## John Moses Browning

### THE LEGENDARY BROWNING AUTO-5

More than a century ago, John M. Browning invented the first semi-automatic shotgun, which he christened "the Automatic 5".

As time went by, its name changed and was abbreviated to become the "Auto-5". It was the first ever gun with automatic loading.

The principle used on the Auto-5 was to use the long barrel recoil for reloading.

The Auto-5 was an unprecedented commercial success and a reference for semi-automatics.

The last version of the Auto-5 was commercialised at the end of the 1990's and a great number of them are still in use today.

Over 4 million examples of this legendary gun have been the joy of hunters throughout the world for almost a century.

### THE REVOLUTIONARY BROWNING A5

The new A5 has adopted the style of the 1902 Auto-5. You will see a close resemblance with its "humpback". The distinctive shape of the back of the receiver on the old generation gun has been kept.

This deliberate decision to keep a similar look gives the gun a family resemblance with your grandfather's Auto-5 and it helps you to line up on the target and aim both easily and naturally.

But appearances are misleading: even if its outside lines recall its famous ancestor, the new A5 is, in fact, a marriage of new technologies.

We must remember that the Auto-5 used the long barrel recoil for reloading, whereas the new A5 semi-auto has a breech that operates by inertia.

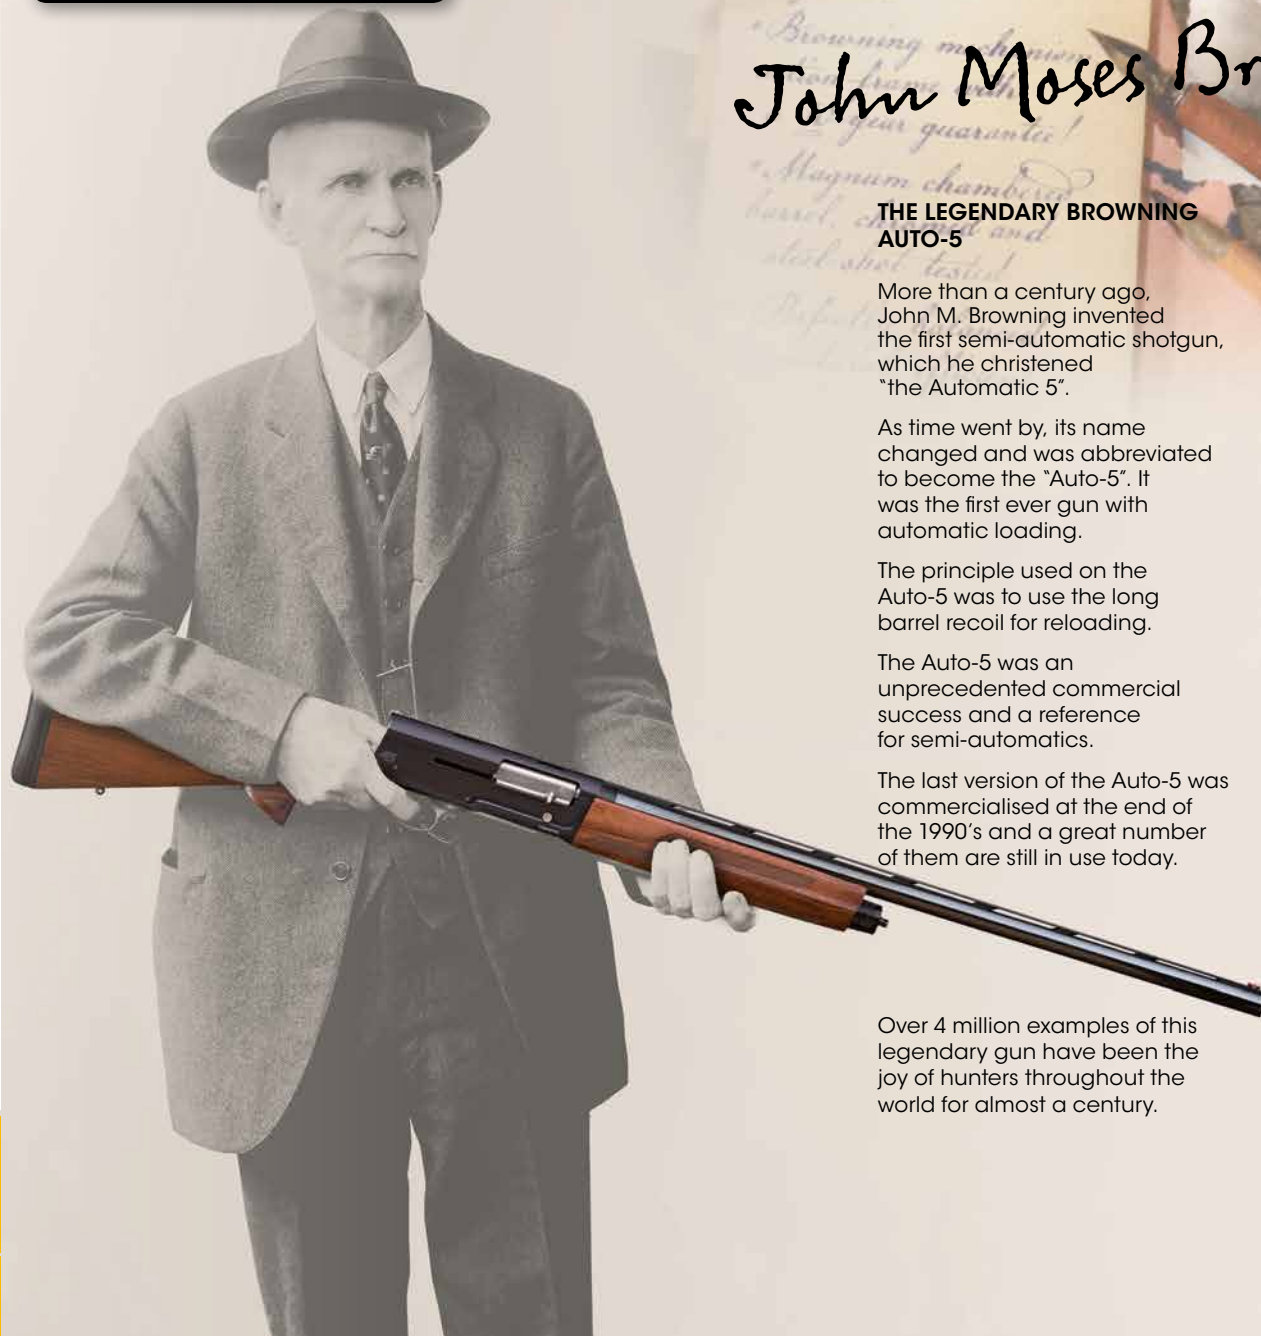

The exclusive, inertial "Kinematic Drive System™" enables you to fire all categories of ammunition from the very lightest (28g) up to magnum calibres.

Other technical innovations are also to be found on the new A5 semi-auto.

For example, there is the new Back bored™ Vector Pro™ barrel, the Invector DS™ choke with an optimal length of 80mm, and the Inflex II recoil pad offering the best possible recoil absorption available for a shotgun.

In conclusion, the years go by and history only remembers the greatest vintages, which stand out on account of their extraordinary capacity to move us by their reputation and the sensations they offer. The Auto-5 is one of them; the A5 comes from the same vine.

Just as a very good wine impresses us, a great wine moves us: that's where the difference lies, trifling, elusive but considerable at the same time. Long live the A5!

# Description Of New Products

Before they are put on the market, Browning's guns have to undergo a wide range of extremely rigorous tests. These are B.A.C.O. (Browning Arms Company) internal tests.

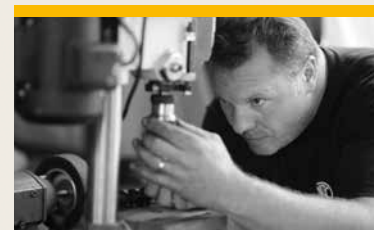

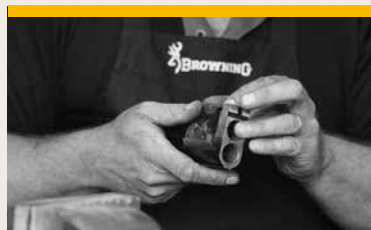

None of its products will be approved unless it clearly meets the following 6 requirements.

In addition, we carry out a systematic inspection process of all mass-produced guns, which involves many checks to ensure that every gun sold meets Browning's criteria with regard to quality, performance and reliability.

## Tests B.A.C.O. BROWNING ARMS COMPANY

- 1 Tests of functioning and endurance**  
The purpose of these highly-demanding tests, which are conducted on both shotguns and rifles, is to ensure they operate correctly whatever types of cartridges are used. Thousands of cartridges are therefore fired to ensure the guns' reliability; no broken or excessively worn parts are tolerated during this test. If such faults are found, they are returned on a systematic basis to Research and Development.
- 2 Tests in extreme conditions**  
When developing a new product, the purpose of this test is to try out the guns in the worst possible weather conditions, using polar temperatures of  $-30^{\circ}\text{C}$  and very high temperatures of up to  $+50^{\circ}\text{C}$ . The gun has to operate perfectly at these temperatures, using a wide range of cartridges. You can therefore use our guns in the most testing conditions, in all circumstances and with complete confidence.
- 3 "Torture tests"**  
When a new product is being developed, it undergoes a wide variety of tests, which are generally more demanding than applicable C.I.P. norms, including a set of "torture tests". A set of guns are subjected to excessive pressure tests and obstruction tests to ensure the strength and reliability of our guns. In addition, we conduct safety tests, which consist of dropping the gun onto its different sides to check its reliability and safety. The legendary strength and reliability of Browning's guns is largely due to their completing all these tests successfully.
- 4 Gun checks**  
When they are manufactured, every gun is subject to a very wide variety of visual inspections and measurements, and has to meet the requirements of the specifications in every respect.
- 5 Gun tests**  
All guns manufactured are fired to ensure their precision and that they are operating properly.
- 6 Accuracy tests**  
We check the precision of every gun which emerges from our workshops. For shotguns, we check the quality of the shot patterns as well as the proper convergence of the barrels at 35 metres. For rifles, we check the precision and pattern of every gun.

### Make Your Gun Correspond To Your Physique.

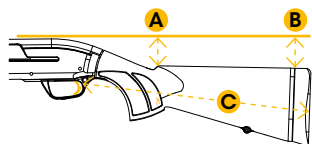

**BROWNING® PROPOSES THE VERY ULTIMATE TO YOU BY OFFERING TO ADAPT YOUR GUN TO YOUR PERSONAL SIZE.**

This service is for persons who are tall, short, with broad-shoulders, beginners or just demanding users, as BROWNING® has made a gun that is the perfect tool for your passion.

The stock can be adjusted by altering 3 important criteria: its length, its pitch or even a version for left-handers

See the 3 pictograms summarizing the options available for stocks, all the way through the catalogue.

