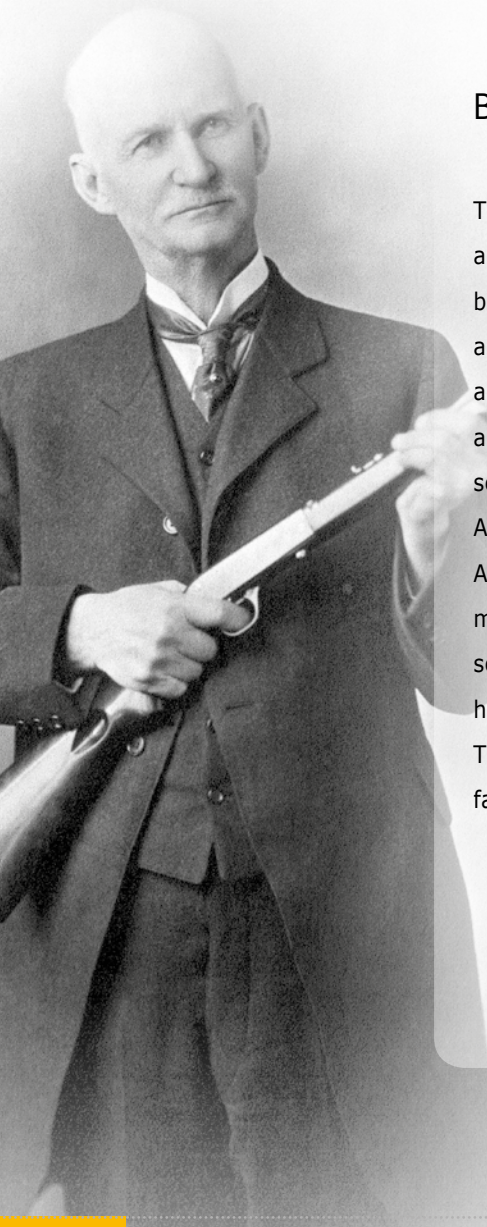
HUNTING & SHOOTING • 2016



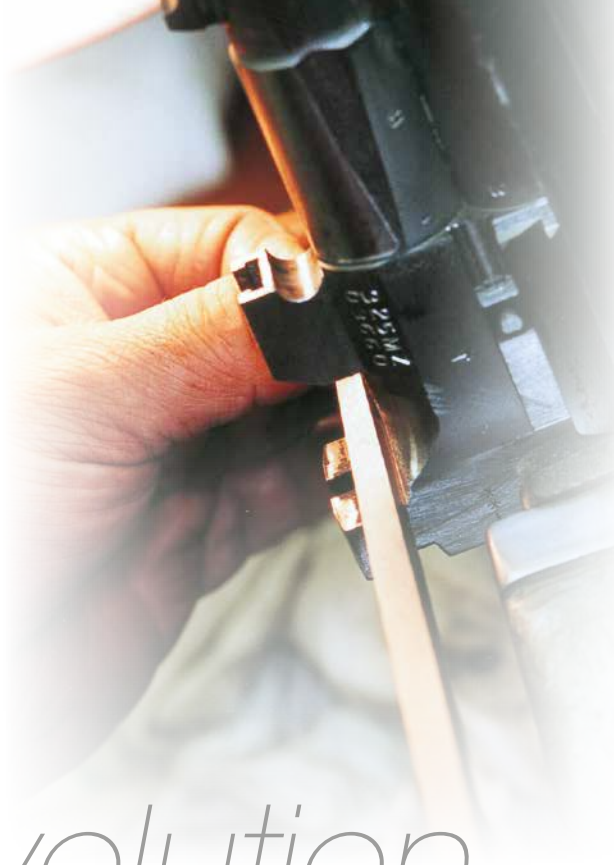
Browning, the brand

The Browning brand is about the genius of a man born 160 years ago in a small town in the American West. John Moses Browning began inventing at an early age, had an exceptionally prolific mind, and revolutionized firearms design time and again. From the Auto-5 and the B25 to the BAR and besides, every one of his designs was a milestone; every work he created was a challenge to time - and a source of inspiration to future generations.

A legacy like this naturally demands that excellence follow.

And so, now as always, every shotgun, rifle and item of equipment made by Browning undergoes a mandatory series of stringent tests so that you can be confident in the knowledge that they are reliable, high-performing and built to withstand the ravages of time.

The best, then, really isn't the enemy of good. It's actually its most faithful friend - and ours too!



Revolution

"An inventor ahead of his years, an exceptionally prolific mind, John Moses Browning revolutionized firearms design time and again."

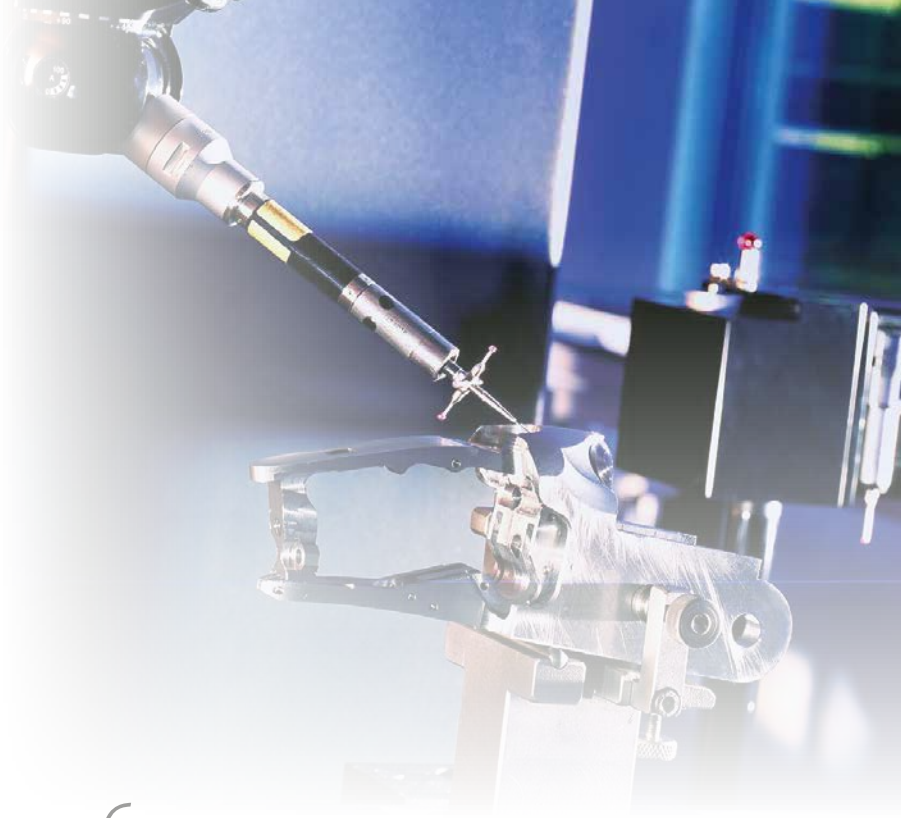
John M. Browning

Browning, the performance

There is one devastatingly simple goal that never leaves our sights: to bring you the best. And our teams are relentless in applying their technical expertise and esthetic acumen to find new ways of making our current guns and items of equipment even better.

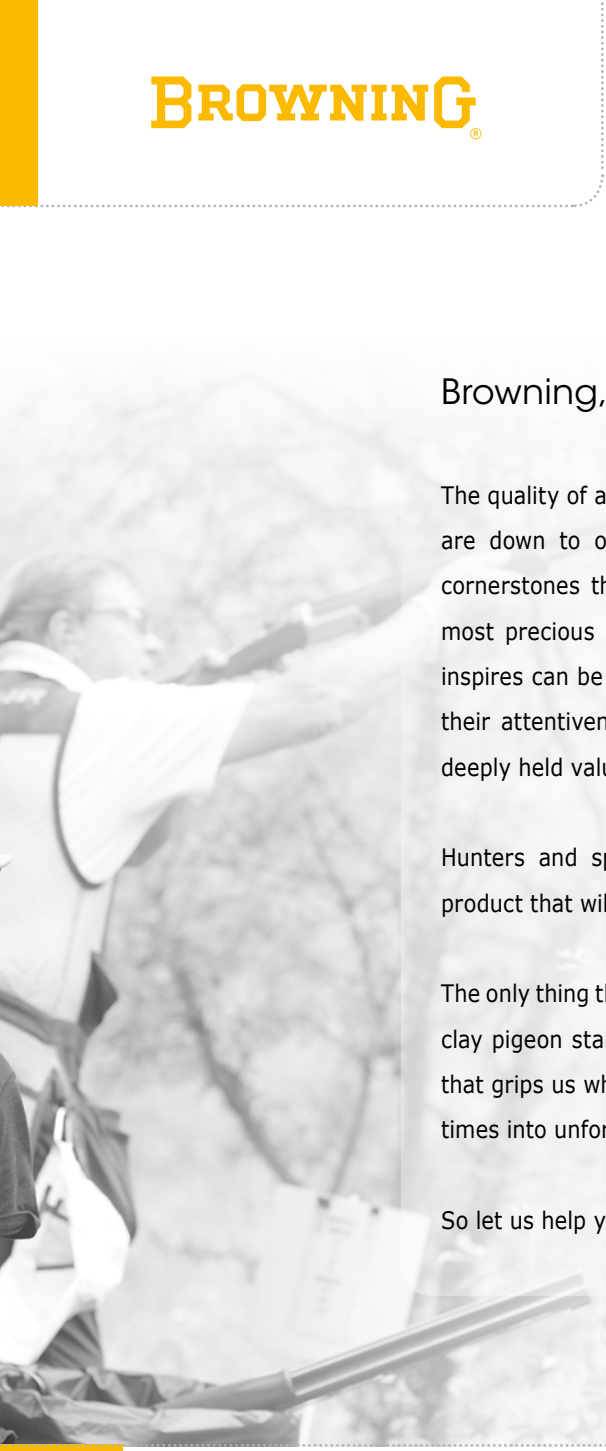
Because our engineers have a passion for hunting and a deep understanding of the difficulties that occur during a hunt, they bring all their personal experience to the solutions they devise and develop.

