BROWNING
The Best There Is

Passion through the years

Since 1897, the year Browning produced its first gun, millions - even tens of millions - of shotguns and rifles for game and target shooting have been invented, developed and manufactured by Browning.

The inventor of the semi-automatic shotgun, Over and Under shotgun and, semi-automatic rifle, and most recently, an Over and Under gun with the lowest action frame and fastest firing system on the market.

Everyday, throughout the world, Browning guns, old or new, smooth-bore or rifled, perform on the range or for hunting, providing great pleasure for their owners.

Target shooters, hunters, and collectors can find in these fascinating items a pleasure that is renewed endlessly.

Using this catalogue, it is our hope that you too will come and join the John Moses Browning family.

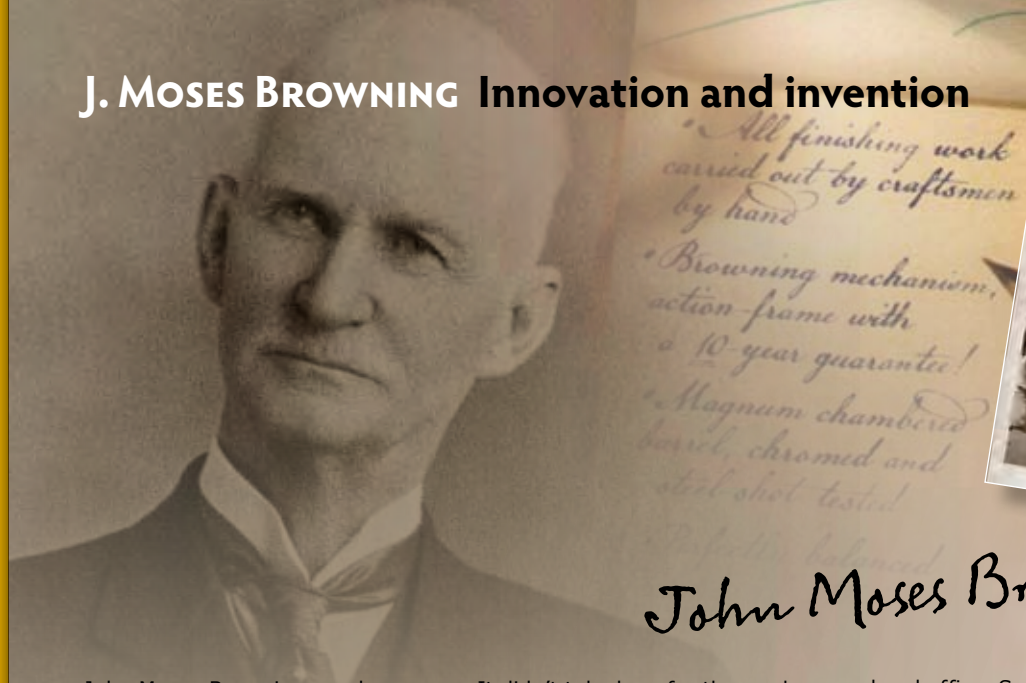
J. Moses Browning Innovation and invention



John Moses Browning

John Moses Browning was born on 23 January 1855, in Ogden, 35 miles north of Salt Lake City (Utah, USA), between the Great Salt Lake and the Wasatch-Cache National Forest.

Gun-making ran in the family of the young John Moses, as his father was a gunsmith who had already been responsible for a number of innovations in the field. As a young boy, he spent time in his father's workshop, and knew the name of every part of a gun before he could read.

From the age of 6, he made fishing accessories from scraps of metal which he hammered into shape on a child-sized work bench made from a wooden crate. His 19th-Century American boyhood abounds with anecdotes, all of which point towards him becoming an internationally renowned genius inventor.

It didn't take long for those who had observed his creative traits to make up their minds: at the age of just 23, John Moses lodged his first patent, for the "John Moses Browning Single Shot Rifle". This invention simplified the percussion mechanism, making it more durable and reliable.

Shortly before his death, his father handed over his business to John Moses. With his brother Matt, even with less than one thousand dollars in the bank and no experience of machine-tool operation, young Browning transformed the humble store into a small gun making workshop with seven employees.

The remoteness of their store, the low number of ready customers, and the lack of capital meant that the business struggled to survive until luck intervened to make the inventor's talents known to a connoisseur: a representative from Winchester.

In another state in the US, this representative had come across a gun made by the Browning brothers. Firmly convinced of the interest of their conception, he bought it from its owner and sent it to his superiors in the company's head office. So impressed were they that the managing director of Winchester himself set out straight away on a six-day journey to what, at that time, was still the Wild West - the real Wild West, to meet the Browning brothers.

Despite his astonishment at finding two young men in their twenties in a rustic workshop, the man was perceptive enough not to be fooled by appearances and signed commercial deals with them as soon as he could. The decision was a wise one: these agreements would last for several decades.

Browning had a future. Over the years, Browning granted licenses to several manufacturers for dozens of inventions and firearms. He invented almost everything in the field of firearms. The creativity and level of perfection of his inventions were so significant that the vast majority of his technological innovations could not be improved upon or replaced for several years.

The world of firearms is like the art world: the success of creators depends on the interest of well-informed amateurs. In 1897, it was one of the directors of the Fabrique Nationale (National Weapons Factory) at Herstal in Belgium, who noticed a 7.65 Browning pistol incorporating a new locking mechanism. He saw the appeal straight away and the NWF obtained the manufacturing license.

Thus began an uninterrupted period of collaboration between the inventor from the Great Salt Lake and the factory on the banks of the Meuse River.

Browning reached the pinnacle of its craft with the Auto-5 semi-automatic shotgun, which was a tremendous commercial success and prompted John Moses' first visit to the Herstal workshops.

But his world-wide acclaim is without doubt due to the 9 mm Hi-Power semi-automatic pistol. More than 10 million of these legendary pistols have been sold. Starting in 1907, it was adopted by most police and armed forces across the world. The fact that the generic name for this type of gun is "Browning" demonstrates the universal acclaim and recognition it has received.

Browning's success is not at all the result of chance.

Like all American pioneers of that time, he turned luck to his advantage only through an enormous amount of hard work. His strength of character and the steadfastness of his principles were out of the ordinary.

Thus it was that, towards the end of his life, when offered an honorary title by a university, he refused it for the simple reason that "he had made it a rule never to accept anything that he had not earned as a result of his own work."

In 1925, John Moses Browning put the finishing touches on the prototype of an Over and Under which would change the history of the hunting shotgun. He called it simply B25, for "Browning 1925".

He died of a heart attack while working in his office in Herstal on 26 November 1926. It was his 61st visit to Belgium.

His body was repatriated to the United States, where he was buried with full military honours. His son Val continued his collaboration with the Belgian factory without interruption.

That collaboration continues to this very day.

Description of new products

Before they are put on the market, Browning's guns have to undergo various extremely rigorous tests. These are B.A.C.O. (Browning Arms Company) internal tests.

None of its products will be approved unless it clearly meets the following 6 requirements.

In addition, we carry out a systematic inspection process of all mass-produced guns, which involves a great many checks to ensure that every gun sold meets Browning's criteria with regard to quality, performance and reliability.

Tests B.A.C.O.

BROWNING ARMS COMPANY

1 Tests of functioning and endurance

The purpose of these highly-demanding tests, which are conducted on both shotguns and rifles, is to ensure they operate correctly whatever types of cartridges are used. Thousands of cartridges are therefore fired to ensure the guns' reliability; no broken or excessively worn parts are tolerated during this test. If such faults are found, they are returned on a systematic basis to Research and Development.

2 Tests in extreme conditions

When developing a new product, the purpose of this test is to try out the guns in the worst possible weather conditions, using polar temperatures of -30°C and very high temperatures of up to +50°C. The gun has to operate perfectly at these temperatures, using a wide range of cartridges. You can therefore use our guns in the most testing conditions, in all circumstances and with complete confidence.

3 "Torture tests"

When a new product is being developed, it undergoes a wide variety of tests, which are generally more demanding than applicable C.I.P. norms, including a set of "torture tests". A set of guns are subjected to excessive pressure tests and obstruction tests to ensure the strength and reliability of our guns. In addition, we conduct safety tests, which consist of dropping the gun onto its different sides to check its reliability and safety. The legendary strength and reliability of Browning's guns is largely due to their completing all these tests successfully.

4 Gun checks

When they are manufactured, every gun is subject to a very wide variety of visual inspections and measurements, and has to meet the requirements of the specifications in every respect.

5 Gun tests

All guns manufactured are fired to ensure their precision and that they are operating properly.

6 Accuracy tests

We check the precision of every gun which emerges from our workshops. For shotguns, we check the quality of the shot patterns as well as the proper convergence of the barrels at 35 metres. For rifles, we check the precision and pattern of every gun.

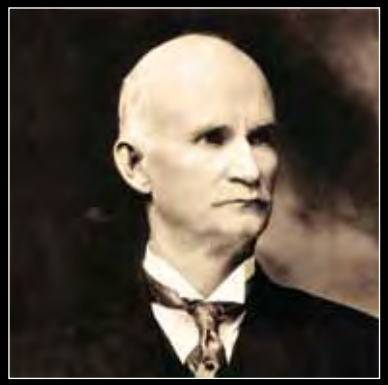
Custom Shop



The legendary B25, an exceptional custom-made gun

Entirely made in the Fabrique Nationale d'Herstal in Belgium, Custom Shop arms are born in the hands of exceptional craftsmen.
These unique models are meticulously made in order to attain perfection at every stage in their construction.
The finest assembly techniques, the beauty of detail and the love of firearms make these collections unique works of art of exceptional luxury.

Passion and craftmanship since 1897

B•25

Over and Under Shotguns

B25 Special Flowers

The B25 over and under gun is the result of the encounter between John Moses Browning's creative genius and Liège's skills in arms-making enhanced by four centuries of tradition. The B25 is an exceptional firearm, representing the utmost rigour in the search for perfection, and today it is the most refined and most admired over-and-under gun in the world.

