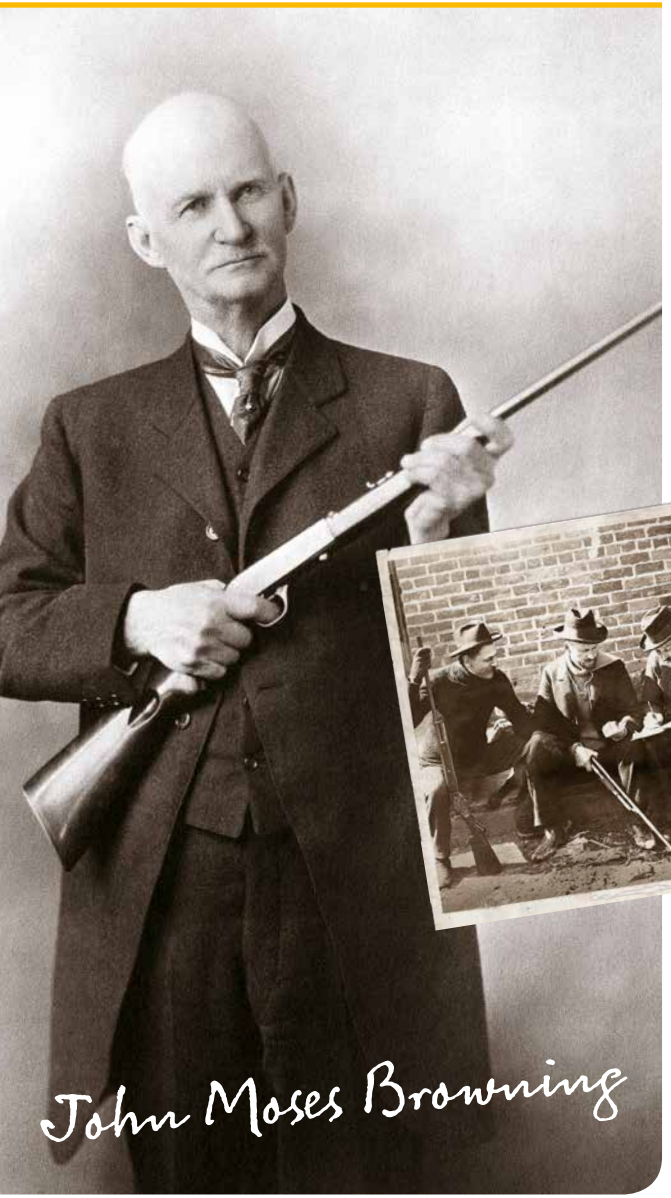
J. MOSES BROWNING

Innovation and invention



John Moses Browning was born on 23rd January 1855, in Ogden, 35 miles north of Salt Lake City (Utah, USA), between the Great Salt Lake and the Wasatch-Cache National Forest.

Gun-making ran in the family of the young John Moses, as his father was a gunsmith who had already been responsible for a number of innovations in the field. As a young boy, he spent time in his father's workshop, and knew the name of every part of a gun before he could read.

It won't take long for anyone who has looked at his creative development to be certain:
In 1878, at the age of only 23, John Moses registered his first patent, for the "John Moses Browning single-shot rifle", an invention that simplified the percussion mechanism, whilst making it sturdier at the same time, and more reliable as well.

Shortly before his death, his father handed over his business to John Moses. With his brother Matt, even with less than one thousand dollars in the bank and no experience of machine-tool operation, young Browning transformed the humble store into a small gun making workshop with seven employees.

The remoteness of their store, the low number of ready customers, and the lack of capital meant that the business struggled to survive until luck intervened to make the inventor's talents known to a connoisseur: a representative from Winchester.

In another state in the US, this representative had come across a gun made by the Browning brothers. Firmly convinced of the interest of their conception, he bought it from its owner and sent it to his superiors in the company's head office. So impressed were they that the managing director of Winchester himself set out straight away on a six-day journey to what, at that time, was still the Wild West - the real Wild West, to meet the Browning brothers.

Despite his astonishment at finding two young men in their twenties in a rustic workshop, the man was perceptive enough not to be fooled by appearances and signed commercial deals with them as soon as he could. The decision was a wise one: these agreements would last for several decades.

Browning had a future. Over the years, Browning granted licenses to several manufacturers for dozens of inventions and firearms. He invented almost everything in the field of firearms. The creativity and level of perfection of his inventions were so significant that the vast majority of his technological innovations could not be improved upon or replaced for several years.

The world of firearms is like the art world: the success of creators depends on the interest of well-informed amateurs. In 1897, it was one of the directors of the Fabrique Nationale (National Weapons Factory) at Herstal in Belgium, who noticed a 7.65 Browning pistol incorporating a new locking mechanism. He saw the appeal straight away and the NWF obtained the manufacturing license.

Thus began an uninterrupted period of collaboration between the inventor from the Great Salt Lake and the factory on the banks of the Meuse River.

Browning reached the pinnacle of its craft with the Auto-5 semi-automatic shotgun, which was a tremendous commercial success and prompted John Moses' first visit to the Herstal workshops. But his worldwide acclaim is without doubt due to the 9 mm Hi-Power semi-automatic pistol. More than 10 million of these legendary pistols have been sold. Starting in 1907, it was adopted by most police and armed forces across the world. The fact that the generic name for this type of gun is "Browning" demonstrates the universal acclaim and recognition it has received.

In 1925, John Moses Browning put the finishing touches on the prototype of an Over and Under which would change the history of the hunting shotgun. He called it simply B25, for "Browning 1925".

He died of a heart attack while working in his office in Herstal on 26 November 1926. It was his 61st visit to Belgium.

His body was repatriated to the United States, where he was buried with full military honours. His son Val continued his collaboration with the Belgian factory without interruption. That collaboration continues to this very day.

1889 2014 125
HERSTAL GROUP
FN Herstal - Browning

2014 : THE HERSTAL GROUP IS CELEBRATING ITS 125TH ANNIVERSARY.

Through its world famous brands, FN Herstal and Browning, the Herstal Group has built up a position among the worldwide leaders in its two fields of activity : Defence / Law Enforcement and Hunting / Shooting.
We are celebrating 125 years of technological innovation and unique know-how which allowed the Herstal Group to develop, manufacture and commercialize foremost quality products with one goal in mind : exceeding the ever-evolving expectations of our customers and partners.
The Herstal Group and its people remain committed to continuing this tradition.

2014

Prices given in this catalogue include VAT. They are for information purposes only at the time of the catalogue's publication and, except for typing errors, are recommended prices.

Before they are put on the market, Browning's guns have to undergo a wide range of extremely rigorous tests. These are B.A.C.O. (Browning Arms Company) internal tests.

None of its products will be approved unless it clearly meets the following 6 requirements.

In addition, we carry out a systematic inspection process of all mass-produced guns, which involves many checks to ensure that every gun sold meets Browning's exacting criteria with regard to quality, performance and reliability.

B.A.C.O. Tests

BROWNING ARMS COMPANY

1 TESTS OF FUNCTIONING AND ENDURANCE

The purpose of these highly-demanding tests, which are conducted on both shotguns and rifles, is to ensure they operate correctly whatever types of cartridges are used. Thousands of cartridges are therefore fired to ensure the guns reliability; no broken or excessively worn parts are tolerated during this test. If such faults are found, they are returned on a systematic basis to Research and Development.

2 TESTS IN EXTREME CONDITIONS

When developing a new product, the purpose of this test is to try out the guns in the worst possible weather conditions, using polar temperatures of –30°C and very high temperatures of up to +50°C. The gun has to operate perfectly at these temperatures, using a wide range of cartridges. You can therefore use our guns in the most testing conditions, in all circumstances and with complete confidence.

3 "TORTURE TESTS"

When a new product is being developed, it undergoes a wide variety of tests, which are generally more demanding than applicable C.I.P. norms, including a set of "torture tests". A set of guns are subjected to excessive pressure tests and obstruction tests to ensure the strength and reliability of our guns. In addition, we conduct safety tests, which consist of dropping the gun onto its different sides to check its reliability and safety. The legendary strength and reliability of Browning's guns is largely due to their completing all these tests successfully.

4 GUN CHECKS

When they are manufactured, every gun is subject to a very wide variety of visual inspections and measurements, and has to meet the requirements of the specifications in every respect.

5 GUN TESTS

All guns manufactured are fired to ensure their precision and that they are operating properly.

6 ACCURACY TESTS

We check the precision of every gun which emerges from our workshops. For shotguns, we check the quality of the shot patterns as well as the proper convergence of the barrels at 35 metres. For rifles, we check the precision and pattern of every gun.

BROWNING® CONFIGURATION

Make Your Gun Correspond To Your Size.

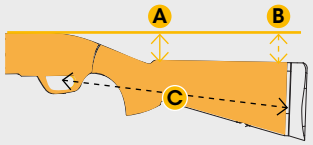
BROWNING® PROPOSES THE VERY ULTIMATE TO YOU BY OFFERING TO ADAPT YOUR GUN TO YOUR PERSONAL SIZE.

This service is for everyone whether tall, short, etc.... , as Browning has made the perfect gun for you and your passion - shooting and hunting.

The stock can be adjusted by altering 3 important criteria: Its length, its pitch or even a version for left-handers

See the 3 pictograms summarising the options available for stocks, all the way through the catalogue.

AVAILABLE FOR Lefthand



Browning® guarantees optimal service by offering you the possibility of purchasing your gun directly in a left-handed version.
In this way the stock is ready and prepared for left-handed shooters.

LEFTHAND
Available in a left-handed version

Custom Shop

THE LEGENDARY B25, AN EXCEPTIONAL CUSTOM-MADE GUN

Entirely made in the Fabrique Nationale d'Herstal in Belgium, Custom Shop arms are born in the hands of exceptional craftsmen. These unique models are meticulously made to order to attain perfection at every stage in their construction. The finest assembly techniques, the beauty of detail and the love of firearms make these shotguns unique just like an exceptional work of art.

LET'S CREATE YOUR IDEAL GUN TOGETHER…

The Custom Shop team working with our trained gunsmiths and your gunshop will look at your ideas and requests providing you with a full specification, quotation and delivery schedule for your own BROWNING® B25. The list of stock arms can be found on-line on our website under the heading "Custom Shop". You will find descriptive data of the arms available, and perhaps even a source of inspiration for creating your own unique BROWNING® B25.

See page 16 for all the options available.

Passion and craftmanship since 1897

IMAGINE A CUSTOM-BUILT GUN JUST MADE FOR YOU …

The feeling of owning your own BROWNING® gun is similar to that of owning a work of art. We can work on this project together and leave it to our craftsmen to produce your ideal gun.

Together with your gunsmith, the Custom Shop team will do their utmost to satisfy the most creative of your ideas, from the type of wood to the most unusual engravings you might choose.

Our range comprises four grades, each of which has a certain number of options. As they are entirely produced in our workshops, with a multitude of options available.

BASED ON THESE OPTIONS :

Calibres	12, 12M, 16, 20, 20M and 28
Barrel lengths	67 to 81cm depending on the calibre.
Rib widths	Different rib widths depending on the calibre.
Stocks	Pistol, half-pistol, Prince of Wales, English, curved made-to-measure.
Fore-end	Tulip, 3-piece tulip, round, narrower tulip, beaver-tail and 3-piece beaver-tail.
Creation of real pairs of guns	
Precious metal inlays	
Oval inlays in gold engraved with your initials	

This list is not exhaustive. For more details, please contact your gunshop who will be able to give you precious advice.

B725 HUNTER

THE LEGENDARY STRENGTH IS NOW COMBINED WITH REVOLUTIONARY DESIGN AND FEATURES

"LEGENDARY RELIABILITY" AND "INNOVATION" ARE THE B725'S WATCHWORDS.

The new Browning® B725 is an aesthetic and technical revolution in Over and Under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding Over & Under shotgun on the market.

1 NEW INFLEX II RECOIL PAD

A totally new Inflex II recoil pad is fitted on all B725 shotguns as standard. This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. This exclusive material makes shouldering easier. Two other pads, 20 or 25 mm thick (available as an option), make it easy to adjust the length of your stock. In this way, you can adapt your B725 to your own physique and also adapt it depending on the hunting season.