AVAILABLE FOR  
Lefthand

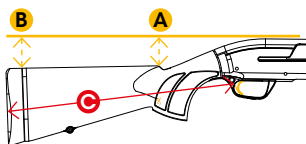

BROWNING® guarantees optimal service by offering you the possibility of purchasing your gun directly in a left-handed version. In this way the stock is ready and prepared for left-handed shooters.

**LEFTHAND**

Available in a left-handed version

Length

#### STANDARD STOCK

A = 36mm  
B = 56mm  
C = 375mm

#### SHORT STOCK

- Shorter
- Lower pitches
- A more rigid, further forward grip

#### B725 & B525 CAL 12

A = 36mm  
B = 50mm  
C = 345mm

#### B525 CAL 20

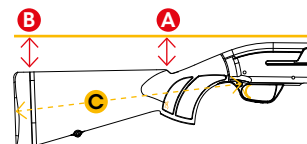

A = 36mm  
B = 50mm  
C = 345mm

**LENGTH**

Available with a short stock

Pitch

**STANDARD STOCK** with  
a normal pitch at  
A = 36mm et B = 56mm

#### STOCK IN OPTION 1 FOR THE B525

A = 35mm et B = 45mm

#### STOCK IN OPTION 2 FOR THE B525

A = 40mm et B = 60mm

#### STOCK IN OPTION 3 FOR THE B725

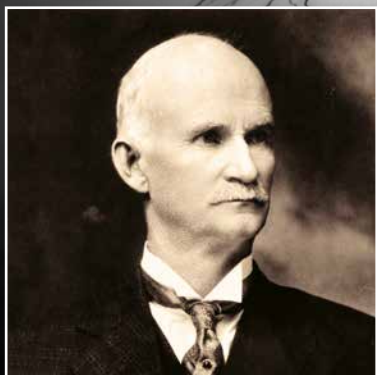

A = 35mm et B = 50mm

**PITCH**

# Custom Shop

The legendary B25, an exceptional custom-made gun

Entirely made in the Fabrique Nationale d'Herstal in Belgium, Custom Shop arms are born in the hands of exceptional craftsmen.

These unique models are meticulously made to order to attain perfection at every stage in their construction.

The finest assembly techniques, the beauty of detail and the love of firearms make these collections unique works of art of exceptional luxury.

Let's create your ideal gun together...

The Custom Shop team working with our trained gunsmiths and your gunshop will look at your ideas and requests providing you with a full specification, quotation and delivery schedule for your own BROWNING® B25.

The list of stock arms can be found on-line on our Internet site under the heading "Custom Shop". You will find descriptive data of the arms available, and perhaps even a source of inspiration for creating your own unique BROWNING® B25.

## Over And Under Shotguns

### B25 Special Bailly

The B25 over and under gun is the result of the encounter between John Moses BROWNING®'s creative genius and Liège's skills in arms-making enhanced by four centuries of tradition.

The B25 is an exceptional firearm, representing the utmost rigour in the search for perfection, and today it is the most refined and most admired over-and-under gun in the world.

SCAN AND DISCOVER THE B725 REVOLUTION

Discover the Sporter version of the B725 on page 80

2013  
**NEW**

VECTOR**PRO**

BACK - BORED™

**B725 HUNTER GRADE 5**

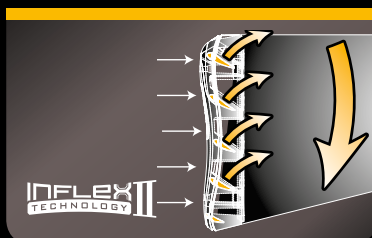

**INVECTORDS™**

The new Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

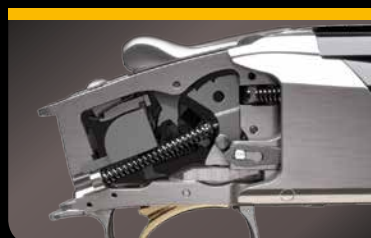

"Legendary reliability" and "Innovation" are the B725's watchwords.

#### NEW INFLEX II RECOIL PAD

A totally new INFLEX II recoil pad is fitted on all B725 shotguns as standard. This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. This exclusive material makes shouldering easier.

Two other pads, 20 or 25 mm thick (available as an option), make it easy to adjust the length of your stock. In this way, you can adapt your B725 to your own physique and also adapt it depending on the hunting season.

#### NEW HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

These new firing system is shorter, faster and lighter giving more control over your shooting. BROWNING's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

#### LOW ACTION FRAME

The low action frame provides the following benefits when shooting by:  
Enabling faster aiming and therefore more instinctive shooting. Reducing muzzle flip due to the frames inline recoil providing a more comfortable shooting position, making it highly manoeuvrable and effective when shooting.

#### NEW INFLEX II RECOIL PAD

This exclusive material makes shouldering easier. Two other pads, 20 or 25mm thick (available on option), make it easy to adjust the length of your stock. In this way, you can adapt your B725 to your own morphology and also adapt it depending on the hunting season.

#### CANON BACK-BORED™ | VECTOR PRO™

The principle of the Back-bored™ Vector Pro™ barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone which provides three advantages:

- Increased speed and better penetration of shot
- Better shot pattern by reducing any pellet deformation when going from through the forcing cone between the chamber and the barrel bore.
- Recoil is reduced.

For ballistic results see page 44

B725

HUNTER

Over And Under Shotguns

B725 HUNTER LIGHT

B725 HUNTER LIGHT

The B725 Hunter Light perfectly resumes the combination of efficiency, weight and design. Its action frame in lightweight aluminium reduces the weight of the gun by over 300g for an even easier swing.

B725 HUNTER

The B725 Hunter is the standard version of the B725 line. It is equipped with numerous technical features - Back-bored™ Vector Pro™ barrels associated with Invector DS™ chokes, a low action frame and the new generation INFLEX II recoil pad. With its tulip fore-end and hunting scene engraving, it will be a delight to use for many years to come.

B725 HUNTER PRINCE OF WALES

The most recent newcomer to the B725 range, it has the same features. Its refined, Prince-of-Wales stock and its rounded fore-end will make it your ally in every shooting condition. It is supplied with a 20mm INFLEX II recoil pad

HERITAGE HUNTER 12M

# HERITAGE

WHEN HUNTING BECOMES AN ART

# B5·25

## HUNTER

### The Most Reliable And Best Performing Line

#### ACTION FRAME

Machined from a single forged part for providing exceptional rigidity and sturdiness.

#### RECOIL SURFACES

The over-sized recoil surfaces give the gun unparalleled life.

#### WIDE FLAT BOLT

The large bolt surface gives the B525 gun a longer life.

When you buy a BROWNING® B525, you are not just buying the heritage and experience of more than 80 years of excellence; you are also buying a shotgun that represents the 5th generation of the legendary B25. The BROWNING® B525 is a more than worthy descendant of this exceptional shotgun and, much like the B25, the BROWNING® B525 has become the benchmark for the industry since its first appearance in 2003.

# B5·25

2013  
**NEW**

#### ● **IMPACT WHEEL EJECTORS**

Firm, powerful and regular ejection.

#### ● **HINGE PIN**

Because of its size, the pin possesses very large contact surfaces - a guarantee of reliability and long life.

## **B525 HUNTER LIGHT 12M**

#### **BACK - BORED.**

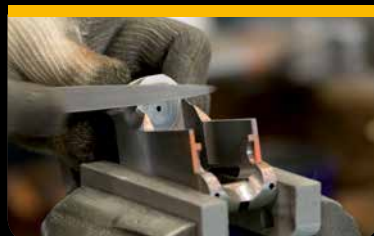

#### **CANON BACK-BORED™**

The 3 benefits of the Back-bored™ barrel are:

- Increase in speed and penetration
- Improvement of patterning
- Less recoil

Hand fitted to create the best there is

The gun moves from one gunsmith to the next to be entirely made by hand, thanks to the expertise acquired over many years by each of the gunsmiths. This is the only shotgun on the market at this price level that is hand fitted during production to such a high performance level, making each shotgun truly unique. Fitting important parts (barrel, action frame, forend) is done by hand using traditional methods (such as red ochre) so as to make the BROWNING® B525 the reference in shotguns. The attention paid to detail when manufacturing and fitting every BROWNING® B525 is unique, just like the "BROWNING® feeling" when the gun locks on closing.

B5·25

HUNTER LIGHT

Over And Under Shotguns Light

B525 HUNTER LIGHT 12M

B525 HUNTER LIGHT 12M

The B525 Light Classic constitutes the ultimate synthesis of effectiveness, weight, and styling. An action frame made of a lightweight "Aircraft" grade alloy reinforced with high-strength steel inserts, a light Back-bored™ barrel profile, and finally a choice of wood and appropriate shaping give this shotgun perfect weight, balance, and feel in the hands.

B525 HUNTER LIGHT ELITE 12M

The B525 Light line is completed with this Elite model, offering richer and more engraving with gold plating.

The buttstock and forearm are made of grade 3 walnut and then finished with oil.

B525 HUNTER LIGHT 20M & 28

Only 2.7kg! The B525 Classic Light 20M or 28 gauge is the lightest of the BROWNING® hunting Over and Under hunting guns.

The action frame of light alloy with a steel insert on the side and a careful choice of wood (which is finished with oil) have allowed us to reach such a light weight.

HUNTER STEEL

# Over And Under Shotguns Steel

B525 GAME 1 12M

## B525 GAME 1 12M

The B525 Game 1 is your ideal hunting partner. Very reasonably priced, it is the basic model in BROWNING® over-and-under hunting guns. Its action frame made from a single block of forged steel, its lightweight Back-bored™ barrels and Invector-Plus chokes make it the ideal gun for all your hunts. It is available with the Auto Safety system.

## B525 HUNTER PRESTIGE 20M

This elegant, refined model has a discreet charm. Its buttstock, made in superb grade 4 oil-finished walnut, has a medallion and sculpted teardrops on each side plate. Its fine engraving, finished entirely by our master engravers, and the very beautiful old silver colour of its action frame make it into an elegant firearm in the best of taste.

## B525 HUNTER 20M & 28

Reprising the characteristics of the Classic, this B525 sets itself apart with its new engraving and its English grip, which give it a very delicate line.

## B525 HUNTER 410M

A real featherweight in its category, this small calibre gun combines reliability, a perfect swing and refined aesthetics

## Take a step forward!

80 years after the invention of the B25, BROWNING® has created yet another revolution in the world of Over-and-Under shotguns with the CYNERGY.

Years of research and testing have been required to develop this reliable, high-performance, elegant, and effective shotgun. BROWNING® takes much pride and pleasure to introduce you to the CYNERGY Hunter!

So that you, the hunters, can benefit from the technical characteristics and ballistic performance of a shotgun that is unique in its field.

