HUNTING & SHOOTING • 2015

Innovation and invention

John Moses Browning was born on 23rd January 1855, in Ogden, 35 miles north of Salt Lake City (Utah, USA), between the Great Salt Lake and the Wasatch-Cache National Forest.

Gun making ran in the family of the young John Moses, as his father was a gunsmith who had already been responsible for a number of innovations in the field. As a young boy, he spent time in his father's workshop, and knew the name of every part of a gun before he could read.

It won't take long for anyone who has looked at his creative development to be certain:
In 1878, at the age of only 23, John Moses registered his first patent, for the "John Moses Browning single-shot rifle", an invention that simplified the percussion mechanism, whilst making it sturdier at the same time, and more reliable as well.

Shortly before his death, his father handed over his business to John Moses. With his brother Matt, even with less than one thousand dollars in the bank and no experience of machine-tool operation, young Browning transformed the humble store into a small gun making workshop with seven employees.

The remoteness of their store, the low number of ready customers, and the lack of capital meant that the business struggled to survive until luck intervened to make the inventor's talents known to a connoisseur: a representative from Winchester.

In another state in the US, this representative had come across a gun made by the Browning brothers. Firmly convinced of the interest of their conception, he bought it from its owner and sent it to his superiors in the company's head office. So impressed were they that the managing director of Winchester himself set out straight away on a six-day journey to what, at that time, was still the Wild West - the real Wild West, to meet the Browning brothers.

Despite his astonishment at finding two young men in their twenties in a rustic workshop, the man was perceptive enough not to be fooled by appearances and signed commercial deals with them as soon as he could. The decision was a wise one: these agreements would last for several decades.

Browning had a future. Over the years, Browning granted licenses to several manufacturers for dozens of inventions and firearms. He invented almost everything in the field of firearms. The creativity and level of perfection of his inventions were so significant that the vast majority of his technological innovations could not be improved upon or replaced for several years.

The world of firearms is like the art world: the success of creators depends on the interest of well-informed amateurs. In 1897, it was one of the directors of the Fabrique Nationale (National Weapons Factory) at Herstal in Belgium, who noticed a 7.65 Browning pistol incorporating a new locking mechanism. He saw the appeal straight away and the NWF obtained the manufacturing license.

Thus began an uninterrupted period of collaboration between the inventor from the Great Salt Lake and the factory on the banks of the Meuse River.

Browning reached the pinnacle of its craft with the Auto-5 semi-automatic shotgun, which was a tremendous commercial success and prompted John Moses' first visit to the Herstal workshops.
But his worldwide acclaim is without doubt due to the 9 mm Hi-Power semi-automatic pistol. More than 10 million of these legendary pistols have been sold. Starting in 1907, it was adopted by most police and armed forces across the world. The fact that the generic name for this type of gun is "Browning" demonstrates the universal acclaim and recognition it has received.

In 1925, John Moses Browning put the finishing touches on the prototype of an Over and Under which would change the history of the hunting shotgun. He called it simply B25, for "Browning 1925".

He died of a heart attack while working in his office in Herstal on 26 November 1926. It was his 61st visit to Belgium.

His body was repatriated to the United States, where he was buried with full military honours. His son Val continued his collaboration with the Belgian factory without interruption. That collaboration continues to this very day.

BROWNING® CONFIGURATION

Make Your Gun Correspond To Your Size.

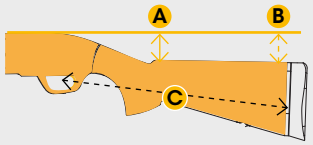
BROWNING® PROPOSES THE VERY ULTIMATE TO YOU BY OFFERING TO ADAPT YOUR GUN TO YOUR PERSONAL SIZE.

This service is for everyone whether tall, short, unique as we like to say, as Browning® has made the perfect gun for you and your passion - shooting and hunting.

The stock can be adjusted by altering 3 important criteria: Its length, its pitch or even a version for left-handers

See the 3 pictograms summarising the options available for stocks, all the way through the catalogue.

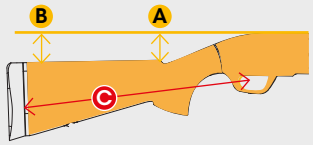
AVAILABLE FOR Lefthand



Browning® guarantees optimal service by offering you the possibility of purchasing your gun directly in a left-handed version.
In this way the stock is ready and prepared for left-handed shooters.

LEFTHAND
Available in a left-handed version

Length



STANDARD STOCK
A = 36mm

FOR THE B525
A = 35mm B = 45mm

STOCK IN OPTION 2
FOR THE B525
A = 40mm B = 60mm

PITCH
Alternative pitch available

Before they are put on the market, Browning's guns have to undergo a wide range of extremely rigorous tests. These are B.A.C.O. (Browning Arms Company) internal tests.

None of its products will be approved unless it clearly meets the following 6 requirements.

In addition, we carry out a systematic inspection process of all all Browning® machines made guns, which involves many checks to ensure that every gun sold meets Browning's exacting criteria with regard to quality, performance and reliability.

B.A.C.O. Tests

BROWNING ARMS COMPANY

1 TESTS OF FUNCTIONING AND ENDURANCE

The purpose of these highly-demanding tests, which are conducted on both shotguns and rifles, is to ensure they operate correctly whatever types of cartridges are used. Thousands of cartridges are therefore fired to ensure the guns reliability; no broken or excessively worn parts are tolerated during this test. If such faults are found, they are returned on a systematic basis to Research and Development.

2 TESTS IN EXTREME CONDITIONS

When developing a new product, the purpose of this test is to try out the guns in the worst possible weather conditions, using polar temperatures of –30°C and very high temperatures of up to +50°C. The gun has to operate perfectly at these temperatures, using a wide range of cartridges. You can therefore use our guns in the most testing conditions, in all circumstances and with complete confidence.

3 "TORTURE TESTS"

When a new product is being developed, it undergoes a wide variety of tests, which are generally more demanding than applicable C.I.P. norms, including a set of "torture tests". A set of guns are subjected to excessive pressure tests and obstruction tests to ensure the strength and reliability of our guns. In addition, we conduct safety tests, which consist of dropping the gun onto its different sides to check its reliability and safety. The legendary strength and reliability of Browning's guns is largely due to their completing all these tests successfully.

4 GUN CHECKS

When they are manufactured, every gun is subject to a very wide variety of visual inspections and measurements, and has to meet the requirements of the specifications in every respect.

5 GUN TESTS

All guns manufactured are fired to ensure their precision and that they are operating properly.

6 ACCURACY TESTS

We check the precision of every gun which emerges from our workshops. For shotguns, we check the quality of the shot patterns as well as the proper convergence of the barrels at 35 metres. For rifles, we check the precision and pattern of every gun.

Custom Shop

THE LEGENDARY B25, AN EXCEPTIONAL CUSTOM-MADE GUN

Entirely made in the Fabrique Nationale d'Herstal in Belgium, Custom Shop arms are born in the hands of exceptional craftsmen. These unique models are meticulously made to order to attain perfection at every stage in their construction. The finest assembly techniques, the beauty of detail and the love of firearms make these shotguns unique just like an exceptional work of art.

LET'S CREATE YOUR IDEAL GUN TOGETHER…

The Custom Shop team working with our trained gunsmiths and your gunshop will look at your ideas and requests providing you with a full specification, quotation and delivery schedule for your own BROWNING® B25. The list of stock arms can be found on-line on our website under the heading "Custom Shop". You will find descriptive data of the arms available, and perhaps even a source of inspiration for creating your own unique BROWNING® B25.

IMAGINE A CUSTOM-BUILT GUN JUST MADE FOR YOU …

The feeling of owning your own BROWNING® gun is similar to that of owning a work of art. We can work on this project together and leave it to our craftsmen to produce your ideal gun. Together with your gunsmith, the Custom Shop team will do their utmost to satisfy the most creative of your ideas, from the type of wood to the most unusual engravings you might choose. Our range comprises four grades, each of which has a certain number of options… and as they are entirely produced in our workshops, with a multitude of options available.

Passion and craftmanship since 1897

www.browning.eu/customshop

BASED ON THESE OPTIONS :

Calibres	12, 12M, 16, 20, 20M and 28
Barrel lengths	67 to 81cm depending on the calibre.
Rib widths	Different rib widths depending on the calibre.
Stocks	Pistol, half-pistol, Prince of Wales, English, curved made-to-measure.
Fore-end	Tulip, 3-piece tulip, round, narrower tulip, beaver-tail and 3-piece beaver-tail.

Creation of real pairs of guns
Precious metal inlays
Oval inlays in gold engraved with your initials

This list is not exhaustive. For more details, please contact your gunshop who will be able to give you precious advice.

B25 SPECIAL BAILLY

The B25 over and under gun is the result of the encounter between John Moses BROWNING®'s creative genius and Liège's skills in arms-making enhanced by four centuries of tradition. The B25 is an exceptional firearm, representing the utmost rigour in the search for perfection, and today it is the most refined and most admired over-and-under gun in the world.

THE LEGENDARY STRENGTH IS NOW COMBINED WITH REVOLUTIONARY DESIGN AND FEATURES

1 NEW INFLEX II RECOIL PAD

A totally new INFLEX II recoil pad is fitted on all B725 shotguns as standard. This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. This exclusive material makes shouldering easier. Two other pads, 20 or 25 mm thick (available as an option), make it easy to adjust the length of your stock. In this way, you can adapt your B725 to your own physique and also adapt it depending on the hunting season.

"LEGENDARY RELIABILITY" AND "INNOVATION" ARE THE B725'S WATCHWORDS.

The new Browning® B725 is an aesthetic and technical revolution in Over and Under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding Over & Under shotgun on the market.

SCAN AND DISCOVER THE B725 REVOLUTION

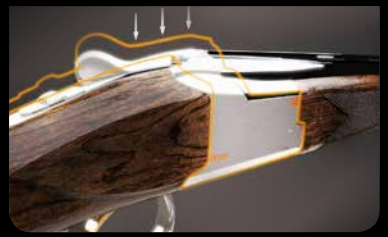
B725 HUNTER GRADE 5

2 NEW HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

These new firing system is shorter, faster and lighter giving more control over your shooting.
Browning®'s innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

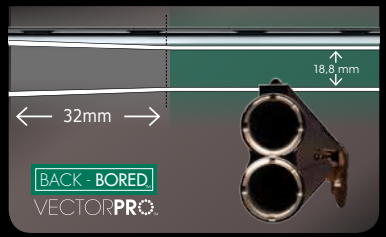
3 LOW ACTION FRAME

The low provides the following benefits when shooting by:
Enabling faster aiming and therefore more instinctive shooting. Reducing muzzle flip due to the frames inline recoil providing a more comfortable shooting position, making it highly manoeuvrable and effective when shooting.



4 BACK-BORED™ VECTOR PRO™ BARREL

The principle of the Back-bored™ Vector Pro™ barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone which provides three advantages:
- Increased speed and improved pellet penetration
- Improved pellet grouping
- Reduced recoill



5 INVECTOR DS™ CHOKES

The new Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

HERITAGE HUNTER 12M

This is the top of the range Browning® over and under shotguns. The Heritage model is the heir to the B25 side-plated model, and possesses all its elegance. The hunting scene engraving combining partridge and pheasant is very delicate. The stock is made from top quality, carefully oil-rubbed walnut. With its half-pistol stock and its tulip fore-end, the gun pays real tribute to the B25, and is the worthiest of heirs.

B5·25

THE MOST RELIABLE AND BEST PERFORMING LINE

1 ACTION FRAME

Machined from a single forged part providing exceptional rigidity and sturdiness.

HAND FITTED TO CREATE THE BEST THERE IS

During the making of a B525, the gun moves from one gunsmith to the next to be entirely hand finished, thanks to the expertise acquired over many years by each of the gunsmiths. This is the only shotgun on the market at this price level that is hand fitted during production to such a high performance level, making each shotgun truly unique. Fitting important parts (barrel, action frame, forend) is done by hand using traditional methods (using red ochre) so as to make the Browning® B525 the reference in shotguns. The attention paid to detail when manufacturing and fitting every Browning® B525 is unique, just like the "Browning® feeling" when the gun locks on closing before shooting.

SCAN AND DISCOVER THE B525 REVOLUTION

B525 HUNTER LIGHT 12M

2 WIDE FLAT BOLT

The large bolt surface gives the B525 gun a longer life.

RECOIL SURFACES

The over-sized recoil surfaces give the gun unparalleled life and strength.

3 HINGE PIN

Because of its size, the pin possesses very large contact surfaces - a guarantee of reliability and long life.

4 IMPACT WHEEL EJECTORS

Firm, powerful and regular ejection.