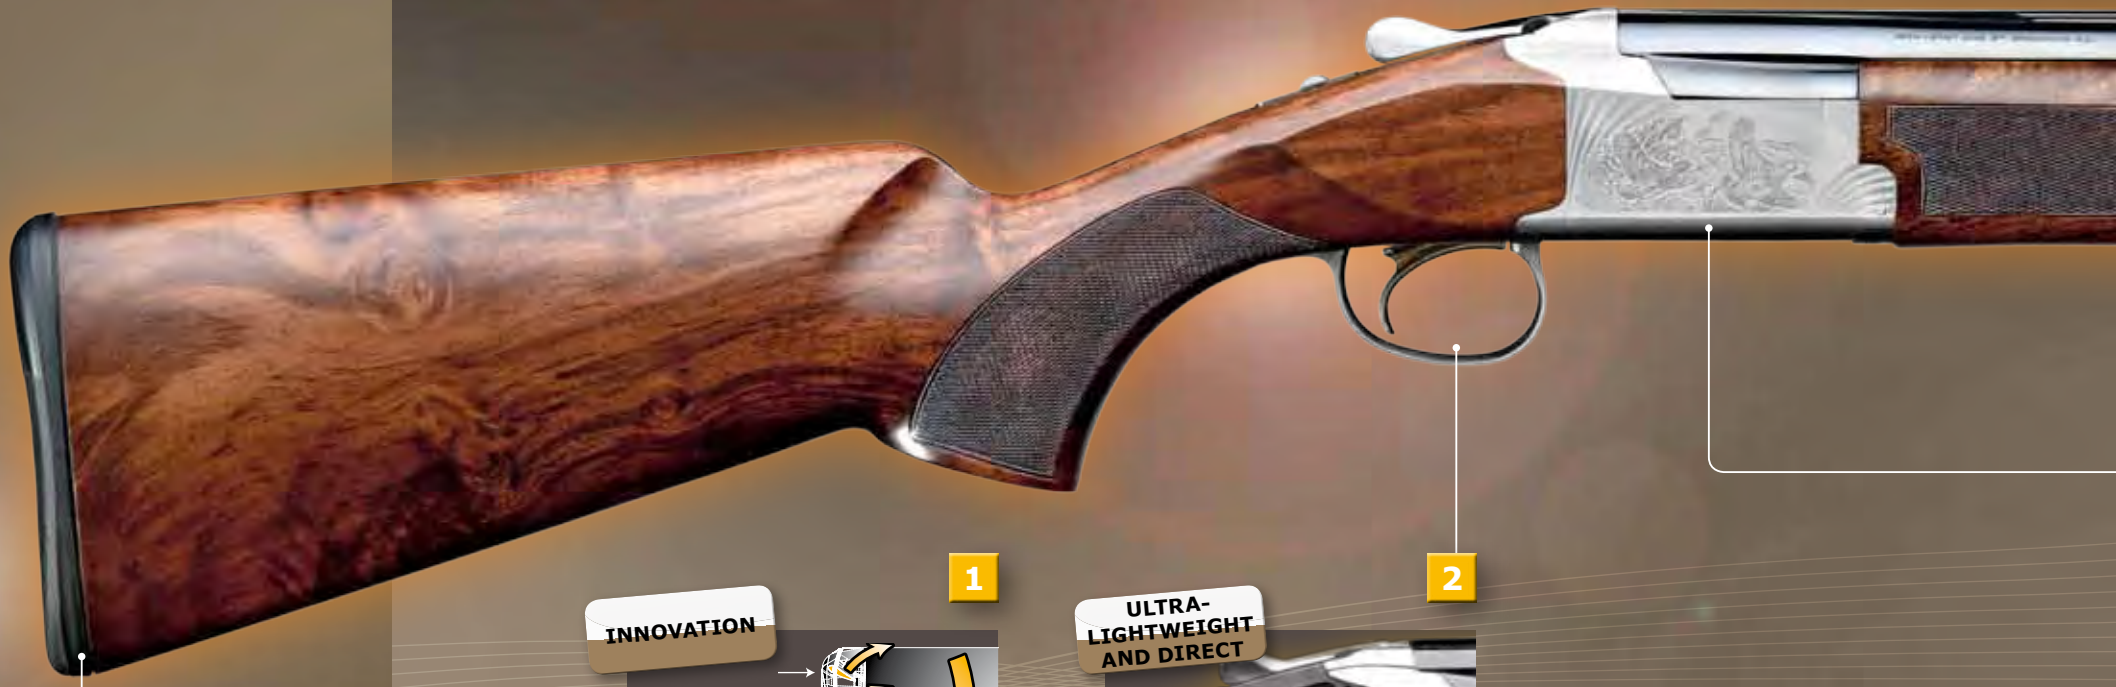
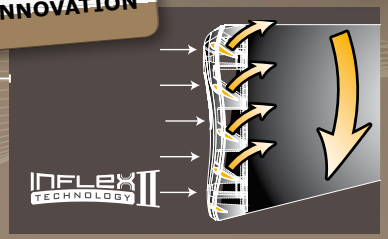
The legendary strength is now combined with revolutionary design and features



1

INNOVATION



New Inflex II butt plate

2

ULTRA-LIGHTWEIGHT AND DIRECT

New high-performance mechanical trigger system

"Legendary reliability" and "innovation" are the B725's watchwords.

The new Browning B725 is an aesthetic and technical revolution in Over and Under shotguns.
Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding Over & Under shotgun on the market.

B725 Hunter

The legendary strength is now combined with revolutionary design and features

Low action frame

The new B725 has a low action frame, which combines all the qualities of reliability and long-life possessed by all Browning Over and Under shotguns. The action frame has a lower and more compact profile than most other Over and Under shotguns.

The low action frame provides the following benefits when shooting by:

- Enabling faster aiming and therefore more instinctive shooting.Reducing muzzle flip due to the frames inline recoil providing a more comfortable shooting position, making it highly manoeuvrable and effective when shooting.
- The B725 is the only Over and Under gun that combines the reliability and legendary sturdiness of Browning Over and Under guns, thanks to its wide, flat bolt, a unique hinge pin and wide recoil surfaces, all combined with a low action frame.

UNIQUE TO BROWNING

INVECTOR DS™

Invector DS chokes

The new Invector DS chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

The optimal 80 mm length enables an exclusive internal shape to be developed, which optimises performances over all shooting distances and ensures a uniform concentration of the shot pattern when using lead or steel shot.

The new patented Invector DS (Double Seal) Chokes offer a double seal. They are fitted with a compression ring that limits penetration of combustion gas between the choke and barrel. The thread on the muzzle side forms an obstacle to prevent exhaust gasses from entering. The ring stops the Invector DS from unscrewing when firing. This guarantees that the choke stays clean and is easy to remove under any conditions.

See the full range of Invector DS chokes on page 87.

Extensive shooting of 500 rounds

After extensive shooting of 500 rounds of the dirtiest loads, competitor's choke tube that don't have a gas seal show significant grit and residue buildup on the tube.

The innovative gas seal on Browning Invector-DS tubes keeps the choke tube cleaner, for easier removal and installation.

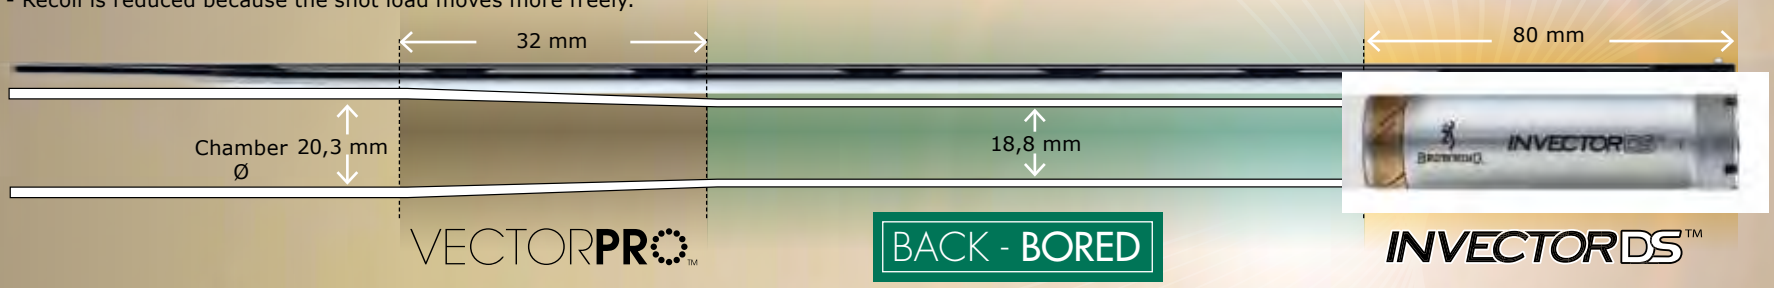
INVECTOR DS™ COMPETITOR'S CHOKE

Canon Back-bored | Vector Pro

NEW 2012

The B725 has new barrels made of new Back-bored Vector Pro shaped barrels and Invector DS chokes.
This gives the B725 perfect balance, ergonomics and swing in all shooting conditions.

The principle of the Back-bored Vector Pro barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone wich provides three advantages:
- Increased speed and better penetration of shot by reducing friction between the shot and the walls of the barrel
- Better shot pattern by reducing any pellet deformation when going from through the forcing cone between the chamber and the barrel bore.
- Recoil is reduced because the shot load moves more freely.



Mechanical firing

The B725 has an improved mechanical firing system, allowing the shooter to really "feel" the shot as the trigger is pulled, which makes for a great feel.

These new firing system is shorter, faster and lighter giving more control over your shooting.

Browning's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

Even if you only have one cartridge in your gun, you will still be able to fire, which is not the case with an inertial system.

Inflex II recoil pad

A totally new Inflex II recoil pad is fitted on all B725 shotguns as standard.

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun.

This exclusive material makes shouldering easier. Two other pads, 20 or 25 mm thick (available on option), make it easy to adjust the length of your stock. In this way, you can adapt your B725 to your own morphology and also adapt it depending on the hunting season.

Furthermore, these exclusively designed pads, 20 or 25 mm thick, generate a downward movement of the stock when firing, moving it away from the shooter's cheek, and giving incomparable comfort when firing.

See the full range of Inflex II recoil pads on page 67.

Features and looks are only part of the B725 equation for success. The new B725 feels incredibly balanced in your hands from pad to muzzle. The B725 feels light and swings fast. Put an B725 to the real test by picking one up.

The grip is comfortable, the forearm is compact, narrow and places your front hand closer to the bore line for superior hand eye coordination and pointability.

Over and Under Shotguns

HERITAGE HUNTER 20M

The shotgun
with the best performance
and the greatest reliability.

HERITAGE HUNTER 12M

Here is the top of the range in Browning over and under shotguns. The Heritage model is the heir to the B25 side-plated model, and possesses all its elegance. The hunting scene engraving combining partridge and pheasant is remarkably delicate.
The stock is made from top quality, carefully oil-rubbed walnut. With its half-pistol stock and its tulip fore-end, the gun pays real tribute to the B25, and is the worthiest of heirs.