The CYNERGY includes:

- The lowest action frame on the market: 60mm
- The fastest second shot: 0.0019s
- The low action frame with its integrated hinge gives this incomparable gun exceptional balance and incredible strength.

To support these claims, CYNERGY's action frame comes with a 10-year warranty. Shouldering the CYNERGY is a perfect, fluid, rapid movement; and the comfort when firing is exceptional. You are in line with a weapon that has virtually no recoil, and the muzzle flip between two shots is so low that the second shot is even faster. The Back-bored barrels of the CYNERGY also allow the firing of high-performance steel shot.

The CYNERGY is also a model of style, both modern and attractive, an innovative design characterised by its smooth flowing lines and slim silhouette.

The CYNERGY's single trigger action will give a sensation that you have never experienced before: incredibly fast, crisp shots; in fact, they are the fastest in the world.

Due to the special firing mechanism on this shotgun - in a class of its own - the time between first and second shots is only 0.0019 seconds, compared to 0.0031 for our leading competitors.

The CYNERGY is now available as a hunting gun, in 12 Magnum gauge with a steel or light alloy action frame and in 20 Magnum gauge with a steel action frame. The CYNERGY hunting gun's extremely elegant line is characterised by the quality of its grade 3, oil-finished wood, but also by the hunting scene engravings on its nickeled action frame.

### THE NEW A5. THE "HUMPBACK" IS BACK WITH US ONCE AGAIN.

The lines of the new A5 will perhaps remind you of its illustrious ancestor, but its lines are the only points this new shotgun has in common with your grand-father's famous Auto 5. The brand new BROWNING® A5 was developed to be the most reliable and the fastest inertia-operated semi-automatic shotgun and with the lowest recoil sensation. Our confidence in the new A5 is such that we offer a guarantee of 100,000 shots or **7 years** with it. This reliability guarantee relies above all on the new Kinematic Drive™ System which is the gun's tireless engine. Other innovations make the A5 a concentrate of new technologies: The new Invector DS™ chokes fitted to the new Vector Pro™ back-bored barrels, the INFLEX II recoil pad and, lastly, the Speed Load Plus system.

## 100,000 ROUND GUARANTEE

In simple terms, kinetic energy is the energy of movement. The new BROWNING® A5™ uses kinetic energy perfectly with its powerful Kinematic Drive™ short recoil system.

The system accumulates recoil energy and converts it into a mechanical movement for actuating moving parts. This concept, tried and tested for many years, has been perfected by the company that invented semi-automatic guns.

The beauty of the Kinematic Drive™ system resides in its simplicity of design, which enables it to operate in a regular, reliable way, with any type of load, and under all extreme conditions of weather, temperature, moisture or fouling.

Our confidence in the Kinematic Drive™ in terms of reliability is such that the A5™ is our first semi-automatic to be guaranteed for 100,000 shots or 7 years.

It stays clean as the gasses are ejected out of the barrel and therefore far away from the mechanism.

The intensively tried and tested Kinematic Drive™ system has shown its abilities with practically every cartridge load from 28g through to Magnum and without any adjustment.

### INVECTOR-DS

Better shot patterns and optimisation of barrel weights and profiles are the main reasons that led us to create the new Invector DS™ (Double Seal) interchangeable choke system. The combination of its muzzle thread and the thinness of its walls, have enabled us to design a longer choke with an exclusive interior profile for improved shot distribution.

From the cylindrical model through to the Extra-Full models, shot-patterns are better graded. Extremely dense and constant shot-patterns can be obtained with the longer inside profile. The outside profile on the muzzle, which holds the choke housing, has been optimised and thinned down.

Besides improving the general appearance of the gun, this modification improves the weight distribution on the barrel, which, in turn, improves the whole gun's swing and balance.

INVECTOR DS™ chokes have been designed to reduce shot-pattern distortion and make sure that they have less empty zones. Our exclusive inside profile also gives higher load speeds for better performance on impact. To avoid or reduce fouling due to gas penetrating between the choke itself and the barrel, we have fitted a new patented brass seal. This seal is compressed against the inner wall of the barrel when the choke is tightened in its housing. The ring prevents the INVECTOR DS™ from unscrewing when firing, and therefore guarantees that chokes stay clean and makes them easy to fit or remove.

UNIQUE TO  
BROWNING®

**See the full range of Invector DS™ chokes on page 94.**

### SPEED LOAD PLUS

Rapid loading systems have been used on BROWNING® semi-automatic shotguns for decades.

Our patented loading system sends the first shell in the magazine directly into the chamber.

In addition, thanks to the rapid unloading system, unloading operations are both simple and fast, without needing to operate the bolt for sending each shell into the chamber.

\* or 7 years

Made from lightweight, aeronautic quality aluminium alloy, the A5's receiver is sturdy and its characteristic shape is much more than just a nostalgic return to the past.

The receiver's familiar humpback shape fits perfectly with the rib for lengthening your line of sight and in this way helps you to aim naturally with faster targeting.

Its features and its look are only a part of the A5's equation for success. The new A5 is incredibly well-balanced from the recoil pad up to the barrel muzzle.

The grip is comfortable, the fore-end is compact and narrow and it places your hand closer to the barrel centre-line for better hand-eye coordination and more accuracy.

The A5 gives you a feeling of lightness and a rapid swing. Put the A5 to the test, by taking hold of it.

The new INFLEX II Technology recoil pad is the next generation of the most recoil absorbing pad available.

A softer new outer material provides even better recoil absorbing performance and is super slippery to prevent snagging on clothing when shouldering. This second generation has added a new absorbent material that slips perfectly on clothing.

25 mm 20 mm 12 mm

With the patented TurnKey system, you can use your car-key for removing the magazine adaptor plug without the slightest difficulty.

Barrel Back-bored™ |

VECTORPRO

For ballistic results **see page 44**

The A5 is fitted with new barrels possessing Back-bored™ Vector Pro™ barrel profiles and Invector DS™ chokes. These two innovations optimize shot patterns and give the A5 a perfect balance, perfect ergonomics and a perfect swing under all conditions.

The principle of the Back-bored™ Vector Pro™ barrel is to increase the diameter of the barrel bore and to extend the connecting cone. This gives three extra benefits:

- An increase in speed and better shot penetration by reducing the friction between the shot and the walls of the barrel
- An improvement in shot patterns due to the shot being less deformed when it passes through the connecting cone between the chamber and the barrel bore.
- And lastly, less recoil as the shot goes through the barrel more easily.

## A5 STANDARD

2013  
NEW

### A5 STANDARD

The A5 Standard is a shotgun with a standard receiver, attractively embellished by a stock and fore-end in oil-polished grade 2 walnut.

### A5 COMPOSITE

A5 Composite designed for the toughest conditions, the A5 Composite is equipped with a stock in high resistance, composite material. With a super-magnum chamber, it is both discreet and futuristic. A real shooting machine, it possesses all the features of the A5 family

### A5 CAMO INFINITY

The A5 Camo Infinity will be your best ally when shooting under cover or in the woods. Its Mossy Oak Break Up camouflage design offers the utmost in discretion. With a super-magnum chamber, it will not cease to surprise you.

### A5 CAMO MAX 4

The A5 Camo Max 4 benefits from the latest generation Realtree Max 4 camouflage film. Highly effective for water-fowl, its reed effects play their role perfectly. It has a super-magnum chamber, ideal for firing 70 to 89mm steel shot.

## Comfort And Vivacity: Optimal Performance

### LENGTH OF PULL EXTENSION SPACER

Supplied with the gun.

### OPTIMAL DIMENSIONS

The drop and the cast can be adjusted by using a set of buttstock spacers.

### SPEED LOAD PLUS

BROWNING®'s new patented loading system sends the first shell directly to the chamber from the magazine.

### INFLEX TECHNOLOGY

1

The recoil pad with INFLEX technology is the most effective of all semi-automatic shotguns.

### LIGHTNING TRIGGER

The Lightning trigger system is designed to offer a smooth, crisp feel with the minimum of travel.

### THE SOFTEST SHOOTING SEMI-AUTOMATIC EVER:

While no recoil reduction system on a shotgun can escape the laws of physics, the MAXUS is sure to change your mind about recoil control. The Power Drive Gas System, INFLEX technology, Vector Pro™ Back-bored™ technology, from BROWNING® are combined to reduce the total recoil force to the shooter by 18% compared to any other semi-automatic shotgun on the market.

### COMPARISON OF MUZZLE JUMP

VECTORPRO™

BACK - BORED™

The new geometry of the extended Vector Pro™ forcing cone together with the Back-bored™ barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

## MAXUS PREMIUM GRADE 3

INVECTOR PLUS™

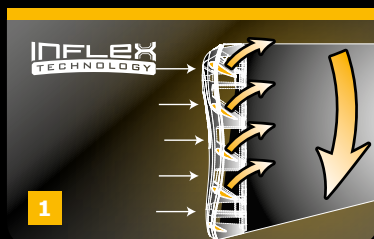

The Invector-Plus interchangeable choke functions jointly with the Vector Pro™ and the Back-bored™ barrel to offer dense and regular shot patterns.

5

SPEED  
LOCK  
FOREARM

4

POWERDRIVE  
GAS SYSTEM

### INFLEX TECHNOLOGY

Much more than a recoil pad in a recoil-absorbing material, it has been designed with an internal structure that lowers the buttstock and pushes it away from the shooter's face after each discharge, which allows a second shot that is even more comfortable and faster.

### RAPID UNLOADING

And now, unloading is just as simple with the new MAXUS. The fast unloading function quickly and easily clears the tube magazine, without any need to individually chamber shells.

### CUT OFF

The MAXUS is equipped with a Cut Off for the magazine to allow the shooter to unload the chamber easily, and thus change the type of shell without having to chamber a shell from the magazine.

### POWER DRIVEN GAS SYSTEM

The Power Drive Gas System uses larger escape valves to remove gas more quickly with heavy loads. A brand new patented design for an integrated valve keeps residue outside the mechanism for cleaner functioning. The piston has a run increased in length by 20% to make it even more reliable with light charges. The system works with loads of 24 to 64g.

### SPEED LOCK

This secure system for setting the forearm makes disassembly of the shotgun for cleaning and storage y and faster. You can attach or detach a strap with one simple press too. The patented Turnkey magazine plug system is easily disassembled with a car key.

MAXUS™

## MAXUS ULTIMATE PARTRIDGES

2013  
NEW

## MAXUS ULTIMATE PARTRIDGES

The delicate engraving representing partridge hunting scenes on one side and pheasants on the other gives it a real up-market standing. Its brushed nickel-coated receiver is an exceptional little gem. Its stock and fore-end are made from grade 3 oil-rubbed walnut.

## MAXUS STANDARD

The latest arrival in the MAXUS range, the MAXUS Standard is a gun with a soberly designed receiver delicately enhanced by grade 2 oil-rubbed walnut elements. Like all the MAXUS range, this steel-shot tested gun is supplied with a 5cm barrel extension.