This continual fine-tuning, this increasingly meticulous scrutiny to the detail that ultimately makes all the difference - these are Browning's signature touch, its distinctive hallmark among other manufacturers, the proof of its commitment to delivering ever-higher performance.



Performance

One devastatingly simple goal never leaves our sights: To bring you the best.



Browning, Our Values

The quality of a firearm and the effectiveness of an item of clothing are down to observation, talent and hard work: three creative cornerstones that mean as much to Browning as its earliest and most precious legacy. The confidence that the stag's head brand inspires can be traced directly to the people behind the name, and their attentiveness and desire to deliver the right solutions - our deeply held values, in fact.

Hunters and sports shooters alike are sure to find a Browning product that will take their passion to a new level!

The only thing that matters on the beat, in a hide, on the stalk, at the clay pigeon stand or in front of the target board is the excitement that grips us when all the conditions are just right for turning great times into unforgettable memories.

So let us help you give it your best shot...

Passion

Hunters and sports shooters alike are sure to find a Browning product that will take their passion to a new level!

Our pledge

Every hunter and sports shooter should be able to purchase the equipment they need and which is right for them, whatever their budget and goals, regardless of whether they follow the latest technological innovations or succumb to the charms of the eternal classics, are or would like to be discerning amateurs, recent converts or old hands: this is our belief. This is our pledge.

Browning has always adhered to this mindset when developing its product lines. The quality of our products is a true reflection of the exacting demands that drive us. What unites us is our pride.

The guns that leave our factory come with a ten-year warranty and a blend of reliability, sturdiness and effectiveness. From manufacturing to fitting and testing, and on to finishing, they each underline the uniqueness of a brand devoted to shooters who are driven by passion: **Browning, The Best There Is.**

INTRODUCING THE JOHN M. BROWNING COLLECTION

Born in 1855, John M. Browning was an American who dedicated his life to creating firearms of exceptional quality and revolutionary construction.

It is Belgium however, that is home to his most lasting legacy.

Manufactured by the Fabrique Nationale d'Herstal in 1925, the B25 was the world's first over and under shotgun.

It was the result of creative genius combined with over 400 years of manufacturing expertise.

Often copied, the B25 has never been bettered, and remains an icon for shooting experts everywhere.

John Moses was a tireless innovator and a legend in the truest sense, so it's befitting that his name should grace a range of exquisitely crafted hunting and sporting guns.

Previously known as the Browning Custom Shop, the John M. Browning Collection is the very best of what we do.

B25 DIANA

B25 B2G

THE B25 HANDMADE
BY EXPERTS FOR EXPERTS

Every part of the B25 from the John M. Browning Collection is manufactured at Fabrique National d'Herstal, Belgium, by the hands of craftsmen without equal.

They are unique models, meticulously fashioned to perfection at each step in the manufacturing process, inimitable works of art created by the finest assembly techniques, the beauty in the detail and a love of hand-crafted workmanship.
The B25 is made to fit the shooter's morphology perfectly.

This means he or she can shoulder it repeatedly, without having to readjust its position. Speed of firing is therefore increased.
We go into the smallest detail, including thicknesses, lengths and grip – everything in fact, that makes it feel like a natural extension of the shooter's body. There are four enhancement grades to choose from, each with different specifications for wood grade, checkering, butt plate and engraving. You can select from 6 different styles of stocks, as well as the wood finish you require. A 1-piece or 3-piece fore-end is another aesthetic option to consider.

Because the perfect gun is in the technical and esthetic detail.

The John M. Browning Collection team maintains a close rapport with their gunsmith partners.
Find out all about them on our website.

B25 DIANA

B25 B2G

THE NEWEST ARRIVAL
FROM THE JOHN MOSES BROWNING COLLECTION

Unveiled in 2015, the B15 Beauchamp is the latest addition to the John M. Browning Collection.

This is the shotgun that Browning aficionados have been waiting for. Ninety years, in fact, since the B25's groundbreaking debut. Like its eminent forerunner, the B15 has been developed and perfected by the world-renowned gunsmiths of the Fabrique Nationale de Herstal.

That means you can expect balance and reliability. You can also expect precision engineering and the finest of aesthetic finishes.

The B15 is available in 4 grades with a choice of exceptional engravings and wood quality. Butt plates and fore end style are also included.

But at its heart is the locking system and all the technical features of the legendary B25, as well as the new and innovative elements listed here. That speaks volumes to those who truly know their shotguns.

Those who appreciate style, but prize function.

PERHAPS THE GREATEST PISTOL DESIGN OF ALL TIME

A custom Hi Power Pistol is a thing of beauty, both inside and out.

Built from solid steel, the frame and slide keep recoil light and manageable for accurate firing, even at rapid rate.

The feeling of balance in the hand is impeccable, regardless of left or right hand preference, and you'll find a large, ambidextrous manual safety catch conveniently located on the frame just above the grip.

The capacity is flexible too, with an option of 13 or 10 rounds, depending on individual country legislation.

The genius of the world's greatest gun maker is complemented by the artistry of Herstal's engravers, and there's a wealth of designs and finishes to choose from.

With the Custom Hi Power 9mm pistol, form always follows function. And that's what makes great design timeless.

HUNTER

The legendary strength is now combined with revolutionary design and features

1 NEW INFLEX II RECOIL PAD

A totally new INFLEX II recoil pad is fitted on all B725 shotguns as standard. This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. This exclusive material makes shouldering easier. Two other pads, 20 or 25 mm thick (available as an option), make it easy to adjust the length of your stock. In this way, you can adapt your B725 to your own physique and also adapt it depending on the hunting season.

"LEGENDARY RELIABILITY" AND "INNOVATION" ARE THE B725'S WATCHWORDS.

The new BROWNING® B725 is an aesthetic and technical revolution in Over and Under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding Over & Under shotgun on the market.

SCAN AND DISCOVER
THE B725 REVOLUTION

B725 HUNTER GRADE 5

2 NEW HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

These new firing system is shorter, faster and lighter giving more control over your shooting.
BROWNING®'s innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

3 LOW ACTION FRAME

The low provides the following benefits when shooting by:
Enabling faster aiming and therefore more instinctive shooting. Reducing muzzle flip due to the frames inline recoil providing a more comfortable shooting position, making it highly manoeuvrable and effective when shooting.

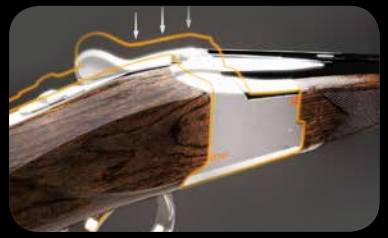
10 YEARS GUARANTEE
ACTION FRAME

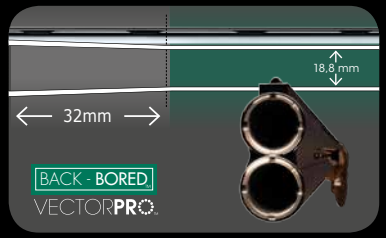
4 BACK-BORED™ VECTOR PRO™ BARREL

The principle of the Back-bored™ Vector Pro™ barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone which provides three advantages:
- increased speed and improved pellet penetration
- improved pellet grouping
- reduced recoill

5 INVECTOR DS™ CHOKES

The new Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.





