsight.

### A-Bolt Composite Stalker

Ideal for target shooting, vermin or game, the stainless stalker seduces as much by the intrinsic qualities of its materials as by its looks. Its composite fibreglass/graphite stock, together with its stainless steel barrel and action make it a gun that is perfectly suited to all kinds of weather.

### A-Bolt Composite Stalker

Sharing the same characteristics as the rest of the A-Bolt range, this new Stalker version, with its composite stock, will withstand the most severe conditions. It will also meet every expectation of both hunters and target shooters.

#### A-Bolt Titanium

Everything has been studied to make this rifle a genuine featherweight : 100% Titanium casing, a breech made of composite materials, a super light stock specifically developed by Bell and Carlson which is the result of a combination of composite materials and fibreglass. A Pachmayr Decelerator butt plate softens the recoil.

#### A-Bolt Hunter Field

A very European look for this A-Bolt Hunter Field whose essential element is a Monte Carlo stock, with a matt finish, which gives greater comfort when firing with a scope.

[Accessories not provided]

#### A-Bolt M1000 Eclipse

This version is specially designed for long-distance sports shooting. Two major components suit it to this purpose: a heavy barrel offering superior accuracy and a Monte Carlo stock whose ergonomic grip ensures perfectly stable handling.

### Acera Battue

With the Acera, reloading simply involves a straight-pull action: a straight back-and-forth movement along the line of the gun is all that is required. But its other major advantage is that the bolt is completely enclosed in the receiver. This gives increased strength and reliability and the hunter is thus able to keep the target in his sights while reloading. Available in calibre 270 win, 7X64, 7RM, 30.06 and 300 WM. Comes in a black ABS carry case.

The seven lug rotating bolt engages directly into the barrel extension, making it particularly strong and reliable.  
Drop-down magazine for speed and ease of loading.

Walnut "hog's back" stock. The Bavarian cheek piece adds to its already good looks.

NEW

**BLR Light Weight**

This is the traditional version of the BLR. This lever action arm is at home everywhere. On rifle ranges, in the hide or when stalking where its lever loading system is extremely reassuring when you are going through difficult terrain with your gun slung or resting on your shoulder.

NEW

**BLR Light Weight Take Down**

The lever-action rifle is the most traditional American rifle. Redesigned by Browning, this myth of the wild west has become a modern, highly effective hunting gun. The BLR is the only lever-action rifle developed in a magnum calibre. Its mechanics are faultless and characterised by their smoothness of operation, it has a removable magazine, it is pre-equipped for fitting a scope and has a top-quality barrel.

The BLR now exists in a Take Down version, i.e. you can dismantle it for easy transport on hunting trips. No tools are required for dismantling, which is a quick, easy operation that in no way modifies the accuracy of your gun. By moving an slide on the front of the receiver and drawing back the breech, the arm is separated into two parts, barrel and fore-end on one side, stock and receiver on the other. Re-assembling is just as easy.

**SPECIAL GTS Elite 12M**

With its superb engraving, this version of the GTS gains in distinction and elegance. The engraving is based on the distinctive GTS design (of a duck gradually being transformed by "morphing" into a clay), further enhanced with 24 carat gold and additional decorative engraving, and superb oil-rubbed European walnut.

**5 Invector Plus**

All over-and-under guns in the Browning and Hunter & Sporter ranges are delivered with 5 chokes.

Browning recommends the use of ammunition by Browning and Winchester.

#### **SPECIAL GTS 12M**

This is the ideal model for both sporting clays and hunting. Its back-bored barrel, its 10 mm rib and its ability to shoot any type of cartridge (including steel shot) make it an incredibly efficient gun, without loss of comfort, for hunting waterfowl and migrating birds. It has removable butt swivel rings, its stock is made from very attractive selected European walnut with an oil-rubbed finish.

Removable butt swivel ring system supplied with each GTS

2008

Cynergy Composite Black Ice 12M

## CYNERGY

MAKE YOUR SHOTGUN A NATURAL EXTENSION OF YOUR BODY, DESIGN AN OVER-AND-UNDER SO NOVEL, WITH SUCH HIGH PERFORMANCES THAT YOU CAN FORGET IT AND CONCENTRATE ENTIRELY ON YOUR TARGET. IT WAS BY DEFINING THESE TWO OBJECTIVES AS A STARTING POINT THAT THE CYNERGY WAS BORN. THIS SHOTGUN SO UNIQUE IN ITS RANGE HAS COMPLETELY REVOLUTIONIZED THE VERY CONCEPT OF THE OVER-AND-UNDER GUN, EVEN THOUGH IT WAS A PRINCIPLE DESIGNED BY BROWNING IN 1925. THE CYNERGY IS THE BEST SHOTGUN IN ITS GENERATION AND MOST CERTAINLY THE BIGGEST INNOVATION IN GUNSMITH WORK SINCE THE BIRTH OF THE B25 OVER 80 YEARS AGO.

THE CYNERGY IS 25 % LESS RECOIL THANKS TO ITS SPECIAL "INFLEX" RECOIL PAD THAT GUARANTEES FIRING COMFORT TOTALLY UNKNOWN UNTIL NOW, PLUS THE POSSIBILITY OF HAVING A GUN PERFECTLY SUITED TO YOUR OWN HEIGHT THANKS TO THE THREE DIFFERENT THICKNESSES OF RECOIL PAD AND INSERT SUPPLIED. THE CYNERGY IS ALSO THE MOST RAPID SHOT ON THE MARKET, 0.0019 S... ABOVE ALL, THE CYNERGY IS THE LOWEST ACTION FRAME, ONLY, 60 MM, THANKS TO A NEW, EXCLUSIVE HINGE, GUARANTEED FOR 10 YEARS. THE CYNERGY IS ALSO A CHOICE OF THREE DIFFERENT TRIGGERS, ADJUSTABLE TO THREE DIFFERENT POSITIONS. LASTLY, THE CYNERGY IS A UNIQUE, MODERN AND INCREDIBLY ATTRACTIVE DESIGN.