INFLEX II TECHNOLOGY

2 NEW HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

These new firing system is shorter, faster and lighter giving more control over your shooting.
Browning®'s innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

3 LOW ACTION FRAME

The low provides the following benefits when shooting by:
Enabling faster aiming and therefore more instinctive shooting. Reducing muzzle flip due to the frames inline recoil providing a more comfortable shooting position, making it highly manoeuvrable and effective when shooting.

4 BACK-BORED™ VECTOR PRO™ BARREL

The principle of the Back-bored™ Vector Pro™ barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone which provides three advantages:
- Increased speed and improved pellet penetration
- Improved pellet grouping
- Reduced recoill

HERITAGE HUNTER 12M

This is the top of the range Browning® over and under shotguns. The Heritage model is the heir to the B25 side-plated model, and possesses all its elegance. The hunting scene engraving combining partridge and pheasant is very delicate. The stock is made from top quality, carefully oil-rubbed walnut. With its half-pistol stock and its tulip fore-end, the gun pays real tribute to the B25, and is the worthiest of heirs.

B5·25 THE MOST RELIABLE AND BEST PERFORMING LINE

1 ACTION FRAME

Machined from a single forged part for providing exceptional rigidity and sturdiness.

HAND FITTED TO CREATE THE BEST THERE IS

The gun moves from one gunsmith to the next to be entirely made by hand, thanks to the expertise acquired over many years by each of the gunsmiths. This is the only shotgun on the market at this price level that is hand fitted during production to such a high performance level, making each shotgun truly unique. Fitting important parts (barrel, action frame, forend) is done by hand using traditional methods (such as red ochre) so as to make the Browning® B525 the reference in shotguns. The attention paid to detail when manufacturing and fitting every Browning® B525 is unique, just like the "Browning® feeling" when the gun locks on closing.

Pistol grip

Reprising the characteristics of the Classic, this B525 sets itself apart with its new engraving and its English grip, which gives it a very delicate line. A real featherweight in its category, this small calibre gun combines reliability, a perfect swing and refined aesthetics

cynergy
HUNTER

OVER AND UNDER SHOTGUNS

A buttstock made of grade 3 walnut finished in oil, a steel action frame decorated with animal scenes, two ducks taking flight on the right, two partridges on the left, together with a nickeled finish form the Cynergy Hunter's magnificent hunting finery. But the Cynergy's shape, design, and performance are still the same.

80 years after the invention of the B25, Browning® has created yet another revolution in the world of Over-and-Under shotguns with the Cynergy.
Years of research and testing have been required to develop this reliable, high-performance, elegant, and effective shotgun. Browning® takes much pride and pleasure to introduce you to the Cynergy Hunter!

The Cynergy includes:
- The lowest action frame on the market: 60mm
- The fastest second shot: 0.0019s
- The low action frame with its integrated hinge gives this incomparable gun exceptional balance and incredible strength.

CYNERGY HUNTER GRADE 3 12M

TAKE A STEP FORWARD!

To support these claims, Cynergy's action frame comes with a 10-year warranty.

Shouldering the Cynergy is a perfect, fluid, rapid movement; and the comfort when firing is exceptional. You are in line with a weapon that has virtually no recoil, and the muzzle flip between two shots is so low that the second shot is even faster.

The Back-bored™ barrels of the Cynergy also allow the firing of high-performance steel shot.

The Cynergy is also a model of style, both modern and attractive, an innovative design characterised by its smooth flowing lines and slim silhouette.

The Cynergy's single trigger action will give a sensation that you have never experienced before: incredibly fast, crisp shots; in fact, they are the fastest in the world.

Due to the special firing mechanism on this shotgun - in a class of its own - the time between first and second shots is only 0.0019 seconds, compared to 0.0031 for our leading competitors.

The Cynergy hunting gun's extremely elegant line is characterised by the quality of its grade 3, oil-finished wood, but also by the hunting scene engravings on its nickeled action frame.

THE NEW A5. THE "HUMPBACK" IS BACK WITH US ONCE AGAIN.

The lines of the new A5 will perhaps remind you of its illustrious ancestor, but its lines are the only points this new shotgun has in common with your grand-father's famous Auto 5. The brand new Browning® A5 was developed to be the most reliable and the fastest inertia-operated semi-automatic shotgun and with the lowest recoil sensation. Our confidence in the new A5 is such that we offer a guarantee of 100,000 shots or 7 years with it. This reliability guarantee relies above all on the new Kinematic Drive™ System which is the gun's tireless engine. Other innovations make the A5 a concentration of new technologies: The new Invector DS™ chokes fitted to the new Vector Pro™ Back-bored™ barrels, the Inflex II recoil pad and, lastly, the Speed Load Plus system.

A5 100,000 ROUND GUARANTEE*

KINEMATIC DRIVE

In simple terms, kinetic energy is the energy of movement. The new Browning® A5™ uses kinetic energy perfectly with its powerful Kinematic Drive™ short recoil system.

The systems accumulates recoil energy and converts it into a mechanical movement for actuating moving parts. This concept, tried and tested for many years, has been perfected by the company that invented semi-automatic guns.

The beauty of the Kinematic Drive™ system resides in its simplicity of design, which enables it to operate in a regular, reliable way, with any type of load, and under all extreme conditions of weather, temperature, moisture or fouling.

Our confidence in the Kinematic Drive™ in terms of reliability is such that the A5™ is our first semi-automatic to be guaranteed for 100,000 shots or 7 years.

It stays clean as the gasses are ejected out of the barrel and therefore far away from the mechanism.

The intensively tried and tested Kinematic Drive™ system has shown its abilities with practically every cartridge load from 28g through to Magnum and without any adjustment.

INVECTOR DS™

Better shot patterns and optimisation of barrel weights and profiles are the main reasons that led us to create the new Invector DS™ (Double Seal) interchangeable choke system. The combination of its muzzle thread and the thinness of its walls, have enabled us to design a longer choke with an exclusive interior profile for improved shot distribution.

From the cylindrical model through to the Extra-Full models, shot-patterns are better graded. Extremely dense and constant shot-patterns can be obtained with the longer inside profile. The outside profile on the muzzle, which holds the choke housing, has been optimised and thinned down.

Besides improving the general appearance of the gun, this modification improves the weight distribution on the barrel, which, in turn, improves the whole gun's swing and balance.

Invector DS™ chokes have been designed to reduce shot-pattern distortion and make sure that they have less empty zones. Our exclusive inside profile also gives higher load speeds for better performance on impact. To avoid or reduce fouling due to gas penetrating between the choke itself and the barrel, we have fitted a new patented brass seal. This seal is compressed against the inner wall of the barrel when the choke is tightened in its housing. The ring prevents the Invector DS™ from unscrewing when firing, and therefore guarantees that chokes stay clean and makes them easy to fit or remove.

UNIQUE TO Browning®

See the full range of Invector DS™ chokes on page 96.

SPEED LOAD PLUS

Rapid loading systems have been used on Browning® semi-automatic shotguns for decades.

Our patented loading system sends the first shell in the magazine directly into the chamber.

In addition, thanks to the rapid unloading system, unloading operations are both simple and fast, without needing to operate the bolt for sending each shell into the chamber.

* or 7 years

HUMPBACK ACQUISITION ADVANTAGE

Made from lightweight, aeronautic quality aluminium alloy, the A5's receiver is sturdy and its characteristic shape is much more than just a nostalgic return to the past.

The receiver's familiar humpback shape fits perfectly with the rib for lengthening your line of sight and in this way helps you to aim naturally with faster targeting.

ERGO BALANCED

Its features and its look are only a part of the A5's equation for success. The new A5 is incredibly well-balanced from the recoil pad up to the barrel muzzle.

The grip is comfortable, the fore-end is compact and narrow and it places your hand closer to the barrel centre-line for better hand-eye coordination and more accuracy.

The A5 gives you a feeling of lightness and a rapid swing. Put the A5 to the test, by taking hold of it.

INFLEX II TECHNOLOGY

The new Inflex II Technology recoil pad is the next generation of the most recoil absorbing pad available.

A softer new outer material provides even better recoil absorbing performance and is super slippery to prevent snagging on clothing when shouldering. This second generation has added a new absorbent material that slips perfectly on clothing.

25 mm 20 mm 12 mm

TURNKEY MAGAZINE PLUG

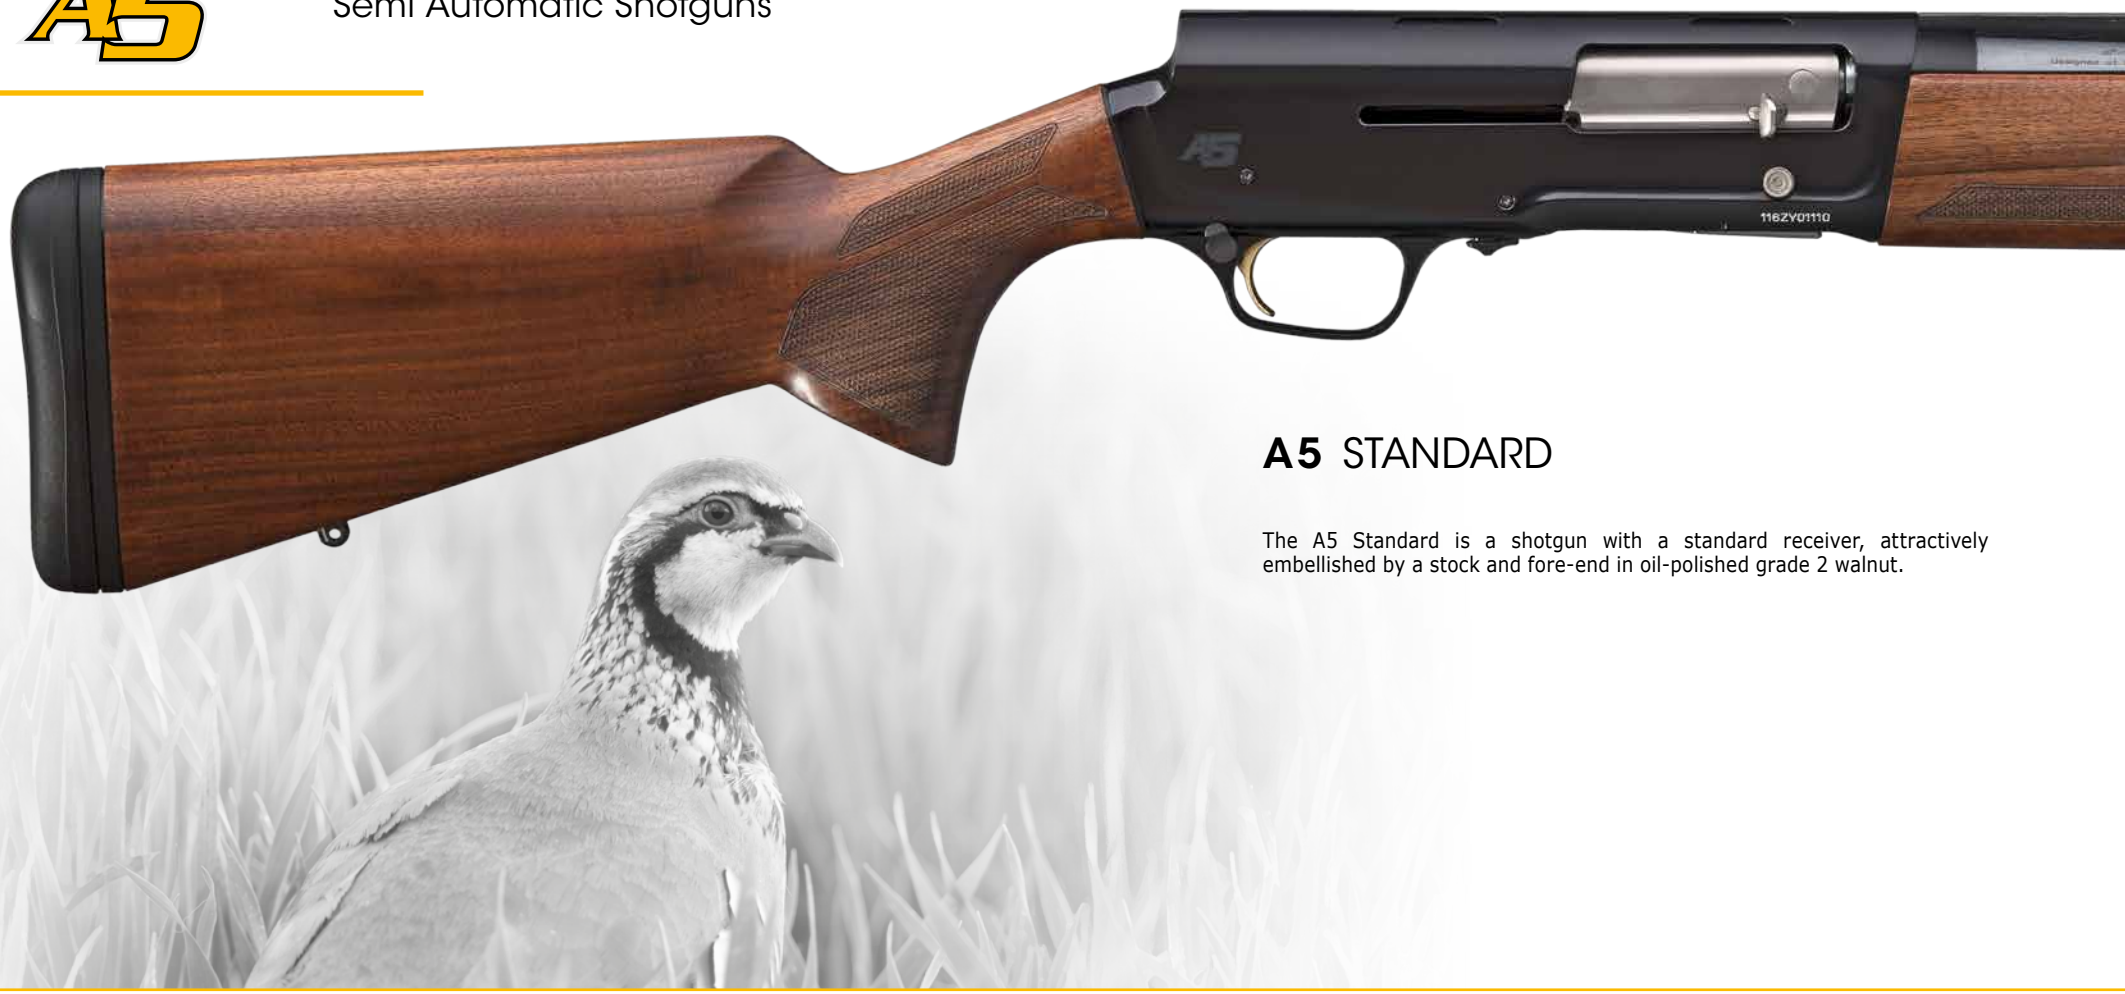
With the patented TurnKey system, you can use your car-key for removing the magazine adaptor plug without the slightest difficulty.