HERITAGE HUNTER 20M

Available in 20M calibre, the Heritage Hunter 20M is a model of perfect balance, delicacy and ease of handling. It possesses a half-pistol stock in superb oil-rubbed walnut. Partridge and woodcock are magnificently represented and enhanced on its low, thoroughbred action frame.

Heritage
When hunting becomes an art

The most reliable and best performing line

10 YEARS GUARANTEE

Action frame
Machined from a single forged part for providing exceptional rigidity and sturdiness.

Recoil surfaces
The over-sized recoil surfaces give the gun unparalleled life.

Wide flat bolt
The large bolt surface gives the B525 gun a longer life.

When you buy a Browning B525, you are not just buying the heritage and experience of more han 80 years of excellence; you are also buying a shotgun that represents the 5th generation of the legendary B25.
The Browning B525 is a more than worthy descendant of this exceptional shotgun and, much like the B25, the Browning B525 has become the benchmark for the industry since its first appearance in 2003.

Impact wheel ejectors
Firm, powerful and regular ejection.

B525 Hunter Light Classic 12M

Hinge pin
Because of its size, the pin possesses very large contact surfaces – a guarantee of reliability and long life.

BACK - BORED

Canon Back-bored
The 3 benefits of the Back-bored barrel are:
- Increase in speed and penetration
- Improvement of patterning
- Less recoil

Hand fitted to create the best there is

The gun moves from one gunsmith to the next to be entirely made by hand, thanks to the expertise acquired over many years by each of the gunsmiths. This is the only shotgun on the market at this price level that is hand fitted during production to such a high performance level, making each shotgun truly unique. Fitting important parts (barrel, action frame, fore-cud and iron) is done by hand using traditional methods (such as red ochre) so as to make the Browning B525 the reference in shotguns. The attention paid to detail when manufacturing and fitting every Browning B525 is unique, just like the "Browning feeling" when the gun locks on closing.

B5·25

Over and Under Shotguns Light

B525 HUNTER Light

B525 HUNTER Light 12M

The B525 Light Classic constitutes the ultimate synthesis of effectiveness, weight, and styling. An action frame made of a lightweight "Aircraft" grade alloy reinforced with high-strength steel inserts, a light Back-bored barrel profile, and finally a choice of wood and appropriate shaping give this shotgun perfect weight, balance, and feel in the hands.

B525 HUNTER Light Elite 12M

The B525 Light line is completed with this Elite model, offering richer and more engraving with gold plating.

The buttstock and forearm are made of grade 3 walnut and then finished with oil.

B525 HUNTER Light 20M & 28

Only 2.7 kg! The B525 Classic Light 20M or 28 gauge is the lightest of the Browning hunting Over and Under hunting guns.

The action frame of light alloy with a steel insert on the side and a careful choice of wood (which is finished with oil) have allowed us to reach such a light weight.

B525 Game 1 12M

NEW

B525 Game 1 12M

NEW

The B525 Game 1 is your ideal hunting partner. Very reasonably priced, it is the basic model in Browning over-and-under hunting guns. Its action frame made from a single block of forged steel, its lightweight Back-bored barrels and Invector-Plus chokes make it the ideal gun for all your hunts.
It is available with the Auto Safety system.

B525 Hunter Prestige 12M & 20M

This elegant, refined model has a discreet charm. Its buttstock, made in superb grade 4 oil-finished walnut, has a medallion and sculpted teardrops on each side plate. Its fine engraving, finished entirely by our master engravers, and the very beautiful old silver colour of its action frame make it into an elegant firearm in the best of taste.

B525 Hunter Elite 12M & 20M

The B525 Hunter Elite combines beauty, lightness, and balance. A completely new engraving of a hunting scene livened with small bouquets decorates this B525. This exquisite engraving covers and adds value to the main working parts. The weight and balance have been completely reviewed and improved thanks to new, lighter barrels.

B525 Hunter 20M & 28

Reprising the characteristics of the Classic, this B525 sets itself apart with its new engraving and its English grip, which give it a very delicate line.

CYNERGY HUNTER Light Grade 3 12M

NEW

NEW

CYNERGY HUNTER Light Grade 3 12M

This stylised version of the Cynergy Hunter has been created at the famous Italian engraving workshop of Giovanelli. Another unique feature of this shotgun is that the wood is made from a single block of grade 3 American walnut.

CYNERGY HUNTER Grade 3 12M

A buttstockmade of grade 3 walnut finished in oil, a steel action frame decorated with animal scenes, two ducks taking flight on the right, two partridges on the left, together with a nickeled finish form the Cynergy Hunter's magnificent hunting finery. But the Cynergy's shape, design, and performance are still the same.

CYNERGY HUNTER Grade 3 20M

For lovers of small gauges and guns with elegant lines, the Cynergy Hunter 20 with its steel action frame has been made just for you! With its low action frame height, its tulip fore-end and its classic stock, this shotgun is a real 20 magnum gauge in the body of a 28.

MAXUS

The most reliable design, construction, and performance!

Length of pull extension spacer
Supplied with the gun.

Optimal Dimensions
The drop and the cast can be adjusted by using a set of buttstock spacers.

SPEED LOAD PLUS

Browning's new patented loading system sends the first shell directly to the chamber from the magazine.

INFLEX TECHNOLOGY

1

The recoil pad with Inflex technology is the most effective of all semi-automatic shotguns.

LIGHTNING TRIGGER

The Lightning trigger system is designed to offer a smooth, crisp feel with the minimum of travel.

The softest shooting semi-automatic ever:

While no recoil reduction system on a shotgun can escape the laws of physics, the Maxus is sure to change your mind about recoil control. The Power Drive Gas System, Inflex technology, Vector Pro Back-bored technology, from Browning are combined to reduce the total recoil force to the shooter by 18% compared to any other semi-automatic shotgun on the market.

VECTORPRO™ BACK - BORED

The new geometry of the extended Vector Pro forcing cone together with the Back-bored barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

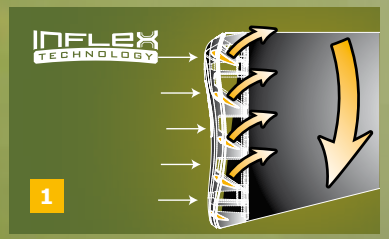
Maxus Premium Grade 3

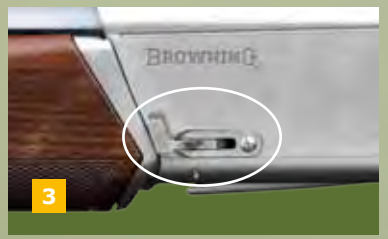
INVECTOR PLUS+

The Invector-Plus interchangeable choke functions jointly with the Vector Pro and the Back-bored barrel to offer dense and regular shot patterns.

5 SPEED LOCK FOREARM

4 POWER DRIVE GAS SYSTEM





Inflex technology
Much more than a recoil pad in a recoil-absorbing material, it has been designed with an internal structure that lowers the buttstock and pushes it away from the shooter's face after each discharge, which allows a second shot that is even more comfortable and faster.

Rapid unloading
And now, unloading is just as simple with the new Maxus. The fast unloading function quickly and easily clears the tube magazine, without any need to individually chamber shells.

Cut off
The Maxus is equipped with a Cut off for the magazine to allow the shooter to unload the chamber easily, and thus change the type of shell without having to chamber a shell from the magazine.

Power driven gas system
The Power Drive Gas System uses larger escape valves to remove gas more quickly with heavy loads. A brand new patented design for an integrated valve keeps residue outside the mechanism for cleaner functioning. The piston has a run increased in length by 20% to make it even more reliable with light charges. The system works with loads of 24 to 64g.

Speed lock
This secure system for setting the forearm makes disassembly of the shotgun for cleaning and storage y and faster. You can attach or detach a strap with one simple press too. The patented Turnkey magazine plug system is easily disassembled with a car key.

MAXUS™

MAXUS

The most reliable design, construction, and performance!

MAXUS PREMIUM Grade 3

MAXUS PREMIUM Grade 3

The Maxus Premium is the top of the-line model in the Maxus family. Its elegant brushed nickeled receiver is decorated with a fine animal engraving enhanced with gilded birds. The select grade 3 walnut of the stock and forearm have oil-rubbed finish.

MAXUS HUNTER Grade 2

The animal engraving and nickeled receiver of the Maxus Hunter give it a very distinct character.
This next generation gun enjoys all the innovations of the Maxus line.

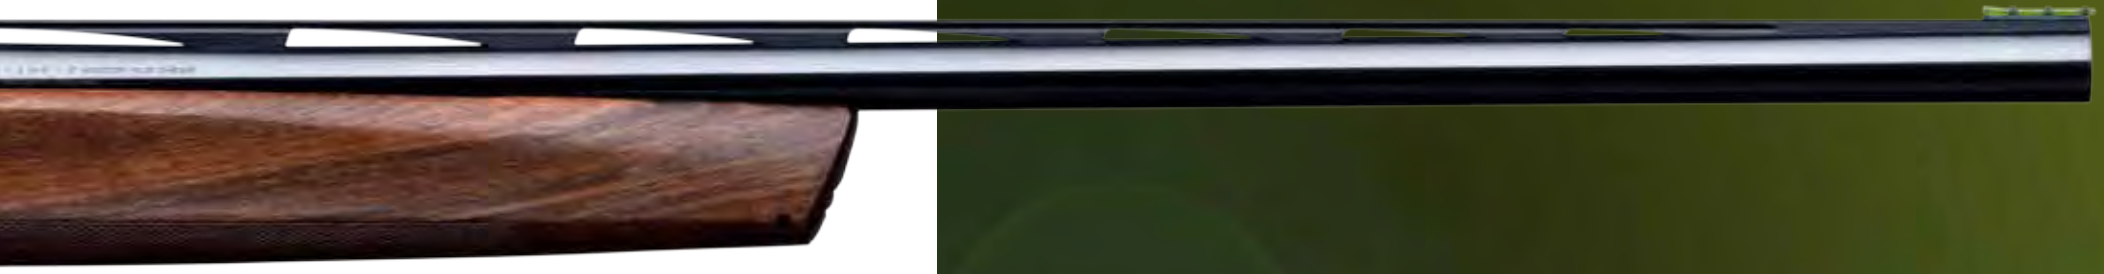
The new Maxus from Browning is the most anticipated semi-automatic shotgun in decades.