AND LIKE ALL THE BROWNING SHOTGUNS, THE CYNERGY HAS BACK-BORED BARRELS, PARTICULARLY HIGH-PERFORMANCE, CAPABLE OF FIRING HIGH-PERFORMANCE STEEL SHOT AND FITTED WITH INVECTOR «DIAMOND» TITANIUM CHOKES.

CYNERGY

Since the introduction of John M. Browning's famed Superposed, the name Browning has been synonymous with innovative and reliable over and under shotguns. The best-selling B525 followed, successfully bearing the flag of Browning shotgun superiority and further enhancing Browning's place as the pre-eminent over and under shotgun company. Continuing with the Browning tradition of quality and advanced technology, 2008 is the year of the Cynergy™ — a totally new low profile shotgun destined to take its place among the rich lineage of Browning shotguns. Like the Superposed and B525, the Cynergy is more than just another shotgun, it is uniquely Browning. The Best There Is™.

### 1. INNOVATIVE DESIGN

- The most innovative over-and-under shotgun on the market.
- Developed by THE creator of the over-and-under shotgun.
- A silhouette which is classically elegant, modern and radically different.

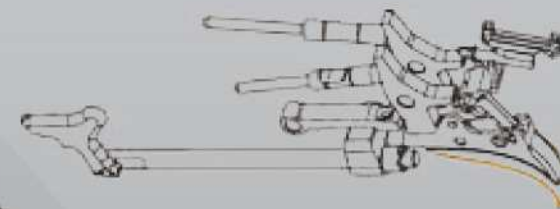

### 2. THE LOWEST ACTION FRAME PROFILE : 60MM

Its exclusive integrated hinge system offers an ultra low action frame:

- A natural extension of the shooter.
- Reduced recoil sensation.
- Reduces the barrel flip, allowing a faster second shot.

### 3. FASTEST FIRING : 0.0019 SECONDS

- 0.0019 seconds as opposed to 0.0031 for the competitors.
- New exclusive inversed firing system.
- Use of rocker arms to inverse the direction of the impact going from the impact wheels to the firing pins.
- Reduction in the stroke of moving parts: gives sharper, faster shooting.

#### 4. 25% LESS RECOIL

- "Inflex" butt plate, its design and material means that more recoil is absorbed than with any other butt plate.
- The plate's exclusive structure allows 1.5 to 2 times more absorption than with a traditional plate.
- Excellent shooting comfort, ideal for women and young shooters.
- Easy to adjust and economical stock length as there are 3 butt plates and an insert. 6 possible configurations give an adjustment range of 32mm.
- The Cynergy is also available in the Pro version: traditional stock

#### 5. ESSENTIAL FEATURES

- Exceptional long-life and robustness thanks to its design and the integrated hinge system.
- Larger action frame surface, reduces both wear and rubbing.
- Mechanical inertial triggers, avoids double firing and guarantees the 2nd shot.
- Adjustable trigger with 3 positions on target shooting models which allows you to change the trigger and make a pull length adjustment.
- Linear impact wheel ejectors : straight, powerful ejection.
- Maximum safety : the only shotgun with this level of safety with both a trigger safety device, a group firing safety device and a rocker arm safety device.

- Back-bored barrels with a lightened profile : lighter and faster swing. [see page 30].
- New "Diamond" Titanium chokes, Titanium PVD-treated chokes which give excellent ballistic quality as well as perfect resistance to wear and corrosion.
- Chromed barrels and chambers: resist rust and makes maintenance easier.
- Steel Shot proofed for the hunting class models. All over-and-under and semi-automatic hunting and sports rifles from Browning, Winchester and Miroku which are fitted with original chokes (Invector, Invector Plus steel, stainless, Teague, Briley, Midas, Diamond, Signature) can fire "high performance" steel shot cartridges.
- 2 flat bolts located on the barrels ensure excellent locking.

Cynergy Pro Sport Cal 12M

The Cynergy "Pro Sport" range offers guns fitted with conventional stocks.

New "Diamond" Titanium PVD treated chokes impart excellent ballistic performance and give perfect abrasion resistance and anticorrosion properties.

Browning recommends the use of ammunition by Browning and Wadsworth.

**Cynergy Pro Sport 20M**

**Cynergy Pro Sport Adjustable 12M**

**Cynergy Sporter Inflex 12M**

Specially designed for target shooting, the Cynergy Sporter stands out in particular because of its exclusive Diamond Titanium external chokes which offer excellent ballistic quality. Its look and revolutionary design without a doubt give the shooting world a real revival.

**Cynergy Composite Black Ice 12M**

Its futuristic appearance will be the talk of the shooting grounds. Stock and fore-end made of composite materials with rubber inserts give this shotgun a significant look and great resistance to the elements. 3 adjustable cheek-pieces are delivered with the gun enabling you to modify the stock's cast and comb height as you wish.

Cynergy Pro Trap 12

The "Pro Trap" range offers conventional stocks that have been specially made by the Italian stockmaker Esseviere for the various Trap disciplines. Two stocks versions available: with drops of 35-45 mm or 30-40 mm.

Midas Chokes: easily replaced without need for a wrench. They provide maximum ballistic performance.

Developed in conjunction with Briley.