For ballistic results see page 87

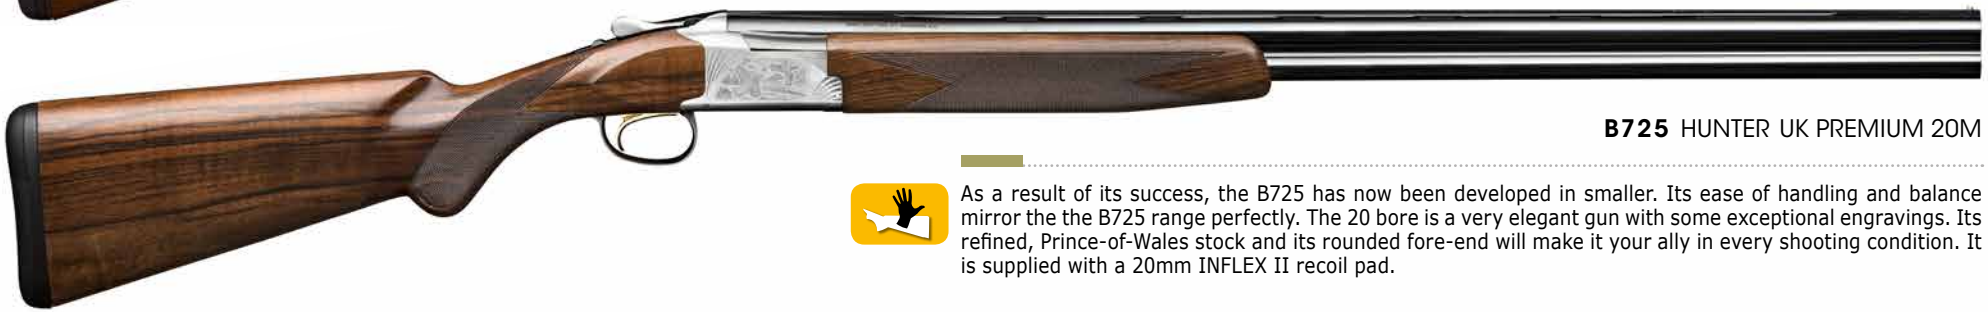
B725 HUNTER UK BLACK GOLD CAL 20

The B725 Hunter UK Black Gold is a distinguished, thoroughbred shotgun in magnum in 20 bore. The greatest care has been given to the smallest details: the action frame is blued and enhanced by a golden engraving representing a flight of partridge and the wood used is 4/5 grade, oil-rubbed American walnut. The aesthetic refinement of this impeccably balanced over-and-under gun is matched only by its mechanical perfection.

B725 HUNTER PREMIUM 20M

Slim, elegant, this 20 bore B725 is remarkably effective. Its rapid, accurate swing associated with its Back-bored™ Vector Pro™ barrels and Invector DS™ chokes, will give you outstanding performance and perfect balance. Your faithful ally for hunting small game, this refined model is sure to give you total enjoyment.



B725 HUNTER UK PREMIUM 20M

As a result of its success, the B725 has now been developed in smaller. Its ease of handling and balance mirror the the B725 range perfectly. The 20 bore is a very elegant gun with some exceptional engravings. Its refined, Prince-of-Wales stock and its rounded fore-end will make it your ally in every shooting condition. It is supplied with a 20mm INFLEX II recoil pad.

B725 HUNTER

Over And Under Shotguns

2016 NEW

B725 HUNTER UK GRADE 3

This venerable companion and newcomer to the B725 12 Magnum family is a tribute to the wonders of small-game hunting. It complements the mechanical performance of the range with a fresh aesthetic appeal of brand new engravings depicting pheasants and partridge taking flight. This homage to the classic charm of our feathered friends is rendered so much more graceful with a grade 5/6 American walnut finish.

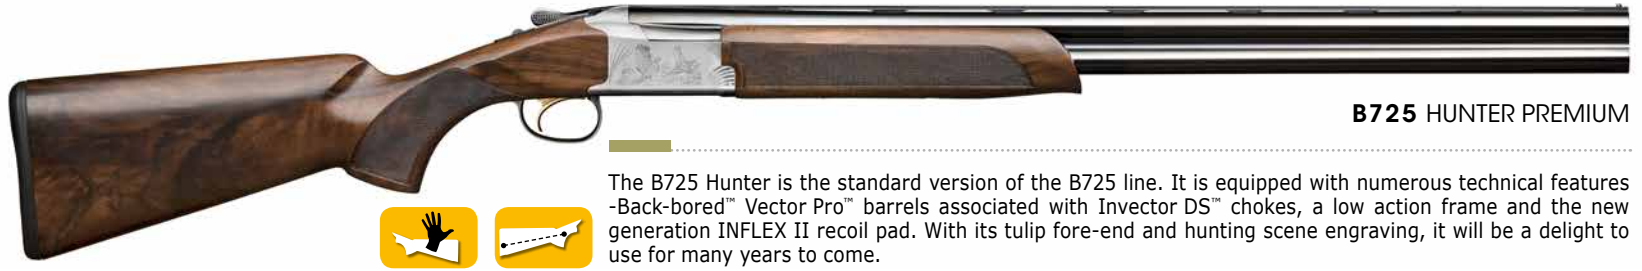
B725 HUNTER LIGHT PREMIUM

2016 NEW

The B725 Hunter Light Premium perfectly resumes the combination of efficiency, weight and design. Its action frame in lightweight aluminium reduces the weight of the gun by over 300g for an even easier swing.

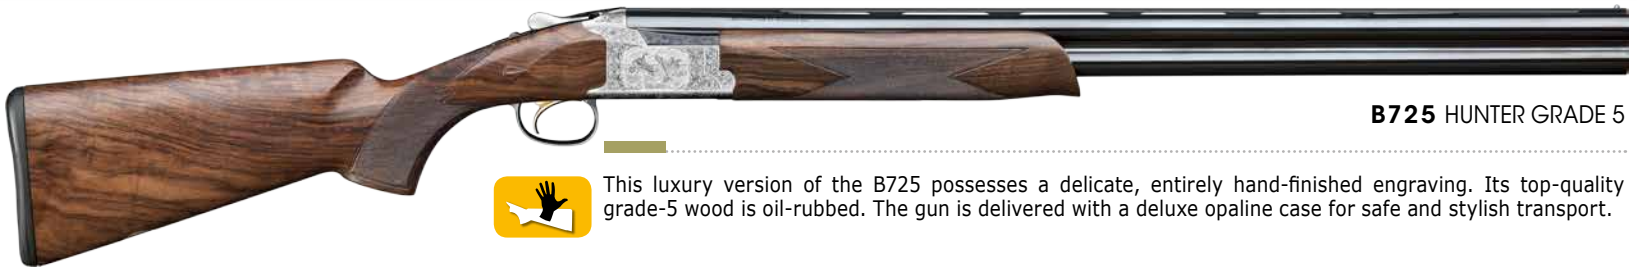


B725 HUNTER PREMIUM

The B725 Hunter is the standard version of the B725 line. It is equipped with numerous technical features -Back-bored™ Vector Pro™ barrels associated with Invector DS™ chokes, a low action frame and the new generation INFLEX II recoil pad. With its tulip fore-end and hunting scene engraving, it will be a delight to use for many years to come.

B725 HUNTER UK PREMIUM

One of the most recent newcomers of the B725 range, it has the same features. Its refined, Prince-of-Wales stock and its rounded fore-end will make it your ally in every shooting condition. It is supplied with a 20mm INFLEX II recoil pad.



B725 HUNTER GRADE 5

This luxury version of the B725 possesses a delicate, entirely hand-finished engraving. Its top-quality grade-5 wood is oil-rubbed. The gun is delivered with a deluxe opaline case for safe and stylish transport.

HERITAGE HUNTER 12M

This is the top of the range BROWNING® over and under shotguns. The Heritage model is the heir to the B25 side-plated model, and possesses all its elegance. The hunting scene engraving combining partridge and pheasant is very delicate. The stock is made from top quality, carefully oil-rubbed walnut. With its half-pistol stock and its tulip fore-end, the gun pays real tribute to the B25, and is the worthiest of heirs.

B5·25

The most reliable and best performing line

1 ACTION FRAME

Machined from a single forged piece for an outstandingly solid and hard-wearing part.
Light version: light-alloy action frame reinforced with high-strength steel inserts.
Steel version: forged steel action frame.

10 YEARS GUARANTEE
ACTION FRAME

HAND FITTED TO CREATE THE BEST THERE IS

During the making of a B525, the gun moves from one gunsmith to the next to be entirely hand finished, thanks to the expertise acquired over many years by each of the gunsmiths. This is the only shotgun on the market at this price level that is hand fitted during production to such a high performance level, making each shotgun truly unique. Fitting important parts (barrel, action frame, forend) is done by hand using traditional methods (using red ochre) so as to make the BROWNING® B525 the reference in shotguns. The attention paid to detail when manufacturing and fitting every BROWNING® B525 is unique, just like the "BROWNING® feeling" when the gun locks on closing before shooting.

A5 sweet sixteen

The Kinematic Drive™ System is your 100.000 round guarantee*

1 INFLEX II

The new INFLEX II Technology recoil pad is the next generation of the most recoil absorbing pad available.

A softer new outer material provides even better recoil absorbing performance and is super slippery to prevent snagging on clothing when shouldering. This second generation has added a new absorbent material that slips perfectly on clothing.

NEW IN 2016: THE A5 SWEET 16

LEGENDS ALWAYS RISE FROM THEIR ASHES.

In 2013, the legendary Auto-5 made it's return, and with it, came an all-new mechanical system. The A5 has the same look as its illustrious forebear, but the new Kinematic Drive System makes it so reliable that BROWNING gave it a 100,000-round warranty! It also lost no time in matching the success of its predecessor. BROWNING is adding to the range in 2016 with the launch of the... 16-gauge version. And the least we can say is that the A5 One Sweet 16 has some seriously strong points in its favor. Its weight is closer to a 20-gauge, making it more wieldy. But it's also similar to the 12-gauge in that its barrel can bear a range of loads. The recoil of the A5 One Sweet 16 is also surprisingly soft. This is a real gentleman's gun; it comes in three barrel lengths (66, 71 and 76 cm) and with two Invector DS chokes. You could say that the A5 One Sweet 16 successfully conjures up a magical mix of the traditional and the modern.