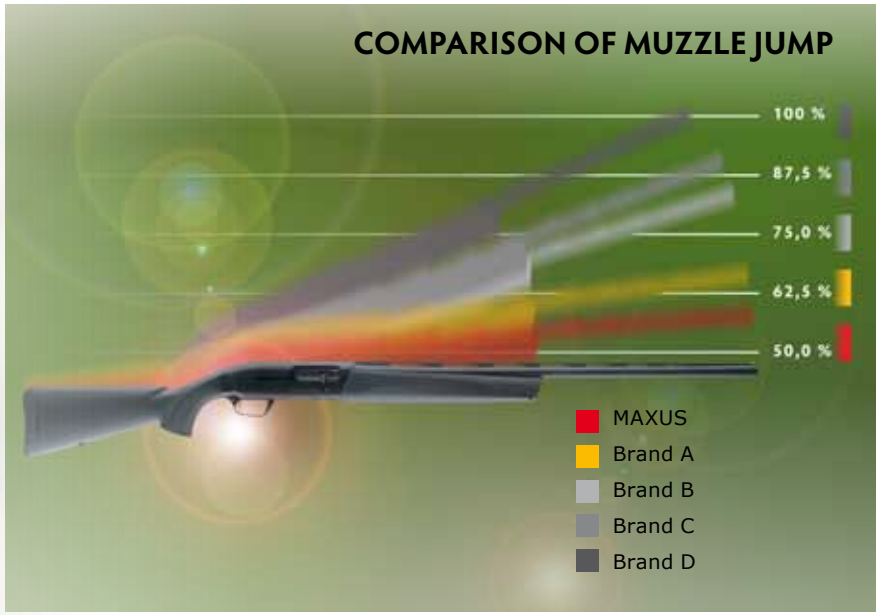
Several highly innovative technologies combine to make the Maxus deliver up to 18% less recoil, 44% less muzzle jump for more accurate follow-up shots, and a firing system that is 24% faster than the nearest competitor.

A new Back-bored Vector Pro barrel assembly has been developed specially for the Maxus.

Add in other benefits, such as the new Speed Lock Forearm with express locking mechanism and Turnkey Magazine Plug, Browning Maxus is the finest, most reliable semi automatic shotgun ever made.



Maxus Hunter Grade 2



MAXUS™

Semi automatic Shotguns

NEW Maxus Sporting Carbon Fibre

NEW

Maxus Sporting Carbon Fibre

The latest version of the Maxus range, this gun has been specially designed for sports shooting. With its ventilated rib – tapered from 8 to 6 mm, you can line up your target at top speed.
Its carbon finish gives it a particularly unique style.

Maxus Standard

The latest arrival in the Maxus range, the Maxus Standard is a gun with a soberly designed receiver delicately enhanced by grade 2 oil-rubbed walnut elements.
Like all the Maxus range, this steel-shot tested gun is supply with a 5 cm barrel extension.

Maxus Composite

The all-terrain version of the Maxus is chambered in super magnum. The buttstock and the forearm of this model have a careful ergonomic design, with all the handling surfaces specially developed for Browning.

NEW

Maxus Standard Super Magnum

This new Maxus has been designed for waterfowl specialists. It is equipped with a super magnum chamber for shooting at very long distances. Like all the Maxus, it is steel shot tested and has a countersunk receiver for fitting a hide scope.

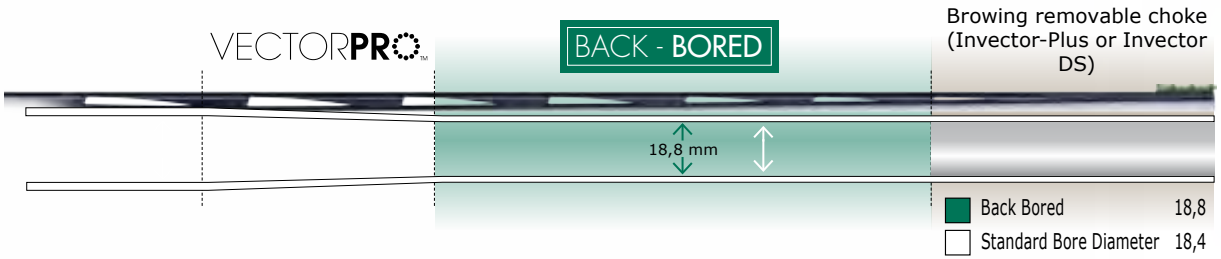
MAXUS™



A. VectorPro & Back-bored VECTORPRO

The new geometry of the extended Vector Pro forcing cone together with the Back-bored barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

B. Barrels BACK - BORED

The principle of the Back-bored barrel is to increase the diameter of the barrel's bore by a standard value, from 18.4 to 18.8 mm. Increasing the barrel bore diameter offers three benefits:

1. Increased speed and penetration
Thanks to the "Back-bored" technology there is less friction between the shot load and the walls of the barrel. Instead of needing to overcome friction, powder combustion gasses can devote more energy to propelling the cartridge wad, which results in higher load speed and greater shot penetration. This also applies to greased wads.

2. Better shot patterns
With less friction on the barrel walls, the amount of shot not deformed on firing is greater, which enables it to keep its ballistic qualities. As ballistic qualities are conserved, you will obtain exceptionally regular impacts with much more shot that effectively hits your target.

3. Less recoil
In a Back-bored barrel, the shot load travels through more easily and, for this reason, the shooter feels less recoil. Our Research and Development department has measured a reduction in recoil of 6%.

C. Chokes INVECTOR-Plus™ INVECTOR DS™

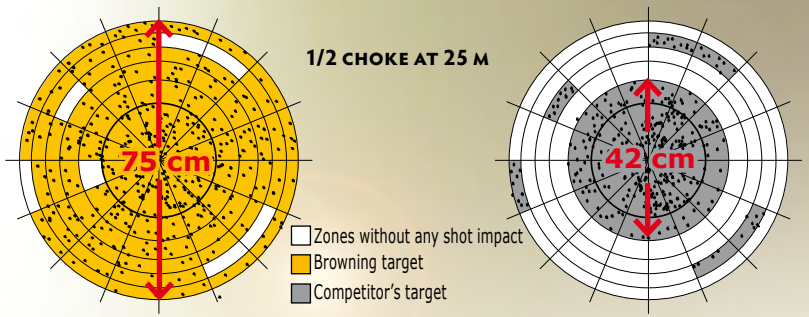
Adjustable Invector-Plus and Invector DS chokes have been specially developed by our Research and Development Department for our Back-bored barrel system. They have been designed to obtain "a perfect target" at different shooting distances.

1. The perfect target
Our objective is:
- Shot pattern efficiency of 80% on target, i.e. 80% of the shot contained in the cartridge must be in a target area inside a diameter of 75 cm.
- A perfect shot pattern: the shot pattern must be such that there is a minimum number of "empty" areas, i.e. areas in the target surface where there are no shot impacts.

2. At different shooting distances
Our objective is:
- To obtain the perfect target at different shooting distances. Depending on the type of choke used, the efficient shooting distance will be different. For example, at 15 m, with an Invector-Plus Cylindrical choke, we obtain target shot pattern efficiency of 80% with a minimum number of surfaces without any shot impacts.

See the full range of Invector DS and Invector-Plus chokes on page 87.

THE PERFECT TARGET



Browning offers a perfect balance between a shot-pattern efficiency of 80% and a perfect shot-pattern with an exceptionally even spread of pellets.

One competitor's gun alone offers good shot-pattern efficiency, but the pattern itself is much less efficient due to the numerous empty zones in the target area.

Tests against competition

In its permanent concern for improvement, Browning regularly tests its own products by comparing them with other guns on the market.

Our tests show that the chokes on other guns provide good performances but their shot pattern is by no means perfect and therefore lead-shot tiering is not as perfect as with Browning.

With large numbers of competitors, it is difficult to find any difference between ½, ¾ and Full choke performances (efficiency and shot distribution).

**test carried out with Winchester AA n°7 lead shot cartridges.*

The Browning choke recommended for different shooting distances

Full Choke	= 35 m
3/4 Choke	= 30 m
1/2 Choke	= 25 m
1/4 Choke	= 20 m
Cyl	= 15 m

Depending on the Browning choke you use, you can adapt your gun perfectly for the distances at which you shoot and the game you are hunting.

Browning offers you "the best there is!"

BAR

The most reliable rifle on the market

Adjustable buttstock
The BAR Short/LongTrac, as well as certain BAR Zenith are fitted with an interchangeable butt plate which enables you to adjust the length of your gun depending on your morphology.

Reliability
46 years of experience combine with the simplicity of its system, the precision of its manufacture and the quality of its controls.

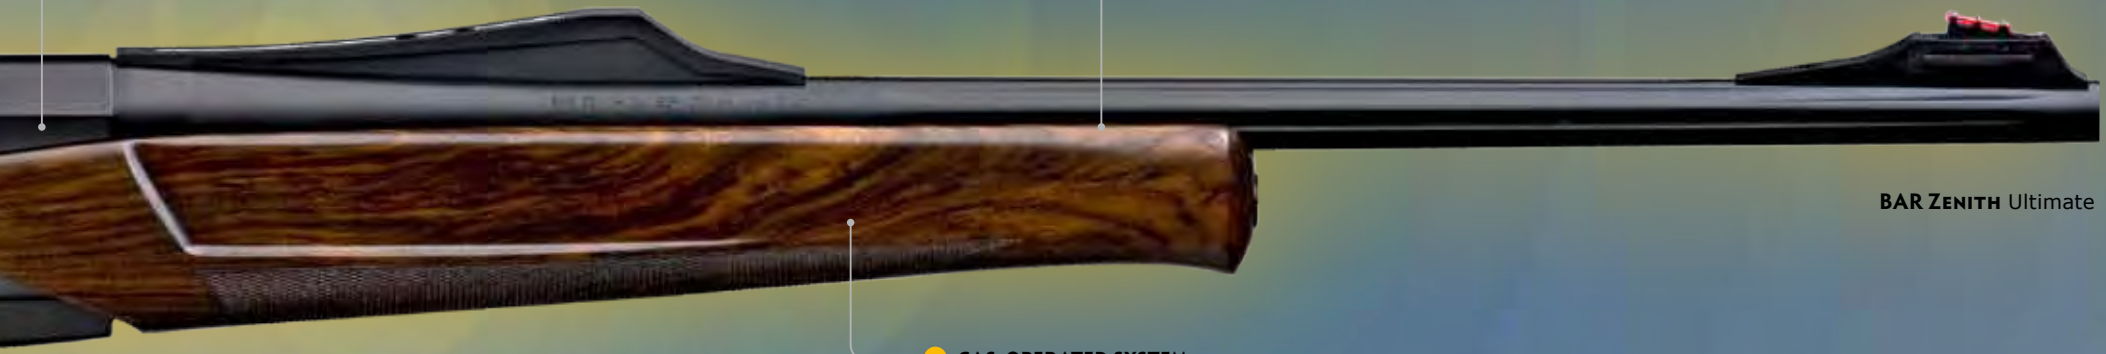
Reversible safety catch
Every BAR Short/LongTrac or Zenith rifle possesses a reversible safety catch that can be adapted for left-handed shooters.