BARREL BACK-BORED™ | VECTORPRO™

For ballistic results see page 46

The A5 is fitted with new barrels possessing Back-bored™ Vector Pro™ barrel profiles and Invector DS™ chokes.
These two innovations optimize shot patterns and give the A5 a perfect balance, perfect ergonomics and a perfect swing under all conditions.

The principle of the Back-bored™ Vector Pro™ barrel is to increase the diameter of the barrel bore and to extend the connecting cone. This gives three extra benefits:
- An increase in speed and better shot penetration by reducing the friction between the shot and the walls of the barrel
- An improvement in shot patterns due to the shot being less deformed when it passes through the connecting cone between the chamber and the barrel bore.
- And lastly, less recoil as the shot goes through the barrel more easily.



A5 STANDARD

The A5 Standard is a shotgun with a standard receiver, attractively embellished by a stock and fore-end in oil-polished grade 2 walnut.

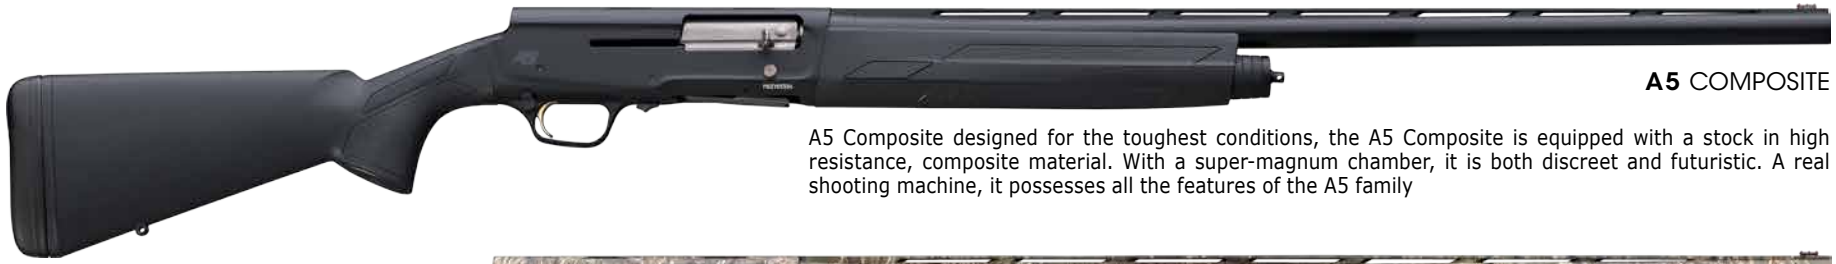
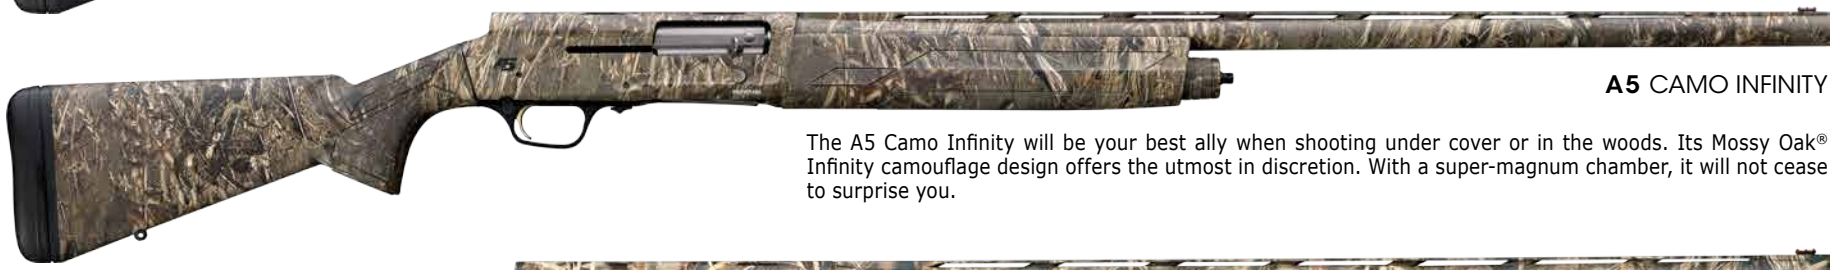
A5 ULTIMATE DUCKS

This firearm combines innovation and aesthetics. Its nickel-plated receiver is decorated with a delicate engraving showing ducks in flight. All the A5's features are present with a Back-bored™ Vector Pro™ barrel, the Invector DS™ chokes, an Inflex II recoil pad and the new Kinematic Drive™ system. Its grade 3 walnut stock has an oil-rubbed finish.



A5 COMPOSITE

A5 Composite designed for the toughest conditions, the A5 Composite is equipped with a stock in high resistance, composite material. With a super-magnum chamber, it is both discreet and futuristic. A real shooting machine, it possesses all the features of the A5 family



A5 CAMO INFINITY

The A5 Camo Infinity will be your best ally when shooting under cover or in the woods. Its Mossy Oak® Infinity camouflage design offers the utmost in discretion. With a super-magnum chamber, it will not cease to surprise you.

A5 CAMO MAX 4

The A5 Camo Max 4 benefits from the latest generation Realtree Max 4 camouflage film. Highly effective for water-fowl, its reed effects play their role perfectly. It has a super-magnum chamber, ideal for firing 70 to 89mm steel shot.

MAXUS

COMFORT AND LIVELINESS: OPTIMAL PERFORMANCE

LENGTH OF PULL EXTENSION SPACER

Supplied with the gun.

1 INFLEX TECHNOLOGY

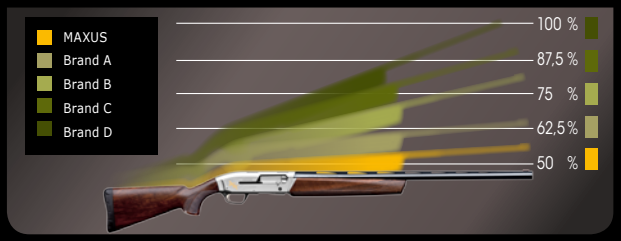
Much more than a recoil pad in a recoil-absorbing material, it has been designed with an internal structure that lowers the buttstock and pushes it away from the shooter's face after each discharge, which allows a second shot that is even more comfortable and faster.

THE SOFTEST SHOOTING SEMI-AUTOMATIC EVER:

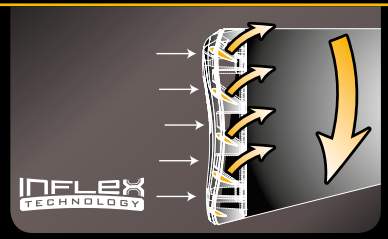
While no recoil reduction system on a shotgun can escape the laws of physics, the Maxus is sure to change your mind about recoil control. The Power Drive Gas System, Inflex technology, Vector Pro™ Back-bored™ technology, from Browning® are combined to reduce the total recoil force to the shooter by 18% compared to any other semi-automatic shotgun on the market.

INFLEX TECHNOLOGY

COMPARISON OF MUZZLE JUMP



SCAN AND DISCOVER THE MAXUS REVOLUTION



The Invector-Plus interchangeable choke functions jointly with the Vector Pro™ and the Back-bored™ barrel to offer dense and regular shot patterns.

INVECTOR PLUS+

MAXUS PREMIUM GRADE 3

2 BARREL ASSEMBLY

The new geometry of the extended Vector Pro™ forcing cone together with the Back-bored™ barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

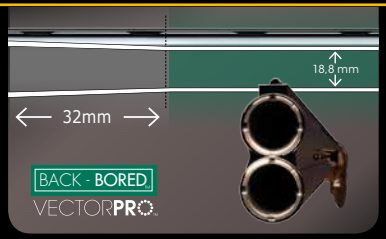
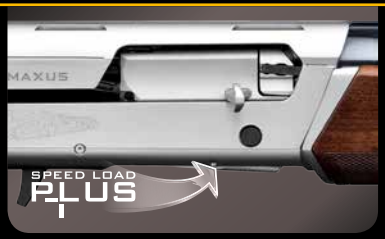
VECTORPRO™



3 RAPID UNLOADING

And now, unloading is just as simple with the new Maxus. The fast unloading function quickly and easily clears the tube magazine, without any need to individually chamber shells.

SPEED LOAD PLUS



CUT OFF

The Maxus is equipped with a Cut Off for the magazine to allow the shooter to unload the chamber easily, and thus change the type of shell without having to chamber a shell from the magazine.

4 POWER DRIVEN GAS SYSTEM

The Power Drive Gas System uses larger escape valves to remove gas more quickly with heavy loads. A brand new patented design for an integrated valve keeps residue outside the mechanism for cleaner functioning. The piston has a run increased in length by 20% to make it even more reliable with light charges. The system works with loads of 24 to 64g.

POWER DRIVE GAS SYSTEM

MAXUS ULTIMATE PARTRIDGES

The delicate engraving representing partridge hunting scenes on one side and pheasants on the other gives it a real up-market standing. Its brushed nickel-coated receiver is an exceptional little gem. Its stock and fore-end are made from grade 3 oil-rubbed walnut.

BACK - BORED VECTORPRO INFLEX II TECHNOLOGY INVECTOR PLUS+ STEEL SHOT proved

MAXUS CAMO DUCK BLIND

The model par excellence for waterfowlers. This shotgun is covered in the famous Mossy Oak® Duck Blind camouflage, which is the most effective camouflage for waterfowl. It is chambered in super magnum to allow you to shoot Steel shot shells of 70mm to 89mm.

MAXUS SPORTING CARBON FIBRE

The latest version of the Maxus range, this gun has been specially designed for sports shooting. With its ventilated rib - tapered from 8 to 6mm, you can line up your target at top speed. Its carbon finish gives it a particularly unique style.