A5 ONE SWEET 16

2016 NEW

2 HUMPBACK

Made from lightweight, aeronautic quality aluminium alloy, the A5's receiver is sturdy and its characteristic shape is much more than just a nostalgic return to the past.

The receiver's familiar humpback shape fits perfectly with the rib for lengthening your line of sight and in this way helps you to aim naturally with faster targeting.

3 RELOADING SYSTEM

Rapid loading systems have been used on BROWNING® semi-automatic shotguns for decades.

Our patented loading system sends the first shell in the magazine directly into the chamber.

In addition, thanks to the rapid unloading system, unloading operations are both simple and fast, without needing to operate the bolt for sending each shell into the chamber.

4 KINEMATIC DRIVE™ SYSTEM

The systems accumulates recoil energy and converts it into a mechanical movement for actuating moving parts.

The beauty of the Kinematic Drive™ system resides in its simplicity of design, which enables it to operate in a regular, reliable way, with any type of load, and under all extreme conditions of weather, temperature, moisture or fouling.

The intensively tried and tested Kinematic Drive™ system has shown its abilities with practically every cartridge load from 28g through to Magnum and without any adjustment.

5 VECTOR PRO™ BARREL

The diameter of the barrels on the A5 One Sweet 16 is a standard 16.96 mm. The 33 mm forcing cone has 3 advantages:

- increased speed and improved pellet penetration
- improved pellet grouping
- reduced recoill.

6 NEW CHOKES

The new Invector DS™ Cal 16 chokes provide unrivalled performance by providing an optimal length of 72mm, an exclusive internal shape and a patented gas seal segment.

A5 ULTIMATE PARTRIDGES

A blend of innovative technology and aesthetic appeal. The nickel-plated receiver features finely engraved partridges in flight. The A5 is also impressively specced, with a Back-bored™ Vector Pro™ Invectore DS™ barrel, INFLEX II recoil pad and the new Kinematic Drive System. The grade-3 walnut stock has an oil-rubbed finished.

A5 ONE

The A5 ONE is a shotgun with a sober receiver embellished by a walnut stock and fore-end. Available in 12 or 16 gauge.

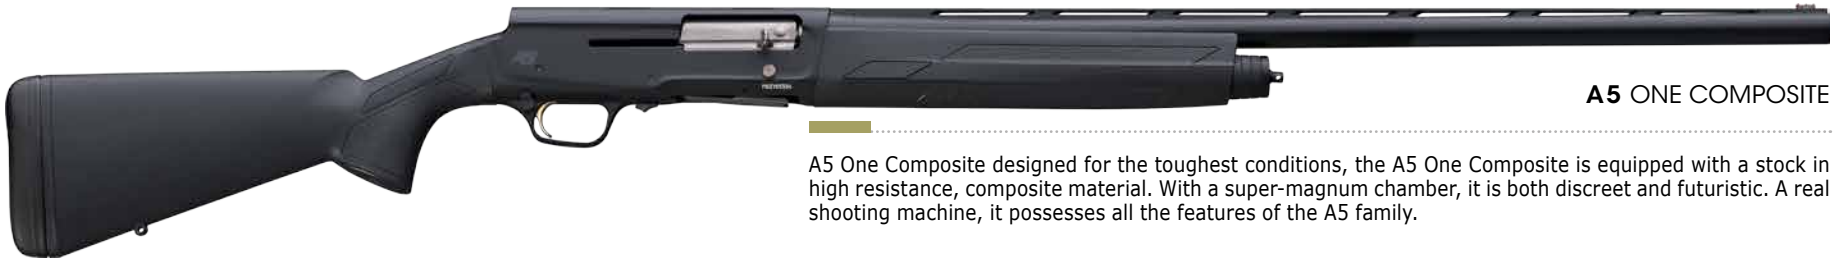
VECTORPRO Standard barrels

A5 ULTIMATE DUCKS

This firearm combines innovation and aesthetics. Its nickel-plated receiver is decorated with a delicate engraving showing ducks in flight. All the A5's features are present with a Back-bored™ Vector Pro™ barrel, the Invector DS™ chokes, an INFLEX II recoil pad and the new Kinematic Drive™ system. Its grade 3 walnut stock has an oil-rubbed finish.

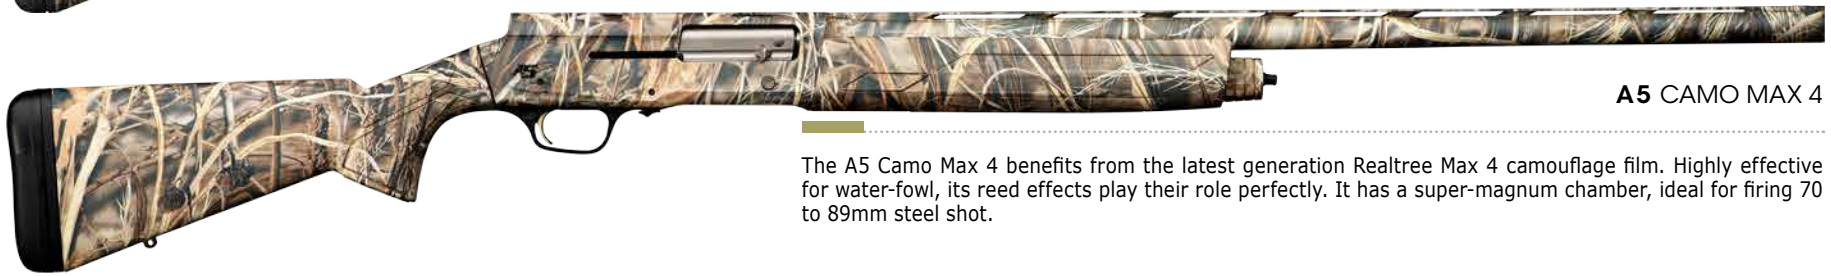


A5 ONE COMPOSITE

A5 One Composite designed for the toughest conditions, the A5 One Composite is equipped with a stock in high resistance, composite material. With a super-magnum chamber, it is both discreet and futuristic. A real shooting machine, it possesses all the features of the A5 family.

A5 CAMO INFINITY

The A5 Camo Infinity will be your best ally when shooting under cover or in the woods. Its Mossy Oak® Infinity camouflage design offers the utmost in discretion. With a super-magnum chamber, it will not let you down.



A5 CAMO MAX 4

The A5 Camo Max 4 benefits from the latest generation Realtree Max 4 camouflage film. Highly effective for water-fowl, its reed effects play their role perfectly. It has a super-magnum chamber, ideal for firing 70 to 89mm steel shot.

MAXUS

Comfort and liveliness: optimal performance

1 INFLEX TECHNOLOGY

Much more than a recoil pad in a recoil-absorbing material, it has been designed with an internal structure that lowers the buttstock and pushes it away from the shooter's face after each discharge, which allows a second shot that is even more comfortable and faster.

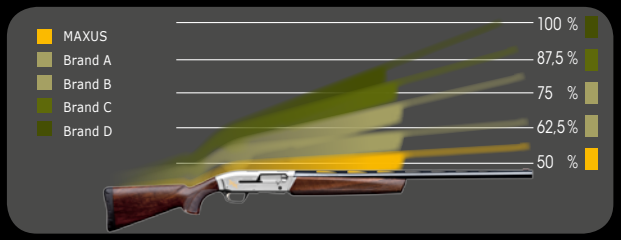
LENGTH OF PULL EXTENSION SPACER

Supplied with the gun.

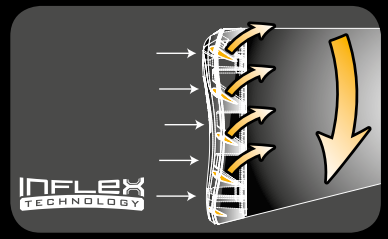
THE SOFTEST SHOOTING SEMI-AUTOMATIC EVER:

While no recoil reduction system on a shotgun can escape the laws of physics, the MAXUS is sure to change your mind about recoil control. The Power Drive Gas System, INFLEX technology, Vector Pro™ Back-bored™ technology, from BROWNING® are combined to reduce the total recoil force to the shooter by 18% compared to any other semi-automatic shotgun on the market.

COMPARISON OF MUZZLE JUMP



SCAN AND DISCOVER THE MAXUS REVOLUTION



The Invector-Plus interchangeable choke functions jointly with the Vector Pro™ and the Back-bored™ barrel to offer dense and regular shot patterns.

INVECTOR PLUS+

MAXUS PREMIUM GRADE 3

2 RAPID UNLOADING

And now, unloading is just as simple with the new MAXUS. The fast unloading function quickly and easily clears the tube magazine, without any need to individually chamber shells.

3 BARREL ASSEMBLY

The new geometry of the extended Vector Pro™ forcing cone together with the Back-bored™ barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

CUT OFF

The MAXUS is equipped with a Cut Off for the magazine to allow the shooter to unload the chamber easily, and thus change the type of shell without having to chamber a shell from the magazine.