5 BACK-BORED™ BARREL

The 3 benefits of the Back-bored™ barrel are:

- Increase in speed and penetration
- Improvement of patterning
- Less recoil

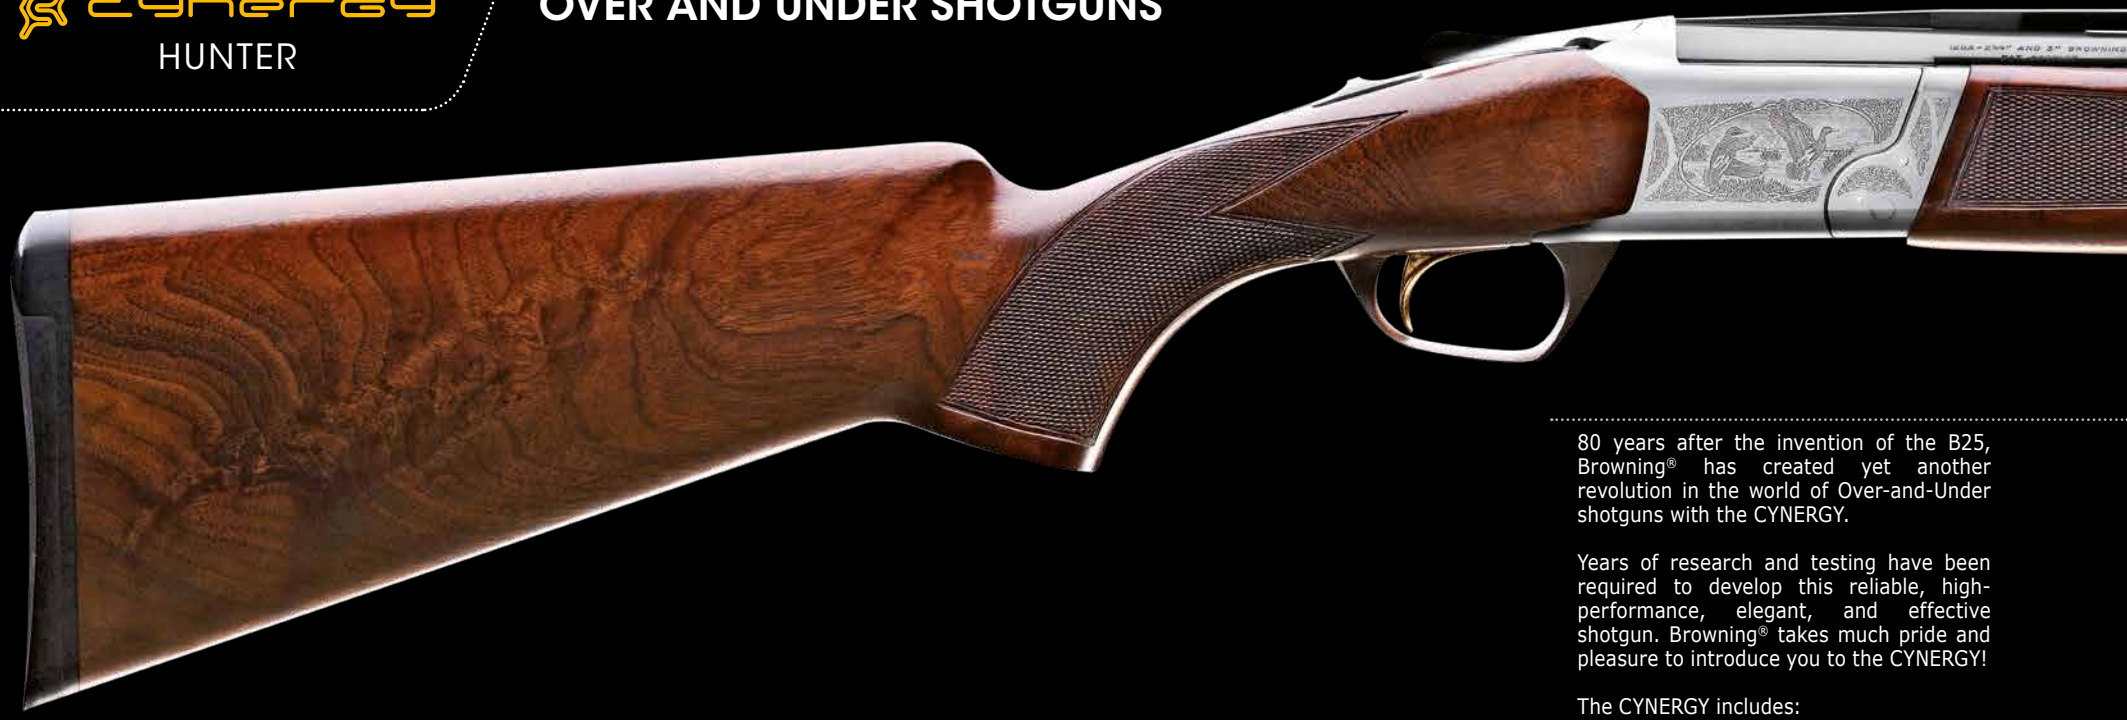
Pistol grip

Reprising the characteristics of the Classic, this B525 sets itself apart with its new engraving and its English grip, which gives it a very delicate line. A real featherweight in its category, this small calibre gun combines reliability, a perfect swing and refined aesthetics

cynergy
HUNTER

OVER AND UNDER SHOTGUNS



A buttstock made of grade 3 walnut finished in oil, a steel action frame decorated with animal scenes, two ducks taking flight on the right, two partridges on the left, together with a nickeled finish form the CYNERGY Hunter's magnificent hunting finery. But the CYNERGY's shape, design, and performance are still the same.

80 years after the invention of the B25, Browning® has created yet another revolution in the world of Over-and-Under shotguns with the CYNERGY.

Years of research and testing have been required to develop this reliable, high-performance, elegant, and effective shotgun. Browning® takes much pride and pleasure to introduce you to the CYNERGY!

The CYNERGY includes:

- The lowest action frame on the market: 60mm
- The fastest second shot: 0.0019s
- The low action frame with its integrated hinge gives this incomparable gun exceptional balance and incredible strength.

CYNERGY HUNTER GRADE 3 12M

1 THE LOWEST ACTION FRAME PROFILE : 60MM

Its exclusive integrated hinge system offers an ultra low action frame.

- A natural extension of the shooter
- Reduced recoil sensation.
- Reduces the barrel flip, allowing a faster 2nd shot.

2 FASTEST FIRING : 0.0019 SECONDS

- 0.0019 seconds as opposed to 0.0031 for the competitors.
- New exclusive inversed firing system.
- Use of rocker arms to inverse the direction of the impact going from the impact wheels to the firing pins.
- Reduction in the stroke of moving parts.
- Gives sharper, faster shooting.

3 25% LESS RECOIL

- «INFLEX» butt plate, its design and material means that more recoil is absorbed than with any other butt plate.
- The plate's exclusive structure allows 1.5 to 2 times more absorption than with a traditional plate.
- Excellent shooting comfort, ideal for women and young shooters.
- Easy to adjust and economical stock length as there are 3 butt plates and an insert.
- 6 possible configurations give an adjustment range of 32mm

THE NEW A5. THE "HUMPBACK" IS BACK WITH US ONCE AGAIN.

The lines of the new A5 will perhaps remind you of its illustrious ancestor, but its lines are the only points this new shotgun has in common with your grand-father's famous Auto 5. The brand new Browning® A5 was developed to be the most reliable and the fastest inertia-operated semi-automatic shotgun and with the lowest recoil sensation. Our confidence in the new A5 is such that we offer a guarantee of 100,000 shots or 7 years with it. This reliability guarantee relies above all on the new Kinematic Drive™ System which is the gun's tireless engine. Other innovations make the A5 a concentration of new technologies: The new Invector DS™ chokes fitted to the new Vector Pro™ Back-bored™ barrels, the INFLEX II recoil pad and, lastly, the Speed Load Plus system.

A5

100,000 ROUND GUARANTEE*

KINEMATIC DRIVE

The systems accumulates recoil energy and converts it into a mechanical movement for actuating moving parts. This concept, tried and tested for many years, has been perfected by the company that invented semi-automatic guns.

The beauty of the Kinematic Drive™ system resides in its simplicity of design, which enables it to operate in a regular, reliable way, with any type of load, and under all extreme conditions of weather, temperature, moisture or fouling.

Our confidence in the Kinematic Drive™ in terms of reliability is such that the A5™ is our first semi-automatic to be guaranteed for 100,000 shots or 7 years.

It stays clean as the gasses are ejected out of the barrel and therefore far away from the mechanism.

The intensively tried and tested Kinematic Drive™ system has shown its abilities with practically every cartridge load from 28g through to Magnum and without any adjustment.

INVECTOR DS™

Better shot patterns and optimisation of barrel weights and profiles are the main reasons that led us to create the new Invector DS™ (Double Seal) interchangeable choke system. The combination of its muzzle thread and the thinness of its walls, have enabled us to design a longer choke with an exclusive interior profile for improved shot distribution.

Invector DS™ chokes have been designed to reduce shot-pattern distortion and make sure that they have less empty zones. Our exclusive inside profile also gives higher load speeds for better performance on impact. To avoid or reduce fouling due to gas penetrating between the choke itself and the barrel, we have fitted a new patented brass seal. This seal is compressed against the inner wall of the barrel when the choke is tightened in its housing. The ring prevents the Invector DS™ from unscrewing when firing, and therefore guarantees that chokes stay clean and makes them easy to fit or remove.

UNIQUE TO BROWNING®

See the full range of Invector DS™ chokes on page 98.

SPEED LOAD PLUS

Rapid loading systems have been used on Browning® semi-automatic shotguns for decades.

Our patented loading system sends the first shell in the magazine directly into the chamber.

In addition, thanks to the rapid unloading system, unloading operations are both simple and fast, without needing to operate the bolt for sending each shell into the chamber.

** or 7 years*

HUMPBACK ACQUISITION ADVANTAGE

Made from lightweight, aeronautic quality aluminium alloy, the A5's receiver is sturdy and its characteristic shape is much more than just a nostalgic return to the past.

The receiver's familiar humpback shape fits perfectly with the rib for lengthening your line of sight and in this way helps you to aim naturally with faster targeting.

ERGO BALANCED

Its features and its look are only a part of the A5's equation for success. The new A5 is incredibly well-balanced from the recoil pad up to the barrel muzzle.

The grip is comfortable, the fore-end is compact and narrow and it places your hand closer to the barrel centre-line for better hand-eye coordination and more accuracy.

INFLEX II TECHNOLOGY

The new INFLEX II Technology recoil pad is the next generation of the most recoil absorbing pad available.

A softer new outer material provides even better recoil absorbing performance and is super slippery to prevent snagging on clothing when shouldering. This second generation has added a new absorbent material that slips perfectly on clothing.

25 mm 20 mm 12 mm

TURNKEY MAGAZINE PLUG

With the patented TurnKey system, you can use your car-key or similar key for removing the magazine adaptor plug without the slightest difficulty.

BACK - BORED™ VECTORPRO™

For ballistic results see page 44

The A5 is fitted with new barrels possessing Back-bored™ Vector Pro™ barrel profiles and Invector DS™ chokes. These two innovations optimize shot patterns and give the A5 a perfect balance, perfect ergonomics and a perfect swing under all conditions.

The principle of the Back-bored™ Vector Pro™ barrel is to increase the diameter of the barrel bore and to extend the connecting cone. This gives three extra benefits:

- An increase in speed and better shot penetration by reducing the friction between the shot and the walls of the barrel
- An improvement in shot patterns due to the shot being less deformed when it passes through the connecting cone between the chamber and the barrel bore.
- And lastly, less recoil as the shot goes through the barrel more easily.

2015 NEW

A5 ONE

The A5 ONE is a shotgun with a somber receiver embellished by a walnut stock and fore-end.

INVECTOR DS™ STEEL SHOT proved

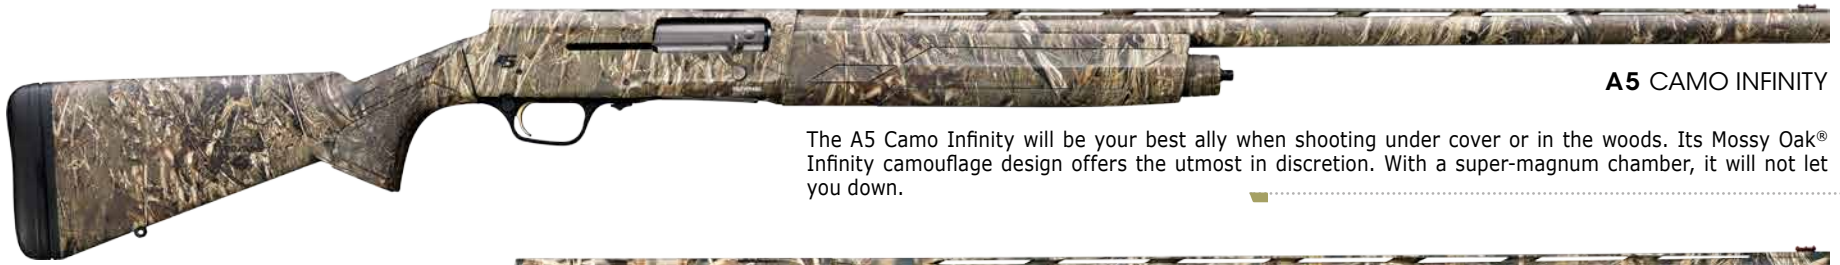
A5 ONE COMPOSITE

2015 NEW

A5 One Composite designed for the toughest conditions, the A5 One Composite is equipped with a stock in high resistance, composite material. With a super-magnum chamber, it is both discreet and futuristic. A real shooting machine, it possesses all the features of the A5 family.