All over-and-under guns in the Browning and Hunter & Sporter ranges are delivered with 5 chokes.

Ultra XS Prestige 20M

Ultra XS 12M

Sporting clays is an increasingly technical discipline with a very wide range of trajectories. A field course, a wood course, with a majority of incoming and going away clays... It is therefore necessary to be able to alter the configuration of the stock in a matter of seconds. The XS Sporter version is equipped with Midas chokes. Comes in an aluminum carry case.

Ultra XS non adjustable 20M

Traditional stock for this version of the Ultra XS, fans will be overjoyed.

# ULTRA XTR

Ultra XTR Prestige 12

As its name suggests, it is the quality of the wood used in this grade 4 version of the XTR gun that sets it apart. The engraving has been completely renewed with silver inlays and a brand new design. This model has its own special range of 100% titanium chokes manufactured exclusively for Browning by Briley.

(\*) Average values - supplied with Allen key for adjustment of stock

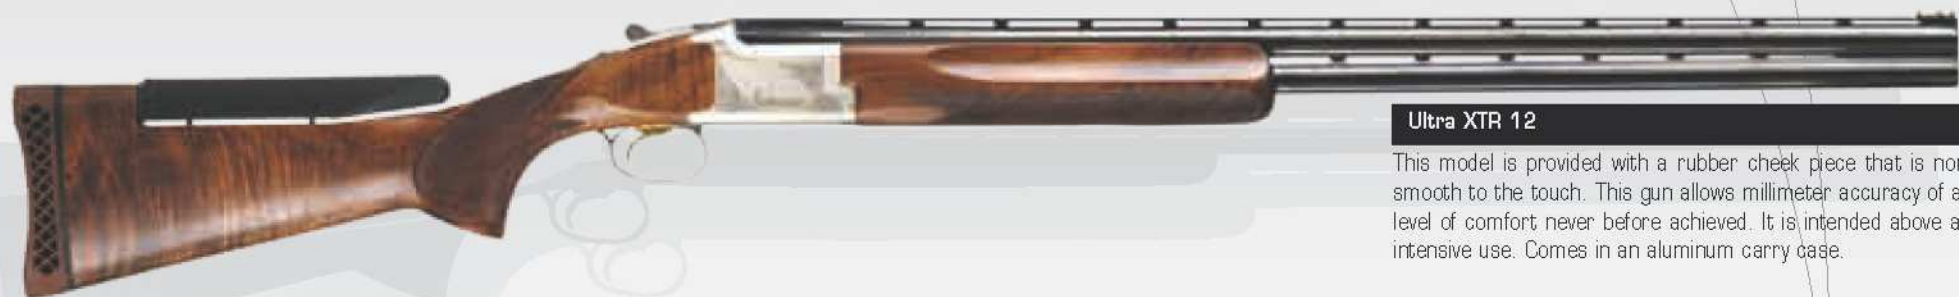

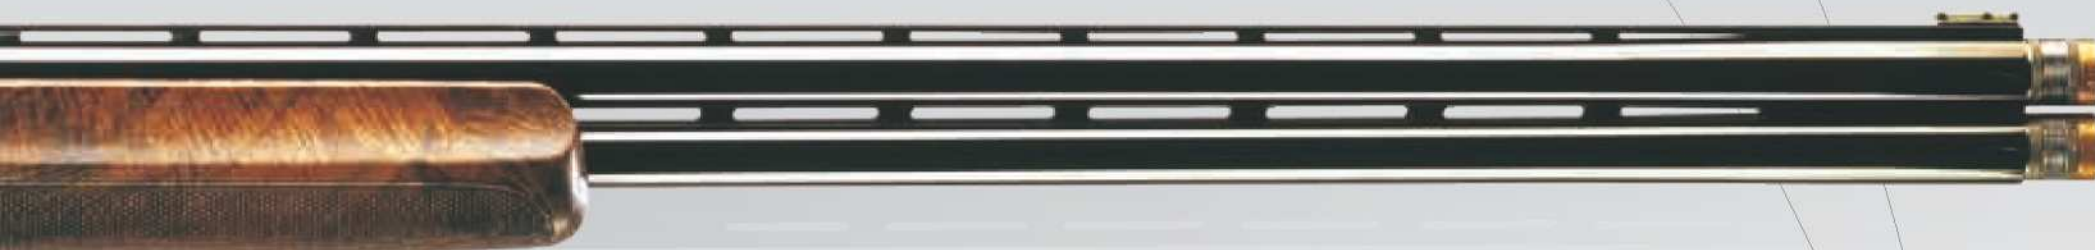

Supplied with 3 different triggers. Quick and accurate, as its position can be adjusted to suit the size of your hand.

Revolutionary... Undo the single adjustable screw through the butt plate, move the cheek piece to the desired position and retighten the screw. You are now ready to shoot.

#### Ultra XTR 12

This model is provided with a rubber cheek piece that is non-slip silky smooth to the touch. This gun allows millimeter accuracy of aim with a level of comfort never before achieved. It is intended above all for very intensive use. Comes in an aluminum carry case.

#### Ultra XSH 12

Intended for trap shooters seeking maximum versatility between disciplines (trap – double trap and helice [ZZ bird]), this Ultra XSH is equipped with removable Midas chokes and has 74 or 76 cm barrels. Comes in an aluminum carry case.

Midas Chokes: easily replaced without need for a wrench. They provide maximum ballistic performance.

Developed in conjunction with Briley.

All over-and-under guns in the Browning and Hunter & Sporter ranges are delivered with 5 chokes.