## MAXUS PREMIUM GRADE 3

The MAXUS Premium is the top of the line model in the MAXUS family. Its elegant brushed nickel receiver is decorated with a fine animal engraving enhanced with gilded birds. The select grade 3 walnut of the stock and forearm have oil-rubbed finish.

## MAXUS HUNTER GRADE 2

The animal engraving and nicked receiver of the MAXUS Hunter give it a very distinct character. This next generation gun enjoys all the innovations of the MAXUS line.

MAXUS CAMO INFINITY

MAXUS CAMO INFINITY

The MAXUS Camo Infinity is covered by the latest generation of Mossy Oak® camouflage film. This super magnum chambered gun is designed for hunting in wooded areas.

MAXUS CAMO DUCK BLIND

The model par excellence for waterfowlers. This shotgun is covered in the famous Mossy Oak® Duck Blind camouflage, which is the most effective camouflage for waterfowl. It is chambered in super magnum to allow you to shoot Steel shot shells of 70mm to 89mm.

MAXUS SPORTING CARBON FIBER

The latest version of the MAXUS range, this gun has been specially designed for sports shooting. With its ventilated rib - tapered from 8 to 6mm, you can line up your target at top speed. Its carbon finish gives it a particularly unique style.

MAXUS COMPOSITE

The all-terrain version of the MAXUS is chambered in super magnum. The buttstock and the forearm of this model have a careful ergonomic design, with all the handling surfaces specially developed for BROWNING®.

**MAXUS** COMPOSITE

# OPTIMAL BALLISTIC PERFORMANCES: BROWNING® BARRELS INCLUDE 3 ADVANCED TECHNICAL SOLUTIONS

## 1. VECTOR PRO™

The new geometry of the extended Vector Pro™ forcing cone together with the Back-bored™ barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

## 2. BARRELS

The principle of the Back-bored™ barrel is to increase the diameter of the barrel's bore by a standard value, from 18.4 to 18.8mm. Increasing the barrel bore diameter provides three benefits:

### INCREASED SPEED AND PENETRATION

Thanks to the "Back-bored™" technology there is less friction between the shot load and the walls of the barrel.

### BETTER SHOT PATTERNS

With less friction on the barrel walls, the amount of shot not deformed on firing is greater, which enables it to keep its ballistic qualities.

### LESS RECOIL

In a Back-bored™ barrel, the shot load travels through more easily and, for this reason, the shooter feels less recoil. Our Research and Development department has measured a reduction in recoil of 6%.

## 3. CHOKES INVECTOR™

Adjustable Invector-Plus™ and Invector DS™ chokes have been specially developed by our Research and Development Department for our Back-bored™ barrel system. They have been designed to obtain "a perfect target" at different shooting distances.

### THE PERFECT TARGET

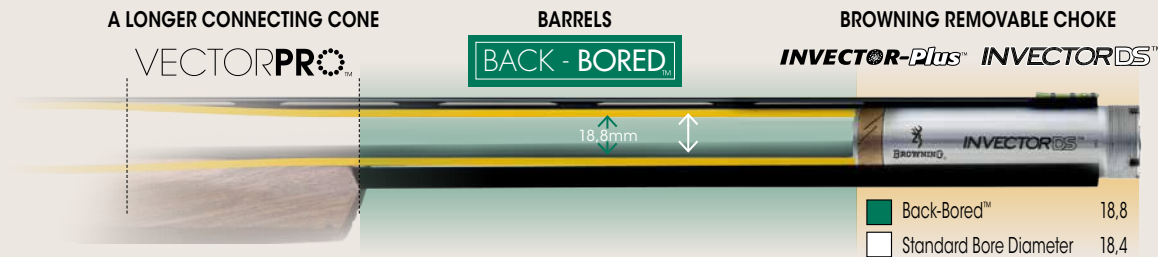

Our objective is:

- Shot pattern efficiency of 80% on target, i.e. 80% of the shot contained in the cartridge must be in a target area inside a diameter of 75cm.
- A perfect shot pattern: the shot pattern must be such that there is a minimum number of "empty" areas, i.e. areas in the target surface where there are no shot impacts.

### AT DIFFERENT SHOOTING DISTANCES

Our objective is:

- To obtain the perfect target at different shooting distances. Depending on the type of choke used, the efficient shooting distance will be different. For example, at 15 m, with an Invector-Plus™ Cylindrical choke, we obtain target shot pattern efficiency of 80% with a minimum number of surfaces without any shot impacts.

See the full range of Invector DS™ and Invector-Plus™ chokes on page 94.

## THE PERFECT TARGET

BROWNING® offers a perfect balance between a shot-pattern efficiency of 80% and a perfect shot-pattern with an exceptionally even spread of pellets.

One competitor's gun alone offers good shot-pattern efficiency, but the pattern itself is much less efficient due to the numerous empty zones in the target area.

## TESTS AGAINST COMPETITION

In its permanent concern for improvement, BROWNING® regularly tests its own products by comparing them with other guns on the market.

Our tests show that the chokes on other guns provide good performances but their shot pattern is by no means perfect and therefore lead-shot tying is not as perfect as with BROWNING®.

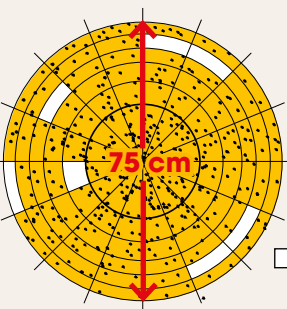

With large numbers of competitors, it is difficult to find any difference between 1/2, 3/4 and Full choke performances (efficiency and shot distribution).

### THE BROWNING® CHOKE RECOMMENDED FOR DIFFERENT SHOOTING DISTANCES

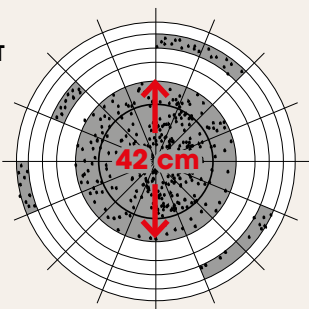

Full Choke	= 35 m
3/4 Choke	= 30 m
1/2 Choke	= 25 m
1/4 Choke	= 20 m
Cyl	= 15 m

Depending on the BROWNING® choke you use, you can adapt your gun perfectly for the distances at which you shoot and the game you are hunting.

### AVAILABILITY SUMMER 2013

#### + SAFETY

##### **BROWNING® 7-TENON BOLT-LOCKING**

A bolt renowned for its sturdiness, which guarantees exceptional safety and accuracy.

##### **HAND COCKING SYSTEM**

Safety guaranteed

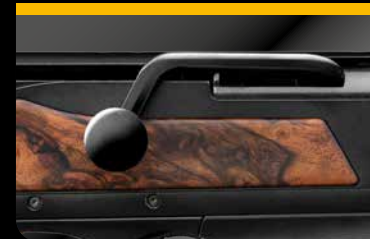

#### + SPEED

##### **QUICK RELOADING SYSTEM**

The servo bolt-return system combines maximum safety, speed and efficiency. Thanks to the time gained in the reloading phase, shooters can concentrate on their firing action.

#### + ERGONOMICS

##### **BREECH CONTAINED INSIDE ITS CASING**

No inconvenience when reloading

##### **INTERCHANGEABLE RECOIL PAD**

The MARAL is fitted with interchangeable recoil pads. Depending on the model of gun, Inflex II and Classic recoil pads of different thicknesses are available: 12 mm, 20 mm, 25 mm. With these recoil pads you can adjust the length of your stock without the slightest difficulty.

# MARAL

# MARAL

The new **BROWNING®** straight pull rifle

# 3 TIMES MORE EFFICIENT

## + SAFETY

### SECURITY GUARANTEED

A safe rifle by its very essence, with its breech confined in the receiver and its manual cocking system.

Unlike other straight-pull action rifles, the **BROWNING®** rotating 7-lug bolt system is a guarantee of protection and absolute safety in the event of over-pressure.

The breech is completely confined inside the gun's receiver and does not interfere with aiming when re-cocking. The shooter keeps the target in his sights without any interference. This confinement also guarantees the cleanliness of the breech system. The MARAL's manual cocking system is designed for maximum safety in both beats and hides.

The manual cocking button lets you cock your rifle just before firing, by moving it forwards, which puts the hammer springs under load.

Conversely, the system is uncocked by pushing the button downwards, which makes the gun inoffensive and completely safe.

### BROWNING® TRADITIONAL ROTATING BOLT

The MARAL is fitted with a **BROWNING®** 7-lug rotating bolt, which has proved its worth for over 40 years.

This legendary sturdiness results from using an extremely simple system that has been made with the utmost precision for many years.

## + SPEED

### QUICK RELOADING SYSTEM: ULTRA-FAST REPEATING

The MARAL is extremely quick to reload thanks to its Quick Reloading System.

The only movement required is the straight pull on the re-cocking lever, as the servo-bolt return system automatically pushes the bolt back forwards.

By eliminating the reloading lever push-forward phase, the shooter gains time, which enables him to concentrate more on targeting and firing rather than on reloading.

Lastly, the linear pull on the reloading lever is constant, which offers unmatched comfort in use.

The exclusive servo bolt return system – the Quick Reloading System – is patented and provides maximum safety, speed and efficiency.

## + ERGONOMICS

### UNMATCHED COMFORT IN AIMING AND RELOADING

Unlike a traditional straight-pull action rifle, the MARAL offers exceptional ergonomics and comfort, thanks to its exclusive patented repeat shot movement.

The MARAL rifle has been designed for stabilized shooting, instinctive "in-line" recocking and faultless repetition. The straight-line recocking movement is not disturbed by the breech passing in front of the shooter's eye, nor by the linear pushing phase on the reloading lever.

Rapidity, sureness and efficiency are the key words for this new-generation rifle.

### THE TARGET IS IN YOUR SIGHTS ALL THE TIME

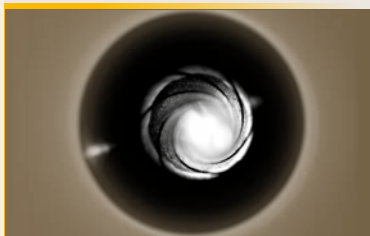

The MARAL's reloading movement is inside the gun's receiver, which offers two major advantages: On the one hand, natural continuous aiming and on the other ergonomic reloading without having to stop firing.

As a result the breech does not shoot out of its casing towards the shooter's face, which makes it easy to reload when in firing position.

Aiming is maintained between each shot which makes repeat shots easier and enables the shooter to concentrate on his target all the time.

## FN Herstal barrel

**FN HERSTAL BARREL FOR  
EXCEPTIONAL ACCURACY**

The MARAL rifle's barrel is made at the Herstal Fabrique Nationale by cold hammering.

This gives shooters exceptional accuracy.

## Removable stock

**REMOVABLE STOCK FOR EASY  
TRANSPORT**

Transporting the MARAL is made easier by its removable stock. A suitable tool is provided with the carrying case.