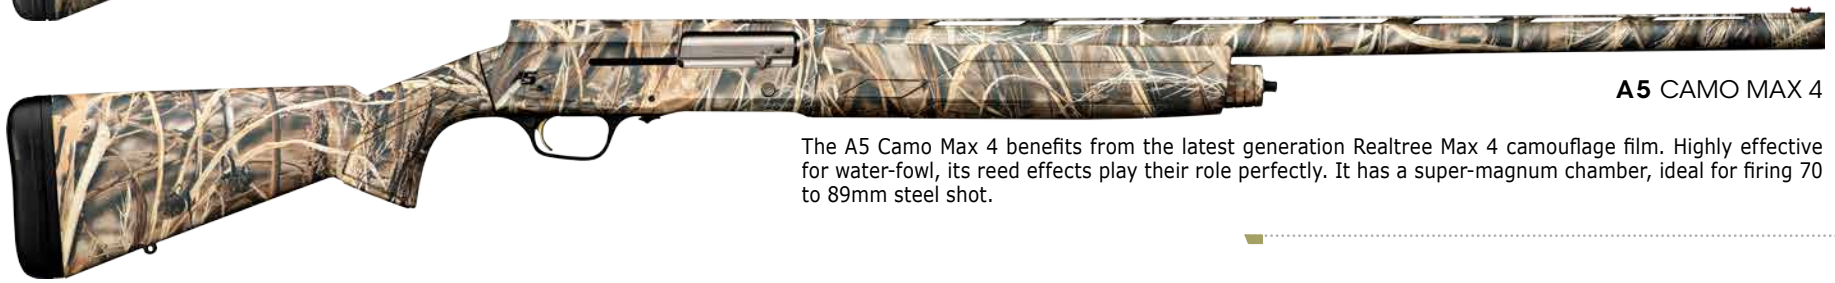
A5 ULTIMATE DUCKS

This firearm combines innovation and aesthetics. Its nickel-plated receiver is decorated with a delicate engraving showing ducks in flight. All the A5's features are present with a Back-bored™ Vector Pro™ barrel, the Invector DS™ chokes, an INFLEX II recoil pad and the new Kinematic Drive™ system. Its grade 3 walnut stock has an oil-rubbed finish.



A5 CAMO INFINITY

The A5 Camo Infinity will be your best ally when shooting under cover or in the woods. Its Mossy Oak® Infinity camouflage design offers the utmost in discretion. With a super-magnum chamber, it will not let you down.



A5 CAMO MAX 4

The A5 Camo Max 4 benefits from the latest generation Realtree Max 4 camouflage film. Highly effective for water-fowl, its reed effects play their role perfectly. It has a super-magnum chamber, ideal for firing 70 to 89mm steel shot.

MAXUS

COMFORT AND LIVELINESS: OPTIMAL PERFORMANCE

LENGTH OF PULL EXTENSION SPACER

Supplied with the gun.

1 INFLEX TECHNOLOGY

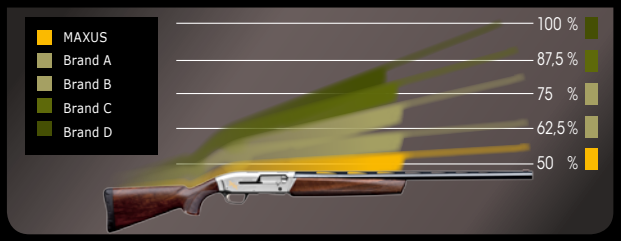
Much more than a recoil pad in a recoil-absorbing material, it has been designed with an internal structure that lowers the buttstock and pushes it away from the shooter's face after each discharge, which allows a second shot that is even more comfortable and faster.

THE SOFTEST SHOOTING SEMI-AUTOMATIC EVER:

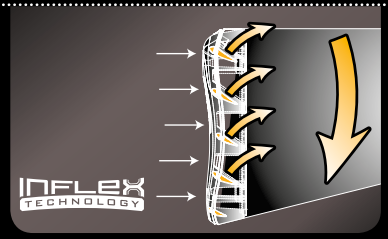
While no recoil reduction system on a shotgun can escape the laws of physics, the MAXUS is sure to change your mind about recoil control. The Power Drive Gas System, INFLEX technology, Vector Pro™ Back-bored™ technology, from Browning® are combined to reduce the total recoil force to the shooter by 18% compared to any other semi-automatic shotgun on the market.

INFLEX TECHNOLOGY

COMPARISON OF MUZZLE JUMP



SCAN AND DISCOVER THE MAXUS REVOLUTION



The Invector-Plus interchangeable choke functions jointly with the Vector Pro™ and the Back-bored™ barrel to offer dense and regular shot patterns.

INVECTOR PLUS+

MAXUS PREMIUM GRADE 3

2 BARREL ASSEMBLY

The new geometry of the extended Vector Pro™ forcing cone together with the Back-bored™ barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

3 RAPID UNLOADING

And now, unloading is just as simple with the new MAXUS. The fast unloading function quickly and easily clears the tube magazine, without any need to individually chamber shells.

CUT OFF

The MAXUS is equipped with a Cut Off for the magazine to allow the shooter to unload the chamber easily, and thus change the type of shell without having to chamber a shell from the magazine.

4 POWER DRIVEN GAS SYSTEM

The Power Drive Gas System uses larger escape valves to remove gas more quickly with heavy loads. A brand new patented design for an integrated valve keeps residue outside the mechanism for cleaner functioning. The piston has a run increased in length by 20% to make it even more reliable with light charges. The system works with loads of 24g to 64g.

INVECTOR PLUS+

STEEL SHOT proved

MAXUS CAMO MAX 5

2015 NEW

A model designed "par excellence" for water fowl hunters. The gun is coated with the MAX 5 camouflage film, the most effective camouflage for wildfowl. It has a super-magnum chamber. So, you can fire with 70 to 89 mm steel shot.

MAXUS SPORTING CARBON FIBRE

This gun has been specially designed for sports shooting. The ventilated rib, tapered from 6 to 8 mm, gives faster targeting. Its carbon finish gives a particularly unique style. Contrary to the hunting MAXUS, the MAXUS Sporting does not have a magazine cut-off.

OPTIMAL BALLISTIC PERFORMANCES:
Browning® Barrels Include 3 Advanced Technical Solutions

1. Vector Pro™

The new geometry of the extended Vector Pro™ forcing cone together with the Back-bored™ barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

2. Barrels

The principle of the Back-bored™ barrel is to increase the diameter of the barrel's bore by a standard value, from 18.4mm to 18.8mm.

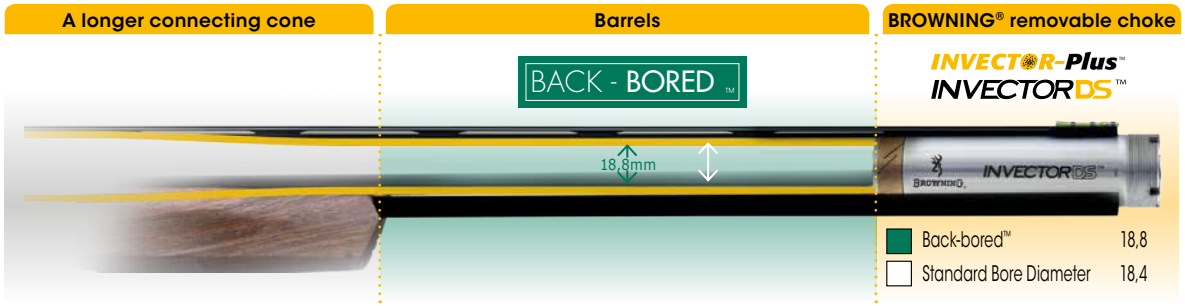
Increasing the barrel bore diameter provides three benefits:
- Increased speed and penetration
- Better shot patterns
- Less recoil

3. Chokes INVECTOR™

Adjustable Invector-Plus™ and Invector DS™ chokes have been specially developed by our Research and Development Department for our Back-bored™ barrel system. They have been designed to obtain "a perfect target" at different shooting distances.

THE PERFECT TARGET
Our objective is:
- Shot pattern efficiency of 80% on target, i.e. 80% of the shot contained in the cartridge must be in a target area inside a diameter of 75cm.
- A perfect shot pattern: the shot pattern must be such that there is a minimum number of "empty" areas, i.e. areas in the target surface where there are no shot impacts.

AT DIFFERENT SHOOTING DISTANCES
Our objective is:
- To obtain the perfect target at different shooting distances. Depending on the type of choke used, the efficient shooting distance will be different. For example, at 15 m, with an Invector-Plus™ Cylindrical choke, we obtain target shot pattern efficiency of 80% with a minimum number of surfaces without any shot impacts.



See the full range of Invector DS™ and Invector-Plus™ chokes on pages 98 and 99.

The Browning® choke recommended for different shooting distances

Depending on the Browning® choke you use, you can adapt your gun perfectly for the distances at which you shoot and the game you are hunting.

Full Choke = 35 m
3/4 Choke = 30 m
1/2 Choke = 25 m
1/4 Choke = 20 m
Cyl = 15 m

MARAL

3 TIMES MORE EFFICIENT*

* than a traditional straight pull rifle.

+ SAFETY

SECURITY GUARANTEED

A safe rifle by its very essence, with its breech confined in the receiver and its manual cocking system.

Unlike other straight-pull action rifles, the BROWNING® rotating 7-lug bolt system is a guarantee of protection and absolute safety in the event of over-pressure.

The breech is completely confined inside the gun's receiver and does not interfere with aiming when re-cocking. The shooter keeps the target in his sights without any interference. This confinement also guarantees the cleanliness of the breech system.
The MARAL's manual cocking system is designed for maximum safety in both beats and hides.

BROWNING® TRADITIONAL ROTATING BOLT

The MARAL is fitted with a BROWNING® 7-lug rotating bolt, which has proved its worth for over 40 years.

This legendary sturdiness results from using an extremely simple system that has been made with the utmost precision for many years.

+ SPEED

QUICK RELOADING SYSTEM: ULTRA-FAST REPEATING

The only movement required is the straight pull on the re-cocking lever, as the servo- bolt return system automatically pushes the bolt back forwards.

By eliminating the reloading lever push-forward phase, the shooter gains time, which enables him to concentrate more on targeting and firing rather than on reloading.

Lastly, the linear pull on the reloading lever is constant, which offers unmatched comfort in use.

+ ERGONOMICS

UNMATCHED COMFORT IN AIMING AND RELOADING

Unlike a traditional straight-pull action rifle, the MARAL offers exceptional ergonomics and comfort, thanks to its exclusive patented repeat shot movement.

The MARAL rifle has been designed for stabilized shooting, instinctive "in-line" recocking and faultless repetition. The straight-line recocking movement is not disturbed by the breech passing in front of the shooter's eye, nor by the linear pushing phase on the reloading lever.

THE TARGET IS IN YOUR SIGHTS ALL THE TIME

The MARAL's reloading movement is inside the gun's receiver, which offers three major advantages:

On the one hand, natural continuous aiming and on the other ergonomic reloading without having to stop firing.

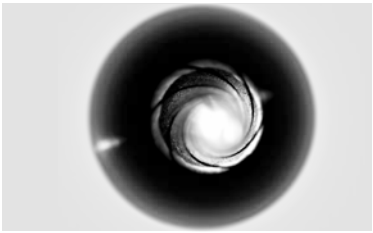
As a result the breech does not shoot out of its casing towards the shooter's face, which makes it easy to reload when in firing position.

Aiming is maintained between each shot which makes repeat shots easier and enables the shooter to concentrate on his target all the time.

THE NEW BROWNING® STRAIGHT PULL RIFLE

FN Herstal barrel

FN HERSTAL BARREL FOR EXCEPTIONAL ACCURACY



The MARAL rifle's barrel is made at the Herstal Fabrique Nationale by cold hammering.

This gives shooters exceptional accuracy.

Removable stock

REMOVABLE STOCK FOR EASY TRANSPORT

Transporting the MARAL is made easier by its removable stock. A suitable tool is provided with the carrying case.

Your customizable Maral

YOUR CUSTOMIZABLE MARAL

You can customize your gun thanks to the range of options available:

- A large choice of Big Game, Wood or Ultimate grips incorporated into the receiver
- Stocks going from Bavarian to Monte Carlo or simply traditional
- Tulip or rounded fore-ends.

2015 NEW

3 OR 4 SHOT REMOVABLE MAGAZINE OR 6, 8, 9 OR 10 SHOTS HIGH CAPACITY MAGAZINE

Essential accessories "par excellence", the MARAL offers 5 different versions of magazine: 3+1, 4+1 removable magazines and 6+1, 8+1, 9+1, and 10+1 high capacity magazines (See page 82 for details and availabilities).

Ideal for driven HUNT and STALKING

IDEAL FOR HUNTING ACTIONS IN BEATS, THE MARAL GUARANTEES:

- High firing speed thanks to its Quick Reloading System
- Comfort and ergonomics for the shooter thanks to the system that confines the breech inside the receiver and prevents it from coming out towards the shooter's face and enables him to reload without unshouldering
- Integral safety in firing with the locking system guaranteed by the servo breech return system
- Sturdiness, reliability and durability for instinctive firing.