MAXUS COMPOSITE

The all-terrain version of the Maxus is chambered in super magnum. The buttstock and the forearm of this model have a careful ergonomic design, with all the handling surfaces specially developed for Browning®.

OPTIMAL BALLISTIC PERFORMANCES:
Browning® Barrels Include 3 Advanced Technical Solutions

1. Vector Pro™

The new geometry of the extended Vector Pro™ forcing cone together with the Back-bored™ barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

2. Barrels

The principle of the Back-bored™ barrel is to increase the diameter of the barrel's bore by a standard value, from 18.4 to 18.8mm.

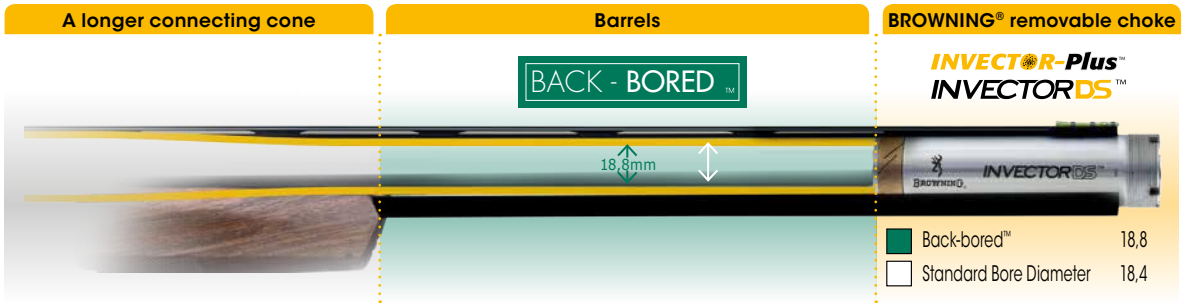
Increasing the barrel bore diameter provides three benefits:
- Increased speed and penetration
- Better shot patterns
- Less recoil

3. Chokes INVECTOR™

Adjustable Invector-Plus™ and Invector DS™ chokes have been specially developed by our Research and Development Department for our Back-bored™ barrel system. They have been designed to obtain "a perfect target" at different shooting distances.

THE PERFECT TARGET
Our objective is:
- Shot pattern efficiency of 80% on target, i.e. 80% of the shot contained in the cartridge must be in a target area inside a diameter of 75cm.
- A perfect shot pattern: the shot pattern must be such that there is a minimum number of "empty" areas, i.e. areas in the target surface where there are no shot impacts.

AT DIFFERENT SHOOTING DISTANCES
Our objective is:
- To obtain the perfect target at different shooting distances. Depending on the type of choke used, the efficient shooting distance will be different. For example, at 15 m, with an Invector-Plus™ Cylindrical choke, we obtain target shot pattern efficiency of 80% with a minimum number of surfaces without any shot impacts.



See the full range of Invector DS™ and Invector-Plus™ chokes on page 96.

The Browning® choke recommended for different shooting distances

Depending on the Browning® choke you use, you can adapt your gun perfectly for the distances at which you shoot and the game you are hunting.

Full Choke = 35 m
3/4 Choke = 30 m
1/2 Choke = 25 m
1/4 Choke = 20 m
Cyl = 15 m

1/2 CHOKE AT 25 m

1 7-TENON BOLT SAFETY GUARANTEED

A bolt renowned for its sturdiness, which guarantees exceptional safety and accuracy.

With all its undeniable experience in making hunting rifles, BROWNING® has innovated yet again in the field of straight-pull action rifles with the new MARAL. A real technical revolution, its quick-loading system offers shooters incomparable speed and unprecedented firing comfort. BROWNING® combines this new technology with all the experience it possesses in barrel-making and its expertise in safety with its 7-lug bolt, which already equips over a million rifles throughout the world. Efficiency can also be measured when you look at the breech, which is always contained inside the bolt-casing. This enables shooters to keep their target in their sights continuously when firing.

MARAL

3 TIMES MORE EFFICIENT*

* than a traditional straight pull rifle.

+ SAFETY

SECURITY GUARANTEED

A safe rifle by its very essence, with its breech confined in the receiver and its manual cocking system.

Unlike other straight-pull action rifles, the BROWNING® rotating 7-lug bolt system is a guarantee of protection and absolute safety in the event of over-pressure.

The breech is completely confined inside the gun's receiver and does not interfere with aiming when re-cocking. The shooter keeps the target in his sights without any interference. This confinement also guarantees the cleanliness of the breech system.
The Maral's manual cocking system is designed for maximum safety in both beats and hides.

The manual cocking button lets you cock your rifle just before firing, by moving it forwards, which puts the hammer springs under load.

Conversely, the system is uncocked by pushing the button downwards, which makes the gun inoffensive and completely safe.

BROWNING® TRADITIONAL ROTATING BOLT

The Maral is fitted with a BROWNING® 7-lug rotating bolt, which has proved its worth for over 40 years.

This legendary sturdiness results from using an extremely simple system that has been made with the utmost precision for many years.

+ SPEED

QUICK RELOADING SYSTEM: ULTRA-FAST REPEATING

The Maral is extremely quick to reload thanks to its Quick Reloading System.

The only movement required is the straight pull on the re-cocking lever, as the servo- bolt return system automatically pushes the bolt back forwards.

By eliminating the reloading lever push-forward phase, the shooter gains time, which enables him to concentrate more on targeting and firing rather than on reloading.

Lastly, the linear pull on the reloading lever is constant, which offers unmatched comfort in use.

The exclusive servo bolt return system – the Quick Reloading System – is patented and provides maximum safety, speed and efficiency.

+ ERGONOMICS

UNMATCHED COMFORT IN AIMING AND RELOADING

Unlike a traditional straight-pull action rifle, the Maral offers exceptional ergonomics and comfort, thanks to its exclusive patented repeat shot movement.

The Maral rifle has been designed for stabilized shooting, instinctive "in-line" recocking and faultless repetition. The straight-line recocking movement is not disturbed by the breech passing in front of the shooter's eye, nor by the linear pushing phase on the reloading lever.

Rapidity, sureness and efficiency are the key words for this new-generation rifle.

THE TARGET IS IN YOUR SIGHTS ALL THE TIME

The Maral's reloading movement is inside the gun's receiver, which offers three major advantages:

On the one hand, natural continuous aiming and on the other ergonomic reloading without having to stop firing.

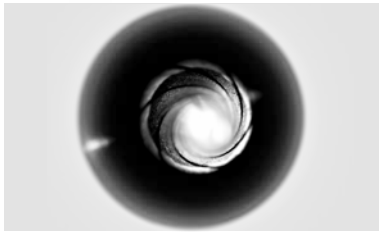
As a result the breech does not shoot out of its casing towards the shooter's face, which makes it easy to reload when in firing position.

Aiming is maintained between each shot which makes repeat shots easier and enables the shooter to concentrate on his target all the time.

THE NEW BROWNING® STRAIGHT PULL RIFLE

FN Herstal barrel

FN HERSTAL BARREL FOR EXCEPTIONAL ACCURACY



The Maral rifle's barrel is made at the Herstal Fabrique Nationale by cold hammering.

This gives shooters exceptional accuracy.

Removable stock

REMOVABLE STOCK FOR EASY TRANSPORT

Transporting the Maral is made easier by its removable stock. A suitable tool is provided with the carrying case.

Removable magazine

3 OR 4 SHOT REMOVABLE MAGAZINE OR 6, 8, 9 OR 10 SHOTS HIGH CAPACITY MAGAZINE

Essential accessories "par excellence", the Maral offers 5 different versions of magazine: 3+1, 4+1 removable magazines and 6+1, 8+1, 9+1, and 10+1 high capacity magazines (See page 81 for details and availabilities).

Your customizable Maral

YOUR CUSTOMIZABLE MARAL

You can customize your gun thanks to the range of options available:

- A large choice of Big Game, Wood or Ultimate grips incorporated into the receiver
- Stocks going from Bavarian to Monte Carlo or simply traditional
- Tulip or rounded fore-ends

Ideal for driven HUNT and STALKING

REAR-SIGHT DELIVERED WITH THE GUN

IDEAL FOR HUNTING ACTIONS IN BEATS, THE MARAL GUARANTEES:

- High firing speed thanks to its Quick Reloading System
- Comfort and ergonomics for the shooter thanks to the system that confines the breech inside the receiver and prevents it from coming out towards the shooter's face and enables him to reload without unshouldering
- Integral safety in firing with the locking system guaranteed by the servo breech return system
- Sturdiness, reliability and durability for instinctive firing

ALSO IDEAL FOR HIDES, THE MARAL GUARANTEES:

- Safety in firing, thanks to its simple manual cocking system
- The guarantee of a second shot, as the shooter's concentration stays on keeping the target in his sights thanks to fast, ergonomic linear reloading
- Exceptional accuracy due to the 7-lug system locking the breech in the chamber and the legendary quality of FN barrels

BAR
ZENITH

THE MOST RELIABLE RIFLE ON THE MARKET

ADJUSTABLE BUTTSTOCK
The BAR Short/LongTrac, as well as certain BAR Zenith are fitted with an interchangeable butt plate, which enables you to adjust the length of your gun depending on your physiology.

**AN UNDISPUTED LEADER WITH 46 YEARS EXPERIENCE, BROWNING®
IS THE SPECIALIST IN SEMI-AUTOMATIC RIFLES.**

It owes this title to the quality of its mechanism, the smoothness of its gas-assisted operation which reduces recoil sensations to a minimum and its reliability, but above all to the fact that it has constantly evolved for offering you consistently better performance.

1 HAND COCKING SYSTEM SAFETY GUARANTEED

The BAR Zenith Prestige Wood now has a new manual cocking system.

The manual cocking system lets you literally cock your rifle, by moving the arming plunger forwards, which puts the hammer springs under load.

Your gun is now ready to fire.

Fittings and accessories see pages 80-81

BAR ZENITH ULTIMATE HAND COCKING

2 RELIABILITY

46 years of experience combine with the simplicity of its system, the precision of its manufacture and the quality of its controls.

3 EXCELLENT PRECISION

7-lug rotating bolt.

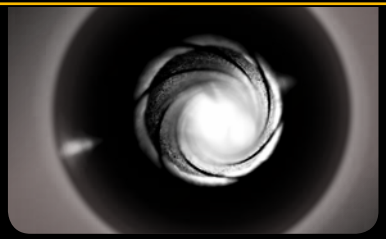
The barrel/bolt locking mechanism works directly in the barrel, due to a lock of seven lugs that engage in an extremely rigid manner. This system provides excellent shooting accuracy.

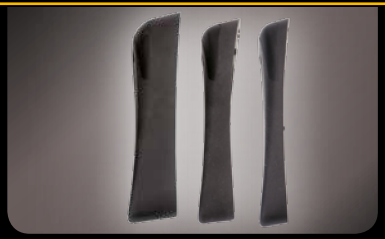
4 FN HERSTAL BARREL

The barrel of each BAR rifle is created by cold hammering at the Fabrique Nationale in Herstal, Belgium.

5 INTERCHANGEABLE BUTT-PLATE

The BAR Short/Longtrac and Zenith are fitted with interchangeable anti-recoil butt plates. Depending on the model of gun, Inflex II and Classic butt plates of different thicknesses are available: 1.3cm, 2.0cm and 2.5cm. These butt plates enable you to adjust the length of your stock without any difficulty.





BAR ZENITH WOOD HAND COCKING

The BAR Zenith Wood HC possesses a longer piped barrel that offers a more accurate line of sight. The new manual cocking system located on the top of the pistol grip offers an extra degree of safety.

(**) According to applicable laws

Options available see pages 50 -51

HAND COCKING SYSTEM

The BAR Zenith Prestige Wood now has a new manual cocking system. The manual cocking system lets you literally cock your rifle, by moving the arming plunger forward, which puts the hammer springs under load. Your gun is now ready to fire.

When hunting and at your firing station, you can feed a cartridge into the chamber of your gun and then use the manual cocking system to put the cocking plunger in the "uncocked" position. Your rifle is now safe.

When you want to fire, you just have to push the plunger forward. Your rifle is now ready to fire and all that you still need to do is to squeeze the trigger.

You can just as easily uncock your gun by pressing on the cocking pushbutton on the top of the plunger. This removes the load from the hammer springs and makes your gun inoperational, and therefore safe.

It is a very simple easy-to-use system that gives your rifle an extra important degree of safety.