Removable  
magazine**3,5 OR 10 SHOT  
REMOVABLE MAGAZINE**

Essential accessories "par excellence", the MARAL is available with three versions of magazine, 3+1, 4+1 or 10+1 (30-06 only). These magazines are available depending on the calibres requested and legislation in force.

## Your customizable Maral

**YOUR CUSTOMIZABLE MARAL**

You can customize your gun thanks to the range of options available:

- A large choice of Big Game, Wood or Ultimate grips incorporated into the receiver
- Stocks going from Bavarian to Monte Carlo or simply traditional
- Tulip or rounded fore-ends

## Ideal for driven HUNT and STALKING

**IDEAL FOR HUNTING ACTIONS IN BEATS, THE MARAL GUARANTEES:**

- High firing speed thanks to its Quick Reloading System
- Comfort and ergonomics for the shooter thanks to the system that confines the breech inside the receiver and prevents it from coming out towards the shooter's face and enables him to reload without unshouldering
- Integral safety in firing with the locking system guaranteed by the servo breech return system
- Sturdiness, reliability and durability for instinctive firing

**ALSO IDEAL FOR HIDES, THE MARAL GUARANTEES:**

- Safety in firing, thanks to its simple manual cocking system
- The guarantee of a second shot, as the shooter's concentration stays on keeping the target in his sights thanks to fast, ergonomic linear reloading
- Exceptional accuracy due to the 7-tenon system locking the breech in the chamber and the legendary quality of FN barrels

**BAR ZENITH** BIG GAME  
HAND COCKING  
with a selection of options

**MARAL**

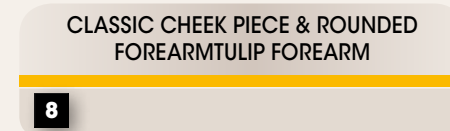

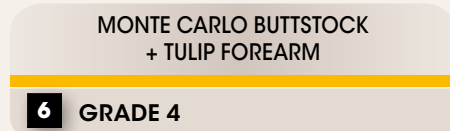

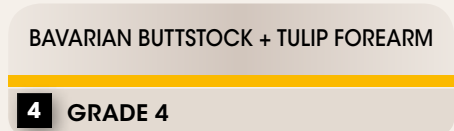

The key values of the Zenith and MARAL rifles are their aesthetics, their refinement and their elegance, together with the pleasure of using a customer-specific product. Indeed their major asset is to offer you the possibility of customizing your gun by selecting from the wide range of options available: different grips incorporated into the receiver, but, above all, several types of stock and fore-end.

## ZENITH

### The Most Reliable Rifle On The Market

#### ADJUSTABLE BUTTSTOCK

The BAR Short/LongTrac, as well as certain BAR Zenith are fitted with an interchangeable butt plate which enables you to adjust the length of your gun depending on your physiology.

#### RELIABILITY

46 years of experience combine with the simplicity of its system, the precision of its manufacture and the quality of its controls.

#### HAND COCKING SYSTEM

Safety guaranteed

The BAR Zenith Prestige Wood now has a new manual cocking system.

The manual cocking system lets you literally cock your rifle, by moving the arming plunger forwards, which puts the hammer springs under load.

Your gun is now ready to fire.

#### AN UNDISPUTED LEADER WITH 46 YEARS EXPERIENCE, BROWNING® IS THE SPECIALIST IN SEMI-AUTOMATIC RIFLES.

It owes this title to the quality of its mechanism, the smoothness of its gas-assisted operation which reduces recoil sensations to a minimum and its reliability, but above all to the fact that it has constantly evolved for offering you consistently better performance.

# BAR

2013  
**NEW**

#### BARREL/BOLT

The barrel/bolt locking mechanism works directly in the barrel, due to a lock of seven lugs that engage in an extremely rigid manner. This system provides excellent shooting accuracy.

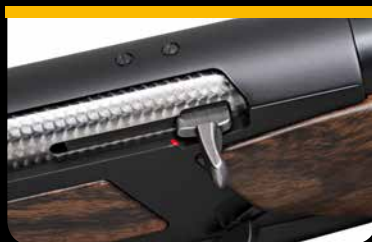

#### EXCELLENT ACCURACY

The barrel of each BAR rifle is created by cold hammering at the Fabrique Nationale in Herstal, Belgium.

#### GAS-OPERATED SYSTEM

The exclusive BROWNING® gas-operated system is adjustable, thereby enabling you to adapt the gun to the types of ammunition used.

## BAR ZENITH ULTIMATE HAND COCKING

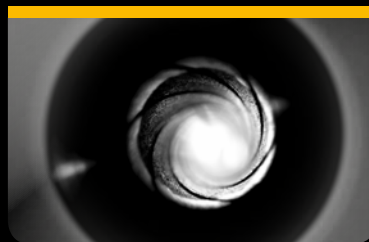

#### RELIABILITY

46 years of experience combine with the simplicity of its system, the precision of its manufacture and the quality of its controls.

#### EXCELLENT PRECISION

7-lug rotating bolt.

#### FN HERSTAL BARREL

The barrel of each BAR rifle is created by cold hammering at the Fabrique Nationale in Herstal, Belgium.

#### INTERCHANGEABLE BUTT-PLATE

The BAR Short/Longtrac and the Zenith inserts are fitted with interchangeable anti-recoil butt plates. Depending on the model of gun, Inflex II and Classic butt plates of different thicknesses are available: 1.3cm, 2.0cm and 2.5cm. These butt plates enable you to adjust the length of your stock without any difficulty.

#### ACCESSORIES AND FITTINGS

## ZENITH

### Semi-Automatic Rifles

**BAR ZENITH** WOOD  
HAND COCKING

**2013  
NEW**

The best-selling  
semi-automatic rifle in the world.

**2013  
NEW**

### Hand Cocking System

**THE BAR ZENITH PRESTIGE WOOD NOW HAS A NEW MANUAL COCKING SYSTEM.**

**THE MANUAL COCKING SYSTEM LETS YOU LITERALLY COCK YOUR RIFLE, BY MOVING THE ARMING PLUNGER FORWARDS, WHICH PUTS THE HAMMER SPRINGS UNDER LOAD.**

**YOUR GUN IS NOW READY TO FIRE.**

When hunting and at your firing station, you can feed a cartridge into the chamber of your gun and then use the manual cocking system for putting the cocking plunger in the "uncocked" position. Your rifle is now safe. When you want to fire, you just have to push the plunger forwards. Your rifle is now ready and all that you still need to do is to squeeze the trigger.

You can just as easily uncock your gun by pressing on the cocking pushbutton on the top of the plunger. This removes the load from the hammer springs and makes your gun inoffensive, and therefore safe.

It is a very simple easy-to-use system that gives your rifle an extra degree of safety.

- 1** Cocking plunger in the "uncocked" or safety position.
- 2** Cocking plunger in the "cocked" position, a red dot appears. Your gun is ready for firing.
- 3** Uncock your BAR Zenith by pressing the pushbutton downwards.

**BAR ZENITH WOOD HC**

The BAR Zenith Wood HC possesses a longer piped barrel that offers a more accurate line of sight. The new manual cocking system located on the top of the pistol grip offers an extra degree of safety.

## BAR SHORT/LONGTRAC ECLIPSE GOLD

### BAR SHORT/LONGTRAC ECLIPSE GOLD

Refinement and elegance are the two characteristics of the BAR Eclipse Gold. It has a nickeled receiver with two brushed side faces that show off a engraving of a hunting scene accentuated by a touch of gold.

### BAR SHORT/LONGTRAC ECLIPSE GOLD LEFT HANDED

This is a carbon copy of the BAR Eclipse Gold, retaining all of its features, but adapted to left-handed shooters. Thus, the ejection window and safety are reversed to create the only semi-automatic rifle in a complete left-handed version.

### BAR SHORT/LONGTRAC HUNTER

It is elegant, beautiful, and more ergonomic. Its receiver carries a restrained and refined engraving, enhanced by a golden Buck Mark on an old-silver nickel plating.

## BAR SHORT/LONGTRAC COMPOSITE HAND COCKING

**2013  
NEW**

### BAR SHORT/LONGTRAC COMPOSITE HAND COCKING

This version is equipped with a fluted barrel and the hand-cocking system for guaranteeing complete safety when on beats or in hides.

### BAR SHORT/LONGTRAC COMPOSITE TRACKER

This model has been developed to resist the harshest conditions when battue hunting. The orange inserts on the stock and the fore-end guarantee visibility on every type of terrain. Battue type ribs are fitted with latest generation optic fibre.

### BAR SHORT/LONGTRAC COMPOSITE

With its receiver and forearm made of composite materials gives this gun extreme ruggedness under all conditions. The BAR Composite also has a piped barrel that improves balance and therefore offers greater efficiency in the field.

### BAR SHORT/LONGTRAC HUNTER NERO

This more traditional version of the BAR Hunter has a black finished receiver with a sober engraving, enhanced by a gold "Buck Mark" and a piped barrel.

X-BOLT - BLR

X-BOLT - BLR

Bolt Action Rifles - Lever Action Rifles

X-BOLT HUNTER  
WITH SIGHTING SYSTEM

X-BOLT HUNTER WITH SIGHTING SYSTEM

Right-hander or left-hander

This version is characterised by the battue rib type sighting system and optic fibre front sight allowing for rapid firing without a scope at short distances. This is ideal for driven hunts and is very versatile in use. Moreover, a "hide" type rear sight is delivered with your gun. The very modern designed and perfectly ergonomic forearm of the X-BOLT is made of walnut.

Available in a left-handed version  
calibres 308 Win, 30-06, 270 WSM, 300 WM

BLR LIGHTWEIGHT BATTUE

The BLR is the only lever-action rifle developed in magnum calibre. Its mechanics are impeccable and characterised by the exceptional smoothness of its operation. It has a removable magazine and a highquality barrel and is ready for fitting a scope. Its battue rib along with a short barrel makes an excellent weapon for driven hunts and tracking.

BLR LIGHTWEIGHT TAKE DOWN

The BLR now comes in a Take Down version, i.e., it can be dismantled, for example, to facilitate its transport on hunting trips. No tools are required for dismantling, which is a quick and easy operation that never affects the accuracy of your gun.

By moving a slide situated on the front of the housing and drawing back the breech, the gun is separated into two parts: barrel and forearm on one side, buttstock and receiver on the other. Reassembly is just as simple and easy.

CCS 525 ELITE

## CCS 525 ELITE

The CCS 525 Elite presents a rich, deep, hand retouched engraving on a steel action frame. The Grade 3 walnut buttstock has also been reworked to give it a more traditional and finer design. Aesthetics and handling join with the technical qualities of this double express rifle to make an ideal battue gun.