ALSO IDEAL FOR HIDES, THE MARAL GUARANTEES:

- Safety in firing, thanks to its simple manual cocking system
- The guarantee of a second shot, as the shooter's concentration stays on keeping the target in his sights thanks to fast, ergonomic linear reloading
- Exceptional accuracy due to the 7-lug system locking the breech in the chamber and the legendary quality of FN barrels.

BAR
ZENITH

THE MOST RELIABLE RIFLE ON THE MARKET

ADJUSTABLE BUTTSTOCK
The BAR Short/LongTrac, as well as certain BAR Zenith are fitted with an interchangeable butt plate, which enables you to adjust the length of your gun depending on your physiology.

1 HAND COCKING SYSTEM SAFETY GUARANTEED

The BAR Zenith Prestige Wood now has a new manual cocking system.

The manual cocking system lets you literally cock your rifle, by moving the arming plunger forwards, which puts the hammer springs under load.

Your gun is now ready to fire.

**AN UNDISPUTED LEADER WITH 46 YEARS EXPERIENCE, BROWNING®
IS THE SPECIALIST IN SEMI-AUTOMATIC RIFLES.**

It owes this title to the quality of its mechanism, the smoothness of its gas-assisted operation which reduces recoil sensations to a minimum and its reliability, but above all to the fact that it has constantly evolved for offering you consistently better performance.

Fittings and accessories see pages 80-81

BAR ZENITH ULTIMATE FLUTED HAND COCKING

2 RELIABILITY

46 years of experience combine with the simplicity of its system, the precision of its manufacture and the quality of its controls.

3 EXCELLENT PRECISION

7-lug rotating bolt.

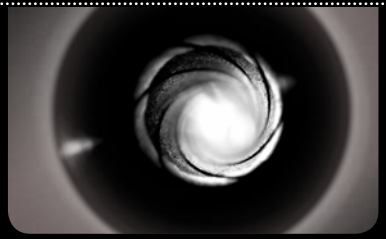
The barrel/bolt locking mechanism works directly in the barrel, due to a lock of seven lugs that engage in an extremely rigid manner. This system provides excellent shooting accuracy.

4 FN HERSTAL BARREL

The barrel of each BAR rifle is created by cold hammering at the Fabrique Nationale in Herstal, Belgium.

5 INTERCHANGEABLE BUTT-PLATE

The BAR Short/Longtrac and Zenith are fitted with interchangeable anti-recoil butt plates. Depending on the model of gun, INFLEX II and Classic butt plates of different thicknesses are available: 1.3cm, 2.0cm and 2.5cm. These butt plates enable you to adjust the length of your stock without any difficulty.



BAR ZENITH WOOD FLUTED HAND COCKING

The BAR Zenith Wood HC possesses a longer piped barrel that offers a more accurate line of sight. The new manual cocking system located on the top of the pistol grip offers an extra degree of safety.

(**) According to applicable laws

Options available see pages 50-51

HAND COCKING SYSTEM

The BAR Zenith Prestige Wood now has a new manual cocking system. The manual cocking system lets you literally cock your rifle, by moving the arming plunger forward, which puts the hammer springs under load. Your gun is now ready to fire.

When hunting and at your firing station, you can feed a cartridge into the chamber of your gun and then use the manual cocking system to put the cocking plunger in the "uncocked" position. Your rifle is now safe.

When you want to fire, you just have to push the plunger forward. Your rifle is now ready to fire and all that you still need to do is to squeeze the trigger.

You can just as easily uncock your gun by pressing on the cocking pushbutton on the top of the plunger. This removes the load from the hammer springs and makes your gun inoperational, and therefore safe.

It is a very simple easy-to-use system that gives your rifle an extra important degree of safety.

1 Cocking plunger in the "uncocked" or safety position.

2 Cocking plunger in the "cocked" position, a red dot appears. Your gun is live for firing.

3 Uncock your BAR Zenith by pressing the pushbutton downwards.

Semi-Automatic Rifles

The BAR Zenith Wood HC Affût possesses a longer piped barrel that offers a more accurate line of sight. The new manual cocking system located on the top of the pistol grip offers an extra degree of safety.

+ DESIGN

+ TRIGGER SYSTEM

+ BARRELS

1 NEW ERGONOMIC DESIGN

The new design of the receiver, stock and fore-end provide unmatched comfort when firing, together with perfect ergonomics.

By launching the new generation of BAR this year, Browning has devoted itself to breathing new life into the original design of its famous semi-automatic rifle. An attractive, updated design together with important improvements on technical levels: this is the twofold requirement that prevailed in the design and manufacture of the BAR MK3, the first symbol of the range's modernisation.
Here, innovation is not just a vain word: A new stock, a new fore-end, a new trigger system – the Super Feather Trigger – for a sharper, lighter pull, a new barrel profile and a new entirely adjustable foresight, for maximum accuracy. In short, with the BAR - a new way of looking at hunting!

SCAN AND DISCOVER THE
BAR MK3 REVOLUTION

BAR MK3 HUNTER FLUTED

2015 NEW

2 NEW TRIGGER SYSTEM FOR CRISPER, SHORTER AND INCREDIBLY DIRECT

When you want absolute precision the new trigger system is crisper, shorter and incredibly direct. The trigger system offers you a clear and direct start leading to exceptional experiences.

3 NEW BARREL PROFILE FOR EVEN BETTER ACCURACY

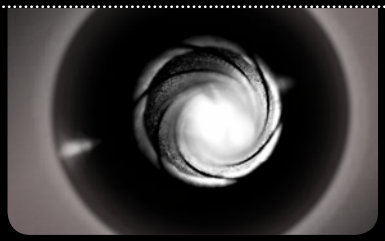
The barrel of each BAR MK3 rifle is created by cold hammering at the Fabrique Nationale in Herstal, Belgium.

4 7-LUG ROTATING BOLT

The barrel/bolt locking mechanism works directly in the barrel, due to a lock of seven lugs that engage in an extremely rigid manner. This system provides excellent shooting accuracy.

5 INTERCHANGEABLE RECOIL PAD

The BAR MK3 is fitted with inter-changeable recoil pads. Depending on the model of gun, INFLEX II and Classic recoil pads of different thicknesses are available: 12 mm, 20 mm, 25 mm. With these recoil pads you can adjust the length of your stock without the slightest difficulty.



(**) According to applicable laws

2015 NEW

BAR MK3 ECLIPSE FLUTED

This version, which possesses all the technical specificities of the new BAR MK3 range, is also exceptional due to the remarkable grace of its aesthetic qualities. Its piped, satin barrel and its delicately nickel-plated receiver – adorned by a new engraving representing roe deer and wild boar – undoubtedly pay honour to the rustic charms of hunting.

BAR MK3 HUNTER FLUTED

2015 NEW

An anodized black receiver, brushed side-faces, top and bottom and the stock and fore-end in grade 2 oil-rubbed walnut: The BAR MK3 Hunter is the end-result of particularly neat and inventive work. Fitted with an adjustable foresight, its 53 cm piped barrel possesses a new profile that emphasizes even more the accuracy of a gun that also offers excellent firing sensations thanks to its Super Feather Trigger system. Available in four calibres (308, 30-06, 300WM and 9.3X62), the BAR MK3 Hunter is equipped with different accessories so that it can be adapted just as closely as possible to the shooter's morphology. A rifle that contains a whole host of surprises ...

BAR SHORT/LONGTRAC
COMPOSITE TRACKER HAND COCKING

This model was especially developed to withstand even the harshest of circumstances while on a drive hunt. Stock and grip are fitted with orange inserts to guarantee your visibility in the field. The aiming mechanism is equipped with state of the art fibre optics.

BAR SHORT/LONGTRAC
COMPOSITE

With its receiver and forearm made of composite materials, this gives the gun extreme ruggedness under all conditions. The BAR Composite also has a piped barrel that improves balance and therefore offers greater efficiency in the field.

BAR LONGTRAC HUNTER NERO THUMBHOLE FLUTED

2015 NEW

This new version of the legendary BAR rifle stands out on account of the shape of its pistol-grip, designed to guarantee impeccable ease-of-handling and balance – conditions essential for making your shot successful. The BAR Hunter Nero Thumbhole does not have any sights, but the shape of its barrel has been specially studied for fitting a scope or a red aimpoint. Its 20mm INFLEX II recoil pad considerably reduces recoil effects and its piped barrel give it a style that is enhanced even more by the black finish of its receiver adorned with a gold Buck Mark.

BAR LONGTRAC
ECLIPSE GOLD LEFT HAND FLUTED

This is a carbon copy of the BAR Eclipse Gold, retaining all of its features, but adapted to left handed shooters. Thus, the ejection window and safety are reversed to create the only semi-automatic rifle in a complete left-handed version.

X-BOLT SF HUNTER WITH SIGHTING SYSTEM

This version is characterised by the battue rib type sighting system and optic fibre front sight allowing for rapid firing without a scope at short distances. This is ideal for driven hunts and is very versatile in use. In addition, a hide type rear sight is delivered with your gun. The very modern designed and perfectly ergonomic forearm of the X-BOLT is made of walnut. Available in a left-handed version calibres 308 Win, 30-06, 270 WSM, 300 WM.

SUPERFEATHER TRIGGER

The new X-BOLT SF are now equipped with a Super Feather Trigger with its perfect action:
clean, short, crisp and direct.

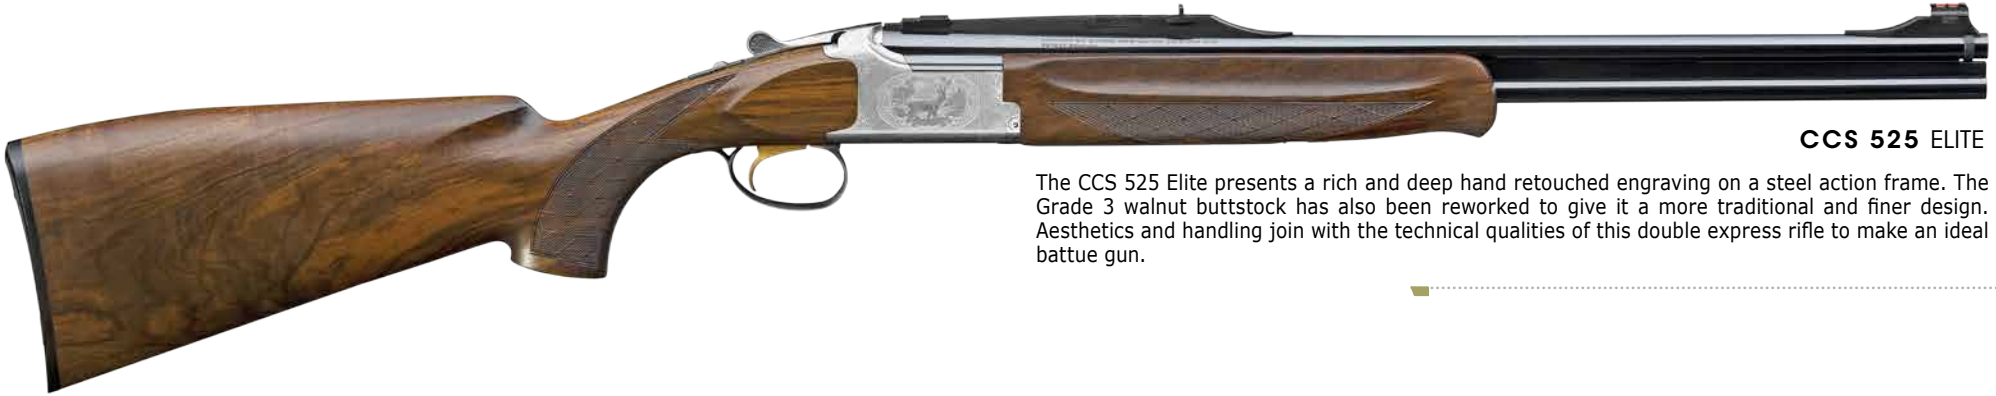
X-BOLT SF HUNTER LEFT HAND
WITH SIGHTING SYSTEM

BLR LIGHTWEIGHT BATTUE

The BLR is the only lever-action rifle developed in magnum calibre. Its mechanics are impeccable and characterised by the exceptional smoothness of its operation. It has a removable magazine and a high quality barrel and is ready for fitting a scope. Its battue rib along with a short barrel makes an excellent weapon for driven hunts and tracking. Model also available in stalking version.



CCS 525 ELITE

The CCS 525 Elite presents a rich and deep hand retouched engraving on a steel action frame. The Grade 3 walnut buttstock has also been reworked to give it a more traditional and finer design. Aesthetics and handling join with the technical qualities of this double express rifle to make an ideal battue gun.

X-BOLT SF

X-BOLT SF VARMINT GRS

(Scope not supplied)

With its heavy M18x1 piped and rifled barrel, the X-BOLT SF Varmint GRS will be particularly appreciated by enthusiasts of varmint hunting and precision shooting. The X-BOLT SF Varmint GRS is the version with a modern provocative look! A perfect combination of accuracy, design and ergonomics, the X-BOLT SF Varmint GRS will give you an aggressive style with its meticulously designed stock in grey-black laminated wood and even greater comfort when firing, with a stock that is adjustable in both length and pitch. The package includes steel mounting bases for your scope. Available in 3 calibres (243, 308 and 6.5x55).