1 Cocking plunger in the "uncocked" or safety position.

2 Cocking plunger in the "cocked" position, a red dot appears. Your gun is live for firing.

3 Uncock your BAR Zenith by pressing the pushbutton downwards.

BAR ZENITH ULTIMATE HAND COCKING

This is the supreme model of the Zenith family, endowed with magnificent engraving entirely retouched by hand and enhanced with gold inlays showing wild boar on the left side and stags fighting on the other.

X-BOLT SF HUNTER WITH SIGHTING SYSTEM

This version is characterised by the battue rib type sighting system and optic fibre front sight allowing for rapid firing without a scope at short distances. This is ideal for driven hunts and is very versatile in use. In addition, a hide type rear sight is delivered with your gun. The very modern designed and perfectly ergonomic forearm of the X-Bolt is made of walnut. Available in a left-handed version calibres 308 Win, 30-06, 270 WSM, 300 WM

2014 NEW

SUPERFEATHER TRIGGER

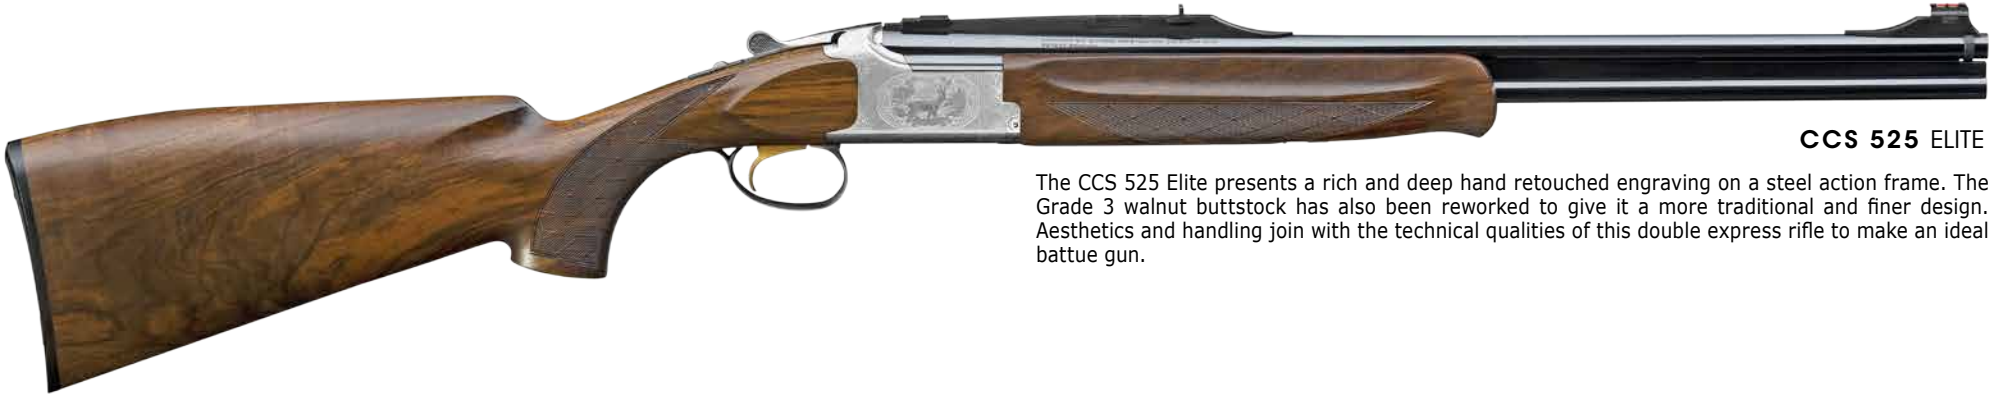
2014 NEW **X-BOLT** SF HUNTER LEFT HAND
WITH SIGHTING SYSTEM

BLR LIGHTWEIGHT BATTUE

The BLR is the only lever-action rifle developed in magnum calibre. Its mechanics are impeccable and characterised by the exceptional smoothness of its operation. It has a removable magazine and a high quality barrel and is ready for fitting a scope. Its battue rib along with a short barrel makes an excellent weapon for driven hunts and tracking. Model also available in stalking version.



CCS 525 ELITE

The CCS 525 Elite presents a rich and deep hand retouched engraving on a steel action frame. The Grade 3 walnut buttstock has also been reworked to give it a more traditional and finer design. Aesthetics and handling join with the technical qualities of this double express rifle to make an ideal battue gun.

SF VARMINT GRS

2014 NEW

X-BOLT SF VARMINT GRS

(Scope not supplied)

With its heavy M18x1 piped and rifled barrel, the X-Bolt SF Varmint GRS will be particularly appreciated by enthusiasts of varmint hunting or precision shooting.

The X-Bolt SF Varmint GRS is the version with a modern provocative look!

A perfect combination of accuracy, design and ergonomics, the X-Bolt SF Varmint GRS will give you an aggressive style with its meticulously designed stock in grey-black laminated wood and even greater comfort when firing, with a stock that is adjustable in both length and pitch.

The package includes steel mounting bases for your scope.

Available in 3 calibres (243, 308 and 6,5x55).

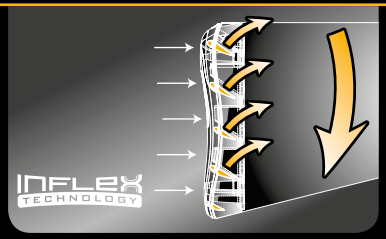
X-BOLT SF HUNTER

2014 NEW

2 INFLEX ANTI-RECOIL BUTT PLATE

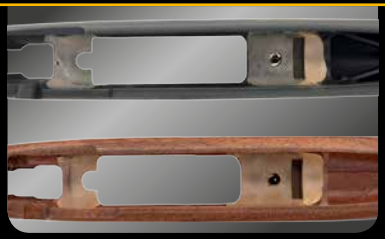
This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun.

INFLEX TECHNOLOGY



3 UTMOST ACCURACY

A free-floating barrel is essential for utmost accuracy. The X-BOLT SF's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel/breech block assembly at two points with respect to the forearm, at the front and at the rear.



4 X-LOCK MOUNTING SYSTEM

The X-Lock scope-mounting system has 4 screws per fixing point. Therefore it is more stable and provides higher accuracy.

5 BOLT-UNLOCKING BUTTON

The bolt-unlocking button works in conjunction with the safety to provide an added degree of safety.

ROTATING MAGAZINE
Made in light ultra-resistant polymer, it gives exclusive protection to bullet noses.

2014 NEW

X-BOLT SF HUNTER MONTE CARLO

This X-BOLT SF has the particularity of possessing a Monte Carlo stock, perfectly adapted for use with a scope.

ALL THE X-BOLT SF HUNTER WITH SIGHTING SYSTEMS ARE PROVIDED WITH A "BATTUE" TYPE RIB AND REAR-SIGHT EXCEPT FOR THE X-BOLT SF HUNTER MONTE CARLO MODELS.

A-BOLT

Bolt Action Rifles

A-BOLT COMPOSITE

Endowed with the features unique to the A-BOLT line, this Stalker version is extremely robust in the worst conditions as a result of its composite buttstock. In addition, it will meet your every expectation, whether for hunting or sharpshooting.

A-BOLT UK STALKER

This A-BOLT Composite rifle is offered in a highly specific configuration, its slightly shortened barrel is threaded (M14x1) at the end. The model is also supplied with a steel fixing base and an extra magazine.

ACCESSORIES SUPPLIED WITH THE A-BOLT UK STALKER

EUROBOLT

The EUROBOLT is provided with interchangeable sights. Thus, the gun can be modified to excel on a high seat hunt (with a rear leaf sight) or to make it formidable on a drivengame hunt (with a quarter rib). The trigger has a "stecher" (set trigger) mechanism, which allows the gun to be fired with a very light trigger pull for very accurate shots.

BAR
ACIER

Semi-automatic Rifles

BAR STEEL AFFÛT BOSS™

The addition of the BOSS™ system produces two particularly interesting effects: recoil reduction (in the range of 30% to 50%) and increased accuracy. The performance of the BAR is thus improved when shooting using a scope or at long distances.

BAR STEEL AFFÛT

This version is fitted with a vertically and horizontally adjustable rear sight.
The fine metal front sight ensures perfect accuracy of aim.

EXCLUSIVE BROWNING® BOSS™

(Ballistic Optimizing Shooting System): improvement of accuracy.

The BOSS™ system has two main advantages:

- ***Improvement of accuracy***: the BOSS™ system allows the bullet to leave the barrel at the ideal moment, i.e. at the "peak" or "valley" of the vibration wave when the muzzle is virtually motionless.
- ***Recoil reduction***: air vents located all around the circumference of the BOSS™ system serve as a muzzle brake by diverting the combustion gas. The result is a recoil reduction of around 30-50% depending on the calibre and, therefore, excellent shooting comfort.

B725 SPORTER

THE LEGENDARY STRENGTH IS NOW COMBINED WITH REVOLUTIONARY DESIGN AND FEATURES

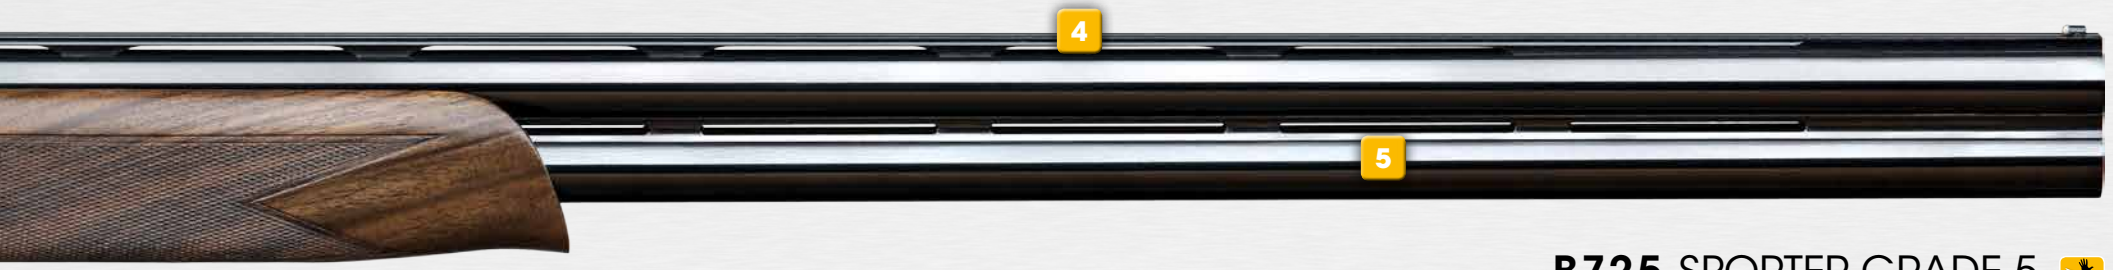
1 NEW INFLEX II RECOIL PAD

A totally new INFLEX II recoil pad is fitted on all B725 shotguns as standard. This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. This exclusive material makes shouldering easier. Two other pads, 20 or 25 mm thick (available as an option), make it easy to adjust the length of your stock. In this way, you can adapt your B725 to your own physique and also adapt it depending on the hunting season.

"LEGENDARY RELIABILITY" AND "INNOVATION" ARE THE B725'S WATCHWORDS.

The new Browning® B725 is an aesthetic and technical revolution in Over and Under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding Over & Under shotgun on the market.

SCAN AND DISCOVER THE B725 REVOLUTION



B725 SPORTER GRADE 5

2 NEW HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

These new brakes are shorter, faster and lighter. This innovation offers extreme ease of use for shooters by guaranteeing the possibility of a second shot no matter what the circumstances. Even if you only have one shell in your gun, you will still be able to fire, which is not the case when you have an inertia system.

3 LOW ACTION FRAME

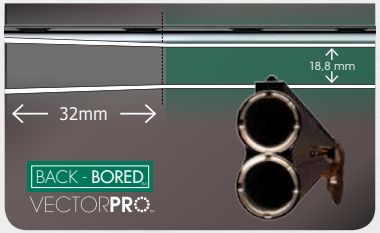
The low action frame provides the following benefits when shooting by:

- Enabling faster aiming and therefore more instinctive shooting.
- Reducing muzzle flip due to the frames inline recoil providing a more comfortable shooting position, making it highly manoeuvrable and effective when shooting.