**BROWNING® REINVENTS THE DOUBLE EXPRESS RIFLE**

The barrel assembly, the essential part of this gun, is both classical and innovative. A spacer ring placed on the upper barrel ensures the precision of the vertical convergence of the barrels, while the lateral convergence is ensured by the design of the barrel itself, which incorporates a unique "cradle" strip.

Whenever, a choice of ammunition is made, a spacer ring is recommended and placed in a fool-proof position below the foresight on the top barrel, which guarantees the convergence of impacts coming from both barrels.

Please note this operation must be performed by your gunsmith.

Calibre	8 x 57 JRS - 9.3 x 74 R

## HUNTER

### The Benchmark For Bolt Action Rifles

**INFLEX**  
TECHNOLOGY

This extra-soft pad offers the best recoil absorption possible on a rifle.

**FEATHERTRIGGER™**

**FEATHER TRIGGER**

The new adjustable three-lever Feather Trigger™ system of the X-BOLT allows a rapid and clean action from the trigger show, with perfect accuracy and no overtravel.

#### BOLT-UNLOCKING BUTTON

Once the rifle has been loaded and is in the safety position, this button enables the gun to be unlocked for removing the cartridge from the chamber, whilst staying in a safety position at the same time.

#### ROTATING MAGAZINE

Made in light ultra-resistant polymer, it gives exclusive protection to bullet noses.

The BROWNING® appeared like a revolution in the bolt action rifle universe. The X-BOLT was built on the foundations of the success of previous BROWNING® rifles, carrying numerous innovations that will without doubt make it one of the best rifles on the market.

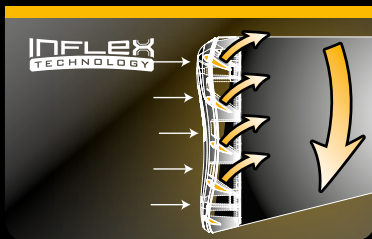

# X-BOLT

#### AN EXTREMELY ACCURATE BARREL

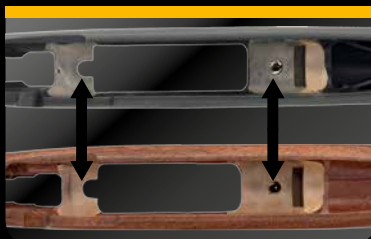

Every barrel is checked three times for providing exceptional quality and accuracy.

## X-BOLT HUNTER WITHOUT SIGHTING SYSTEM

#### INFLEX ANTI-RECOIL BUTT PLATE

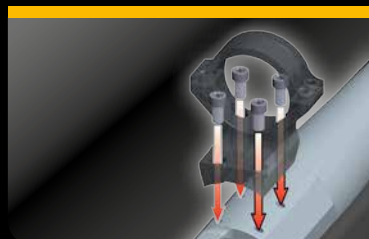

The Inflex Technology anti-recoil pad is standard on every X-BOLT rifle. This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun.

#### UTMOST ACCURACY

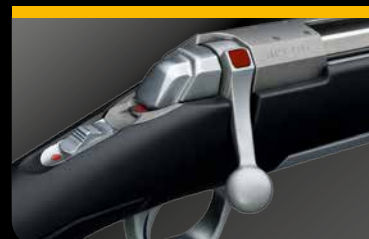

A free-floating barrel is essential for utmost accuracy.

The X-BOLT's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel/breech block assembly at two points with respect to the forearm, at the front and at the rear.

#### X-LOCK MOUNTING SYSTEM

The X-Lock scope-mounting system has 4 screws per fixing point. Therefore it is more stable and provides higher accuracy.

#### BOLT-UNLOCKING BUTTON

The bolt-unlocking button works in conjunction with the safety to provide an added degree of safety.

#### ACCESSORIES AND FITTINGS

See pages 76-77.

## EXCLUSIVE BROWNING® BOSS™

(Ballistic Optimizing Shooting System): improvement of accuracy.

The BOSS™ system has two main advantages:

**Improvement of accuracy:** the BOSS™ system allows the bullet to leave the barrel at the ideal moment, i.e., at the "peak" or "valley" of the vibration wave when the muzzle is virtually motionless.

**Recoil reduction:** air vents located all around the circumference of the BOSS™ system serve as a muzzle brake by diverting the combustion gas. The result is a recoil reduction of around 30-50% depending on the calibre and, therefore, excellent shooting comfort.

The Legendary Strength Is Now Combined  
With Revolutionary Design And Features

The recoil pad with Inflex technology is the most effective of all semi-automatic shotguns.

**B725** SPORTER GRADE 5

This luxury version of the B725 possesses a delicate, entirely hand-finished engraving. Its wood is comprised of grade 4 oil-rubbed elements. The gun is delivered with a deluxe opaline case for safe stylish transport.

The new BROWNING® B725 is an aesthetic and technical revolution in Over and Under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding Over & Under shotgun on the market.

**NEW**

VECTORPRO

BACK · BORED

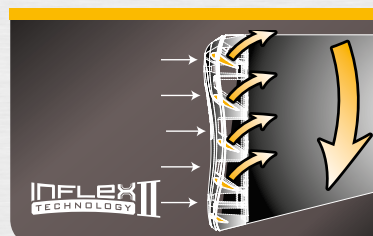

**B725** SPORTER GRADE 5

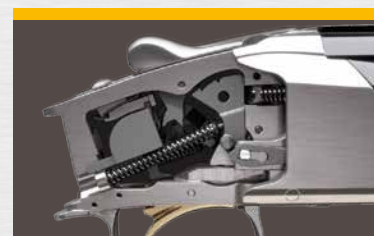

● **INVECTORDS**

The new Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

“Legendary reliability” and “innovation” are the B725’s watchwords.

**INFLEX II BUTT PLATE**

**NEW HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM**

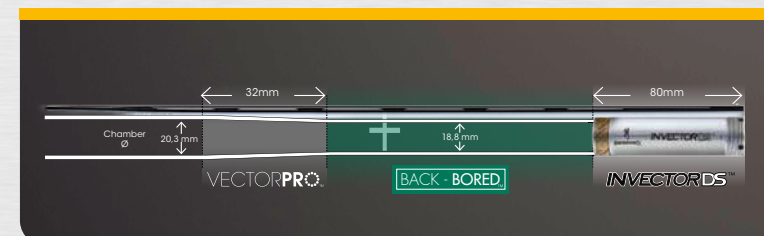

These new breaks are shorter, faster and lighter. This innovation offers extreme ease of use for shooters by guaranteeing the possibility of a second shot no matter what the circumstances.

Even if you only have one shell in your gun, you will still be able to fire, which is not the case when you have an inertia system.

**LOW ACTION FRAME**

The low action frame provides the following benefits when shooting by:  
Enabling faster aiming and therefore more instinctive shooting. Reducing muzzle flip due to the frames inline recoil providing a more comfortable shooting position, making it highly manoeuvrable and effective when shooting.

**CANON BACK-BORED™ | VECTOR PRO™**

The B725 has new barrels made of new Back-bored™ Vector Pro™ shaped barrels and Invector DS™ chokes. This gives the B725 perfect balance, ergonomics and swing in all shooting conditions.

The principle of the Back-bored™ Vector Pro™ barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone which provides three advantages:

- Increased speed and better penetration of shot
- Better shot pattern by reducing any pellet deformation when going from through the forcing cone between the chamber and the barrel bore.
- Recoil is reduced.

# B725

## CHOKES **INVECTOR DS™** UNIQUE TO BROWNING®

The new Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

The optimal 80mm length enables an exclusive internal shape to be developed, which optimises performances over all shooting distances and ensures a uniform concentration of the shot pattern when using lead or steel shot.

The new patented Invector DS™ (Double Seal) Chokes offer a double seal. They are fitted with a compression ring that limits penetration of combustion gas between the choke and barrel. The thread on the muzzle side forms an obstacle to prevent exhaust gasses from entering. The ring stops the Invector DS™ from unscrewing when firing. This guarantees that the choke stays clean and is easy to remove under any conditions.

After extensive shooting of 500 rounds of the dirtiest loads, competitor's choke tube that don't have a gas seal show significant grit and residue buildup on the tube.

The innovative gas seal on BROWNING® Invector-DS tubes keeps the choke tube cleaner, for easier removal and installation.

**Extensive shooting of 500 rounds**

**INVECTOR DS™** **COMPETITOR'S CHOKE**

See the full range of Invector DS™ chokes on page 94.

## HERITAGE SPORTER II 12M

The Heritage Sporter combines the performance of a modern shotgun with the elegance of a true deluxe gun. It embodies the line of the hunting model with its magnificent side plates, but with the specifications of the Sporter versions. The pistol buttstock and tulip forearm are made from beautiful, oil-finished walnut. Each gun is beautifully engraved.

Sporting Clay Over And Under Guns

ULTRA XS PRESTIGE 12M 

ULTRA XS PRESTIGE 12M

The ULTRA XS Prestige is one of the best guns for shooting sporting clays.

Equipped with a Back-bored™ barrel assembly, the top rib is mounted on a rounded base in order to allow for the free expansion of the barrels when their temperature is increased.

ULTRA XS 20M

Fine and distinguished, this 20M calibre ULTRA XS is extraordinarily effective.

Its quick and precise swing, combined with Back-bored™ barrels equipped with Midas chokes, offers exceptional performance.

ULTRA XS 12M

Sporting clays, a gruelling and technique-oriented discipline, can take on very different forms. Parcours in open fields, in undergrowth, and the majority approaching and retreating clay. The ULTRA XS allows you to modify the necessary parameters in a few seconds.

*The XS Sporter version is equipped with external Midas chokes.*

Technology-Derived,  
Shooting Excellence

**B525 SPORTER 1 12M**

The B525 Sporter 1 is the basic model in BROWNING® Over and Under guns. Equipped with 10mm top rib, ventilated side-ribs, a pistol grip and a tulip fore-end, the B525 Classic Shooter is just as much at ease when out hunting as for shooting sporting clays. Very reasonably priced, it is the ideal gun for beginners - both hunters and sporting clay shooters.

CYNERGY COMPOSITE BLACK ICE 12M

## Take a step forward!

80 years after inventing the B25, BROWNING® has once again revolutionized the world of over and under guns with the arrival of the CYNERGY. Many years of research and testing were needed for finalizing this reliable, high-performance, elegant and efficient shotgun. BROWNING® is pleased and proud to present the CYNERGY Composite Black Ice 12M to you!

The CYNERGY is:

- The lowest action frame on the market: 60mm
- The fastest breaks: 0.0019s
- The low action frame with its integrated hinge gives this unmatched gun exceptional balance and incredible resistance.

To prove it, the CYNERGY's action frame is guaranteed for 10 years. The CYNERGY's shouldering is perfect, smooth and fast. Firing comfort is exceptional. You are in line with your gun, which has almost no recoil and the barrel's movement between two shots is so infinitesimal that the second shot is even faster. The CYNERGY's Back-bored™ barrels can also be used for firing high-performance steel-shot shells.

The CYNERGY also means modern and attractive aesthetics, a novel design characterized by fine straight lines and a slim silhouette.