Grand Prix

### Grand Prix Trap

A major innovation, the Grand Prix Sporter or GP Sporter is fitted with a selective ejection system, which allows you to have either ejection or extraction mode. The GP Sporter is ideal for competition shooting with crisp triggers set at 4 lbs and a Back Bored barrel fitted with Midas chokes.

This gun is attractive with a modern, sporty engraving which includes a silver and gold design.

### Ejection control

Midas Chokes: easily replaced without need for a wrench. They provide maximum ballistic performance.

Developed in conjunction with Briley. All over-and-under guns in the Browning and Hunter & Sporter ranges are delivered with 5 chokes.

### Grand Prix Sporter

Following the Sporter model, the GP shotgun range with disconnectable ejector is now available in a Trap Shooting model.

B5.25

NEW

### Heritage Sporter 12M

The target-shooting version of the Heritage, the Sporter, has all the lines of the hunting model with its magnificent side-plates, plus ventilated upper and central ribs for optimal barrel-cooling and a perfect view when firing. The pistol grip and tulip fore-end are made from magnificent, oil finished walnut. The Heritage Sporter combines all the performances of a modern target-shooting gun with the elegance of a real luxury shotgun.

### B525 Sporter 12M

Following the introduction of the hunting B525 in 2003, the range is naturally being developed this year in the Sports shooting field. In fact, it is a complete range of B525 Sport which see the light of day with numerous models which reveal major innovations:

- The new barrels are now chambered in 3" which allow steel shot to be fired, in the models fitted with adjustable, "Invector" type chokes. These same "Invector" are also new, as they are going to be made of "stainless steel" from now on, which makes them light and sturdy to improve patterns.
- Another change, the trigger pulls have been re-worked to become both lighter and more crisp.
- The B525 Sport line is resolutely innovative with a specific re-filing of the action frame and the barrel wings. All the models are also fitted with ventilated side ribs which improve the guns handling particularly.
- The wood benefits from an all new oil finish which is far brighter.
- All over-and-under guns in the Browning and Hunter & Sporter ranges are delivered with 5 chokes.

**B525 Trap 12**

**B525 Trap Advance 12**

**B525 Trap / Trap Advance 12**

These two B525 Trap versions are perfectly designed for Trap, they benefit from a stock and forend whose dimensions have been carefully studied, a rib which is 13 mm wide and long barrels. As for the Advance model, it is endowed with magnificent English style engraving and superior quality wood.

### Buck Mark Rifle

This is without doubt one of our very favourite Browning products. With its exceptional, highly accurate and reliable design, this gun provides a vast range of possibilities of use.

### Buck Mark Classic Target Rifle

This is the latest addition to the Buck Mark Rifle range. It has been designed to give the shooter the maximum possible accuracy through the use of a heavy large diameter Match type barrel. The laminated wooden stock and forearm give it a special and highly distinctive look.

#### BL .22

This gun, with its undeniable "Wild West" charm features a very short travel lever (33"), external hammer and magazine tube. It also allows the possibility of mixing all types of cartridge (long, long-rifle, short) without risk of jamming.

#### SA .22

This much copied, never equalled rifle has been continually produced since 1924 and has something for everyone:

operation in "blow-back" mode (unlocked breech operated by gas)

- automatic ejection, cocking and loading
- loading through the stock (the magazine tube is pulled to the rear and the cartridges are dropped one at a time into an opening in the stock)
- bottom ejection
- barrel take-down with wear adjustment

TARGET

T-Bolt

Rifles

Scope not provided

#### T-Bolt .22 / 17HMR

In the language of today, this rifle is a «vintage» model. To be completely clear, we should say that it is a re-edition of a best-seller, a legend. The .22 LR rim-fire rifle, used by so many for firing their first-ever rounds, is back, similar to the old version in terms of aesthetics, but with mechanics that have been considerably modernised. The T-Bolt still features its straight-pull bolt that chambers cartridges from a special 10-round rotating magazine. The arm's accuracy is notably due to its floating barrel.

## Buck Mark

Browning Buck Mark rimfire pistols are very much in demand owing to their quality, reliability, accuracy and variety.

The Ultragrip RXTM and Ultragrip DX™ represent the very latest in grip technology. These new grips have an ergonomic profile with the contour and texture of the checkering combining to offer ideal handling. Your hand will automatically take hold of the grip in exactly the same place on every shot, resulting in more instinctive shooting and improved accuracy. The textured surfaces are comfortable and effective under all conditions and for all ergonomic variations.

### Operation

The Blowback action of Buck Mark pistols makes for simpler, more reliable operation.

### Slide

The two reinforcements on each side of the slide offer excellent grip. The slide-stop release can easily be activated with either hand.

### Barrel

Many models have heavy barrels for improved stability. All chambers are hand-reamed and muzzle crowns are recessed to protect the grooves from damage that could degrade accuracy.

### Rear sight

The Pro-Target™ sight with its 16 clicks-per-revolution adjustment is mounted as standard on all models. This sight provides a more accurate range of adjustment than standard 12-click sights.

### Front sight

Plus models are equipped with a Truglo®/Marble's® fibre optic front sight.

### Receiver

While most of the .22LR pistols on the market are cast or manufactured from sheet metal stampings, every Buck Mark receiver is CNC machined from a 7075-T6 aluminium block to fine tolerances.

### Magazine

The magazine body is heat-treated for long-term charging reliability. Its coil spring enables a more regular, stable feeding action to be achieved than the usual "Z" spring. Ten-round capacity.

### Magazine release

Positioned near to the trigger guard for extremely handy operation.