4 BACK-BORED™ VECTOR PRO™ BARREL

The principle of the Back-bored™ Vector Pro™ barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone which provides three advantages:

- Increased speed and improved pellet penetration
- Improved pellet grouping
- Reduced recoill



5 INVECTOR DS™ CHOKES

The new Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

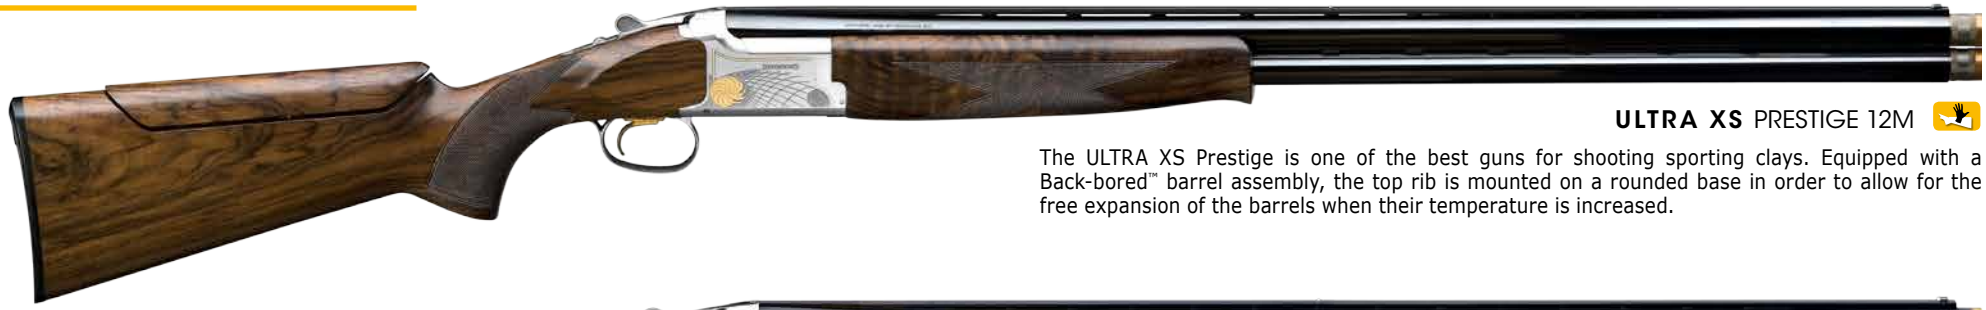
ULTRA XS PRESTIGE

Sporting Clay Over And Under Guns



ULTRA XS PRESTIGE 12M

The ULTRA XS Prestige is one of the best guns for shooting sporting clays. Equipped with a Back-bored™ barrel assembly, the top rib is mounted on a rounded base in order to allow for the free expansion of the barrels when their temperature is increased.

ULTRA XS 20M

Fine and distinguished, this 20M calibre ULTRA XS is extraordinarily effective.Its quick and precise swing, combined with Back-bored™ barrels equipped with Midas chokes, offers exceptional performance.

ULTRA XS 12M

Sporting clays, a gruelling and technique-oriented discipline, can take on very different forms. Parcours in open fields, in undergrowth, and the majority approaching and retreating clay.The ULTRA XS allows you to modify the necessary parameters in a few seconds. The XS Sporter version is equipped with external Midas chokes.

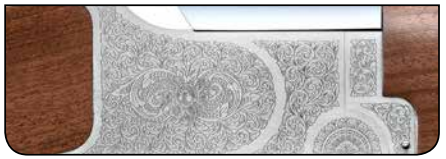
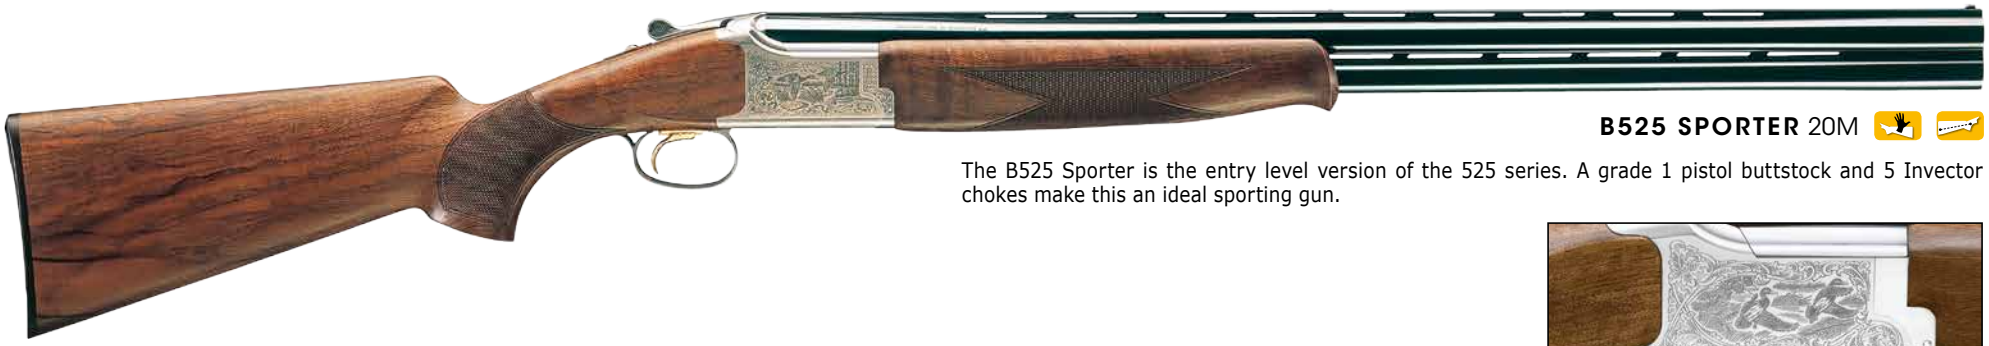
B525 SPORTER

Sporting Clay Over And Under Guns

B525 SPORTER ONE 12M 2014 NEW

The B525 Sporter One is the basic model in Browning® Over and Under guns. Equipped with 10mm top rib, ventilated side-ribs, a pistol grip and a tulip fore-end, the B525 Sporter One is just as much at ease when out hunting as for shooting sporting clays. Very reasonably priced, it is the ideal gun for beginners - both hunters and sporting clay shooters.





B525 SPORTER 20M

The B525 Sporter is the entry level version of the 525 series. A grade 1 pistol buttstock and 5 Invector chokes make this an ideal sporting gun.

SPORTER

SPORTING CLAY OVER AND UNDER GUNS

Its futuristic style will turn heads on the shooting range. The buttstock and forearm are made of composite material with rubber inserts, increasing this gun's weight and making it more resistant.

A supplementary adjustable comb that is included with the gun allows the buttstock drop and cast to be modified as you desire.

80 years after the invention of the B25, Browning® has created yet another revolution in the world of Over-and-Under shotguns with the CYNERGY.

Years of research and testing have been required to develop this reliable, high-performance, elegant, and effective shotgun. Browning® takes much pride and pleasure to introduce you to the CYNERGY!

The CYNERGY includes:

- The lowest action frame on the market: 60mm
- The fastest second shot: 0.0019s
- The low action frame with its integrated hinge gives this incomparable gun exceptional balance and incredible strength.

CYNERGY COMPOSITE BLACK ICE 12M

TAKE A STEP FORWARD!

To prove it, the CYNERGY's action frame is guaranteed for 10 years.

The CYNERGY's shouldering is perfect, smooth and fast. Firing comfort is exceptional. You are in line with you gun, which has almost no recoil and the barrel's movement between two shots is so infinitesimal that the second shot is even faster.

The CYNERGY's Back-bored™ barrels can also be used for firing high-performance steel-shot shells.

The CYNERGY also has modern and attractive aesthetics, a novel design characterised by fine straight lines and a slim silhouette.

The CYNERGY's single trigger will give you a hitherto unknown sensation: Incredibly precise and rapid breaks, the fastest in the world.

Thanks to this exceptional gun's special firing mechanism, there is only 0.0019 seconds between the first and second shot, compared with 0.0031 for our leading competitors.

CYNERGY COMPOSITE BLACK ICE 12M	12M	76mm	71-76-81cm	5 Invector + Diamond (Cyl-1/4-1/2-3/4-Full)	ventilated 10-8mm	pistol with adjustable comb	375mm	28-46mm	28-46mm	3.4kg	tulip	grey and gold engraving	composite	rubber chequering 1 pad and 1 spacer 1 additional comb with right cast	Cynergy carry case

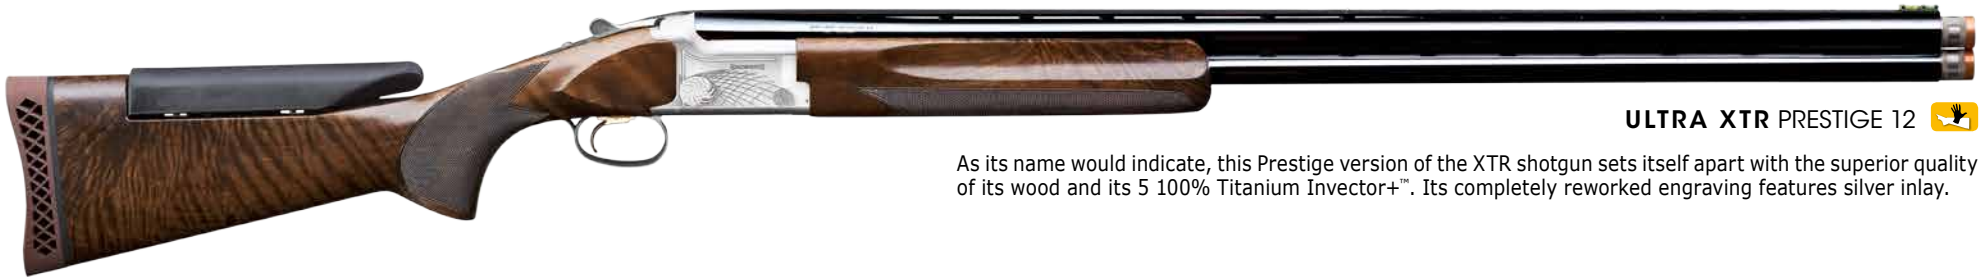
ULTRA XTR INV+ MIDAS

This model is fitted with a rubber comb that is simultaneously both smooth to the touch and non-slip. This gun strives for accuracy in aiming that can be guaranteed to the millimetre with a comfort that, until now, had never been attained. It is primarily geared toward shooters who practice their sport intensely.



ULTRA XTR PRESTIGE 12

As its name would indicate, this Prestige version of the XTR shotgun sets itself apart with the superior quality of its wood and its 5 100% Titanium Invector+™. Its completely reworked engraving features silver inlay.

Grand Prix, The First Browning® Shotgun With Disconnectable Ejectors

GRAND PRIX TRAP

Following the Sporter version, the line of GP shotguns with disconnectable ejector is now available in a Trap version.

The Trap GP shotguns are equipped with the "Ejection Control" system that, after a simple operation, allows you to switch between ejection and extraction modes.

The Back-bored™ barrels are fitted with Invector-Plus™ Midas chokes made by Briley, the renowned manufacturer.

INVECTOR DS™

The new Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

The optimal 80mm length enables an exclusive internal shape to be developed, which optimises performances over all shooting distances and ensures a uniform concentration of the shot pattern when using lead or steel shot.

The new patented Invector DS™ (Double Seal) Chokes offer a double seal. They are fitted with a compression ring that limits penetration of combustion gas between the choke and barrel. The thread on the muzzle side forms an obstacle to prevent exhaust gasses from entering. The ring stops the Invector DS™ from unscrewing when firing. This guarantees that the choke stays clean and is easy to remove under any conditions.

After extensive shooting of 500 rounds of the dirtiest loads, competitor's choke tube that don't have a gas seal show significant grit and residue buildup on the tube. The innovative gas seal on Browning® Invector-DS tubes keeps the choke tube cleaner, for easier removal and installation.