An undisputed leader with 46 years experience, Browning is the specialist in semi-automatic rifles.

It owes this title to the quality of its mechanism, the smoothness of its gas-assisted operation which reduces recoil sensations to a minimum and its reliability, but above all to the fact that it has constantly evolved for offering you consistently better performance.

Barrel/bolt
The barrel/bolt locking mechanism works directly in the barrel, due to a lock of seven lugs that engage in an extremely rigid manner. This system provides excellent shooting accuracy.

Excellent accuracy
The barrel of each BAR rifle is created by cold hammering at the Fabrique Nationale in Herstal, Belgium.

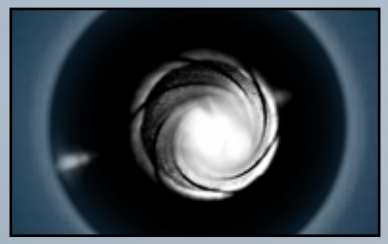


BAR Zenith Ultimate

gas-operated system
The exclusive Browning gas-operated system is adjustable, thereby enabling you to adapt the gun to the types of ammunition used.

Reliability
46 years of experience combine with the simplicity of its system, the precision of its manufacture and the quality of its controls.

Excelente precisión
7-lug rotating bolt



FN Herstal barrel
The barrel of each BAR rifle is created by cold hammering at the Fabrique Nationale in Herstal, Belgium.

Interchangeable butt-plate
The BAR Short/Longtrac and the Zenith inserts are fitted with interchangeable anti-recoil butt plates. Depending on the model of gun, Inflex II and Classic butt plates of different thicknesses are available: 1.3 cm, 2.0 cm and 2.5 cm. These butt plates enable you to adjust the length of your stock without any difficulty.

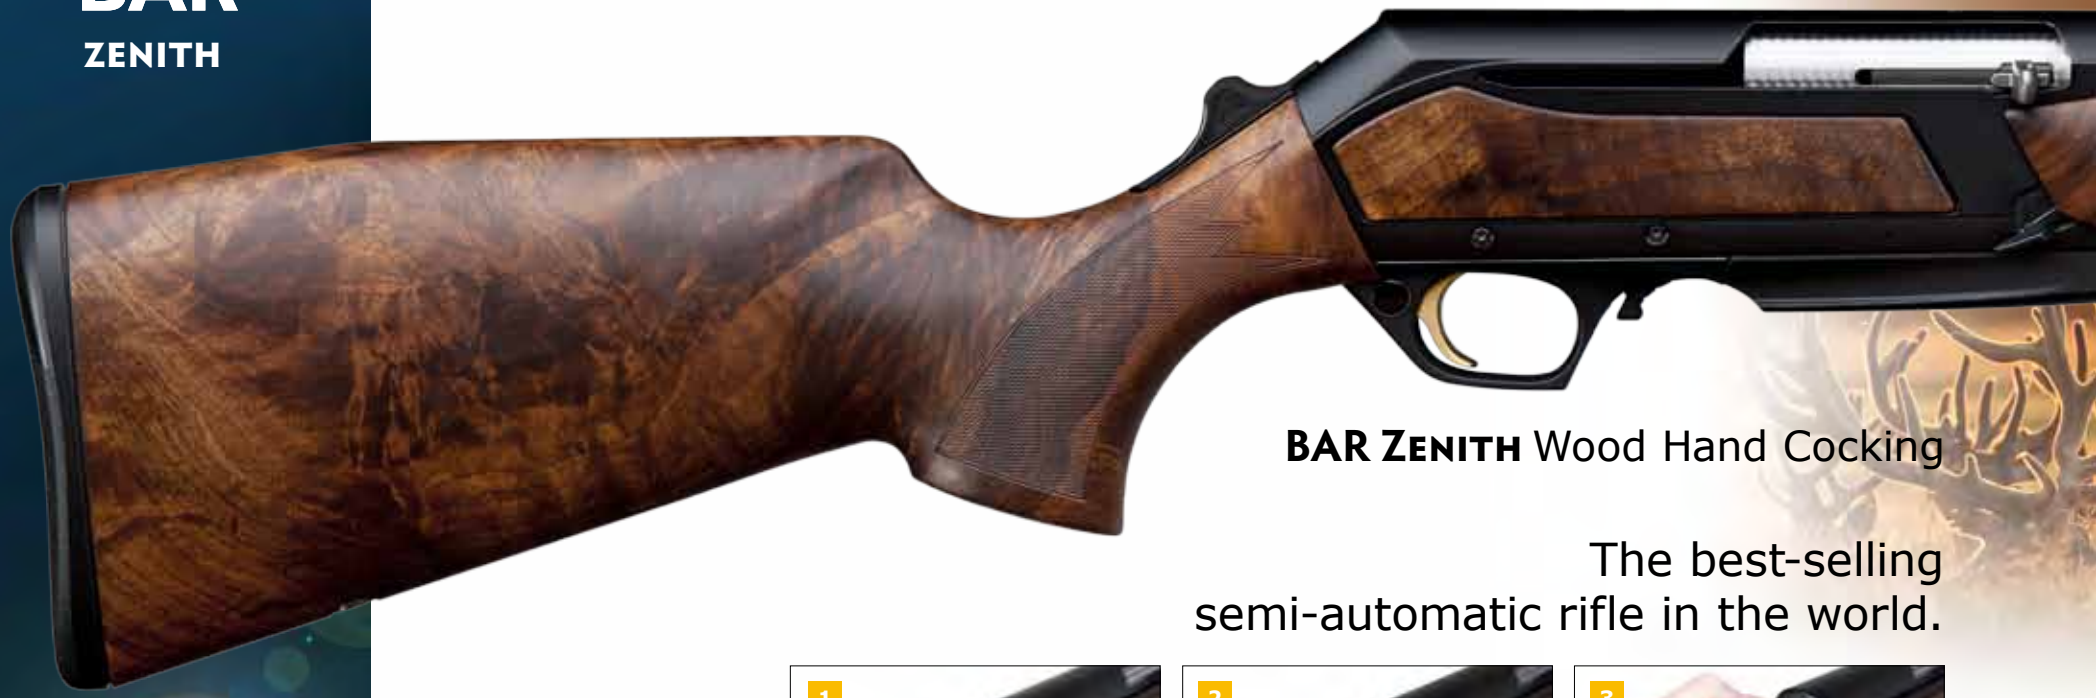
ZENITH

Semi-automatic Rifles



BAR Zenith Wood Hand Cocking

The best-selling
semi-automatic rifle in the world.

NEW 2012

Hand Cocking System

The BAR Zenith Prestige Wood now has a new manual cocking system.

The manual cocking system lets you literally cock your rifle, by moving the arming plunger forwards, which puts the hammer springs under load.

Your gun is now ready to fire.

When hunting and at your firing station, you can feed a cartridge into the chamber of your gun and then use the manual cocking system for putting the cocking plunger in the "uncocked" position. Your rifle is now safe.
When you want to fire, you just have to push the plunger forwards. Your rifle is now ready and all that you still need to do is to squeeze the trigger.

You can just as easily uncock your gun by pressing on the cocking pushbutton on the top of the plunger. This removes the load from the hammer springs and makes your gun inoffensive, and therefore safe.

It is a very simple easy-to-use system that gives your rifle an extra degree of safety.

1. Cocking plunger in the "uncocked" or safety position.
2. Cocking plunger in the "cocked" position, a red dot appears. Your gun is ready for firing.
3. Uncock your BAR Zenith by pressing the pushbutton downwards.

Bar Zenith Wood HC

The BAR Zenith Wood HC possesses a longer piped barrel that offers a more accurate line of sight. The new manual cocking system located on the top of the pistol grip offers an extra degree of safety.

Bolt Action Rifles - Lever Action Rifles

X-Bolt Hunter with sighting system

X-Bolt Hunter
with sighting system

Right-hander – left-hander

This version is characterised by the battue rib type sighting system and optic fibre front sight allowing for rapid firing without a scope at short distances. This is ideal for driven hunts and is very versatile in use. Moreover, a "hide" type rear sight is delivered with your gun. The very modern designed and perfectly ergonomic forearm of the X-Bolt is made of walnut.

Available in a left-handed version calibres 308 Win , 30-06, 270 WSM, 300 WM

BLR Lightweight

Here is the classic version of the BLR. This lever-action gun is at home everywhere.
On rifle ranges, in the hide, or when tracking where its lever action plays a reassuring role as you cross difficult terrain with the gun slung or on your shoulder.

BLR Lightweight Battue

The BLR is the only lever-action rifle developed in magnum calibre. Its mechanics are impeccable and characterised by the exceptional smoothness of its operation.
It has a removable magazine and a highquality barrel and is ready for fitting a scope. Its battue rib along with a short barrel makes an excellent weapon for driven hunts and tracking.

BLR Lightweight Take Down

The BLR now exists in a Take Down version, i.e., it can be dismantled, for example, to facilitate its transport on hunting trips.

No tools are required for dismantling, which is a quick and easy operation that never affects the accuracy of your gun.

Action frame	greyed steel
Wood	oil finished
Notes	set of 6 convergence adjustment rings

10 YEARS GUARANTEE

Browning reinvents the Double Express rifle

The barrel assembly, the essential part of this gun, is both classical and innovative. A spacer ring placed on the upper barrel ensures the precision of the vertical convergence of the barrels, while the lateral convergence is ensured by the design of the barrel itself, which incorporates a unique "cradle" strip.

Whenever, a choice of ammunition is made, a spacer ring is recommended and placed in a fool-proof position below the foresight on the top barrel, which guarantees the convergence of impacts coming from both barrels.

Please note this operation must be performed by your gunsmith.