4 POWER DRIVEN GAS SYSTEM

The Power Drive Gas System uses larger escape valves to remove gas more quickly with heavy loads. A brand new patented design for an integrated valve keeps residue outside the mechanism for cleaner functioning. The piston has a run increased in length by 20% to make it even more reliable with light charges. The system works with loads of 24g to 64g.

BAR MK3

Semi-Automatic Rifles

+ DESIGN
+ TRIGGER SYSTEM
+ BARRELS

Half a century ago, Bruce Browning - grandson of the great John Moses Browning - added the final touches to the world's first semi-automatic, gas-operated hunting rifle: the now legendary BAR. It was a revolutionary rifle that was an instant and massive success when it was launched in 1966, and over the years, has built up an ever-increasing, devoted fan club since. Now, fifty years later and with a rich legacy that has never strayed from its original qualities, the BAR is still the best friend of big-game hunters around the world. And so, for 2016, it is our great pleasure to introduce two outstanding, specially customized, limited-edition versions of the BAR MK3 as a tribute to their noble predecessor and a fitting celebration of the birth of a mythical gun that gives so much pride to the stag's head brand and such great success to its ardent admirers.

BAR MK3 COMPOSITE HC

2016 NEW

1 INTERCHANGEABLE RECOIL PAD

The BAR MK3 is fitted with interchangeable recoil pads. Depending on the model of gun, INFLEX II and Classic recoil pads of different thicknesses are available: 12 mm, 20 mm, 25 mm. With these recoil pads you can adjust the length of your stock without the slightest difficulty.

2 NEW ERGONOMIC DESIGN

The new design of the receiver, stock and fore-end provide unmatched comfort when firing, together with perfect ergonomics.

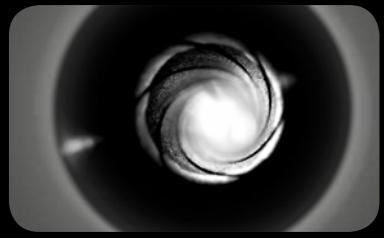
3 NEW TRIGGER SYSTEM FOR CRISPER, SHORTER AND INCREDIBLY DIRECT

When you want absolute precision the new trigger system is crisper, shorter and incredibly direct. The trigger system offers you a clear and direct start leading to exceptional experiences.

SUPERFEATHER TRIGGER

4 NEW BARREL PROFILE FOR EVEN BETTER ACCURACY

The barrel of each BAR MK3 rifle is created by cold hammering at the Fabrique Nationale in Herstal, Belgium.



2016 NEW

BAR MK3 50TH ANNIVERSARY

This limited edition of 1,000 specially designed BAR MK3s celebrates the 50th anniversary of a rifle whose star has never waned. The nickel-plated receiver, satin-finished fluted barrel and grade 4 oil-finished walnut grace it with a subtly contemporary design that further enhances the elegant appeal of the engravings, in which boars and stags - the very symbols of a rifle that has always deftly combined power and style, strength and nobility - feature strongly.

(**) According to applicable laws

DID YOU KNOW THAT THE MOST RELIABLE HUNTING RIFLE ON THE MARKET - THE BAR MK3 - IS A PRODUCT OF MILITARY TECHNOLOGY?

The BAR M1918, from the creative genius of John Moses Browning, was an American Army issue rifle in the First World War, its distinctive sound rising above the horrors of the trenches to strike fear into the hearts of the enemy. In World War II, the 550 rounds per minute of the BAR 1918A2 proved decisive in many Allied victories.

1966 saw the arrival of the outstanding BAR (Browning Automatic Rifle) gas-operated, semi-automatic hunting rifle, on which John Moses' grandson Bruce Browning and the engineers at FN Herstal worked for a year. By 1967, hunters were falling over themselves to get hold of this functional, well balanced and easy-to-use rifle with its gentle recoil. They were particularly impressed when the BAR was paired with the 300. Winchester Magnum round: for them, a match made in heaven; for their quarry, a match made in hell!
Where would Browning be with major innovations? The highly prolific Belgian inventor Joseph Rousseau knew very well. It's thanks to him that hunters had the pleasure of getting to grips with the BAR Mark II in 1993.

The BAR's interior was entirely revamped, making it easier to use and even more reliable. In came technological progress in the form of a streamlined piston system and a bolt lever, hand in hand with greater aesthetic variety across the BAR line. The enfant terrible is undoubtedly the BAR «Safari». It has an all-steel receiver and boasts an adjustable muzzle brake that uses the BOSS system. The other BAR MARK II line is the «lightweight», so named because of the aluminum receiver that gives it its low weight.

In 2004, Browning further extended its BAR range with the Long Track and Short Track models, in reference to the length of their receivers. They underwent a number of improvements during the first decade of the new millennium - aesthetic first, as new composite materials were introduced; then practical, with new magazines, a manual-cocking version and left-hand versions.

In 2009, Browning launched the supremely distinguished and impeccably finished BAR Zenith. The Zenith retains all the ever-present features behind the BAR's ongoing success and adds extra esthetic appeal, with a choice of wood grade and side plates. The gun was completely restyled and adjustable sights were introduced. Browning also put the emphasis on safety by bringing out a hand cocking system.

The latest newcomer to the BAR dynasty was released in 2015. It goes by the name of BAR MK3 and is just as effective as its illustrious predecessors, but with totally new styling. It also comes with the new Super Feather trigger that massively improves the huntsman's reaction time, while the more stable barrel profile promises outstanding accuracy.

With over 1.1 million units sold, the BAR is the stuff of legend. And Browning is celebrating this mythical rifle's half century the way it should be celebrated: by designing two limited-edition commemorative models. The first features grade 4 wood, with a boar and a deer engraved on the sides; only 1,000 units will be built. The second commemorative edition offers the same scenes in much richer detail. Only fifty copies will be built, each one individually numbered. Both collectors' models are another page in the glorious history of the BAR.

BAR 1968

2016 NEW

BAR MK3 COMPOSITE HC

With its all-black exterior, this brand new version of the BAR MK3 goes for the minimalist look. The composite stock and fore-end add the finishing touches of harmony to this rifle, which will melt into any background. In addition to the extremely consistent contours, the BAR MK3 COMPO HC also boasts a fluted barrel with a new profile for outstanding accuracy on driven hunts and in blinds. Safety is guaranteed by the hand-cocking system that is as intuitive as it is reliable. Finally, rubber pads are fitted over areas that are handled the most. The BAR MK3 Compo HC - Understated and effective at an eye-catching price!

2016 **NEW** **BAR MK3** COMPOSITE HC LEFT HAND

How can a gun be said to have reached the pinnacle of design if it doesn't adapt flawlessly to each user's body form? It can't! So this version of the BAR MK3 COMPO HC was designed simply so that left-handers can enjoy the memorable hunting experience it offers. This is a carbon copy of the BAR MK3 Composite HC, retaining all of its features, but adapted to left handed shooters.

BAR MK3 ECLIPSE FLUTED

This version, which possesses all the technical specificities of the new BAR MK3 range, is also exceptional due to the remarkable grace of its aesthetic qualities. Its piped, satin barrel and its delicately nickel-plated receiver – adorned by a new engraving representing roe deer and wild boar – undoubtedly pay honour to the rustic charms of hunting.

BAR MK3 HUNTER FLUTED

An anodized black receiver, brushed side-faces, top and bottom and the stock and fore-end in grade 2 oil-rubbed walnut: The BAR MK3 Hunter is the end-result of particularly neat and inventive work. Fitted with an adjustable foresight, its 53 cm piped barrel possesses a new profile that emphasizes even more the accuracy of a gun that also offers excellent firing sensations thanks to its Super Feather Trigger system. Available in four calibres (308, 30-06, 300WM and 9.3X62), the BAR MK3 Hunter is equipped with different accessories so that it can be adapted just as closely as possible to the shooter's morphology. A rifle that contains a whole host of surprises ...

BLR TRACKER

2016 NEW

This gray lever-action rifle comes with a laminated plywood stock, and has been treated to a new ultra-strength "Cerakote" surface treatment for unbeatably long service life. The sights and short barrel make this an excellent gun for driven hunts and tracking.

BLR LIGHTWEIGHT

The BLR is the only lever-action rifle developed in magnum calibre. Its mechanics are impeccable and characterised by the exceptional smoothness of its operation. It has a removable magazine and a high quality barrel and is ready for fitting a scope.

MARAL

The Most Effective Straight-Pull Action Rifle : Surer, More Ergonomic, Faster

LENGTH OF PULL EXTENSION SPACER

Supplied with the rifle

+ SAFETY

+ SPEED

+ ERGONOMICAL

With all its undeniable experience in making hunting rifles, BROWNING® has innovated yet again in the field of straight-pull action rifles with the new MARAL. A real technical revolution, its quick-loading system offers shooters incomparable speed and unprecedented firing comfort. BROWNING® combines this new technology with all the experience it possesses in barrel-making and its expertise in safety with its 7-lug bolt, which already equips over a million rifles throughout the world. Efficiency can also be measured when you look at the breech, which is always contained inside the bolt-casing. This enables shooters to keep their target in their sights continuously when firing.