The CYNERGY's single trigger will give you a hitherto unknown sensation: Incredibly precise and rapid breaks, the fastest in the world.

Thanks to this exceptional gun's special firing mechanism, there is only 0.0019 seconds between the first and second shot, compared with 0.0031 for our leading competitors.

 CYNERGY

Sporting Clay Over And Under Guns

ULTRA XT HIGH RIB

ULTRA XT HIGH RIB

This ULTRA XT has a high top rib. The pillared rib enables you to fire in a more natural position, the adjustable cheek-piece offers millimetric stock adjustment for accurate sighting.

ULTRA XTR 12

This model is fitted with a rubber comb that is simultaneously both smooth to the touch and non-slip. This gun strives for accuracy in aiming that can be guaranteed to the millimetre with a comfort that, until now, had never been attained. It is primarily geared toward shooters who practice their sport intensely.

ULTRA XTR PRESTIGE 12

As its name would indicate, this Prestige version of the XTR shotgun sets itself apart with the superior quality of its wood and its 5 100% Titanium Invector+™. Its completely reworked engraving features silver inlay.

## Shotgun Sights

1

### HIVIZ® BIRDBUSTER

For rapid targeting, especially in poor light. Magnetic mounting (supplied with three bases of different width)

2

### HIVIZ® COMP

By using the different Litepipe colours and diameters, shooters can choose their point of aim depending on the available light and their personal preferences. Screw-mounting (supplied with screws of different diameter)

Code	12859
Colours	Litepipes: 2 green, 2 red (round and triangular)

Code	12850
Colours	Litepipes : 3 green, 3 red, 2 white (round with different diameters)

## INVECTOR DS™

The new Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

The optimal 80mm length enables an exclusive internal shape to be developed, which optimises performances over all shooting distances and ensures a uniform concentration of the shot pattern when using

lead or steel shot.

The new patented Invector DS™ (Double Seal) Chokes offer a double seal. They are fitted with a compression ring that limits penetration of combustion gas between the choke and barrel. The thread on the muzzle side forms an obstacle to prevent exhaust gasses from entering. The ring stops the Invector DS™ from unscrewing when firing. This guarantees that the choke stays clean and is easy to remove under any conditions.

After extensive shooting of 500 rounds of the dirtiest loads, competitor's choke tube that don't have a gas seal show significant grit and residue buildup on the tube. The innovative gas seal on BROWNING® Invector-DS tubes keeps the choke tube cleaner, for easier removal and installation.

Extensive shooting of 500 rounds

T-BOLT SPORTER COMPOSITE  
(Scope not supplied)

T-BOLT SPORTER

BUCK MARK  
SPORTER RIFLE

T-BOLT SPORTER

This rifle is a "vintage", the re-issuance of a best seller, a legend. Available in .22LR, .22 Magnum, and 17 HMR calibres, it is quite close on an aesthetical point of view to its ancestor, the first T-Bolt, but the mechanics have been completely modernised. It is characterised by its straight pull bolt that loads cartridges from an exclusive 10-round rotating magazine.

Options	rifled barrel 16.5" long		
	in 22LR and 17HMR calibres		

T-BOLT SPORTER COMPOSITE

This version is equipped with a buttstock made of highly-resistant ergonomic composite, allowing intense use in all conditions. Another very useful characteristic is an additional magazine integrated in the buttstock and, more particularly, in the pad.

Additional magazine integrated in the buttstock for the Composite version  
An additional magazine integrated in the buttstock and, more particularly, in the pad.

During intense shooting, it is therefore very easy to quickly replace the first empty magazine.

SA.22 GRADE 3 *Custom Shop*

The Semi-Auto .22 is the biggest seller and the most often imitated.

This rifle is particularly light and efficient. The barrel is dismantled in an instant. Made by the Custom Shop from original pieces, it is available in grades 2 and 3.

SA.22

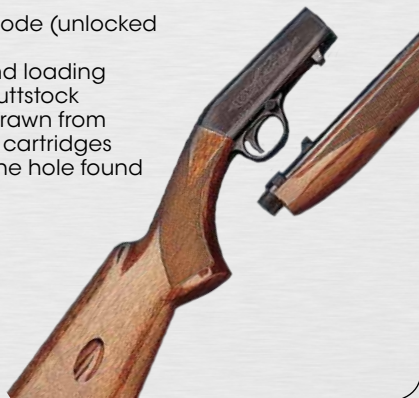

This legendary rifle, often copied but never equalled, has been made continuously since 1924. Its exclusive features, through-the-stock loading, bottom ejection and the fact that the rifle can be dismantled make it an exceptional firearm.

BL GRADE 2

This jewel of the era of the pioneers, back in the Wild West, the .22 BL with its short movement action-lever (33°), external hammer, and magazine tube. It enables you to mix all types of cartridges (long, long rifles, short) with no risks of jamming.

### SA.22

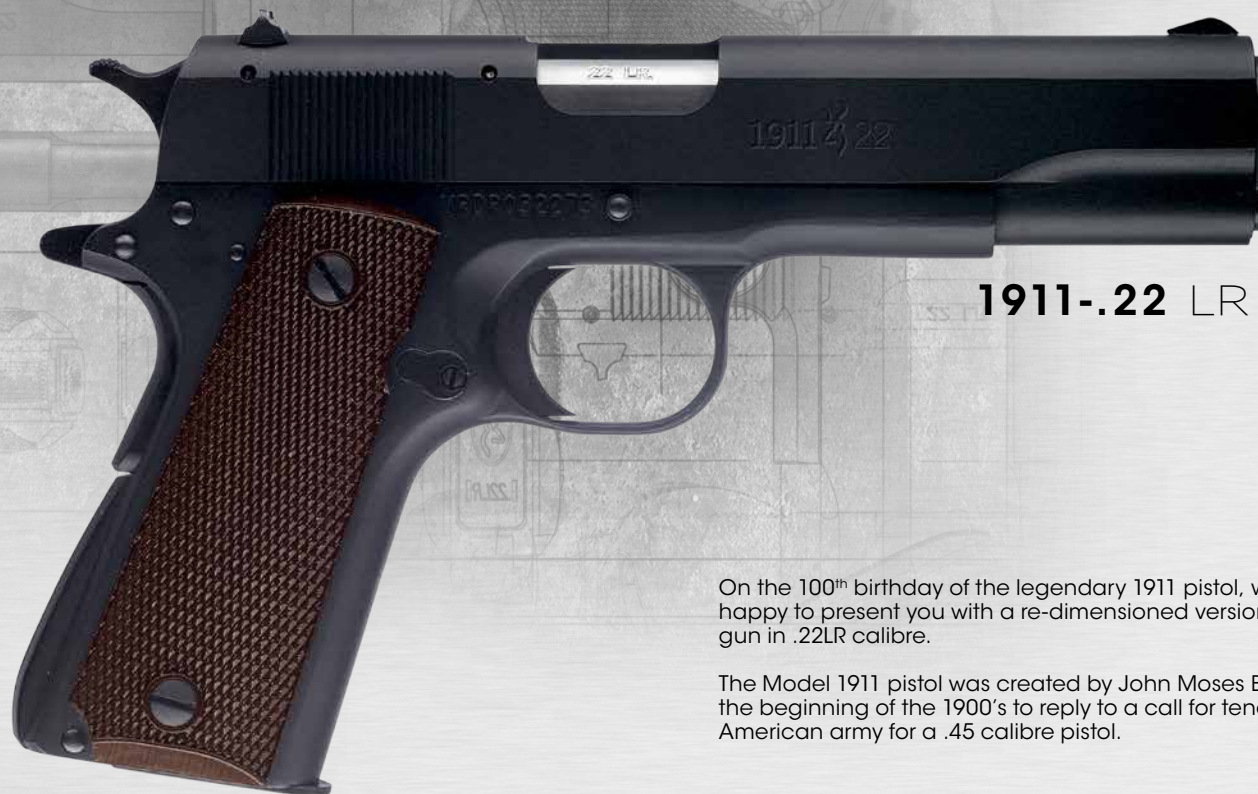

- Operation in "blow back" mode (unlocked breech activated by gas)
- Automatic eject, arming, and loading
- Loading performed in the buttstock (the magazine tube is withdrawn from the back of the rifle and the cartridges are inserted one by one in the hole found in the buttstock)
- Bottom ejection
- Barrel take-down with wear adjustment.

1911-.22 LR

On the 100<sup>th</sup> birthday of the legendary 1911 pistol, we are proud and happy to present you with a re-dimensioned version of this mythical gun in .22LR calibre.

The Model 1911 pistol was created by John Moses BROWNING® at the beginning of the 1900's to reply to a call for tenders made by the American army for a .45 calibre pistol.

## 1911-.22 LR

[illegible]

The pistol then became the most widespread and most popular handgun.

This new resized version respects the proportions and functionalities of its ancestor perfectly, whilst offering a more compact gun with an exceptionally low weight, barely 430 grams.

The slide is machined in a single aluminium block, the side grooves make it extremely easy to hold and handle, and fluid and easy to use. It has a black mat finish.

The aluminium receiver also has a mat black finish. The barrel, made from molybdenum chrome steel has a barrel insert machined from a single stainless steel block.

The magazine with a capacity of ten rounds is in heat treated steel to guarantee long service life and reliability of loading.

The manual safety catch is well-dimensioned. Like the original model, the 1911-.22 has a pistol grip safety system.

BUCK MARK  
CONTOUR URX

BROWNING® BUCK MARK rim-fire pistols are very highly valued due to their quality, reliability and accuracy. These pistols have a receiver made from a single aluminium block machined using numerical control. The barrel is machined in a single top-quality steel block and the chamber is hand-bored for guaranteeing optimal accuracy. Every BUCK MARK pistol has fully adjustable sights.

Breaks are light accurate and crisp. Grips, URX version in rubber or UDX in wood are perfectly ergonomic. Your hand positions itself systematically in the same place on the grip every time you fire. This allows more instinctive firing and improves accuracy.

**HP SILVER CHROME**

The HP exists in the Silver Chrome version, which is equipped with a rear sight that is adjustable in elevation and direction and a sport front sight with a rounded base plate.

The slide and the receiver are nicked, and the rubber grip is made by Pachmayr, for sure and efficient handling.

**HP MK III S**

It brings together all of the qualities found in the HP, yet with an additional ambidextrous safety and lighter weight (910g), which make it an accurate gun with practical handling. The "Pachmayr" handles ensure the best handling.

It is made with a swivel system.

**ADJUSTABLE HP PRACTICAL**

The HP Practical meets the demands of Practical Shooting. It has undergone several improvements, such as:

- Adjustable, low profile sights.
- Particularly crisp trigger pull.
- Extremely comfortable handling due to its Pachmayr chequered rubber grips.

BROWNING® Hunting Wear Uses The Latest Technologies For Giving Hunters Unmatched Comfort And Effectiveness.