The benchmark for Bolt Action Rifles

X-BOLT

THE SHOOTING INDUSTRY AWARDS 2011
SHOOTING Gun SHOOTING TIMES
WINNER New Rifle 2010

Bolt-unlocking button
Once the rifle has been loaded and is in the safety position, this button enables the gun to be unlocked for removing the cartridge from the chamber, whilst staying in a safety position at the same time.

Rotating magazine
Made in light ultra-resistant polymer, it gives exclusive protection to bullet noses.

INFLEX TECHNOLOGY

This extra-soft pad offers the best recoil absorption possible on a rifle.

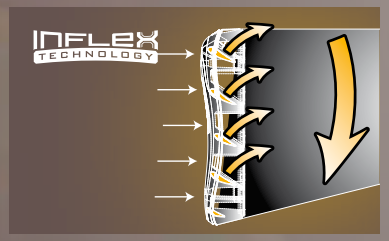
FEATHERTRIGGER™

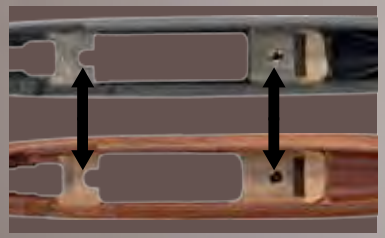
Feather Trigger
The new adjustable three-lever Feather Trigger™ system of the X-Bolt allows a rapid and clean action from the trigger show, with perfect accuracy and no overtravel.

The Browning appeared like a revolution in the bolt action rifle universe. The X-Bolt was built on the foundations of the success of previous Browning rifles, carrying numerous innovations that will without doubt make it one of the best rifles on the market.

An extremely accurate barrel
Every barrel is checked three times for providing exceptional quality and accuracy.

X-Bolt Hunter without sighting system





Inflex anti-recoil butt plate
The Inflex Technology anti-recoil pad is standard on every X-Bolt rifle. This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun.

Utmost accuracy
A free-floating barrel is essential for utmost accuracy.

The X-Bolt's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel/breech block assembly at two points with respect to the forearm, at the front and at the rear.

X-Lock mounting system
The X-Lock scope-mounting system has 4 screws per fixing point. Therefore it is more stable and provides higher accuracy.

Bolt-unlocking button
The bolt-unlocking button works in conjunction with the safety to provide an added degree of safety.

Accessories and fittings
See pages 66-67.

X-Bolt Stainless Stalker
Fluted Threated

All the X-Bolt Hunters with sighting systems are provided with a « battue » type rib and rear-sight.

Fittings and accessories see pages 66 -67

Bolt Action Rifles

EUROBOLT

A-BOLT Composite Stalker

EUROBOLT

The Eurobolt is provided with interchangeable sights. Thus, the gun can be modified to excel on a high seat hunt (with a rear leaf sight) or to make it formidable on a drivengame hunt (with a quarter rib). The trigger has a "stecher" (set trigger) mechanism, which allows the gun to be fired with a very light trigger pull for very accurate shots.

A-BOLT Composite Stalker

Endowed with the features unique to the A-Bolt line, this Stalker version is extremely robust in the worst conditions as a result of its composite buttstock.
In addition, it will meet your every expectation, whether for hunting or sharpshooting.

A-BOLT UK Stalker

This A-Bolt Composite rifle is offered in a highly specific configuration, its slightly shortened barrel is threaded (M14x1) at the end.
The model is also supplied with a steel fixing base and an extra magazine.

Semi-automatic Rifles

BAR STEEL Affût Boss™

BAR STEEL Affût

BAR STEEL Affût Boss™

The addition of the BOSS™ system produces two particularly interesting effects: recoil reduction (in the range of 30 to 50%) and increased accuracy.
The performance of the BAR is thus improved when shooting using a scope or at long distances.

BAR STEEL Affût

This version is fitted with a vertically and horizontally adjustable rear sight.
The fine metal front sight ensures perfect accuracy of aim.

EXCLUSIVE BROWNING BOSS™

(Ballistic Optimizing Shooting System): improvement of accuracy.

The BOSS™ system has two main advantages: ***Improvement of accuracy***: the BOSS™ system allows the bullet to leave the barrel at the ideal moment, i.e., at the "peak" or "valley" of the vibration wave when the muzzle is virtually motionless.

Recoil reduction: air vents located all around the circumference of the BOSS™ system serve as a muzzle brake by diverting the combustion gas. The result is a recoil reduction of around 30-50% depending on the calibre and, therefore, excellent shooting comfort.

B725
Sporter

The legendary strength is now combined with revolutionary design and features

"Legendary reliability" and "innovation" are the B725's watchwords.

The new Browning B725 is an aesthetic and technical revolution in Over and Under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding Over & Under shotgun on the market.

B725

The legendary strength is now combined with revolutionary design and features

Low action frame

The new B725 has a low action frame, which combines all the qualities of reliability and long-life possessed by all Browning Over and Under shotguns. The action frame has a lower and more compact profile than most other Over and Under shotguns.

The low action frame provides the following benefits when shooting by:
- Enabling faster aiming and therefore more instinctive shooting. Reducing muzzle flip due to the frames inline recoil providing a more comfortable shooting position, making it highly manoeuvrable and effective when shooting.
- The B725 is the only Over and Under gun that combines the reliability and legendary sturdiness of Browning Over and Under guns, thanks to its wide, flat bolt, a unique hinge pin and wide recoil surfaces, all combined with a low action frame.

UNIQUE TO BROWNING

INVECTOR DS™

Invector DS chokes

The new Invector DS chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

The optimal 80 mm length enables an exclusive internal shape to be developed, which optimises performances over all shooting distances and ensures a uniform concentration of the shot pattern when using lead or steel shot.

The new patented Invector DS (Double Seal) Chokes offer a double seal. They are fitted with a compression ring that limits penetration of combustion gas between the choke and barrel. The thread on the muzzle side forms an obstacle to prevent exhaust gasses from entering. The ring stops the Invector DS from unscrewing when firing. This guarantees that the choke stays clean and is easy to remove under any conditions.

See the full range of Invector DS chokes on page 87.

Extensive shooting of 500 rounds

After extensive shooting of 500 rounds of the dirtiest loads, competitor's choke tube that don't have a gas seal show significant grit and residue buildup on the tube.

The innovative gas seal on Browning Invector-DS tubes keeps the choke tube cleaner, for easier removal and installation.

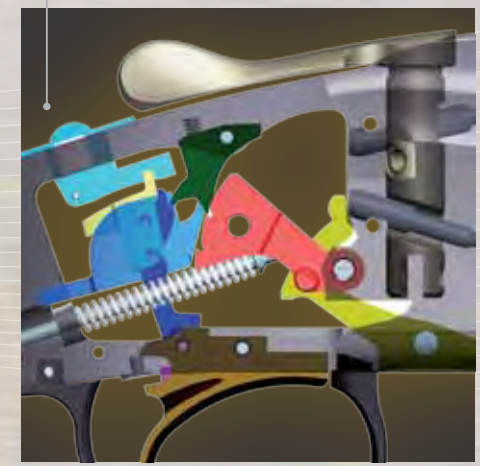
INVECTOR DS™ COMPETITOR'S CHOKE

Canon Back-bored | Vector Pro

NEW 2012

The B725 has new barrels made of new Back-bored Vector Pro shaped barrels and Invector DS chokes.
This gives the B725 perfect balance, ergonomics and swing in all shooting conditions.

The principle of the Back-bored Vector Pro barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone wich provides three advantages:
- Increased speed and better penetration of shot by reducing friction between the shot and the walls of the barrel
- Better shot pattern by reducing any pellet deformation when going from through the forcing cone between the chamber and the barrel bore.
- Recoil is reduced because the shot load moves more freely.



Mechanical firing

The B725 has an improved mechanical firing system, allowing the shooter to really "feel" the shot as the trigger is pulled, which makes for a great feel.

These new firing system is shorter, faster and lighter giving more control over your shooting.

Browning's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

Even if you only have one cartridge in your gun, you will still be able to fire, which is not the case with an inertial system.

Inflex II recoil pad

A totally new Inflex II recoil pad is fitted on all B725 shotguns as standard.

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun.

This exclusive material makes shouldering easier. Two other pads, 20 or 25 mm thick (available on option), make it easy to adjust the length of your stock. In this way, you can adapt your B725 to your own morphology and also adapt it depending on the hunting season.

Furthermore, these exclusively designed pads, 20 or 25 mm thick, generate a downward movement of the stock when firing, moving it away from the shooter's cheek, and giving incomparable comfort when firing.

See the full range of Inflex II recoil pads on page 67.

Features and looks are only part of the B725 equation for success. The new B725 feels incredibly balanced in your hands from pad to muzzle. The B725 feels light and swings fast. Put an B725 to the real test by picking one up.

The grip is comfortable, the forearm is compact, narrow and places your front hand closer to the bore line for superior hand eye coordination and pointability.

ERGO BALANCED

Over-and-Under Shotguns

ULTRA XS Prestige 12M

ULTRA XS Prestige 12M

The Ultra XS Prestige is the specialist in Sporting Clays.

Equipped with a Back-bored barrel assembly, the top rib is mounted on a rounded base in order to allow for the free expansion of the barrels when their temperature is increased.

ULTRA XS Prestige 20M

This version of the Ultra XS 20M is fitted with superb oil finished walnut, a new engraving with gold inlay and exclusive 100% titanium chokes.

ULTRA XS 20M

Fine and distinguished, this 20M calibre Ultra XS is extraordinarily effective.

Its quick and precise swing, combined with Back-bored barrels equipped with Midas chokes, offers exceptional performance.

ULTRA XS 12

Sporting clays, a gruelling and technique-oriented discipline, can take on very different forms. Parcours in open fields, in undergrowth, and the majority approaching and retreating clay.

The Ultra XS allows you to modify the necessary parameters in a few seconds.
The XS Sporter version is equipped with external Midas chokes.

Over-and-Under Shotguns

ULTRA XT High Rib

NEW

ULTRA XT High Rib

NEW

This Ultra XT has a high top rib. The pillared rib enables you to fire in a more natural position, the adjustable cheek-piece offers millimetric stock adjustment for accurate sighting.

ULTRA XTR 12

This model is fitted with a rubber comb that is simultaneously both smooth to the touch and non-slip. This gun strives for accuracy in aiming that can be guaranteed to the millimetre with a comfort that, until now, had never been attained. It is primarily geared toward shooters who practice their sport intensely.

ULTRA XSH 12

Oriented toward pit shooters seeking good interdisciplinary versatility (pit, double trap, etc.) and Helice (ZZ), this ultra XSH is equipped with removable Midas chokes and 74 and 76cm barrels.