MARAL FLUTED HC

1 INTERCHANGEABLE RECOIL PAD

The MARAL is fitted with interchangeable recoil pads. Depending on the model of gun, INFLEX II and Classic recoil pads of different thicknesses are available: 12 mm, 20 mm, 25 mm. With these recoil pads you can adjust the length of your stock without the slightest difficulty.

2 HAND COCKING SYSTEM

Safety guaranteed.

EASY, ERGONOMIC HANDLING

RAPID STOCK DISMANTLING SYSTEM

3 BREECH CONTAINED INSIDE ITS CASING

No inconvenience when reloading.

REMOVABLE MAGAZINE

"BATTUE" TYPE RIB WITH OPTIC FIBRE

Also delivered with a rear-sight.

4 7-TENON BOLT SAFETY GUARANTEED

A bolt renowned for its sturdiness, which guarantees exceptional safety and accuracy.

5 QUICK RELOADING SYSTEM

The servo bolt return system combines maximum safety, speed and efficiency. Thanks to the time gained in the reloading phase, shooters can concentrate on their firing action.

MARAL

THE BROWNING® STRAIGHT PULL RIFLE

3 TIMES MORE EFFICIENT*

BROWNING® TRADITIONAL ROTATING BOLT

The MARAL is fitted with a BROWNING® 7-lug rotating bolt, which has proved its worth for over 40 years. This legendary sturdiness results from using an extremely simple system that has been made with the utmost precision for many years.

QUICK RELOADING SYSTEM: ULTRA-FAST REPEATING

THE TARGET IS IN YOUR SIGHTS ALL THE TIME

+ SAFETY

A safe rifle by its very essence, with its breech confined in the receiver and its manual cocking system. Unlike other straight-pull action rifles, the BROWNING® rotating 7-lug bolt system is a guarantee of protection and absolute safety in the event of over-pressure. The breech is completely confined inside the gun's receiver and does not interfere with aiming when re-cocking. The shooter keeps the target in his sights without any interference. This confinement also guarantees the cleanliness of the breech system. The MARAL's manual cocking system is designed for maximum safety in both beats and hides.

+ SPEED

The only movement required is the straight pull on the re-cocking lever, as the servo- bolt return system automatically pushes the bolt back forwards. By eliminating the reloading lever push-forward phase, the shooter gains time, which enables him to concentrate more on targeting and firing rather than on reloading. Lastly, the linear pull on the reloading lever is constant, which offers unmatched comfort in use.

+ ERGONOMICAL

Unlike a traditional straight-pull action rifle, the MARAL offers exceptional ergonomics and comfort, thanks to its exclusive patented repeat shot movement.

The MARAL rifle has been designed for stabilized shooting, instinctive "in-line" recocking and faultless repetition. The straight-line recocking movement is not disturbed by the breech passing in front of the shooter's eye, nor by the linear pushing phase on the reloading lever.

The MARAL's reloading movement is inside the gun's receiver, which offers three major advantages: On the one hand, natural continuous aiming and on the other ergonomic reloading without having to stop firing.

As a result the breech does not shoot out of its casing towards the shooter's face, which makes it easy to reload when in firing position. Aiming is maintained between each shot which makes repeat shots easier and enables the shooter to concentrate on his target all the time.

** than a traditional straight pull rifle.*

YOUR CUSTOMIZABLE MARAL

MARAL
BIG GAME FLUTED HC
2016 NEW

MARAL
GR5 MONTE CARLO FLUTED HC
2016 NEW

You can customize your gun thanks to the range of options available:

- a large choice of Big Game, Wood or Ultimate grips incorporated into the receiver
- stocks going from Bavarian to Monte Carlo or simply traditional
- tulip or rounded fore-ends.

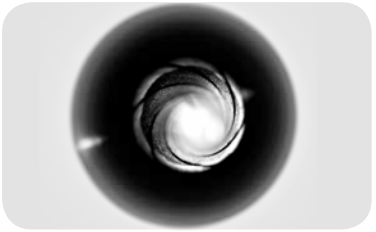
OPTIONAL

3 OR 4 SHOT REMOVABLE MAGAZINE OR 6, 8, 9 OR 10 SHOTS HIGH CAPACITY MAGAZINE

Essential accessories "par excellence", the MARAL offers 5 different versions of magazine: 3+1, 4+1 removable magazines and 6+1, 8+1, 9+1, and 10+1 high capacity magazines (See page 106 for details and availabilities).

REMOVABLE STOCK

Transporting the MARAL is made easier by its removable stock. A suitable tool is provided with the carrying case.



FN HERSTAL BARREL

The MARAL rifle's barrel is made at the Herstal Fabrique Nationale by cold hammering.

This gives shooters exceptional accuracy.

IDEAL FOR DRIVEN HUNT AND STALKING

IDEAL FOR HUNTING ACTIONS IN BEATS, THE MARAL GUARANTEES:

- high firing speed thanks to its Quick Reloading System
- comfort and ergonomics for the shooter thanks to the system that confines the breech inside the receiver and prevents it from coming out towards the shooter's face and enables him to reload without unshouldering
- integral safety in firing with the locking system guaranteed by the servo breech return system
- sturdiness, reliability and durability for instinctive firing.

ALSO IDEAL FOR HIDES, THE MARAL GUARANTEES:

- safety in firing, thanks to its simple manual cocking system
- the guarantee of a second shot, as the shooter's concentration stays on keeping the target in his sights thanks to fast, ergonomic linear reloading
- exceptional accuracy due to the 7-lug system locking the breech in the chamber and the legendary quality of FN barrels.

1 NEW PERFECT TRIGGER ACTION, SUPER DIRECT

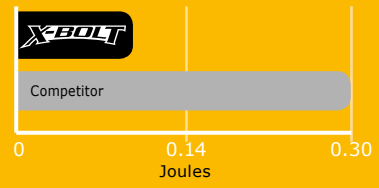
When you want absolute precision the Super Feather Trigger is your only alternative, crisper, shorter and incredibly direct. The Super Feather Trigger offers you a clear and direct start leading to exceptional experiences.

SUPERFEATHER TRIGGER

3 X MORE EFFICIENT THAN COMPETITION IN TRIGGER SENSITIVENESS

- **Zero take-up**
- **Minimum overtravel**
- **Minimum creep**

Energy required for firing



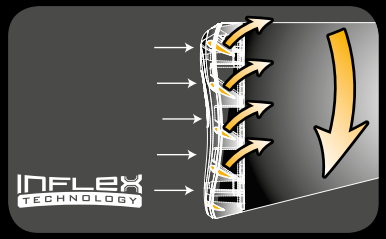
Fittings and accessories see pages 104-107

X-BOLT SF HUNTER

2 INFLEX ANTI-RECOIL BUTT PLATE

This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun.

INFLEX TECHNOLOGY



3 BOLT-UNLOCKING BUTTON

The bolt-unlocking button works in conjunction with the safety to provide an added degree of safety.

ROTATING MAGAZINE

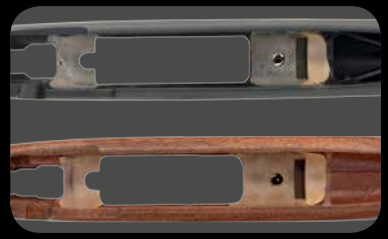
Made in light ultra-resistant polymer, it gives exclusive protection to bullet noses.

4 X-LOCK MOUNTING SYSTEM

The X-Lock scope-mounting system has 4 screws per fixing point. Therefore it is more stable and provides higher accuracy.

5 UTMOST ACCURACY

A free-floating barrel is essential for utmost accuracy. The X-BOLT SF's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel/breech block assembly at two points with respect to the forearm, at the front and at the rear.



X-BOLT SF STAINLESS FLUTED THREADED

This model is equipped with a piped and rifled barrel (M14x1) in 223 Rem, 243 Win, 270 Win, 30-06 and 308 Win calibres.

See page 104-105

Also available with muzzle brake option for the composite version only, in cal 308 / 7mm Rem / 300 Win Mag.

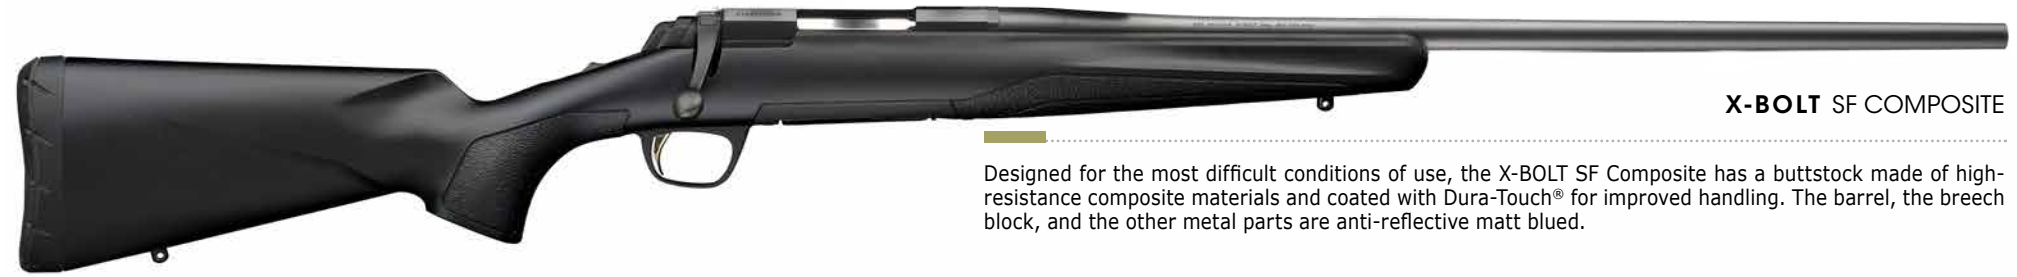
X-BOLT SF STAINLESS

Offering great resistance and ideal in all weather conditions, the X-BOLT SF Stainless Stalker has a stainless steel barrel and breech block as well as a composite buttstock with Dura-Touch® coating. This weapon is the partner of choice for your extreme hunts. Available with a fluted and threaded barrel (M14x1) in 223 Rem, 243 Win, 270 Win, 30-06, 308 Win calibres.