### YOUR BAD-WEATHER PROTECTION

PreVent™ is our watertight, windproof and breathable techno-material.

The impermeability rating at 10.000 mm and the care taken in product design for PreVent™ing all water infiltration guarantee that our PreVent™ wear is of the very highest quality.

PreVent™ marked clothing is designed to resist against rain, snow, wind squalls whilst remaining breathable and comfortable for the hunter at the same time.

### A HI-TECH SOFT-SHELL

Hells Canyon™ is our hi-tech 3-layer soft-shell material.

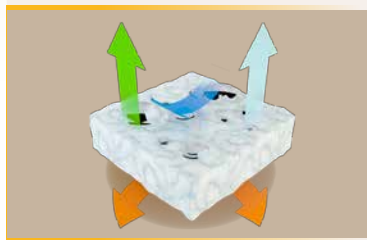

It is comprised of three layers adhered together: a layer in flexible mesh treated for water-repellency outside, a waterproof, windproof and breathable membrane in the middle and a fleece layer inside.

Silent, lightweight, warm and stretchable, Hells Canyon™ material is ultra-comfortable to wear.

When combined with Odorsmart™ technology, it is the ideal wear for hunting big game.

### THE BEST INSULATION FOR ALL WEATHER CONDITIONS

PrimaLoft™ is a premium performance insulation engineered for superior warmth, water resistance, loft, softness and compressibility.

These fibers are the finest in the industry and are densely packed to retain heat better for improved thermal efficiency. PrimaLoft™ fibers are specially treated to repel water molecules and absorb less water to make it more water-resistant and faster drying than other polyester insulations.

Tightly-compressed fibers also make PrimaLoft™ highly wind-resistant as the smaller, finer fibers compress more and are lighter, less bulky, more breathable and extremely compressible. That's what makes our clothing with PrimaLoft™ insulation so good.

### A FLEXIBLE INSULATION SYSTEM

X-Change™ is a zip-fastening system for incorporating insulated clothing inside a jacket.

This enables hunters to adjust the insulation level of their jacket depending on outside conditions or to use each product separately.

### LESS RECOIL

The Reactar™ G2 anti-recoil patch uses the new flexible Impact Gel™ material, which absorbs recoil better than any other product on the market.

The Reactar™ G2 patch is placed inside jackets, vests or shirts fitted with a special Reactar™ G2 pocket.

Only 8mm thick, it does not change your length of arming or point of aim. Flexible it adapts itself to your morphology without the slightest difficulty.

#### REACTAR™ G2 SHOOTING PATCH

Code	309013
Colour	Grey
Sizes	single size

### FEWER ODOURS EMITTED

Odour is caused by specific bacteria that thrive on human skin. When bacteria metabolize, their waste produces odours that can be detected by deer and other big game animals. So how does Odorsmart™ work?

Simply stated, Odorsmart™ attacks the bacteria on the skin and in the "microclimate" immediately around the skin, killing them BEFORE they have a chance to develop odours.

With just normal use and care, Odorsmart™ will last for the life of the garment and does not require recharging or other special care.

Code 129893

### 3 IN 1 WATER-PROOFING SPRAY FOR HUNTING WEAR

Water-repellent treatments applied to the outside of fabric tend to lose their efficiency as time goes by (washing, rain, rubbing, etc.).

Therefore, they need to be retreated regularly with a waterproofing product that does not damage the inner membrane and allows the fabric to breathe correctly.

Code 129894

### 3 IN 1 WASHING PRODUCT FOR HUNTING WEAR

Cleans without damaging technical clothing

The micropores on waterproof breathable membranes get blocked as time goes by (dust, dirt, etc.), which reduces their capacity to evacuate moisture into the open air.

Regular washing with a specialized product that respects membranes' characteristics guarantees the long life and effectiveness of your technical clothing. BROWNING® treatment will also wash your normal clothes wear perfectly well.

Care for your hunting wear with BROWNING® products

### ABSORBS ODOURS

Without BROWNING® Odour Shield treatment, the odours released by your clothing (washing powder, wood-fire smells or those left by your dog for example) make game aware of your presence.

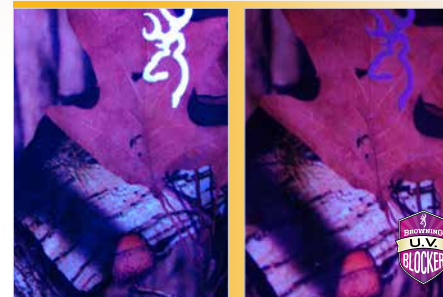

BROWNING® 3 in 1 treatment is not only perfume-free but it also contains odour-absorbing molecules and masking agents to make you "invisible" to game's sense of smell.

The advantage of the BROWNING® anti-odour system is that it can be used on all your hunting clothes and will avoid you having to invest in costly clothing that is less effective over time.

Best results are obtained by combining 3 in 1 waterproofing treatment with the 3 in 1 washing product.

### ABSORBS UVS

With BROWNING® UV Blocker treatment your clothing will be less visible for game.

Unlike human eyes, deer's eyes perceive ultraviolet rays.

The BROWNING® treatment reduces the UV radiation reflected by your clothing.

Best results are obtained by combining 3 in 1 waterproofing treatment with the 3 in 1 washing product.

# CLEANING

CLEANING & MAINTENANCE

1

**BROWNING® LEGIA SPRAY**  
Cleaning oil for barrels and housings: excellent product for maintenance and protection. With our pumping system (without propellant gas, 200ml) and the adhering qualities of our oils (low volatility) the performance of the LEGIA SPRAY has 25% more active ingredients than other shotguns.

2

This 32 pieces kit includes two cleaning brushes, five woolsops, two solid brass adaptors, two slotted ends, and 50 cleaning cloths

3

A means for protecting both firearms and accessories. The soft imitation felt fabric does not damage firearms and includes a Zorb Tech™ waterproof top. Zorb Tech™ keeps spills from spreading and cleansing agents from soaking through. This mat is also washable, dryable, and treated to be stain resistant

# A Unique Sporting Challenge Awaits You !

## LES COLVERTS DE SABOURNAC - FRANCE

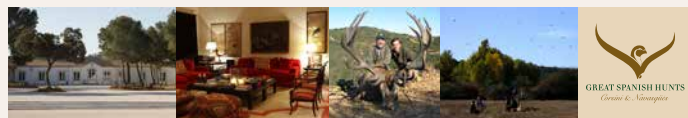

Unique in Europe, Sabournac is a private hunting estate that has been organising mallard shoots over the last twenty years or so on the principles of the large "English style shoots". This type of hunting surprises and appeals to many hunters, who like shooting a few hundred cartridges on high-flying mallards. The birds fly over surprisingly high, which challenges top-shooters to equip themselves with full-choke guns. The estate is open from September 1st to January 31st and may be reserved by a single group of 4 to 12 guns.

## CORTIJO SOTO REAL - SPAIN

A unique sporting challenge awaits you at Soto Real. An authentic five-star hunting lodge set among the palm trees, bougainvillea, and orange trees of a working estate in the rolling hills of Andalusia. Driven red-legged partridges are hunted from October until March and walked-up quail from July to September. You can truly expect a challenge above and beyond the usual at Soto Real.

## GREAT SPANISH HUNT - MADRID, SPAIN

Only 45 minutes from Madrid, outstanding red-legged partridge shooting in Spain is at its very best on the La Fñca and Fuensauco estates, run by Javier Corsini who is one of the most respected shoot owners in Spain with his 30 years of experience. His professionalism, his rigour and his expertise are a guarantee that you will have a magnificent stay with a booty of between 500 and 2,000 birds, depending on the size of the party. Surrounded by an estate of 3,000 hectares, a luxury hunting lodge is ready to welcome you, with its gastronomic creations and top-quality Spanish wines that will really make your stay unforgettable.

## PUELO EXPEDITION - CORDOBA, ARGENTINA

Cordoba is considered to be the world dove-hunting capital. Every year, over 50 million turtledoves fly over in a radius of 95 km around the Puelo Expedition hunting lodge. Turtledoves offer fast, stimulating hunting where a large number of shells are fired every day, from 1,000 to 3,000 and sometimes even more. Puelo Expedition looks after two top-quality hunting lodges for offering hunters the best possible service. Puelo Expedition also manages a hunting lodge in the province of Buenos Aires for everyone who not only likes hunting turtledoves but ducks as well.

## CAMPEMENT DE L'ÉLÉPHANT - BURKINA FASO

Hunting francolin and guinea-fowl at random is the speciality of the Elephant Camp together with "pass shooting" turtle-dove and sand-grouse coming in to drink at waterholes. The season goes from December through to March. Hunters will find a comfortable camp (with air-conditioning and a swimming pool). Enjoy all the unfamiliar sights and sounds of the African bush.

## EAGLEMP - ARGENTINA

The EagleMP camp is a reference in duck-shooting in San Javier, located in the province of Santa Fé. This is considered to be one of the most reputed regions in the world for duck-shooting. EagleMP has been managed by Frenchmen for the last 20 years. The season goes from February through to July with a change in biotopes: from paddy fields to marshes passing by the Parana islands. Turtledoves can also be hunted with over 1,000 cartridges fired per day.

## KOULOUDIA - LAKE TCHAD, TCHAD

The new KOULOUDIA air-conditioned camp, 3 hours away from N'Djamena offers exceptional hunting for teal, pintail, shovelers and African duck coming from Europe for the winter. The season goes from November through to March in the Lake Chad overflow areas, which are cultivated by villagers and where duck come and eat.

## TAMASI - GYULAJ, HUNGARY

Gyulaj is a territory belonging to the Hungarian water and forestry authorities, which offers exclusive big wild boar battues hunts or shoots in open or closed territory. The size of the estates (900 ha and more) maintains the quality of the hunt and offers everyone the possibility of taking shooting a large number of young boar or big tusked males. A guard accompanies every person at his post during the 3 or 4 beats of the day, which can be organised over a whole weekend. A torchlight presentation of the bag is made to the best Hungarian traditions at the end of the day's shoot, before returning to the very comfortable hunting lodge.

The BROWNING® B525 shotgun is already appreciated for its numerous qualities by over a million hunters, and especially for its unmatched sturdiness in the field. In collaboration with the «Magic Safari Lodges» label and the Orchape hunting tour agency, top-quality "small game" destinations are offered in France, Burkina Faso, Chad and Spain. They have now become «BROWNING® Partner Lodges». Several B525 guns will be made available to hunters on each site. This free service, which offers hunters an opportunity of hunting with this mythical gun, also enables them to avoid all the problems and unpleasant surprises liable to occur when transporting firearms by air.

MAGICSAFARILODGES.COM

"Magic Safari Lodges" is the premier guide to exceptional hunting destinations specially conceived for those looking for better experiences, blending deluxe facilities with unforgettable locations. [www.magicsafarilodges.com](http://www.magicsafarilodges.com)