### Trigger

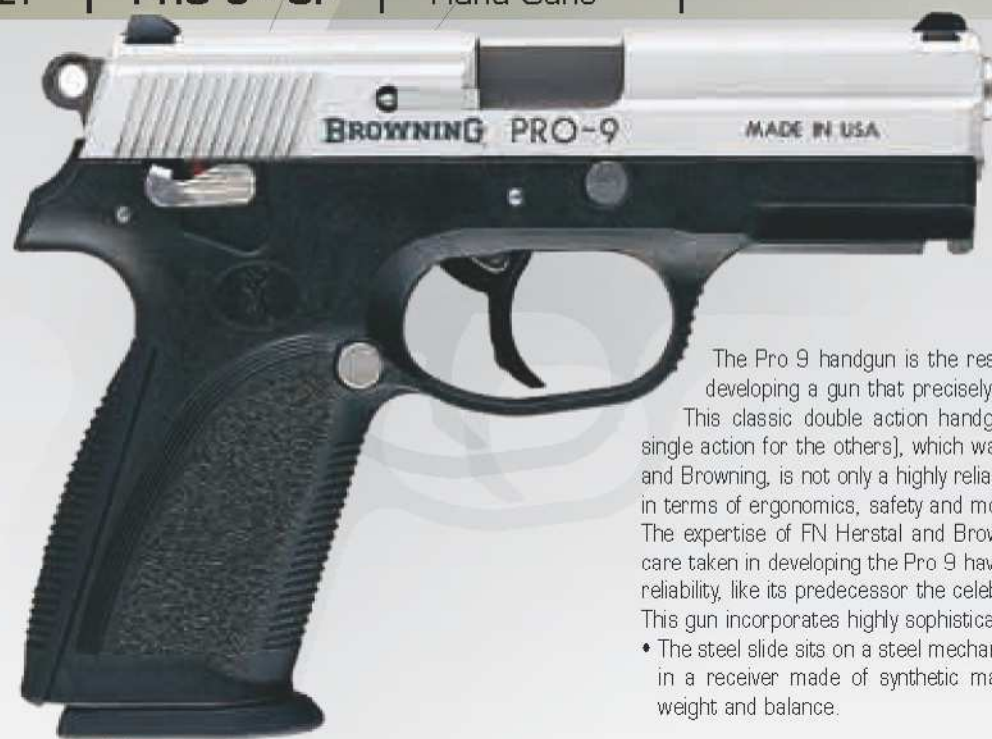

Offering great performance compared with the competition, the trigger break on Buck Mark pistols is light, crisp and precise.

### Safety catch

Large manual safety catch with thumb setting. The trigger is disconnected when the magazine is removed for greater safety.

### Pistol grip

Several varieties of wood, laminates and composites are available. The rubber Ultragrip RXTM (URX) and wooden Ultragrip Deluxe™ (UDX) ambidextrous grips provide a perfectly ergonomic hold.

The Pro 9 handgun is the result of lengthy research aimed at developing a gun that precisely meets the needs of the market.

This classic double action handgun (double action for first shot, single action for the others), which was jointly developed by FN Herstal and Browning, is not only a highly reliable gun but also a unique solution in terms of ergonomics, safety and modularity.

The expertise of FN Herstal and Browning in handgun design and the care taken in developing the Pro 9 have already made it a "Standard" of reliability, like its predecessor the celebrated HP.

This gun incorporates highly sophisticated technological solutions:

- The steel slide sits on a steel mechanical cradle, which is itself housed in a receiver made of synthetic material, thus combining strength, weight and balance.

## PRO 9

- The firing mechanism is housed in an easily replaceable "firing box", for ease of servicing, both for yourself and your gunsmith.
- A medium-sized handgun, the handle can be adapted to suit the hand of each user.

Safety has not been ignored. The Pro 9 handgun is equipped with the most modern systems:

- Firing pin safety to avoid the gun accidentally firing without first pulling the trigger.
- A safety lever to make the gun safe and to deactivate the hammer with or without a cartridge in the chamber.
- Finally, it is fitted with a rail which is able to receive an extensive range of accessories, such as flash lights, laser designators, etc.

#### GP Practical ajustable

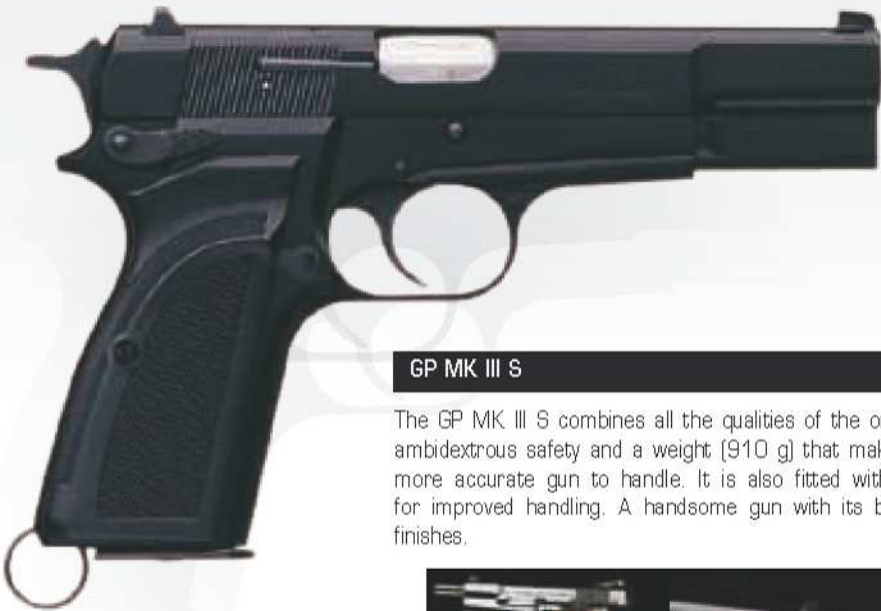

The GP Practical has been developed to meet the stringent demands of "Practical Shooting". It includes numerous improvements, such as :

- Adjustable, low profile sights
- Particularly crisp trigger pull
- Ultra precise handling through the use of Pachmayr chequered rubber grips
- Hammer redesigned to avoid getting caught when drawing
- Increased weight and improved stability
- Ambidextrous (left/right) with retained magazine safety
- Larger magazine entry in the frame
- Ejectable magazine equipped with Pachmayr rubber buffer
- Particularly corrosion resistant finishes

#### GP Sport

The latest standard version of the HP handgun incorporating new low profile sights.