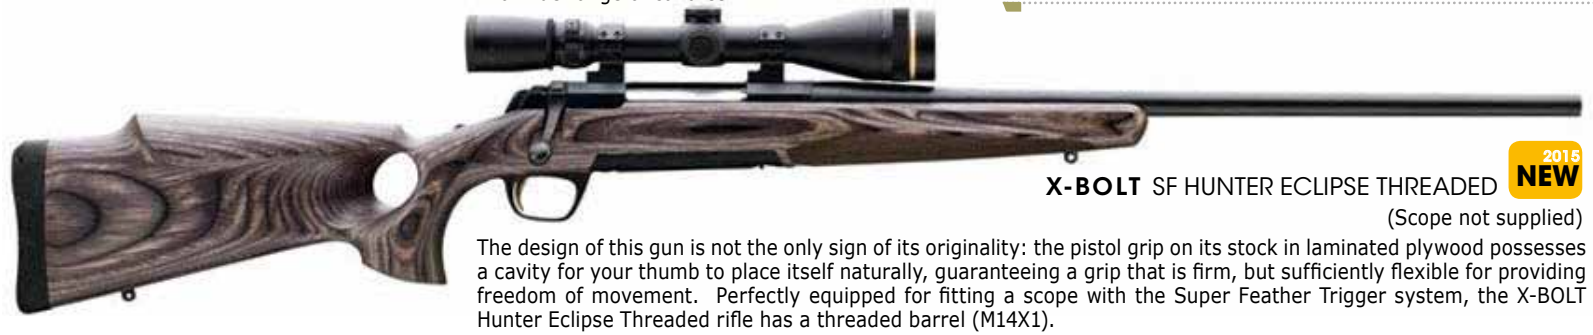
X-BOLT SF VARMINT THREADED

2015 NEW

With its serious, elegant appearance, the new X-BOLT Varmint SF Threaded rifle has arrived just at the right moment for completing the range of bolt-action rifles specially designed for shooting vermin and pests. It is equipped with a heavy threaded barrel (M18X1), a guarantee of exceptional accuracy, associated with the Super Feather Trigger system: a perfect trigger action for a sharp, firm and direct pull. Supplied with its steel mounting bases, it is available in a wide range of calibres.

SUPER FEATHER TRIGGER

The new X-BOLT SF are now equipped with a Super Feather Trigger with its perfect action: clean, short, crisp and direct.



X-BOLT SF HUNTER ECLIPSE THREADED

2015 NEW

(Scope not supplied)

The design of this gun is not the only sign of its originality: the pistol grip on its stock in laminated plywood possesses a cavity for your thumb to place itself naturally, guaranteeing a grip that is firm, but sufficiently flexible for providing freedom of movement. Perfectly equipped for fitting a scope with the Super Feather Trigger system, the X-BOLT Hunter Eclipse Threaded rifle has a threaded barrel (M14X1).

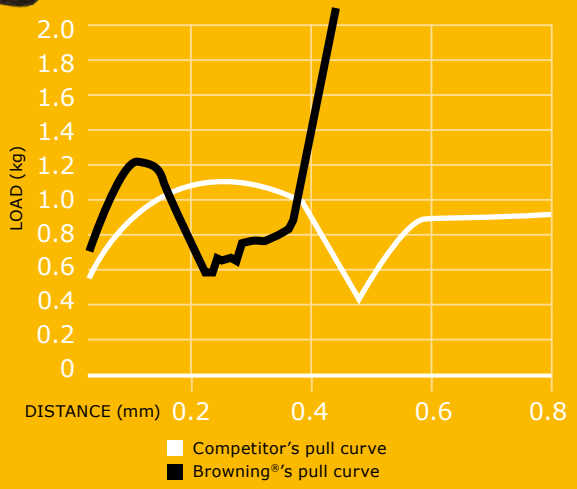
NEW X-BOLT SF : MISSING IS NO LONGER AN OPTION!

The Browning® X-BOLT SF appears like a revolution in the bolt action rifle universe. The X-BOLT SF was built on the foundations of the success of previous Browning® rifles, carrying numerous innovations that will without doubt make it one of the best rifles on the market.

SCAN AND DISCOVER
THE X-BOLT SF HUNTER REVOLUTION

Typical curve trigger shoe movement – load on trigger shoe



1 NEW PERFECT TRIGGER ACTION, SUPER DIRECT

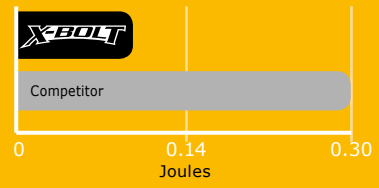
When you want absolute precision the Super Feather Trigger is your only alternative, crisper, shorter and incredibly direct. The Super Feather Trigger offers you a clear and direct start leading to exceptional experiences.

SUPER FEATHER TRIGGER

3 X MORE EFFICIENT THAN COMPETITION IN TRIGGER SENSITIVENESS

- **Zero take-up**
- **Minimum overtravel**
- **Minimum creep**

Energy required for firing



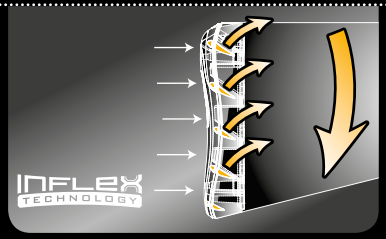
Fittings and accessories see pages 80-81

X-BOLT SF HUNTER

2 INFLEX ANTI-RECOIL BUTT PLATE

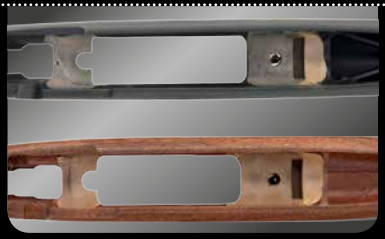
This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun.

INFLEX TECHNOLOGY



3 UTMOST ACCURACY

A free-floating barrel is essential for utmost accuracy. The X-BOLT SF's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel/breech block assembly at two points with respect to the forearm, at the front and at the rear.



4 X-LOCK MOUNTING SYSTEM

The X-Lock scope-mounting system has 4 screws per fixing point. Therefore it is more stable and provides higher accuracy.

5 BOLT-UNLOCKING BUTTON

The bolt-unlocking button works in conjunction with the safety to provide an added degree of safety.

ROTATING MAGAZINE

Made in light ultra-resistant polymer, it gives exclusive protection to bullet noses.

X-BOLT SF HUNTER MONTE CARLO

This X-BOLT SF has the particularity of possessing a Monte Carlo stock, perfectly adapted for use with a scope.

ALL THE X-BOLT SF HUNTER WITH SIGHTING SYSTEMS ARE PROVIDED WITH A "BATTUE" TYPE RIB AND REAR-SIGHT EXCEPT FOR THE X-BOLT SF HUNTER MONTE CARLO MODELS.

X-BOLT SF COMPOSITE

Designed for the most difficult conditions of use, the X-BOLT SF Composite has a buttstock made of high-resistance composite materials and coated with Dura-Touch® for improved handling. The barrel, the breech block, and the other metal parts are anti-reflective matt blued.

X-BOLT SF STAINLESS

Offering great resistance and ideal in all weather conditions, the X-BOLT SF Stainless Stalker has a stainless steel barrel and breech block as well as a composite buttstock with Dura-Touch® coating. This weapon is the partner of choice for your extreme hunts. Available with a fluted and threaded barrel (M14x1) in 223 Rem, 243 Win, 270 Win, 30-06, 308 Win calibres.

X-BOLT SF STAINLESS
FLUTED THREADED

This model is equipped with a piped and rifled barrel (M14x1) in 223 Rem, 243 Win, 270 Win, 30-06 and 308 Win calibres.

SUPERFEATHER TRIGGER

The new X-BOLT SF are now equipped with a Super Feather Trigger with its perfect action: clean, short, crisp and direct.

See page 80

Also available with muzzle brake option for the composite version only, in cal 308 / 7mm Rem / 300 Win Mag.

BOLT ACTION RIFLES

1 UNLOCKING BUTTON FOR THE BOLT

The unlocking button for the bolt ensures optimum security and is ideally placed on the back of the pistol grip. Can be opened in the safety 'on' position.

THE NEW A-BOLT 3 CARBINE, A LEGEND IN THE MAKING, IS BORN.

Experience acquired over time and tested in the field, an A-BOLT's exceptional precision and reliability are seldom matched. This new carbine allies a modern production system with the trusted Browning® quality in order to produce a high-performance carbine at a very interesting price. The A-BOLT 3 gives you the precision and performance you want in a hunting rifle and its cost-effective budget is a real delight.

SCAN AND DISCOVER THE A-BOLT 3 REVOLUTION

A-BOLT 3 COMPOSITE

2 NEW PERFECT TRIGGER

For firing with absolute accuracy, there is no other alternative to the A-BOLT 3 trigger action, sharper, short and ultra-direct. The trigger gives you a clean, fast pull with exceptional sensations.

3 BOLT AND HOUSING

The A-BOLT 3 features a three pin bolt that offers extreme precision. The 60° opening of the bolt allows for a rapid and efficient cycle.

4 DROP BOX MAGAZINE

The essential accessory, the A-BOLT 3 is fitted with a state of the art drop box magazine. Made from synthetic material, it withstands any and all circumstances.

5 INFLEX ANTI-RECOIL BUTT PLATE

This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun.

A-BOLT 3 COMPOSITE

With its high quality barrel, rapid and sure locking/unlocking system, drop-down magazine and INFLEX Technology recoil pad, the A-BOLT 3 Composite no longer needs to be presented. Designed for hunting from a hide, the rifle, which combines extreme accuracy and rock-solid toughness, really gives you excellent value for your money. BAR
ACIER

Semi-automatic Rifles

BAR ACIER AFFUT BOSS™

The addition of the BOSS™ system produces two particularly interesting effects: recoil reduction (in the range of 30% to 50%) and increased accuracy. The performance of the BAR is thus improved when shooting using a scope or at long distances.

BAR ACIER AFFUT

This version is fitted with a vertically and horizontally adjustable rear sight.
The fine metal front sight ensures perfect accuracy of aim.

EXCLUSIVE BROWNING® BOSS™ (Ballistic Optimizing Shooting System): improvement of accuracy.

The BOSS™ system has two main advantages:

- ***Improvement of accuracy***: the BOSS™ system allows the bullet to leave the barrel at the ideal moment, i.e. at the "peak" or "valley" of the vibration wave when the muzzle is virtually motionless.
- ***Recoil reduction***: air vents located all around the circumference of the BOSS™ system serve as a muzzle brake by diverting the combustion gas. The result is a recoil reduction of around 30-50% depending on the calibre and, therefore, excellent shooting comfort.

Fittings and accessories see pages 80-81

Browning: Shotguns that make champions

Take part in the loyalty programme and win Browning products worth up to 8000 euros per competition and over 35000 euros during the whole season!

> www.browning.eu

This plan is open to all! Its objective is to encourage and recompense European shooters who use Browning, Winchester or Miroku guns at offi cial competitions. It enables all shooters who win with Browning, Winchester or Miroku guns, and who have put their names down on the Browning internet site, to be awarded credits of as much as 8,000 euros per competition depending on their places at offi cial national and international competitions. Credits can be kept concurrently throughout the year and they give the right to receive products free-ofcharge from the Browning-Winchester-Miroku brands (arms & outdoor only).

See the full rules, explanations, the list of competitions and the value of credits on the internet site under the loyalty plan general conditions: **www.browning.eu**

B725 ProTrap HIGH RIB

Performance / Excellence / Adaptibility

1 LOW PROFILE ACTION FRAME

- Improved recoil control and less muzzle jump are two of the big benefits of a low profile receiver. There is also the "one with the gun" feeling that makes the B725 Pro Trap feel like an extension of the body.
- Places the front hand closer to the bore line for superior hand-eye coordination and pointability

2 INVECTOR DS™ CHOKE TUBE SYSTEM

- Pro Trap models include eight extended Invector DS™ tubes.
- Invector DS™ choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradually tapered choke tube that produces extremely consistent, dense shot patterns.
- From Cylinder to Extra Full, Invector DS™ shot patterns tighten consistently in reliable, evenly scaled steps.

The new B725 Pro Trap High Rib is equipped with Pro Fit Balancer technology, it contributes to giving the finishing touches to the harmony between shooter and gun by proposing a raised battue rib that can be adjusted just as you like: this is the Pro Rib system designed for adjusting the barrels' point of impact. In addition, with its graduated shim-adjustable comb, its Monte Carlo stock most certainly makes it a really ergonomic firearm.

PRO TECHNOLOGY

3 TRIPLE TRIGGER SYSTEM

- The Triple Trigger System fine tunes finger-to-trigger reach on target models.
- Includes three trigger shoes: Wide checkered, narrow smooth and wide smooth canted.

4 PRO FIT ADJUSTABLE COMB

- The new Browning® Pro Fit Adjustable Comb makes it easy to find the perf ect comb position.

- Pro Fit offers single bolt adjustment for both cast and drop. The revised design allows the stock to be professionally fit for shorter length of pull.
- Easy to read markings allow the shotgun to be dialed-in and easily replicated should the comb be removed.