Extensive shooting of 500 rounds

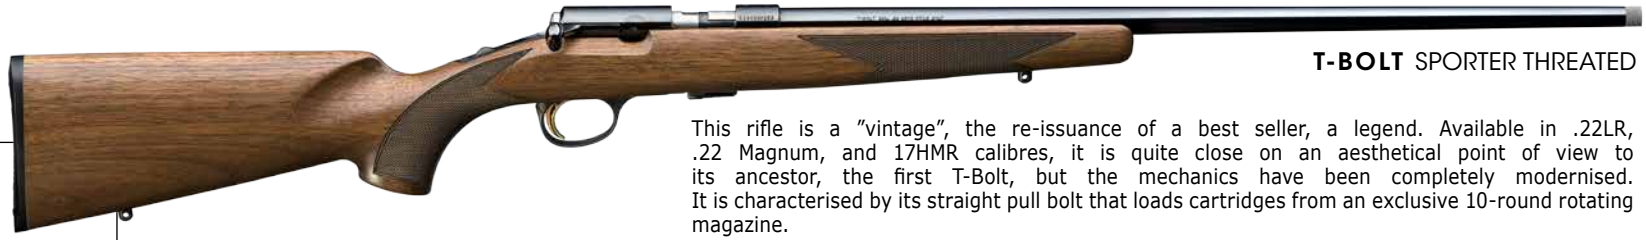
INVECTOR DS™ COMPETITOR'S CHOKE

T-BOLT
SPORTER

Rifles .22LR - 17HMR

T-BOLT SPORTER COMPOSITE THREATED

This rifle is «vintage» gun, a best seller and a legend. Available in .22LR, .22 Magnum, and 17HMR calibres, it is quite close on an aesthetical point of view to its ancestor, the first T-Bolt, but the mechanics have been completely modernised. It is characterised by its straight pull bolt that loads cartridges from an exclusive 10-round rotating magazine.



T-BOLT SPORTER THREATED

This rifle is a "vintage", the re-issuance of a best seller, a legend. Available in .22LR, .22 Magnum, and 17HMR calibres, it is quite close on an aesthetical point of view to its ancestor, the first T-Bolt, but the mechanics have been completely modernised. It is characterised by its straight pull bolt that loads cartridges from an exclusive 10-round rotating magazine.

.22LR 17HMR

ADDITIONAL MAGAZINE INTEGRATED IN THE BUTTSTOCK FOR THE COMPOSITE VERSION

An additional magazine integrated in the buttstock and, more particularly, in the pad.

During intense shooting, it is therefore very easy to quickly replace the first empty magazine.

BUCK MARK SPORTER RIFLE

Non-standard by its design, compact, and tremendously accurate and reliable, this rifle offers a range of truly extensive usage possibilities. It has adjustable sighting equipment with an adjustable rear sight as well as a fibre optic front sight as well as an integrated rail for optical mounting.

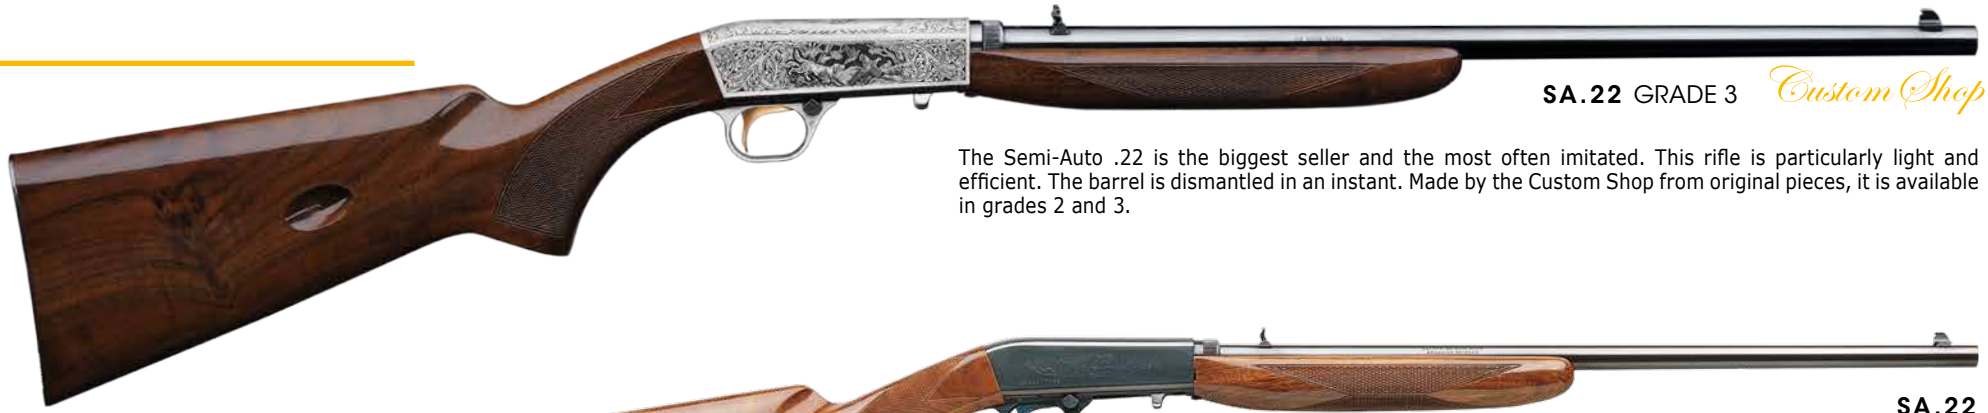
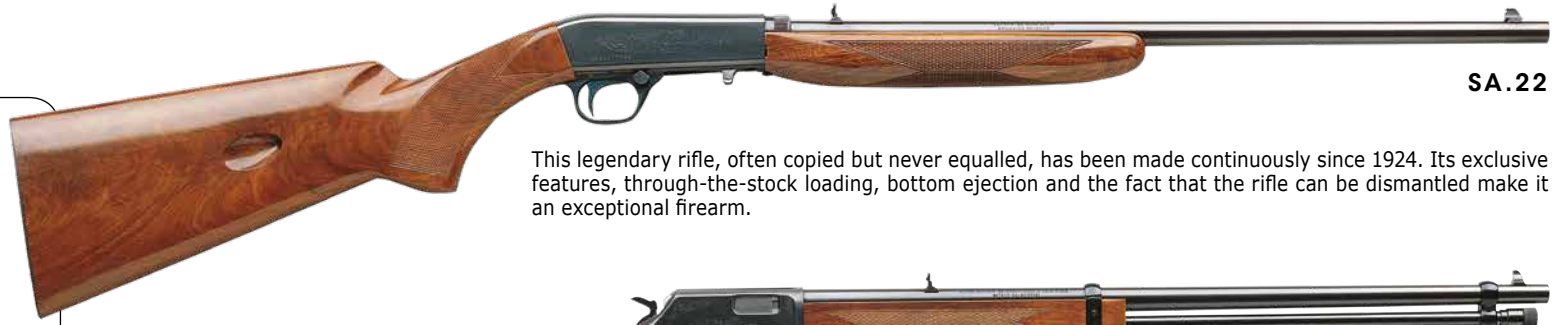
SA.22 – BL.22 Rifles



SA.22 GRADE 3 *Custom Shop*

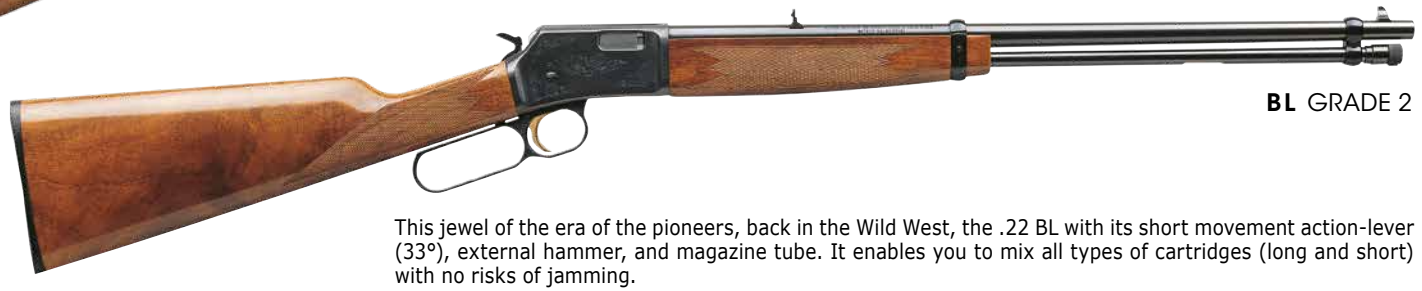
The Semi-Auto .22 is the biggest seller and the most often imitated. This rifle is particularly light and efficient. The barrel is dismantled in an instant. Made by the Custom Shop from original pieces, it is available in grades 2 and 3.



SA.22

This legendary rifle, often copied but never equalled, has been made continuously since 1924. Its exclusive features, through-the-stock loading, bottom ejection and the fact that the rifle can be dismantled make it an exceptional firearm.

- Operation in "blow back" mode (unlocked breech activated by gas)
- Automatic eject, arming, and loading
- Loading performed in the buttstock (the magazine tube is withdrawn from the back of the rifle and the cartridges are inserted one by one in the hole found in the buttstock)
- Bottom ejection
- BARRel take-down with wear adjustment.



BL GRADE 2

This jewel of the era of the pioneers, back in the Wild West, the .22 BL with its short movement action-lever (33°), external hammer, and magazine tube. It enables you to mix all types of cartridges (long and short) with no risks of jamming.

1911-.22LR

On the 100th birthday of the legendary 1911 pistol, we are proud and happy to present you with a re-dimensioned version of this mythical gun in .22LR calibre. The Model 1911 pistol was created by John Moses Browning® at the beginning of the 1900's to reply to a call for tenders made by the American army for a .45 calibre pistol. The pistol then became the most widespread and most popular handgun.

This new resized version respects the proportions and functionalities of its ancestor perfectly, whilst offering a more compact gun with an exceptionally low weight, barely 430 grams. The slide is machined in a single aluminium block, the side grooves make it extremely easy to hold and handle, and fluid and easy to use. The aluminium receiver also has amat black finish. The barrel, made from molybdenum chrome steel has a barrel insert machined from a single stainless steel block.

The magazine with a capacity of ten rounds is in heat treated steel to guarantee long service life and reliability of loading.

The manual safety catch is well-dimensioned. Like the original model, the 1911-.22 has a pistol grip safety system.

BUCK MARK .22LR Hand Guns

BUCK MARK
CONTOUR URX

Browning® Buck Mark rim-fire pistols are very highly valued due to their quality, reliability and accuracy. These pistols have a receiver made from a single aluminium block machined using numerical control. The barrel is machined in a single top-quality steel block and the chamber is hand-bored for guaranteeing optimal accuracy.

Every Buck Mark pistol has fully adjustable sights.
Breaks are light accurate and crisp.
Grips, URX version in rubber or UDX in wood are perfectly ergonomic.
Your hand positions itself systematically in the same place on the grip every time you fire.
This allows more instinctive firing and improves accuracy.

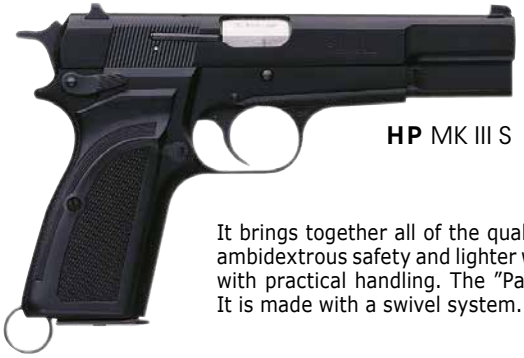
HP SILVER CHROME

The HP exists in the Silver Chrome version, which is equipped with a rear sight that is adjustable in elevation and direction and a sport front sight with a rounded base plate.

The slide and the receiver are nickeled, and the rubber grip is made by Pachmayr, for sure and efficient handling.



HP MK III S

It brings together all of the qualities found in the HP, yet with an additional ambidextrous safety and lighter weight (910g), which make it an accurate gun with practical handling. The "Pachmayr" handles ensure the best handling. It is made with a swivel system.

ADJUSTABLE **HP** PRACTICAL

The HP Practical meets the demands of Practical Shooting.
It has undergone several improvements, such as:
- Adjustable, low profile sights.
- Particularly crisp trigger pull.
- Extremely comfortable handling due to its Pachmayr chequered rubber grips.

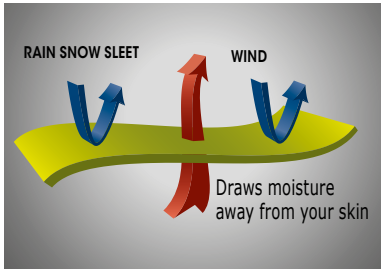
OUTDOOR TECHNICALITY

Browning® hunting wear uses the **latest technologies** for giving hunters **unmatched comfort** and **effectiveness**.