ULTRA XTR Prestige 12

As its name would indicate, this Prestige version of the XTR shotgun sets itself apart with the superior quality of its wood and its 5 100% Titanium Invector+.
Its completely reworked engraving features silver inlay.

Ultra XTR 12

Ultra XSH 12

Ultra XTR Prestige 12

Every Ultra X is supplied with three different triggers adjustable in 3 positions so that you can make your gun suit you perfectly.

All Browning Sporter over-and-under shotguns come with 5 chokes.

Titanium Chokes
Titanium chokes are made with 100% titanium exclusively for Browning by Briley.

Midas Chokes
These chokes can be detached and reattached without a key. Their ballistic performance is unparalleled. Developed in conjunction with the Briley company.

Ultra XTR

Revolutionary... You are now ready to shoot !

Grand Prix, the first Browning shotgun with disconnectable ejectors

Grand Prix Trap

Grand Prix Sporter

The Sporter and Trap GP shotguns are equipped with the "Ejection Control" system that, after a simple operation, allows you to switch between ejection and extraction modes.

The Back-bored barrels are fitted with Invector Plus Midas chokes made by Briley, the renowned manufacturer.

Santiago Pastor

Grand Prix Trap

Following the Sporter version, the line of GP shotguns with disconnectable ejector is now available in a Trap version.

Grand Prix Sporter

The GP Sporter lends itself to competition shooting, with an approximate pull weight of 1.8 kg and a Back-bored barrel equipped with Midas chokes.

This is an attractive gun with a modern, sporty engraving that incorporates both gold and silver into its design.

Heritage Sporter

The highest-performing and most reliable shotgun

Heritage Sporter 12M

Heritage Sporter 12M

The Heritage Sporter combines the performance of a modern shotgun with the elegance of a true deluxe gun. It embodies the line of the hunting model with its magnificent side plates, but with the specifications of the Sporter versions. The pistol buttstock and tulip forearm are made from beautiful, oil-finished walnut. Each gun is beautifully engraved.

Over-and-Under Shotguns

B525 Sporter Prestige 20M

NEW

B525 Sporter Prestige 12M & 20M

Elegant and refined, the B525 Sporter Prestige is fitted with grade 4 oil-finished walnut, "water droplets" on each side plate, and a chequered binding. The buttstock is also equipped with a metal plate on which you can have your initials engraved. This fine inscription, performed entirely by our master engravers, covers nearly the entirety of the pieces.

GTS

Distinction & Elegance

GTS Elite 12M

GTS Special 12M

GTS Elite 12M

With its superb engraving, this version of the GTS exudes both distinction and elegance. The engraving, which features the distinctive GTS design – a duck that gradually transforms into a clay target, is enhanced by a lovely arabesque motif and superb oil-finished European walnut.

GTS Special 12M

The ideal model for hunting and Sporting.

Its Back-bored barrel, 10 mm rib, and ability to fire any cartridge (including Steel shot) make for a formidably effective gun without sacrificing comfort, ideal for hunting waterfowl and migratory birds.

10 YEARS GUARANTEE

Specially designed for Sporting clays

Cynergy Composite Black Ice 12M

Cynergy Composite Black Ice 12M

Its futuristic style will turn heads on the shooting range. The buttstock and forearm are made of composite material with rubber inserts, increasing this gun's weight and making it more resistant.

A supplementary adjustable comb that is included with the gun allows the buttstock drop and cast to be modified as you desire.

Cynergy Sporter Inflex 12M

Specially designed for Sporting Clays, the Cynergy Sporter stands out for its exclusive Diamond Titanium exterior chokes, which offer unparalleled ballistic quality. Its appearance and revolutionary design are undoubtedly a novel contribution to the world of shooting. It comes equipped with an Inflex pad.

Cynergy Pro Sport Adjustable 12M

This version has a traditional stock with an anti-recoil butt-plate.
The adjustable cheek-piece allows you to adapt your stock to your morphology and to your shooting habits.

Cynergy Pro Trap Adjustable 12 Diamond

Cynergy Pro Trap Adjustable 12
This Trap model has a stock with an adjustable cheek-piece and an anti-recoil butt-plate.
It is also fitted with 5 Invector plus Diamond chokes that offer optimal versatility of use in all trap-shooting disciplines.

extensive shooting of 500 rounds

INVECTOR DS™ Competitor's choke

After extensive shooting of 500 rounds of the dirtiest loads, competitor's choke tube that don't have a gas seal show significant grit and residue buildup on the tube.

The innovative gas seal on Browning Invector-DS tubes keeps the choke tube cleaner, for easier removal and installation.

Rifles .22 LR - 17 HMR

T-Bolt Sporter Composite
(Scope not supplied)

T-Bolt Sporter

Buck Mark Sporter Rifle

T-Bolt Sporter

This rifle is a "vintage", the re-issuance of a best seller, a legend. Available in .22LR, .22 Magnum, and 17 HMR calibres, it is quite close on an aesthetical point of view to its ancestor, the first T-Bolt, but the mechanics have been completely modernised.
It is characterised by its straight pull bolt that loads cartridges from an exclusive 10-round rotating magazine.

T-Bolt Sporter Composite

This version is equipped with a buttstock made of highly-resistant ergonomic composite, allowing intense use in all conditions.
Another very useful characteristic is an additional magazine integrated in the buttstock and, more particularly, in the pad.

Buck Mark Sporter Rifle

Non-standard by its design, compact, and tremendously accurate and reliable, this rifle offers a range of truly extensive usage possibilities.
It has adjustable sighting equipment with an adjustable rear sight as well as a fibre optic front sight as well as an integrated rail for optical mounting.

Barrel	56 cm	threaded 56 cm	threaded 42 cm	50 cm

Provided	mounting supplied	mounting supplied		mounting on integrated rail
Options	rifled barrel 16.5 " long in 22LR and 17HMR calibres			

Additional magazine integrated in the buttstock for the Composite version

An additional magazine integrated in the buttstock and, more particularly, in the pad.

During intense shooting, it is therefore very easy to quickly replace the first empty magazine.

SA.22 – BL.22 Rifles

SA .22 Grade 3 *Custom Shop*

The Semi-Auto .22 is the biggest seller and the most often imitated.

This rifle is particularly light and efficient. The barrel is dismantled in an instant. Made by the Custom Shop from original pieces, it is available in grades 2 and 3.

SA .22

This legendary rifle, often copied but never equalled, has been made continuously since 1924.
Its exclusive features, through-the-stock loading, bottom ejection and the fact that the rifle can be dismantled make it an exceptional firearm.

BL .22 Grade 2

This jewel of the era of the pioneers, back in the Wild West, the .22 BL with its short movement action-lever (33°), external hammer, and magazine tube.
It enables you to mix all types of cartridges (long, long rifles, short) with no risks of jamming.

SA .22

- Operation in "blow back" mode (unlocked breech activated by gas)
- Automatic eject, arming, and loading
- Loading performed in the buttstock (the magazine tube is withdrawn from the back of the rifle and the cartridges are inserted one by one in the hole found in the buttstock)
- Bottom ejection
- Barrel take-down with wear adjustment.

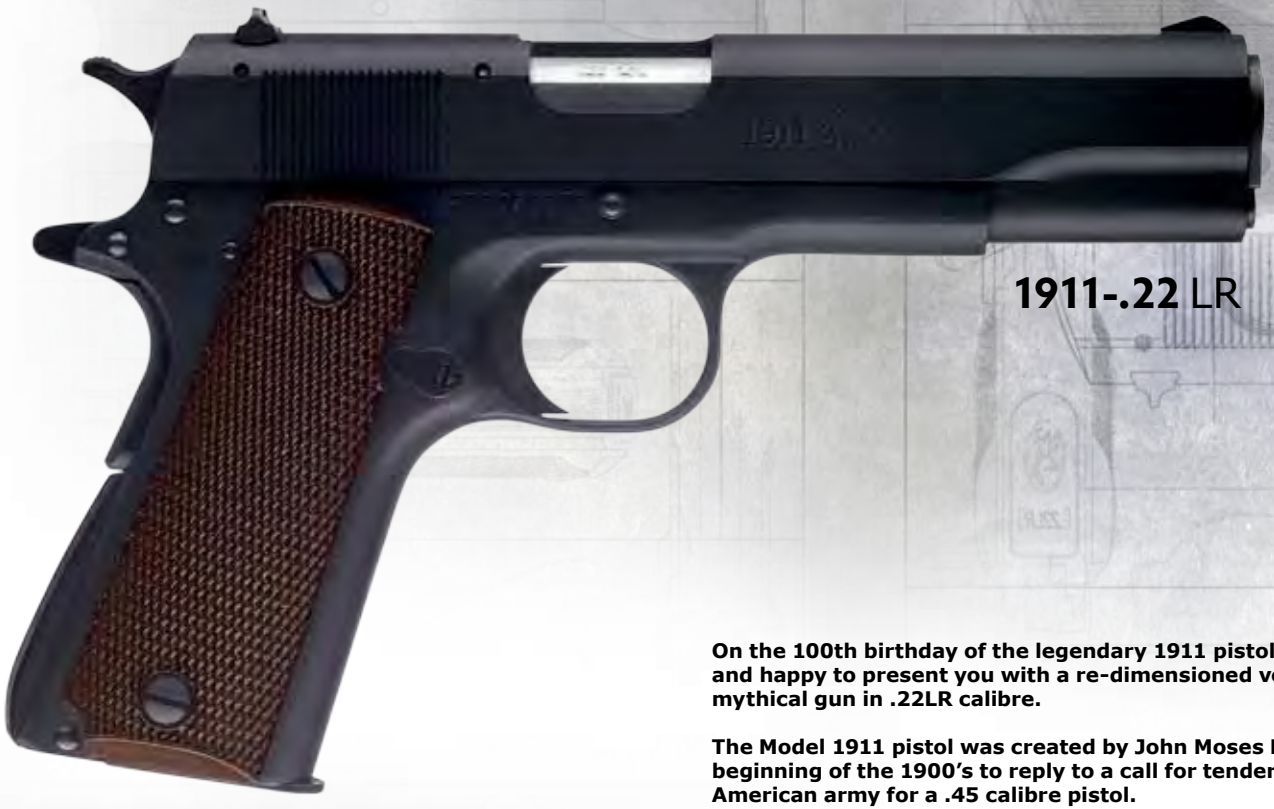
Hand Guns



1911-.22 LR

On the 100th birthday of the legendary 1911 pistol, we are proud and happy to present you with a re-dimensioned version of this mythical gun in .22LR calibre.