5 PRO BALANCE SYSTEM

STOCK BALANCE

- The Pro Balance System allows shooters to fine-tune the balance point for a perfect mount and swing.
- Adding weights to the stock helps balance the shotgun, aids follow-up shots and the additional mass reduces felt recoil.

BARREL WEIGHT

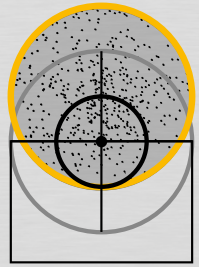
The barrel's counterweight is comprised of tungsten plates which enable the gun's centre of gravity to be moved up to 20 mm forwards.

6 INTERCHANGEABLE RECOIL PAD

The B725 PRO TRAP HIGH RIB model is supplied with interchangeable 15 & 25mm recoil pads. They will enable you to adjust the length of your stock without the slightest difficulty.

7 ADJUSTABLE RAISED TOP-RIB

With the adjustable raised top rib, you can raise the shot pattern's point of impact without any difficulty.



70% of the shot is above the line of sight.

30% of the shot is below the line of sight.

B725 ProTrap

Be at one with your gun

This model is a version of the B725 Pro Trap High Rib. It combines unmatched firing comfort with high performance. Its secret? The Pro Balance System, a brand-new adjustment system for fine-tuning the gun's balance by modifying the weight of the stock and the barrels as required. Fitted with 8 Invector DS Extended chokes, Hi-Viz sights and 2 extra triggers, it can be adapted to the requirements of the most demanding sports shooters.

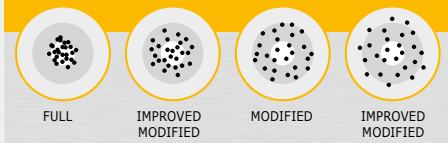
PRO TECHNOLOGY

2 INVECTOR DS™ CHOKE TUBE SYSTEM



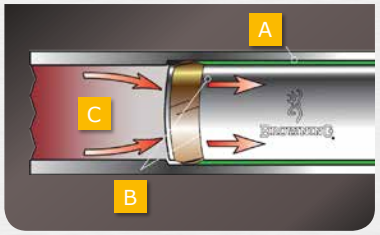
INVECTOR DS™

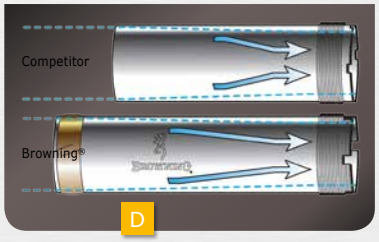
INVECTOR DS™ tubes even pattern percentage increments, offering just the right pattern for any shooting situation.

COMPETITOR

A competitor's choke tubes show little pattern difference between chokes constrictions.

- **A** Area between tube and barrel stays clean.
- **B** Special brass seal has multiple cuts that allow it to compress tightly against the barrel wall and completely seal against gas leakage.
- **C** Gas exits completely through tube
- **D** Longer over all length, as much as 1 1/8 over a leading competitor, allows a more gradual choke taper for denser shot patterns, better pattern percentages and faster shot velocities.





3 TRIPLE TRIGGER SYSTEM

- The Triple Trigger System fine tunes finger-to-trigger reach on target models.
- Includes three trigger shoes: Wide checkered, narrow smooth and wide smooth canted.

4 PRO BALANCE SYSTEM

STOCK BALANCE

- The Pro Balance System allows shooters to fine-tune the balance point for a perfect mount and swing.
- Adding weights to the stock helps balance the shotgun, aids follow-up shots and the additional mass reduces felt recoil.

BARREL WEIGHT

The barrel's counterweight is comprised of tungsten plates which enable the gun's centre of gravity to be moved up to 20 mm forwards.

5 INTERCHANGEABLE RECOIL PAD

The B725 PRO TRAP model is supplied with interchangeable 15 & 25mm recoil pads. They will enable you to adjust the length of your stock without the slightest difficulty.

B725 SPORTER

The Legendary Strength Is Now Combined With Revolutionary Design And Features

B725 SPORTER BLACK EDITION

This version of the B725 has an entirely black receiver with a special Browning® engravings on it.

The new Browning® B725 is an aesthetic and technical revolution in Over and Under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding Over & Under shotgun on the market.

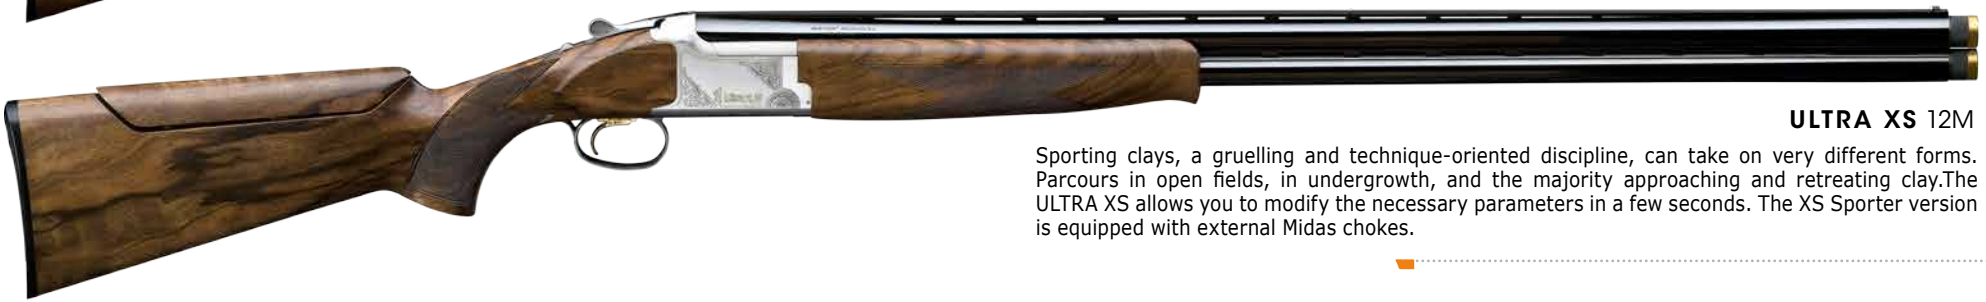
Sporting Clay Over And Under Guns

ULTRA XS PRESTIGE 12M

The ULTRA XS Prestige is one of the best guns for shooting sporting clays. Equipped with a Back-bored™ barrel assembly, the top rib is mounted on a rounded base in order to allow for the free expansion of the barrels when their temperature is increased.

ULTRA XS 20M

Fine and distinguished, this 20M calibre ULTRA XS is extraordinarily effective.Its quick and precise swing, combined with Back-bored™ barrels equipped with Midas chokes, offers exceptional performance.



ULTRA XS 12M

Sporting clays, a gruelling and technique-oriented discipline, can take on very different forms. Parcours in open fields, in undergrowth, and the majority approaching and retreating clay.The ULTRA XS allows you to modify the necessary parameters in a few seconds. The XS Sporter version is equipped with external Midas chokes.

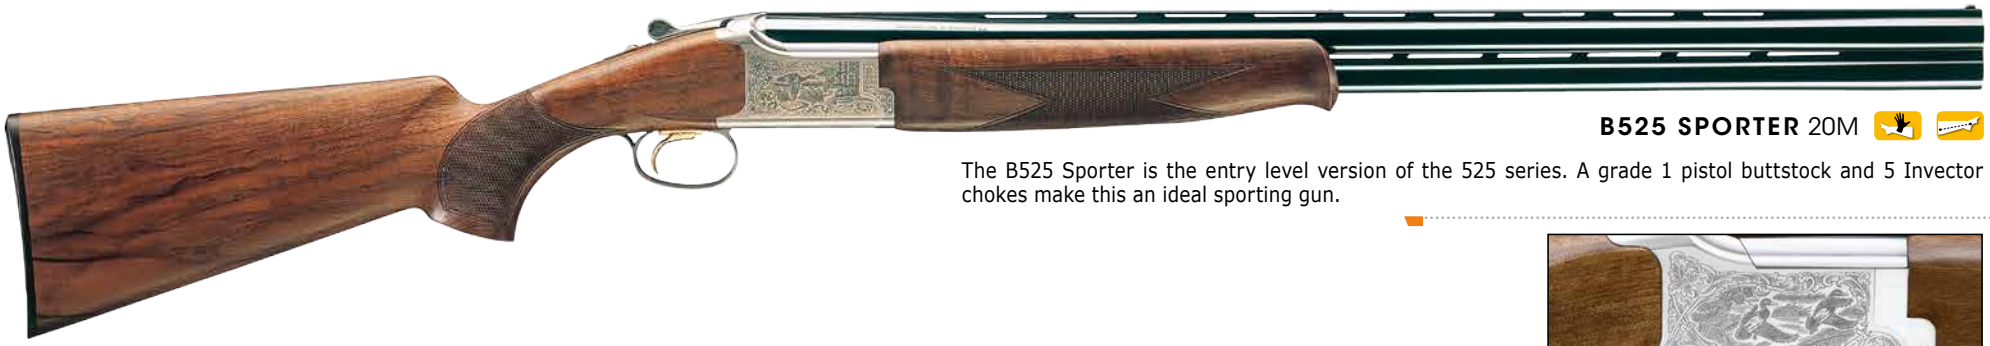
B525 SPORTER

Sporting Clay Over And Under Guns

B525 SPORTER ONE 12M

2015 NEW

Keeping all the specific features of the B525 Sporter 1, commercialised in 2014, this new model has perfected its design even more – at the same price! Besides its Back-Bored Vector Pro barrels, its 10mm battue rib and the oil-rubbed finish of its grade 2 walnut elements, it now possesses 4 Invector + chokes and the Auto Safety system. Just as efficient for sporting clays as for hunting, the B525 Sporter 1 does not lose in aesthetics everything it has gained in reliability: the magnificent autumn scene engraving that adorns its metal surfaces just goes to prove it.



B525 SPORTER 20M

The B525 Sporter is the entry level version of the 525 series. A grade 1 pistol buttstock and 5 Invector chokes make this an ideal sporting gun.

TECHNICAL SPECIFICATIONS

cynergy
SPORTER

SPORTING CLAY OVER AND UNDER GUNS

Its futuristic style will turn heads on the shooting range. The buttstock and forearm are made of composite material with rubber inserts, increasing this gun's weight and making it more resistant.

A supplementary adjustable comb that is included with the gun allows the buttstock drop and cast to be modified as you desire.

80 years after the invention of the B25, Browning® has created yet another revolution in the world of Over-and-Under shotguns with the CYNERGY.

Years of research and testing have been required to develop this reliable, high-performance, elegant, and effective shotgun. Browning® takes much pride and pleasure to introduce you to the CYNERGY!

The CYNERGY includes:

- The lowest action frame on the market: 60mm
- The fastest second shot: 0.0019s
- The low action frame with its integrated hinge gives this incomparable gun exceptional balance and incredible strength.

CYNERGY COMPOSITE BLACK ICE 12M

1 THE LOWEST ACTION FRAME PROFILE : 60MM

Its exclusive integrated hinge system offers an ultra low action frame.

- A natural extension of the shooter
- Reduced recoil sensation.
- Reduces the barrel flip, allowing a faster 2nd shot.

2 FASTEST FIRING : 0.0019 SECONDS

- 0.0019 seconds as opposed to 0.0031 for the competitors.
- New exclusive inversed firing system.
- Use of rocker arms to inverse the direction of the impact going from the impact wheels to the firing pins.
- Reduction in the stroke of moving parts.
- Gives sharper, faster shooting.

3 25% LESS RECOIL

- «INFLEX» butt plate, its design and material means that more recoil is absorbed than with any other butt plate.
- The plate's exclusive structure allows 1.5 to 2 times more absorption than with a traditional plate.
- Excellent shooting comfort, ideal for women and young shooters.
- Easy to adjust and economical stock length as there are 3 butt plates and an insert.
- 6 possible configurations give an adjustment range of 32mm

HIVIZ© COMP	12850	Litepipes : 3 green, 3 red, 2 white (round with different diameters)

INVECTOR DS™

The new Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

The optimal 80mm length enables an exclusive internal shape to be developed, which optimises performances over all shooting distances and ensures a uniform concentration of the shot pattern when using lead or steel shot.

The new patented Invector DS™ (Double Seal) Chokes offer a double seal. They are fitted with a compression ring that limits penetration of combustion gas between the choke and barrel. The thread on the muzzle side forms an obstacle to prevent exhaust gasses from entering. The ring stops the Invector DS™ from unscrewing when firing. This guarantees that the choke stays clean and is easy to remove under any conditions.

After extensive shooting of 500 rounds of the dirtiest loads, competitor's choke tube that don't have a gas seal show significant grit and residue buildup on the tube. The innovative gas seal on Browning® Invector DS™ tubes keeps the choke tube cleaner, for easier removal and installation.