X-BOLT SF COMPOSITE

Designed for the most difficult conditions of use, the X-BOLT SF Composite has a buttstock made of high-resistance composite materials and coated with Dura-Touch® for improved handling. The barrel, the breech block, and the other metal parts are anti-reflective matt blued.

X-BOLT SF HUNTER ECLIPSE THREADED

The design of this gun is not the only sign of its originality: the pistol grip on its stock in laminated plywood possesses a cavity for your thumb to place itself naturally, guaranteeing a grip that is firm, but sufficiently flexible for providing freedom of movement. Perfectly equipped for fitting a scope with the Super Feather Trigger system, the X-BOLT Hunter Eclipse Threaded rifle has a threaded barrel (M14X1).

SUPERFEATHER TRIGGER

The new X-BOLT SF are now equipped with a Super Feather Trigger with its perfect action: clean, short, crisp and direct.

2016 NEW

X-BOLT SF EUROPE

The X-BOLT SF EUROPE is a close technical cousin to the X-BOLT SF HUNTER, but the shape of its oil-finished american grade 4/5 walnut stock is a real stand-out feature: the more traditional workmanship is unmachined around the sides - giving the rifle a notably clean contour that can even be seen in the swell of the fore-end. In addition, although the fluted barrel of the X-BOLT SF EUROPE does not have sights, steel scope-mounting bases are included. This rifle is outstanding against large animals, and the 20 mm INFLEX recoil pad spares users the unpleasant effects of recoil action.

X-BOLT SF HUNTER LEFT HAND
WITH SIGHTING SYSTEM

This Left hand version is characterised by a sighting system of a battue rib and a fibre optic front sight; a rear sight is also supplied. Once mounted to replace the battue rib, this rear sight offers you superior accuracy and quality of sight for long distance shooting.

X-BOLT SF HUNTER LEFT HAND
WITHOUT SIGHTING SYSTEM

This X-BOLT SF Hunter Left hand possesses all the X-BOLT SF features, but in an integral left-handed version. All the major functions have been adapted for left-handed shooters; the bolt, the unlocking button and the safety catch are perfectly located for left-handed shooters.

X-BOLT SF HUNTER
WITHOUT SIGHTING SYSTEM

This version is available without sights and the barrel is not prepared for their mounting. Available in a Left handed version in calibres 243 Win, 30-06, 308 Win, 300 WM

SUPERFEATHER TRIGGER

The new X-BOLT SF are now equipped with a Super Feather Trigger with its perfect action: clean, short, crisp and direct.

2016
NEW

X-BOLT SF ECLIPSE VARMINT

This latest incarnation of the much-loved X-BOLT is available in 223Rem, 243Win, 308Win and 6.5x55 calibers, and sports a distinctive 61 cm heavy barrel with a threaded end (M18X1). It also continues the excellent principle of having a thumbhole in the stock for an easier grip; when combined with the ultra-high performance of the Super Feather Trigger system, the laminated grey wood stock takes comfortable shooting to a whole new level. The X-BOLT Eclipse Varmint - a vital ally when stalking vermin!

X-BOLT SF VARMINT GRS

(Scope not supplied)

With its heavy M18x1 piped and rifled barrel, the X-BOLT SF Varmint GRS will be particularly appreciated by enthusiasts of varmint hunting and precision shooting. The X-BOLT SF Varmint GRS is the version with a modern provocative look! A perfect combination of accuracy, design and ergonomics, the X-BOLT SF Varmint GRS will give you an aggressive style with its meticulously designed stock in grey-black laminated wood and even greater comfort when firing, with a stock that is adjustable in both length and pitch. The package includes steel mounting bases for your scope. Available in 3 calibres (243, 308 and 6.5x55).

X-BOLT SF VARMINT THREADED

With its serious, elegant appearance, the new X-BOLT SF Varmint Threaded rifle has arrived just at the right moment for completing the range of bolt-action rifles specially designed for shooting vermin and pests. It is equipped with a heavy threaded barrel (M18X1), a guarantee of exceptional accuracy, associated with the Super Feather Trigger system: a perfect trigger action for a sharp, firm and direct pull. Supplied with its steel mounting bases, it is available in a wide range of calibres.

SUPERFEATHER TRIGGER

The new X-BOLT SF are now equipped with a Super Feather Trigger with its perfect action: clean, short, crisp and direct.

1 INFLEX ANTI-RECOIL BUTT PLATE

This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun.

THE NEW A-BOLT 3 CARBINE, A LEGEND IN THE MAKING, IS BORN.

Experience acquired over time and tested in the field, an A-BOLT's exceptional precision and reliability are seldom matched. This new carbine allies a modern production system with the trusted Browning® quality in order to produce a high-performance carbine at a very interesting price. The A-BOLT 3 gives you the precision and performance you want in a hunting rifle and its cost-effective budget is a real delight.

SCAN AND DISCOVER THE A-BOLT 3 REVOLUTION

A-BOLT 3 COMPOSITE

2 UNLOCKING BUTTON FOR THE BOLT

The unlocking button for the bolt ensures optimum security and is ideally placed on the back of the pistol grip. Can be opened in the safety 'on' position.

3 NEW PERFECT TRIGGER

For firing with absolute accuracy, there is no other alternative to the A-BOLT 3 trigger action, sharper, short and ultra-direct. The trigger gives you a clean, fast pull with exceptional sensations.

4 BOLT AND HOUSING

The A-BOLT 3 features a three pin bolt that offers extreme precision. The 60° opening of the bolt allows for a rapid and efficient cycle.

5 DROP BOX MAGAZINE

The essential accessory, the A-BOLT 3 is fitted with a state of the art drop box magazine. Made from synthetic material, it withstands any and all circumstances.

A-BOLT 3 HUNTER

(Scope not supplied)

2016 NEW

The A-BOLT 3 Hunter adds to the Browning bolt-action rifle range for big game and high-precision shooting. This new version includes all the special features of the A-BOLT 3 Composite, also comes in six calibers and with steel bases for secure scope mounting. The A3 Bolt Hunter is made from noble walnut, a wood that is always guaranteed to add true «natural» beauty to a hunting rifle, and which here enhances its elegance without sacrificing any of its rugged qualities...

ALL A-BOLT 3 RIFLES ARE SOLD WITH STEEL BASE MOUNTS.

A-BOLT 3 COMPOSITE

With its high quality barrel, rapid and sure locking/unlocking system, drop-down magazine and INFLEX Technology recoil pad, the A-BOLT 3 Composite no longer needs to be presented. Designed for hunting from a hide, the rifle, which combines extreme accuracy and rock-solid toughness, really gives you excellent value for your money. Added to the range of calibres 270Win. 30-06, 7mm Rem. and 300W Mag. now available in 243 Win. and 308 Win. calibres.

A-BOLT 3 COMPOSITE THREADED

The essential particularity of this model is that it is fitted with a barrel (M14x1) that is threaded at the end. Available in 243 Win. 308 Win. and 30-06 calibres, the A-BOLT 3 Composite Threaded rifle is supplied with steel mounting bases for fitting your scope.

BROWNING RELIABILITY AVAILABLE TO EVERYONE!

BROWNING®
TEAM

Browning:
the guns of champions!

Performance and passion have been an integral part of Browning's values since day one. And every day since then, they have been an ever-present guiding principle for our engineers as they design increasingly high-performance products, and for our shooters whenever they take part in a competition.

Browning products give shooters the best possible technical edge and equipment that is beyond reproach, setting their instincts free and giving full effect to the magic of the moment. Browning is a fixture at Sporting Clay and Compak events, and made a return to trap shooting (Universal and Olympic Trench) in 2015, with the B725 Pro Trap shotgun taking a starring role.

Check it out now! And check out the official Browning shooting team... Over 350 medals in FITASC* international competitions since 2009!

Browning Young Talent

Browning is also investing in young talent, and its ranks include some budding stars who look set to be great sports-shooting champions in years to come.

Visit **www.browning.eu** to see our Browning Young Talent, or catch them in action at championship events!

Browning Loyalty Program

We're giving you the chance to win Browning products worth up to 8,000 € in every competition, and over 35,000 € over the course of your season!