The Model 1911 pistol was created by John Moses Browning at the beginning of the 1900's to reply to a call for tenders made by the American army for a .45 calibre pistol.

The pistol then became the most widespread and most popular handgun.

This new resized version respects the proportions and functionalities of its ancestor perfectly, whilst offering a more compact gun with an exceptionally low weight, barely 430 grams.

The slide is machined in a single aluminium block, the side grooves make it extremely easy to hold and handle, and fluid and easy to use. It has a black mat finish.

The aluminium receiver also has a mat black finish. The barrel, made from molybdenum chrome steel has a barrel insert machined from a single stainless steel block.

The magazine with a capacity of ten rounds is in heat treated steel to guarantee long service life and reliability of loading.

The manual safety catch is well-dimensioned. Like the original model, the 1911-.22 has a pistol grip safety system.

Barrel	11 cm
Calibre	.22 LR
Rear sight	fixed
Front sight	fixed
Handle	fixed
Material	brown composite
Magazine	plastique
Total weight	10 rounds
Finishing	0.43 kg
	black

Buck Mark Contour URX

Browning Buck Mark rim-fire pistols are very highly valued due to their quality, reliability and accuracy. These pistols have a receiver made from a single aluminium block machined using numerical control. The barrel is machined in a single top-quality steel block and the chamber is hand-bored for guaranteeing optimal accuracy. Every Buck Mark pistol has fully adjustable sights.

Breaks are light accurate and crisp. Grips, URX version in rubber or UDX in wood are perfectly ergonomic. Your hand positions itself systematically in the same place on the grip every time you fire. This allows more instinctive firing and improves accuracy.

Hand Guns

GP Silver Chrome

The GP exists in the Silver Chrome version, which is equipped with a rear sight that is adjustable in elevation and direction and a sport front sight with a rounded base plate.

The slide and the receiver are nickeled, and the rubber grip is made by Pachmayr, for sure and efficient handling.

GP MK III S

It brings together all of the qualities found in the GP, yet with an additional ambidextrous safety and lighter weight (910g), which make it an accurate gun with practical handling. The "Pachmayr" handles ensure the best handling.

It is made with a swivel system.

Adjustable **GP** Practical

The GP Practical meets the demands of Practical Shooting. It has undergone several improvements, such as:

- Adjustable, low profile sights.
- Particularly crisp trigger pull.
- Extremely comfortable handling due to its Pachmayr chequered rubber grips.

Clothing Care

Ideal for your **HUNTING** gear or clothing

Absorbs odours

Traditional washing products are always perfumed and inform game that you are close-by.

Browning 3 in 1 treatment is not only perfume-free but it also contains odour-absorbing molecules and masking agents to make you "invisible" to game's sense of smell. The advantage of the Browning anti-odour system is that it can be used on all your hunting clothes and will avoid you having to invest in costly clothing that is less effective over time.
Best results are obtained by combining 3 in 1 waterproofing treatment with the 3 in 1 washing product.

Absorbs UVs

Unlike human eyes, deer's eyes perceive ultraviolet rays.

The Browning treatment reduces the UV radiation reflected by your clothing.

Best results are obtained by combining 3 in 1 waterproofing treatment with the 3 in 1 washing product.

Clothing cared for with Browning products | **Clothing cared for with a traditional washing product**

3 in 1 water-proofing spray for hunting wear

Water-repellent treatments applied to the outside of fabric tend to lose their efficiency as time goes by (washing, rain, rubbing, etc.). Therefore, they need to be retreated regularly with a waterproofing product that does not damage the inner membrane and allows the fabric to breathe correctly.

129893

3 in 1 washing product for hunting wear

Cleans without damaging technical clothing

The micropores on waterproof breathable membranes get blocked as time goes by (dust, dirt, etc.), which reduces their capacity to evacuate moisture into the open air. Regular washing with a specialized product that respects membranes' characteristics guarantees the long life and effectiveness of your technical clothing. Browning treatment will also wash your normal clothes wear perfectly well.

129894

Browning treatments are environment friendly and OEKO-TEX® Standard 100 certified.

Cleaning and Maintenance

LEGIA SPRAY: cleaning oil for barrels and housings: excellent product for maintenance and protection.
With our pumping system (without propellant gas, 200ml) and the adhering qualities of our oils (low volatility) the performance of the LEGIA SPRAY has 25% more active ingredients than other shotguns.

1

This top-quality kit is ideal for rifles and shotguns, calibres .30 to .22 and from calibre 12 to .410, as well as for pistols, calibre .357, .40 and .45

2

This 32 pieces kit includes two cleaning brushes, five wollmops, two solid brass adaptors, two slotted ends, and 50 cleaning cloths

3

A means for protecting both firearms and accessories. The soft imitation felt fabric does not damage firearms and includes a Zorb Tech™ waterproof top. Zorb Tech™ keeps spills from spreading and cleansing agents from soaking through. This mat is also washable, dryable, and treated to be stain resistant

The Reactar™ G2 anti-recoil patch uses the new flexible Impact Geltm material, which absorbs recoil better than any other product on the market

The Reactar™ G2 patch is placed inside jackets, vests or shirts fitted with a special Reactar™ pocket

4

Only 8mm thick, it does not change your length of arming or point of aim. Flexible it adapts itself to your morphology without the slightest difficulty

BROWNING Partner Lodges
www.browningPartnerLodges.com

The Browning B525 is already appreciated by more than a million hunters for its many qualities, and most especially for its unequalled sturdiness in the field. In collaboration with the brand "Magic Safari Lodges" and the hunters' travel agency "Orchape", some "small game" destinations are suggested in Argentina, Burkina Faso, Kazakhstan, Chad, and Spain. These are now "browning Partner Lodges". Several B525 shotguns are made available to hunters at each location. This free service that offers the opportunity to hunt with a legendary shotgun will also allow you to avoid the problems and possible hazards of travelling by air with a gun.

ORCHAPE
Organisation Chasse & Pêche depuis 1958

Magic Safari Lodges
MAGICSAFARILODGES.COM

"Magic Safari Lodges" is the premier guide to exceptional hunting destinations specially conceived for those looking for better experiences, blending deluxe facilities with unforgettable locations.
www.magicsafarilodges.com

A unique sporting challenge awaits you !

LES COLVERTS DE SABOURNAC – France

Unique in Europe, Sabournac is a private hunting estate that has been organising mallard shoots over the last twenty years or so on the principles of the large "English style shoots". This type of hunting surprises and appeals to many hunters, who like shooting a few hundred cartridges on high-flying mallards. The birds fly over surprisingly high, which challenges top-shooters to equip themselves with full-choke guns. The estate is open from September 1st to January 31st and may be reserved by a single group of 4 to 12 guns.

CAMPEMENT DE L'ELÉPHANT – Burkina Faso

Hunting francolin and guinea-fowl at random is the speciality of the Elephant Camp together with "pass shooting" turtle-dove and sand-grouse coming in to drink at waterholes. The season goes from December through to March. Hunters will find a comfortable camp (with air-conditioning and a swimming pool). Enjoy all the unfamiliar sights and sounds of the African bush.

CORTIJO SOTO REAL – Spain

A unique sporting challenge awaits you at Soto Real. An authentic five-star hunting lodge set among the palm trees, bougainvillea, and orange trees of a working estate in the rolling hills of Andalusia. Driven red-legged partridges are hunted from October until March and walked-up quail from July to September. You can truly expect a challenge above and beyond the usual at Soto Real.

EAGLEMP – Argentina

The EagleMP camp is a reference in duck-shooting in San Javier, located in the province of Santa Fé. This is considered to be one of the most reputed regions in the world for duck-shooting. EagleMP has been managed by Frenchmen for the last 20 years. The season goes from February through to July with a change in biotopes: from paddy fields to marshes passing by the Parana islands. Turtledoves can also be hunted with over 1,000 cartridges fired per day.

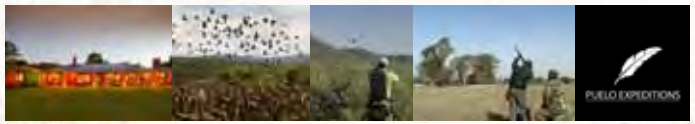
GREAT SPANISH HUNT – Madrid, Spain

Only 45 minutes from Madrid, outstanding red-legged partridge shooting in Spain is at its very best on the La Fnca and Fuensauco estates, run by Javier Corsini who is one of the most respected shoot owners in Spain with his 30 years of experience. His professionalism, his rigour and his expertise are a guarantee that you will have a magnificent stay with a booty of between 500 and 2,000 birds, depending on the size of the party. Surrounded by an estate of 3,000 hectares, a luxury hunting lodge is ready to welcome you, with its gastronomic creations and top-quality Spanish wines that will really make your stay unforgettable.

KOULOUDIA – Lake Tchad, Tchad

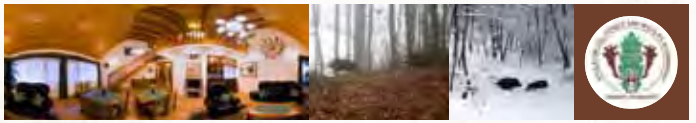
The new KOULOUDIA air-conditioned camp, 3 hours away from N'Djamena offers exceptional hunting for teal, pintail, shovelers and African duck coming from Europe for the winter. The season goes from November through to March in the Lake Chad overflow areas, which are cultivated by villagers and where duck come and eat.

PUELO EXPEDITION - Cordoba, Argentina



Cordoba is considered the dove shooting capital of the world. Over 50 million doves annually inhabit the 60-mile radius (95 km) around Puelo Expedition's lodge. Doves offer fast and challenging shooting with a high number of cartridge shot in one day, from 1000 to 3000 cartridges a day is possible. Puelo Expedition runs 2 different lodges with the high quality standard to offer the best service to hunters. Puelo Expedition runs a lodge in the Buenos Aires province for those who want to combine dove hunting with duck Hunting.

TAMASI - Gyulaj, Hungary



Gyulaj is a territory belonging to the Hungarian water and forestry authorities, which offers exclusive big wild boar battues hunts or shoots in open or closed territory. The size of the estates (900 ha and more) maintains the quality of the hunt and offers everyone the possibility of taking shooting a large number of young boar or big tusked males. A guard accompanies every person at his post during the 3 or 4 beats of the day, which can be organised over a whole weekend. A torchlight presentation of the bag is made to the best Hungarian traditions at the end of the day's shoot, before returning to the very comfortable hunting lodge.