Extensive shooting of 500 rounds

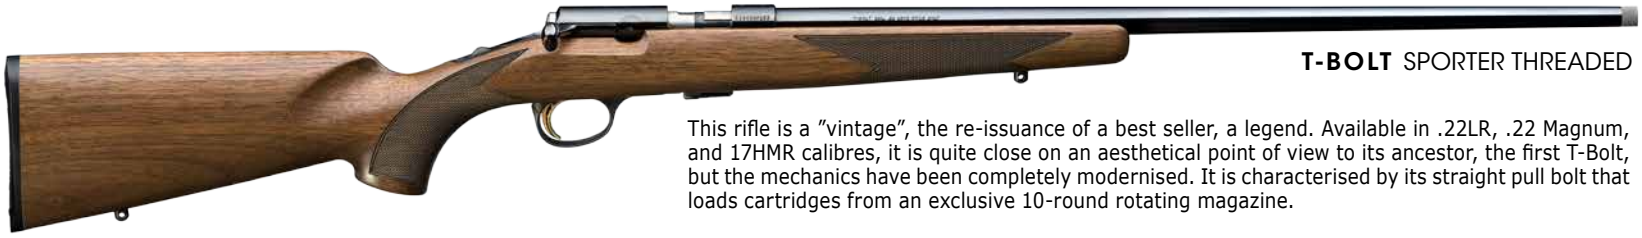
INVECTOR DS™ **COMPETITOR'S CHOKE**

T-BOLT
SPORTER

Rifles .22LR - 17HMR

T-BOLT SPORTER COMPOSITE THREADED

This version is equipped with a buttstock made of highly-resistant ergonomic composite, allowing intense use in all conditions. Another very useful characteristic is an additional magazine integrated in the buttstock and, more particularly, in the pad.



T-BOLT SPORTER THREADED

This rifle is a "vintage", the re-issuance of a best seller, a legend. Available in .22LR, .22 Magnum, and 17HMR calibres, it is quite close on an aesthetical point of view to its ancestor, the first T-Bolt, but the mechanics have been completely modernised. It is characterised by its straight pull bolt that loads cartridges from an exclusive 10-round rotating magazine.

T-BOLT TARGET VARMINT THREADED **2015 NEW**

The new T-Bolt Target Varmint Threaded rifle, specially designed for hunting vermin and pests from a hide, has added a wooden Monte Carlo Varmint stock to the heavy threaded barrel that guarantees its accuracy. Provided with mounting bases for scopes, this model, with its pleasantly traditional look, renews all the pleasure of shooting with a small calibre rifle.

.22LR 17HMR

ADDITIONAL MAGAZINE INTEGRATED IN THE BUTTSTOCK FOR THE COMPOSITE VERSION
An additional magazine integrated in the buttstock and, more particularly, in the pad.

During intense shooting, it is therefore very easy to quickly replace the first empty magazine.

T-BOLT SPORTER THREADED	.22LR .22LR-17HMR	56cm threaded 42cm threaded	-	-	pistol	343mm	16mm	16mm	drop-down magazine	10	5	2,3kg	blued	satin-finished	mounting supplied	card board box

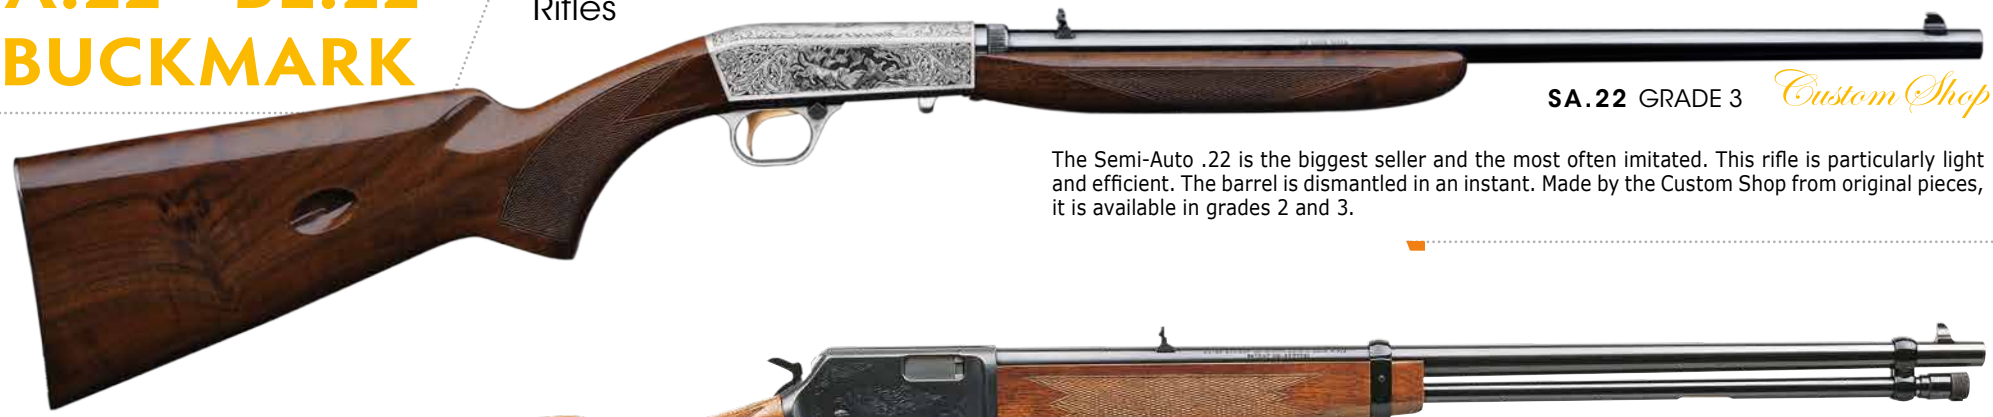
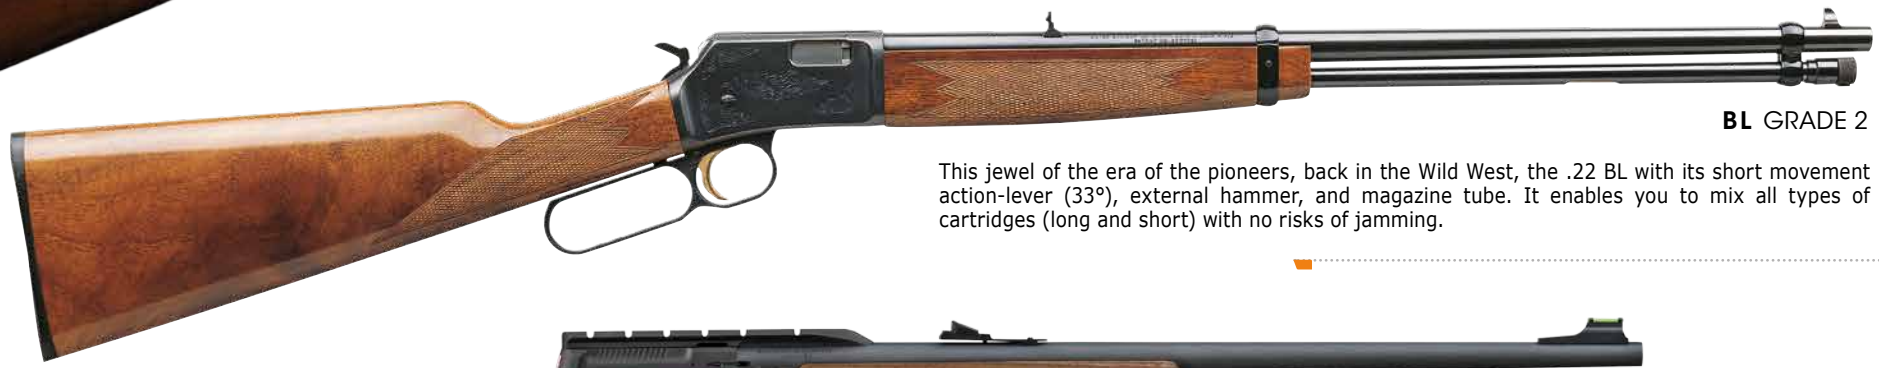
SA.22 – BL.22 -BUCKMARK

Rifles



SA.22 GRADE 3 *Custom Shop*

The Semi-Auto .22 is the biggest seller and the most often imitated. This rifle is particularly light and efficient. The barrel is dismantled in an instant. Made by the Custom Shop from original pieces, it is available in grades 2 and 3.



BL GRADE 2

This jewel of the era of the pioneers, back in the Wild West, the .22 BL with its short movement action-lever (33°), external hammer, and magazine tube. It enables you to mix all types of cartridges (long and short) with no risks of jamming.

BUCK MARK SPORTER RIFLE

Non-standard by its design, compact, and tremendously accurate and reliable, this rifle offers a range of truly extensive usage possibilities. It has adjustable sighting equipment with an adjustable rear sight as well as a fibre optic front sight as well as an integrated rail for optical mounting.

1911-380 BLACK LABEL

2015 NEW

Developed on the basis of the mythical arm created by the genial inventor John-Moses Browning® at the beginning of the 20th century, the Model 1911 (version reduced to 85% of the size of the original model in 45 ACP) range of pistols has now been enriched by the arrival of two newcomers soberly christened Black Label. Available in calibre 380, the first model has a pure, effective design: slide receiver and side panels are mat black, the 11cm barrel is in stainless steel, the magazine holds seven cartridges.
Ergonomically, the 1911 Black Label Cal 22 LR is a well-balanced, supple, intuitive-in-use pistol. All in black with a 10-shot magazine, the second model has been specially developed for perfect handling, the necessary prerequisite for firing accurately and safely. With its side slots, its laminated plywood side plates, its ambidextrous thumb-operated safety catch, its fixed sights and its rail beneath the barrel for fitting different accessories – the 1911 Black Label Laminated 22LR remains faithful to all the qualities of its renowned line of predecessors, whilst transcending them at the same time. The 1911 version 2015 : A remarkable heritage – for an innovative lineage!

1911-.22LR
BLACK LABEL

2015 NEW

1911-.22LR

RECEIVER
- Engineering grade composite.
- Composite grip panels.

SIGHTS
"Combat type" sights for faster targeting.

EXTENDED PISTOL-GRIP SAFETY CATCH
- The he unique design prevents bite to the hand from the grip safety.
- Raised bump ensures positive operation.

EXTENDED AMBIDEXTROUS SAFETY
- Ambidextrous thumb safety is easy to operate.
- Extended design is easier to reach with the strong hand.

MAGAZINE
The steel magazine body is heat treated for long-term feeding reliability and long life.
Seven rounds capacity.

FLAT MAINSPRING HOUSING
Makes the grip more comfortable for a wider range of shooters.

ABS CARRY CASE
The 1911-380 pistol is shipped in a sturdy ABS case.

BUCK MARK .22LR

Hand Guns

BUCK MARK BLACK LABEL

2015 NEW

Browning® Buck Mark rim-fire pistols are very highly valued due to their quality, reliability and accuracy. These pistols have a receiver made from a single aluminium block machined using numerical control. The barrel is machined in a single top-quality steel block and the chamber is hand-bored for guaranteeing optimal accuracy.

Every Buck Mark pistol has fully adjustable sights.
Breaks are light accurate and crisp.
Grips, URX version in rubber or UDX in wood are perfectly ergonomic.
Your hand positions itself systematically in the same place on the grip every time you fire.
This allows more instinctive firing and improves accuracy.

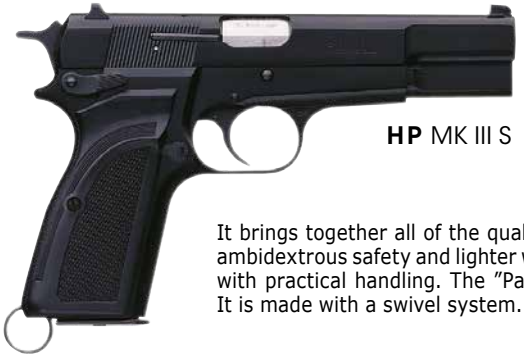
HP

Hand Guns

HP SILVER CHROME

The HP exists in the Silver Chrome version, which is equipped with a rear sight that is adjustable in elevation and direction and a sport front sight with a rounded base plate.

The slide and the receiver are nickeled, and the rubber grip is made by "Pachmayr", for sure and efficient handling.



HP MK III S

It brings together all of the qualities found in the HP, yet with an additional ambidextrous safety and lighter weight (910g), which make it an accurate gun with practical handling. The "Pachmayr" handles ensure the best handling. It is made with a swivel system.

ADJUSTABLE **HP** PRACTICAL

The HP Practical meets the demands of Practical Shooting.
It has undergone several improvements, such as:
- Adjustable, low profile sights.
- Particularly crisp trigger pull.
- Extremely comfortable handling due to its "Pachmayr" chequered rubber grips.

CLEANING

CLEANING & MAINTENANCE

All the tools you need to clean your firearms in one handy compact kit
27-pieces kit in a nice ABS case including :
- A set of solid metal handle
- 9 wire bore brushes
- 9 wool mops
- 2 jacks and a brush adapter
- A pack of cleaning clothes

Calibers: 12GA - 20GA - .410 - .45 - .38 - .30 - .270 - .22

LEGIA SPRAY NEW FORMULA

New formula Legia oil is ideal for looking after your gun and giving it total protection. The new improved formula cleans and lubricates not only metal parts, but also wooden and plastic elements down to temperatures of -40°C. Available in 200ml and 750ml spray versions (with propellant)

A means for protecting both firearms and accessories. The soft imitation felt fabric does not damage firearms and includes a Zorb Tech™ waterproof top. Zorb Tech™ keeps spills from spreading and cleansing agents from soaking through. This mat is also washable, dryable, and treated to be stain resistant

BROWNING® PARTNER LODGES

A Unique Sporting Challenge Awaits You !