#### GP MK III S

The GP MK III S combines all the qualities of the original HP with an ambidextrous safety and a weight (910 g) that makes it a safer and more accurate gun to handle. It is also fitted with Pachmayr grips for improved handling. A handsome gun with its blued and chrome finishes.

#### GP Silver Chrome

The GP also exists in a Silver Chrome version, equipped with an adjustable backsight that can be adjusted for both windage and elevation and a sport foresight with a rounded base. It is also fitted with Pachmayr grips to provide improved handling. A handsome gun with its blued and chrome finishes.

## INTRODUCING NEW HYDRO-FLEECE A.T.

**THE MOST ADVANCED HUNTING CLOTHING  
SINCE ORIGINAL HYDRO-FLEECE**

Hydro-Fleece, the name hunters have known and trusted for waterproof, breathable protection for years, **has been totally redesigned and reengineered for 2008**. New Hydro-Fleece A.T. [Advanced Technologies] assures the highest degree of performance possible using advanced technology not available previously. Here's what has changed:

- **NEW POCKET DESIGNS ON MOST MODELS**
- **GAME BAG ON BACK BOTTOM**
- **SELECTWEIGHT™ INSULATION PLACES DIFFERENT WEIGHTS OF INSULATION IN VARIOUS PARTS OF THE GARMENT FOR MAXIMUM PERFORMANCE**
- **ODORSMART™ ANTIMICROBIAL/MOISTURE WICKING LINING FABRIC KEEPS HUNTERS DRY AND ODOR FREE**
- **ODORSMART™ INSULATION FOR A SECOND DEFENSE AGAINST ODOR**
- **NEW FEATHERWEIGHT/NEOPRENE CUFFS WITH MOLDED ONE-PIECE HOOK AND LOOP CLOSURE**

In addition to all of the above **NEW features**, traditional features like double needle construction, barrier strips between the outside shell and linings, hood and loop closures, YKK® zippers, detachable three piece hoods and drawcords that adjust from inside the pockets are all still here. **Competitors call these "Special Features", BROWNING calls "Standard Equipment"**.

Finally, Hydro-Fleece features Gore-Tex® waterproof and breathable fabric. Only Gore-Tex® offers the famous "Guaranteed to Keep You Dry" warranty.

Every garment must meet W.L. Gore's stringent standards for design and construction.

**If only the best is good enough, Hydro-Fleece is the only choice, and now it is better than ever.**

One-handed height adjustment on hood  
One-handed cord adjustment for front hood closure

Featherweight neoprene cuffs eliminate bulk and provide a watertight closure

Two Expander System Pockets keep ammunition within easy reach

Mesh barrier strip between shell and lining prevents water from wicking into the lining

Molded shoulder tab keeps firearm sling in place

Two oversized no spell bellows pockets with magnetic closure

## HYDRO-FLEECE® A.T.™ 4-IN-1 PARKA

## INTRODUCING NEW XPO™ GRAND PASSAGE™

### TOTALLY REDESIGNED AND ENGINEERED WATERFOWL CLOTHING

BROWNING is proud to announce the new XPO™ Grand Passage line of waterfowl clothing. Built upon time-proven designs, BROWNING has added new features, fabrications and a new camo pattern to make **Grand Passage the leader in technical waterfowl clothing.** No other line of waterfowl clothing offers as many features and benefits for the serious hunter. Here's what's new:

- A TOTAL OF 10 EXTERIOR POCKETS ON PARKAS, SOMEWITH MAGNETIC CLOSURES, OTHERSWITH PATENT PENDING DESIGNS. ALSO ONE INSIDE POCKET SECURITY
- GAME BAG ON BACK BOTTOM
- SELECTWEIGHT™ INSULATION PLACES DIFFERENT WEIGHTS OF INSULATION INVARIOUS PARTS OF THE GARMENT FOR MAXIMUM PERFORMANCE
- NEW REMOVABLE NEOPRENE SKIRT ON JACKET MODELS TO SEAL OUT WATER (USA LINE) ( SPECIFIC REQUEST FOR EUROPE)
- NEW MOSSY OAK® DUCK BLIND™ CAMO IS DESIGNED TO LET HUNTERS DISAPPEAR INTO THE MARSH
- MOLDED SHOULDER TAB TO HELP KEEP GUN SLING IN PLACE

The NEW features are in addition to ongoing features hunters have come to expect from Browning. Things like detachable, fully adjustable three-piece hoods; neoprene cuff closures; mesh barrier strips between outer shell and lining; rugged, lightweight fabrications that don't pick up water or burrs; sleeves and shoulders designed to allow optimum freedom of movement.

Hunters can rely on the proven Pre-Vent™ waterproof, windproof and breathable fabric to keep them dry and comfortable. **Browning demands the highest levels of waterproofness, windproofness and breathability where other manufacturers skimp to save cost.**

It's time to make the move to XPO™ Grand Passage.