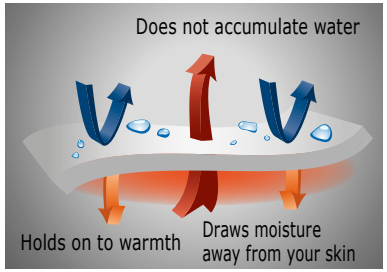
YOUR BAD-WEATHER PROTECTION



PreVent™ is our watertight, windproof and breathable techno-material.

The impermeability rating at 10.000mm and the care taken in product design for preventing all water infiltration guarantee that our PreVent™ wear is of the very highest quality. PreVent™ marked clothing is designed to resist against rain, snow, wind squalls whilst remaining breathable and comfortable for the hunter at the same time.

THE BEST INSULATION FOR ALL WEATHER CONDITIONS



PrimaLoft™ is a premium performance insulation engineered for superior warmth, water resistance, loft, softness and compressibility.

These fibres are the finest in the industry and are densely packed to retain heat better for improved thermal efficiency. PrimaLoft™ fibres are specially treated to repel water molecules and absorb less water to make it more water-resistant and faster drying than other polyester insulations.

Tightly-compressed fibres also make PrimaLoft™ highly wind-resistant as the smaller, finer fibres compress more and are lighter, less bulky, more breathable and extremely compressible.

That's what makes our clothing with PrimaLoft™ insulation so exceptional.

AN ARAMID FABRIC FOR EXTREME RESISTANCE

Armortex™ is the fruit of the latest innovations in textiles that are ultra-resistant to abrasion and puncturing.

Armortex™ is an aramid fibre based fabric (Kevlar®) and is used by numerous professionals in domains as varied as forestry work clothing and protective clothing for motorcyclists together with many other fields where protection is a vital element in clothing.

Armortex™ forms a real barrier for protecting you against bramble, thorns and nature's other forms of aggression.

AN EXTRA-TOUGH, LIGHTWEIGHT FABRIC

Hydura™ is a fabric made from ultra-resistant polyamide fibres.

Its weave and the fibres' special treatment give extra resistance to abrasion, whilst keeping them sufficiently flexible and lightweight for maximum comfort at the same time.

A HI-TECH SOFT-SHELL

Hells Canyon™ is our hi-tech 3-layer soft-shell material.

It is comprised of three layers adhered together: a layer in flexible mesh treated for water-repellency outside, a waterproof, windproof and breathable membrane in the middle and a fleece layer inside.

Silent, lightweight, warm and stretchable, Hells Canyon™ material is ultra-comfortable to wear.

When combined with Odorsmart™ technology, it is the ideal wear for hunting big game.

The best shooting clothing designed ***by*** hunters ***for*** hunters

FEWER ODOURS EMITTED

Odour is caused by specific bacteria that thrive on human skin.

When bacteria metabolise, their waste produces odours that can be detected by deer and other big game animals.

SO HOW DOES ODORSMART™ WORK?

Simply stated, Odorsmart™ attacks the bacteria on the skin and in the "microclimate" immediately around the skin, killing them BEFORE they have a chance to develop odours.

With just normal use and care, Odorsmart™ will last for the life of the garment and does not require recharging, changing or other special care.

A FLEXIBLE INSULATION SYSTEM

X-Change™ is a zip-fastening system for incorporating insulated clothing inside a jacket.

This enables hunters to adjust the insulation level of their jacket depending on outside conditions or to use each product separately.

LESS RECOIL

The Reactar™ G2 anti-recoil patch uses the new flexible Impact Geltm material, which absorbs recoil better than any other product on the market.

The Reactar™ G2 patch is placed inside jackets, vests or shirts fitted with a special Reactar™ G2 pocket. Only 8mm thick, it does not change your length of arming or point of aim. Flexible it adapts itself to your morphology without the slightest difficulty.

REACTAR™ G2

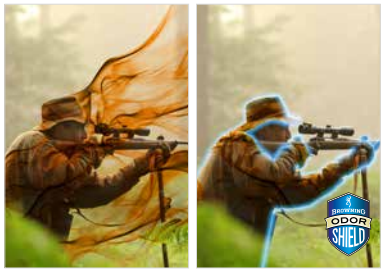
OUTDOOR
CLOTHING MAINTENANCE

Care for your hunting wear with **Browning® products**

ABSORBS ODOURS



Without Browning® Odour Shield treatment, the odours released by your clothing (washing powder, wood-fire smells or those left by your dog for example) make game aware of your presence.

Browning® 3 in 1 treatment is not only perfume-free but it also contains odour-absorbing molecules and masking agents to make you "invisible" to game's sense of smell.

The advantage of the Browning® anti-odour system is that it can be used on all your hunting clothes and will avoid you having to invest in costly clothing that is less effective over time.

Best results are obtained by combining 3 in 1 waterproofing treatment with the 3 in 1 washing product.

ABSORBS UVS

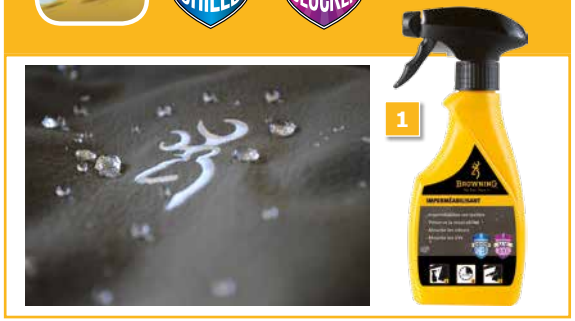
With Browning® UV Blocker treatment your clothing will be less visible for game.

Unlike human eyes, deer's eyes perceive ultraviolet rays.

The Browning® treatment reduces the UV radiation reflected by your clothing.

Best results are obtained by combining 3 in 1 waterproofing treatment with the 3 in 1 washing product.

3 in 1 water-proofing spray for hunting wear



Water-repellent treatments applied to the outside of fabric tend to lose their efficiency as time goes by washing, rain, rubbing, etc.

Therefore, they need to be retreated regularly with a waterproofing product that does not damage the inner membrane and allows the fabric to breathe correctly.

3 in 1 washing product for hunting wear

Cleans without damaging technical clothing.

The micropores on waterproof breathable membranes get blocked as time goes by dust, dirt, etc., which reduces their capacity to evacuate moisture into the open air.

Regular washing with a specialised product that respects membranes' characteristics guarantees the long life and effectiveness of your technical clothing.

Browning® treatment will also wash your normal clothes wear perfectly well.

HELL'S CANYON

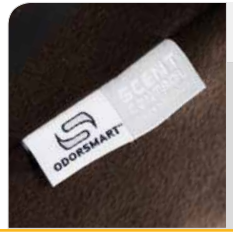
A range for **big game hunting**. **Supple** technical clothing, **odourless** and **very quiet**

COLD WEATHER

BIG GAME HUNTING

CLOTHING CHARACTERISTICS

- Wind resistant
- Breathable
- Water-repellant
- Anti-microbial



ODORSMART™ FEWER ODOURS EMITTED

Odour is caused by specific bacteria that thrive on human skin. When bacteria metabolize, their waste produces odours that can be detected by deer and other big game animals. So how does OdorSmart™ work? Simply stated, OdorSmart™ attacks the bacteria on the skin and in the "microclimate" immediately around the skin, killing them BEFORE they have a chance to develop odours. With just normal use and care, OdorSmart™ will last for the life of the garment and does not require recharging or other special care.

LEGIA SPRAY NEW FORMULA

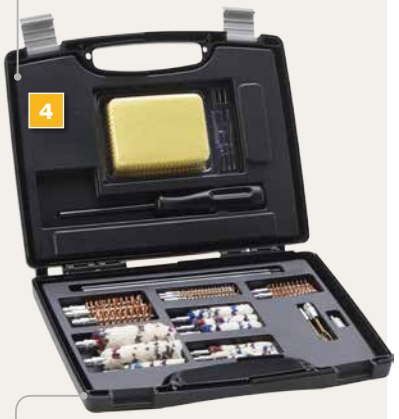
New formula Legia oil is ideal for looking after your gun and giving it total protection. The new improved formula cleans and lubricates not only metal parts, but also wooden and plastic elements down to temperatures of -40°C. Available in 200ml and 750ml spray versions (with propellant)

BROWNING® LEGIA SPRAY

Traditional Legia oil in a 200ml container with a pump (without propellant) is a high-performance oil for cleaning and lubricating the metal elements on your guns.

2014 NEW

All the tools you need to clean your firearms in one handy compact kit
27-pieces kit in a nice ABS case including :
- A set of solid metal handle
- 9 wire bore brushes
- 9 wool mops
- 2 jacks and a brush adapter
- A pack of cleaning clothes



Calibers: 12GA - 20GA - .410 - .45 - .38 - .30 - .270 - .22

A means for protecting both firearms and accessories. The soft imitation felt fabric does not damage firearms and includes a Zorb Tech™ waterproof top. Zorb Tech™ keeps spills from spreading and cleansing agents from soaking through. This mat is also washable, dryable, and treated to be stain resistant

BROWNING® PARTNER LODGES

A Unique Sporting Challenge Awaits You !

LES COLVERTS DE SABOURNAC - FRANCE

www.sabournac.com

Unique in Europe, Sabournac is a private hunting estate that has been organising mallard shoots over the last twenty years or so on the principles of the large "English style shoots". This type of hunting surprises and appeals to many hunters, who like shooting a few hundred cartridges on high-flying mallards. The birds fly over surprisingly high, which challenges top-shooters to equip themselves with full-choke guns. The estate is open from September 1st to January 31st and may be reserved by a single group of 4 to 12 guns.

CAMPEMENT DE L'ELÉPHANT - BURKINA FASO

www.nahourisafari.com

Hunting francolin and guinea-fowl at random is the speciality of the Elephant Camp together with "pass shooting" turtle-dove and sand-grouse coming in to drink at waterholes. The season goes from December through to March. Hunters will find a comfortable camp (with air-conditioning and a swimming pool). Enjoy all the unfamiliar sights and sounds of the African bush.

GREAT SPANISH HUNT - MADRID, SPAIN

www.greatspanishunts.com

Only 45 minutes from Madrid, outstanding red-legged partridge shooting in Spain is at its very best on the La Fnca and Fuensauco estates, run by Javier Corsini who is one of the most respected shoot owners in Spain with his 30 years of experience. His professionalism, his rigour and his expertise are a guarantee that you will have a magnificent stay with a booty of between 500 and 2,000 birds, depending on the size of the party. Surrounded by an estate of 3,000 hectares, a luxury hunting lodge is ready to welcome you, with its gastronomic creations and top-quality Spanish wines that will really make your stay unforgettable.

KOULOUDIA - LAKE TCHAD, CHAD

www.orchape.com

The new KOULOUDIA air-conditioned camp, 3 hours away from N'Djamena offers exceptional hunting for teal, pintail, shovelers and African duck coming from Europe for the winter. The season goes from November through to March in the Lake Chad overflow areas, which are cultivated by villagers and where duck come and feed.

VERACRUZ - ARGENTINA

www.fronterawingshooting.com

Located in the heavenly Mountains of Cordoba, El Colibrí Estancia de Charme is the right combination between the refinement of a high quality European style Lodge, a charming and hospitable homely atmosphere and the excitement of a different kind of leisure.

Magic Safari Lodges

MAGICSAFARILODGES.COM

"Magic Safari Lodges" is the premier guide to exceptional hunting destinations specially conceived for those looking for better experiences, blending deluxe facilities with unforgettable locations.

ORCHAPE

Organisation Chasse & Pêche depuis 1958

www.magic**safari**lodges.com

BROWNING Partner Lodges

www.browningPartnerLodges.com

The BROWNING® B525 shotgun is already appreciated for its numerous qualities by over a million hunters, and especially for its unmatched sturdiness in the field. **In collaboration with the «Magic Safari Lodges» label and the Orchape hunting tour agency, top-quality "small game" destinations are offered in France, Burkina Faso, Chad, Argentina and Spain. They have now become «BROWNING® Partner Lodges».** Several B525 guns will be made available to hunters on each site. This free service, which offers hunters an opportunity of hunting with this mythical gun, also enables them to avoid all the problems and unpleasant surprises liable to occur when transporting firearms by air.