The BROWNING® B525 shotgun is already appreciated for its numerous qualities by over a million hunters, and especially for its unmatched sturdiness in the field. **In collaboration with the "Magic Safari Lodges" label and the Orchape hunting tour agency, top-quality "small game" destinations are offered in France, Burkina Faso, Chad, Argentina and Spain. They have now become "BROWNING® Partner Lodges".** Several B725 and B525 guns will be made available to hunters on each site. This free service, which offers hunters an opportunity of hunting with this mythical gun, also enables them to avoid all the problems and unpleasant surprises liable to occur when transporting firearms by air.

LES COLVERTS DE SABOURNAC - FRANCE

www.sabournac.com

Unique in Europe, Sabournac is a private hunting estate that has been organising mallard shoots over the last twenty years or so on the principles of the large "English style shoots". This type of hunting surprises and appeals to many hunters, who like shooting a few hundred cartridges on high-flying mallards. The birds fly over surprisingly high, which challenges top-shooters to equip themselves with full-choke guns. The estate is open from September 1st to January 31st and may be reserved by a single group of 4 to 12 guns.

CAMPEMENT DE L'ELÉPHANT - BURKINA FASO

www.nahourisafari.com

Hunting francolin and guinea-fowl at random is the speciality of the Elephant Camp together with "pass shooting" turtle-dove and sand-grouse coming in to drink at waterholes. The season goes from December through to March. Hunters will find a comfortable camp (with air-conditioning and a swimming pool). Enjoy all the unfamiliar sights and sounds of the African bush.

GREAT SPANISH HUNT - MADRID, SPAIN

www.greatspanishunts.com

Only 45 minutes from Madrid, outstanding red-legged partridge shooting in Spain is at its very best on the La Fnca and Fuensauco estates, run by Javier Corsini who is one of the most respected shoot owners in Spain with his 30 years of experience. His professionalism, his rigour and his expertise are a guarantee that you will have a magnificent stay with a booty of between 500 and 2,000 birds, depending on the size of the party. Surrounded by an estate of 3,000 hectares, a luxury hunting lodge is ready to welcome you, with its gastronomic creations and top-quality Spanish wines that will really make your stay unforgettable.

KOULOUDIA - LAKE TCHAD, CHAD

www.orchape.com

The new KOULOUDIA air-conditioned camp, 3 hours away from N'Djamena offers exceptional hunting for teal, pintail, shovelers and African duck coming from Europe for the winter. The season goes from November through to March in the Lake Chad overflow areas, which are cultivated by villagers and where duck come and feed.

VERACRUZ - ARGENTINA

www.fronterawingshooting.com

Located in the heavenly Mountains of Cordoba, El Colibrí Estancia de Charme is the right combination between the refinement of a high quality European style Lodge, a charming and hospitable homely atmosphere and the excitement of a different kind of leisure.

MAGICSAFARILODGES.COM

ORCHAPE
Organisation Chasse & Pêche depuis 1958

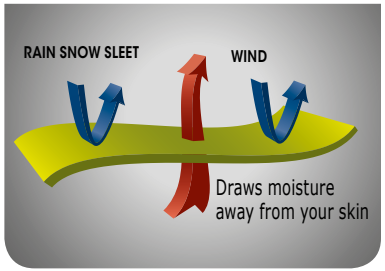
OUTDOOR
TECHNICALITY

Browning® hunting wear uses the **latest technologies** giving hunters **unmatched comfort** and **effectiveness**.

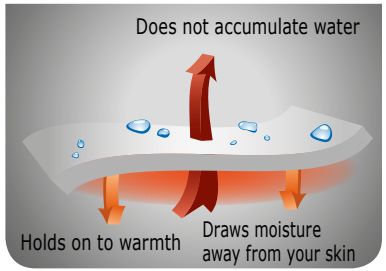
YOUR BAD-WEATHER PROTECTION



PreVent™ is our watertight, windproof and breathable techno-material.

The impermeability rating at 10.000mm and the care taken in product design for preventing all water infiltration guarantees that our PreVent™ wear is of the very highest quality. PreVent™ marked clothing is designed to resist rain, snow, wind squalls whilst remaining breathable and comfortable for the hunter at the same time.

THE BEST INSULATION FOR ALL WEATHER CONDITIONS



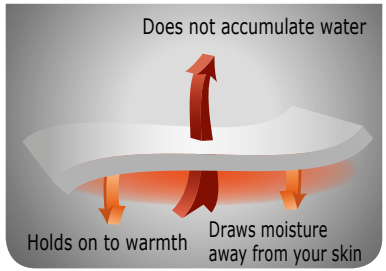
PrimaLoft™ is a premium performance insulation engineered for superior warmth, water resistance, loft, softness and compressibility.

These fibres are the finest in the industry and are densely packed to retain heat better for improved thermal efficiency. PrimaLoft™ fibres are specially treated to repel water molecules and absorb less water to make it more water-resistant and faster drying than other polyester alternatives.

Tightly-compressed fibres also make PrimaLoft™ highly wind-resistant as the smaller, finer fibres compress more and are lighter, less bulky, more breathable and extremely compressible.

That's what makes our clothing with PrimaLoft™ insulation so exceptional.

WARMTH-WITHOUT-BULK INSULATION



Thinsulate™ Insulation is used in your jackets, pants or gloves to help keep you warm when it's cold outside.

The unique microfibres or fine fibres that make up Thinsulate insulation work by trapping air molecules between you and the outside.

The more air a material traps in a given space, the better it insulates you from the cold outside air. B

ecause the fibres in Thinsulate insulation are finer than the fibres used in most other synthetic or natural insulation, they trap more air in less space, which naturally makes Thinsulate insulation a better insulator.

A KEVLAR® BASED FABRIC FOR EXTREME RESISTANCE.

Armortex™ is the fruit of the latest innovations in textiles that are ultra-resistant to abrasion and puncturing.

Armortex™ is an aramid fibre based fabric (Kevlar®) and is used by numerous professionals in domains as varied as forestry work clothing and protective clothing for motorcyclists together with many other fields where protection is a vital element in clothing.

Armortex™ forms a real barrier for protecting you against bramble, thorns and nature's other forms of aggression.

AN EXTRA-TOUGH, LIGHTWEIGHT FABRIC

Hydura™ is a fabric made from ultra-resistant polyamide fibres.

Its weave and the fibres' special treatment give extra resistance to abrasion, whilst keeping them sufficiently flexible and lightweight for maximum comfort at the same time.

The best shooting clothing designed ***by*** hunters ***for*** hunters

Technicality and sizing

FEWER ODOURS EMITTED ADVANCED SCENT CONTROL

Odour is caused by specific bacteria that thrive on human skin.

When bacteria metabolise, their waste produces odours that can be detected by deer and other big game animals.

HOW DOES ODORSMART™ ADVENCED WORK?

Simply stated, Odorsmart™ attacks the bacteria on the skin and in the "microclimate" immediately around the skin, killing them BEFORE they have a chance to develop odours.

Then the remaining molecules of odour are captured in the material without escaping into the open air.

With just normal use and care, Odorsmart™ will last for the life of the garment and does not require recharging, changing or other special care other than the normal washing cycle.

FLEXIBLE INSULATION SYSTEMS

Zip'In™ et X-Change™ are zip-fastening systems for incorporating insulated clothing inside a jacket.

This enables hunters to adjust the insulation level of their jacket depending on outside conditions or to use each product separately.

Zip'In™ and X-Change™ are not compatible.

LESS RECOIL

The Reactar™ G2 anti-recoil patch uses the new flexible Impact Geltm material, which absorbs recoil better than any other product on the market.

The Reactar™ G2 patch is placed inside jackets, vests or shirts fitted with a special Reactar™ G2 pocket. Only 8mm thick, it does not change your length of arming or point of aim. Flexible it adapts itself to your morphology without the slightest difficulty.

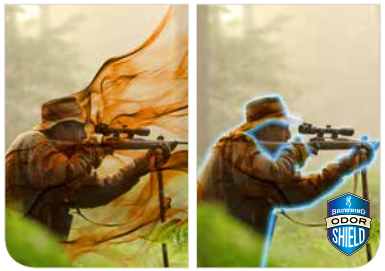
OUTDOOR
CLOTHING MAINTENANCE

Maintain your technical clothing's efficiency and **increase its service life**.

ABSORBS ODOURS



Without Browning® Odour Shield treatment, the odours released by your clothing (washing powder, wood-fire smells or those left by your dog for example) make game aware of your presence.

Browning® 3 in 1 treatment is not only perfume-free but it also contains odour-absorbing molecules and masking agents to make you "invisible" to game's sense of smell.

The advantage of the Browning® anti-odour system is that it can be used on all your hunting clothes and will avoid you having to invest in costly clothing that is less effective over time.

Best results are obtained by combining 3 in 1 waterproofing treatment with the 3 in 1 washing product.

ABSORBS UVS

With Browning® UV Blocker treatment your clothing will be less visible for game.

Unlike human eyes, deer's eyes perceive ultraviolet rays.

The Browning® treatment reduces the UV radiation reflected by your clothing.

Best results are obtained by combining 3 in 1 waterproofing treatment with the 3 in 1 washing product.

3 in 1 **washing product** for hunting wear

2

Cleans without damaging technical clothing.

The micropores on waterproof breathable membranes get blocked as time goes by dust, dirt, etc., which reduces their capacity to evacuate moisture into the open air.

Regular washing with a specialised product that respects membranes' characteristics guarantees the long life and effectiveness of your technical clothing.

Browning® treatment will also wash your normal clothes wear perfectly well.

3 in 1 **water-proofing** spray for hunting wear

1

Water-repellent treatments applied to the outside of fabric tend to lose their efficiency as time goes by washing, rain, rubbing, etc.

Therefore, they need to be retreated regularly with a waterproofing product that does not damage the inner membrane and allows the fabric to breathe correctly.

		000.000	
3 IN 1 SPRAY	1	129893	25,00 €
3 IN 1 WASHING PRODUCT	2	129894	25,00 €

Browning® treatments are environment friendly and OEKO-TEX® Standard 100 certified.

NEW: PROTECTION FOR DOGS

Browning® Protect anti-boar jackets are designed and tested for giving your dog the best possible protection.

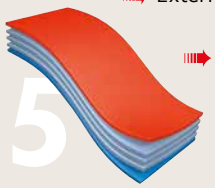
THE ONLY APPROVED PERFORATION TEST IN EUROPE !

This test is carried out in Germany by a specialised laboratory. It uses a rectangular spike with a 3 mm side and a kind of inverted pyramid shaped tip. This tip is driven into 10 samples of fabric at a rate of 6 metres per second, and the average result over 10 tests gives the perforation value in newtons.

In practical terms:

- the **5-layer** composition of the **PROTECT HUNTER** and **PROTECT ONE** jacket is resistant to perforation up to a weight in excess of 2100 N, ie 210 KG approx.

5 LAYERS



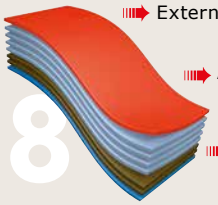
External side Cordura 600 DTEX

Anti-perforation DYNEEMA® 3 layers

Internal side of dog

- the **8-layer** composition of the **PROTECT PRO** jacket is resistant to perforation up to a weight in excess of 3000 N, ie 300KG approx.

8 LAYERS



External side Cordura 1100 DTEX

Anti-perforation DYNEEMA® 4 layers

2 thermo regulating layers

Internal side of dog

PROTECT PRO

Maximum protection for your dog

PROTECT

2015 NEW

HOW TO CHOOSE THE RIGHT SIZE OF THE JACKET ?

We offer 9 different sizes, which are easily identifiable, as they relate to the chest size of your dog.

To choose the right size jacket, simply measure around your dog's chest. The other dimensions are standardised based on the chest size, but this is the most important measurement as the collar and belly can be adjusted with velcro®.

Measure your dog's chest very precisely (using a flexible tape measure or a piece of string) to establish the exact size. Make sure the tape measure isn't too tight, it should just skim the dog's coat.

Never buy a jacket in a bigger size than your dog, because the jacket could rub as the dog moves, causing injury to the dog's front legs.

For example:
Size T65 corresponds to a dog with a chest measurement of 65 cm. By removing the additional zip fastening, it then measures 62 cm. Thanks to the additional chest kit, the jacket can be extended by 3 cm or even 6 cm.
If your dog measures 62 cm when you measure him as described above, you should choose a T65.
The smallest size corresponds to a chest size of 45 cm, such as a Teckel, and the following sizes go up in 5 cm increments, ie T45, T50, T55, T60, T65, T70, T75, T80 and T85. Size T85 corresponds to a type of dog such as a Grand Bleu de Gascogne.

Sizes	T45	T50	T55	T60	T65	T70	T75	T80	T85
Chest Sizes	45 cm	50 cm	55 cm	60 cm	65 cm	70 cm	75 cm	80 cm	85 cm