Fully adjustable hood

Game bag

Two Expander System Pockets keep ammunition within easy reach

Mesh barrier strip between shell and lining prevents water from wicking into the lining

Molded shoulder tab keeps firearm sling in place

Seamless shoulders for unrestricted movement

## XPO™ GRAND PASSAGE™ PARKA

### BETTER THAN EVER

As the major flyways open their gates in autumn, hunters begin to scan the skies, hoping to catch sight of the first birds that represent the beginning of the annual "Grand Passage", the time when waterfowl begins their southern migration. The totally new Grand Passage line has more and larger pockets, watertight neoprene cuffs, and more comfort and mobility than ever before. **Waterproof, breathable Pre-Vent™ shell fabric is combined with new selectweight™ insulation** to keep hunters warmer and drier. New Duck Blind camo will revolutionize concealment in the blind or the field. **There is simply no better engineered technical outerwear for the marsh than XPO™ Grand Passage.**

**Description** XPO™ Grand Passage fabric with Pre-Vent™ waterproof, windproof, breathable laminate • SelectWeight insulation system maximizes warmth and freedom of movement • Mesh moisture barrier strip between shell and lining • Soft and warm brushed tricot lining, reversed in sleeves • Set-in sleeves with one-piece, no-seam construction • Articulated elbow for ease of movement • Detachable, insulated, height-adjustable hood • Two oversize spill-proof bellows pockets with magnetic closures and handwarmer pockets • Shell pockets with the Pocket Expander System • Two Gear Trier™ System pockets • Two chest handwarmer pockets • Inside security pocket • Two-way front zipper with internal and external storm flaps • Adjustable, watertight neoprene cuffs with hook and loop closure • Molded shoulder strips protect wear from heavy bags • Internal waist drawcord

## GEAR TRIEVER

No more hanging or dropping calls and accessories • Attaches to jackets, webbing, belts or straps • Retractable cable keeps calls and gear at hand and out of the elements • Call lanyard model holds up to four calls • Accessory model with a split-ring is ideal for e-collar and decoy remotes flashlights • Fits in chest pocket (on green model ref. 3036840 only)

not included

Code	121011
Description	Gear Triever

## 1. PRE-VENT™ STAY DRY AND COMFORTABLE

## WATERPROOF, WINDPROOF, BREATHABLE

Browning's latest development in outdoor draws upon every feature dedicated hunters demand of their performance clothing. The new Pre-Vent™ fabric is waterproof, windproof and breathable, not to mention **lightweight, durable and highly affordable**. Pre-Vent™ fabric is **100% Waterproof**, a feature most outdoor enthusiasts insist upon, and at the same time prevents the chilling winds of autumn from cutting through the garment. And for those times when the temperatures or activity levels rise, **Pre-Vent™ is highly breathable**, wicking moisture away from the body, leaving hunters dry regardless of the weather. Pre-Vent™ is featured in a wide range of Browning outdoorwear. From cold-weather parkas and jackets to lightweight raingear, **Pre-Vent™ is the choice for any hunter, any person, in any environment, in any condition and in any weather**

**PRE-VENT™**  
WATERPROOF - WINDPROOF - BREATHABLE

## CAMO UMBRELLA

- Windproof double canopy with mesh
- Flexible fiberglass ribs and shaft
- Manual open and close
- Rubber grip handle
- Mossy Oak Break Up

Code	3981202
Colors	mossy oak new break-up

## 2. POCKET EXPANDER SYSTEM

## A NECESSARY CONVENIENCE

The Browning Pocket Expander System is the latest convenience found in Browning parkas and jackets. The pocket Expander System allows for a shell loop flap to be tucked inside the large bellows pockets to **protect shells against the elements, or placed on the outside for easier, faster access**. This unique design also allows for access to the bellows pockets even when using the shell loop flap on the outside. Count on Browning's innovation to design hunting clothing that make a day in the field far more comfortable and convenient.

## XP0™ BIG GAME CAP

- XP0™ Big Game fabric with Pre-Vent™ lamination
- Brushed tricot lining
- Hook and loop adjustable size strap
- Sizes: One size fits most

Code	30891414**
Colors	mossy oak new break-up

## 3. GEAR TRIEVER™ SYSTEM

## PROTECTION AND CONVENIENCE

Available in a Call Lanyard model with four slip-knot lanyard, or an Accessory model, with split-ring attachment, the Gear 'Trievery™ attaches to a specialised tab inside the pockets of some parkas. The Gear 'Trievery's retractable cable keeps gear, such as calls, torches and GPS units, tucked inside the side pockets until they are ready to be used. Sold separately. On green Parka model ref. 3036840 only

**GEAR 'TRIEVERY™**  
sold separately

## DRY LITE

## ULTRA-DRY, ULTRA-LITE.

Waterproof technology has come a long way since the days of heavy, noisy rubber rain gear that kept water out, but did nothing to prevent condensation and moisture buildup inside. Fast forward to Dry-Lite rain gear featuring a Pre-Vent™ waterproof, windproof, breathable 2.5 laminate. Dry-Lite is constructed from high-density tricot for durability with the benefit of ultra-light weight. At a combined weight of a scant 450 grammes, the Dry-Lite Jacket and Pant fit into their own stuff sacks and are easily carried in a small pack — **a dream come true for lovers of nature.** The compact size and minimal weight of Dry-Lite is perfect for packing when out stalking or putting in your pack when in a high seat or simply stashing it behind a truck seat for unpredictable thunderstorms. **Dry-Lite is the perfect answer for those needing quality, lightweight, packable rain gear.**

## DRYLITE™ JACKET

- High-density tricot with Pre-vent™ waterproof, breathable fabric
- Raglan sleeve construction with adjustable, water-tight hook and loop cuffs
- Adjustable attached hood with drawcord closure and molded brim
- Full front closure with WaterGuard™ zipper and chin guard
- Two handwarmer pockets with WaterGuard™ zippers
- Drawcord bottom
- Stuffs into included bag
- Available in Mossy Oak® New Break-Up® or green colored
- Dry-Lite™ Jacket and Pant weight a combined 545 g.

## DRYLITE™ PANT

## HI-VIZ® MAGNI-OPTI SIGHT

- Magni-Sport includes 5 screws sizes 3/56, 3X.5, 3X.6, 5/40 and 6/48 will fit most guns

Code 12854 12870  
Colors 1 green, 1 red magni sport magnetic sight

- Patent pending technology solves cross-eye dominance by making the sight visible only with the shooting eye, enabling any shotgunner to shoot with both eyes open for improved target acquisition and better hand/eye coordination
- Improves shooters of all levels by refining shooting form and head-to-rib alignment and with correct head position on the stock in order to see the sight.
- Includes one green and one red LitePipe
- Magni-sport Includes two sizes of magnetic bases to fit the rib of most shotguns and two green and two red LitePipe

## HI-VIZ® COMP SIGHT

- Metal base threads directly into the bead of shotguns for a more permanent sight picture
- Interchangeable LitePipes allow shooter to match light pipe diameter and color to shooting conditions
- Includes eight LitePipes of different diameters and colors
- Allows the shooter to know exactly where the barrel is in relation to the target
- Key and custom carrying case included

- 5 screws sizes 3/56, 3X.5, 3X.6, 5/40 and 6/48 will fit most guns

Code 12850  
Colors 1 white, 4 green, 3 red litepipes

## HI-VIZ® BIRD BUSTER MAGNETIC SHOTGUN SIGHTS

- All Browning HiViz® Bird Buster magnetic sights come with four interchangeable LitePipes of different diameters for different light conditions
- Includes three different sizes magnetic bases to fit the rib on any shotgun
- Fits all BROWNING Shotguns

Code 12859  
Colors 4 Litepipe interchangeable

## HI-VIZ® 4-IN-1 GAME SIGHTS

- HiViz® 4x1 Game sight includes both front and rear sights, making the 4-in-1 perfect for deer, turkey, waterfowl and upland hunting
- Injection-molded optical-grade resine sight construction
- Rear sight is fully adjustable for windage and elevation
- Light-gathering Litepipes make low-light shooting effortless
- Mounts easily with no gunsmithing required

Code 12893  
Description 4in-1 game sight

## HISTORY KNIVES

Each knife celebrates the great achievements of historic Americans and the impact they made to their nation. As a testimony to their beauty and craftsmanship, **these fine knives have been honoured with the Shooting Industry's "Knife of the Year" award.** What truly made these knives special is the handle, each made from the wood of trees that "witnessed" the history of the people involved. **American Forest will plant trees in habitat restoration projects with each BROWNING knives sold.**

### ROBERT E LEE

The Robert E. Lee knife is a D-guard Bowie knife which handle wood from a black oak on the grounds of Lee's former estate in Arlington, Virginia. It's decorated with 13 gold stars forming the pattern of the Confederate flag. Just 1807 knives, represented the year Lee was born, will be made.

Code	321003
Description	Robert E. Lee Knife only 1847 issued
Blade Length	± 21 cm
Packaging	beveled glass walnut case
Unique Features	
Handle	black oak - solid brass d-guard
Engraved	"First Gentleman of Virginia"

Knives sold on specific request - box included.

### EISENHOWER

The Dwight D. Eisenhower knife is patterned after the M3 knife, issued to many GIs who fought on D-Day. The wood is from ash trees grown at the General's boyhood birthplace in Texas. In honor of the year of the D-Day invasion, just 1944 knives will be made.

Code	321004
Description	Eisenhower knife only 1944 issued
Blade Length	± 20 cm
Packaging	beveled glass walnut case
Unique Features	
Handle	ash
Engraved	"Normandy 1944" "Let's Go"

Knives sold on specific request - box included

## COLLECTOR KNIVES MADE IN USA

### SERIE FEATURES

- Type: Fixed blade
- Blades: 420 high carbon steel
- Handles: Made from trees harvested from historic grounds [see individual description]
- Features: Engraved blades  
Walnut display bow with beveled glass  
Certificate of Authenticity

### CRAZY HORSE

The Crazy Horse knife sports a handle made of aspen wood from a grove of trees in South Dakota. The aspen is revered by the Sioux Nation as the "Tree of Life". The blade is hand-knapped obsidian. To commemorate the year of Crazy Horse's birth, only 1847 knives will be produced.

Code	321005
Description	Crazy Horse knife only 1847 issued
Blade Length	± 11,5 cm
Packaging	beveled glass walnut case
Unique Features	
Handle	aspen wood - affixed to hilt with leather strips horsehair tassels
Blade	volcanic handknapped obsidian
Sheath	handbeaded fringed buckskin

Knives sold on specific request - box included.

### VIETNAM

The Vietnam knife handle is made of Khan Hin wood from the Ho Chi Minh Trail. This model is reminiscent of the one favored by members of the MACV-SOG whose emblem is inside the box. In honor of the year ending the conflict, just 1975 knives will be made.

Code	321006
Description	Vietnam knife only 1975 issued
Blade Length	± 17 cm
Packaging	beveled glass walnut case
Unique Features	
Handle	Khan hin wood
Engraved	"Lest We Forget"

Knives sold on specific request - box included