Our loyalty program is open to everyone, and is particulary aimed at sports-shooting enthusiasts. The concept is straightforward: Each registered shooter that wins a competition using a Browning, Winchester or Miroku brand rifle will gain credits worth up to 8,000 € each time!

These credits can be saved throughout the year and traded in exchange for Browning, Winchester and Miroku brand products (guns and/or outdoor equipment).

The aim is simply to encourage your passion and break boundaries, performance barriers and records.

The program applies to national and international Sporting, Compak, Trap, Universal and Olympic Trench competitions. You can register, find more information and a list of competitions at www.browning.eu!

B725 ProTrap

Performance / Excellence / Adaptibility

1 LOW PROFILE ACTION FRAME

Improved recoil control and less muzzle jump are two of the big benefits of a low profile receiver. There is also the "one with the gun" feeling that makes the B725 Pro Trap feel like an extension of the body.
Places the front hand closer to the bore line for superior hand-eye coordination and pointability

2 FULL-WIDTH HINGE PIN

FULL-WIDTH HINGE PIN

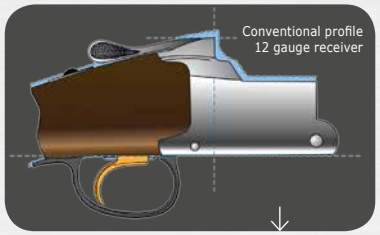
The B725 Pro Trap full-width hinge pin provides maximum strength and long-lasting endurance.

COMPETITING TRUNNION DESIGN

The competitor's trunnions provide only a fraction of the bearing surface that the B725 Pro Trap's full-width hinge pin provides.

The B725 Pro Trap range is a variation on the B725 that combines unbeatable shooting comfort with a whole new level of performance. The secret is the new Pro Balance System that lets you alter the weight of the stock and barrels just the way you need them to fine-tune the gun's balance. The eight INVECTOR DS Extended chokes, Hi-Viz sights and two extra triggers make it the perfect choice for the most demanding sports shooters.

SCAN AND DISCOVER THE B725 PRO TRAP REVOLUTION



B725 PRO TRAP HIGH RIB

3 TRIPLE TRIGGER SYSTEM

The Triple Trigger System fine tunes finger-to-trigger reach on target models.
Includes three trigger shoes: Wide checkered, narrow smooth and wide smooth canted.

4 BARREL WEIGHT

The barrel's counterweight is comprised of tungsten plates which enable the gun's centre of gravity to be moved up to 20 mm forwards.

5 STOCK BALANCE

The Pro Balance System allows shooters to fine-tune the balance point for a perfect mount and swing.
Adding weights to the stock helps balance the shotgun, aids follow-up shots and the additional mass reduces felt recoil.

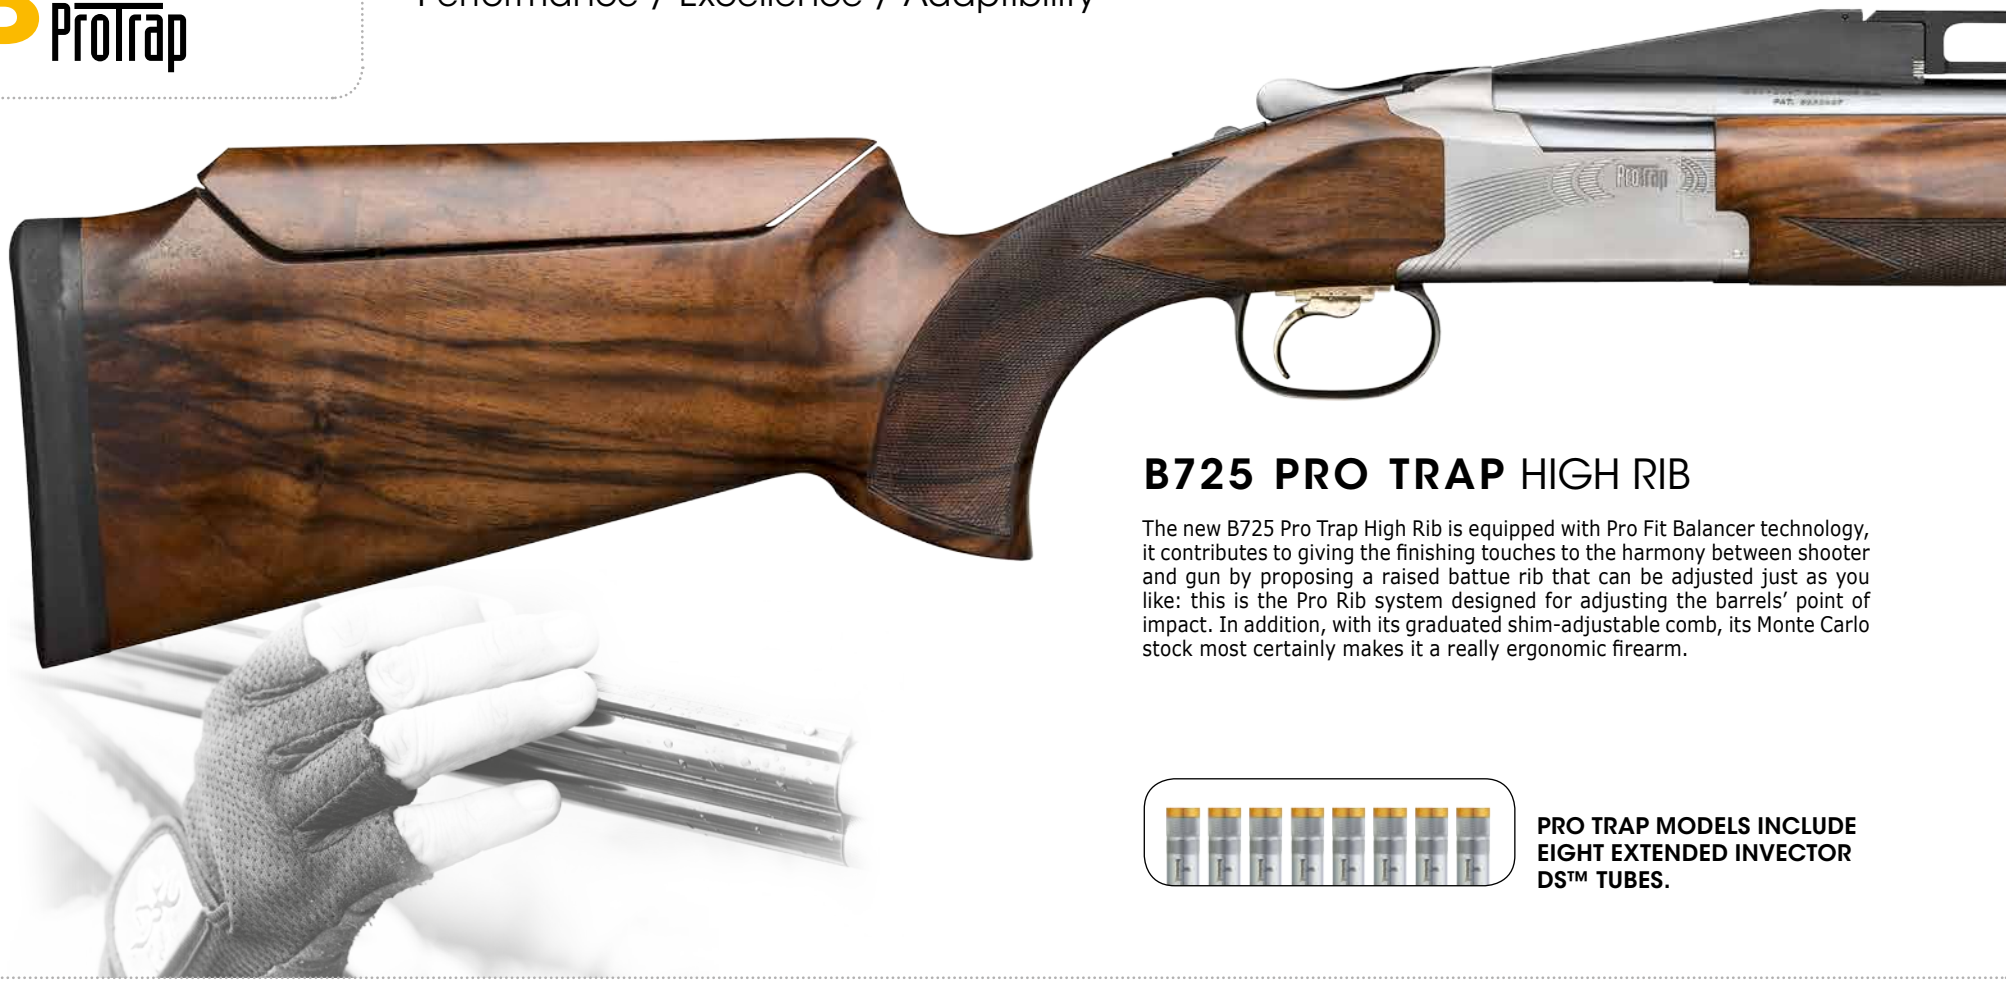
6 INTERCHANGEABLE RECOIL PAD

The B725 Pro Trap High Rib model is supplied with interchangeable 15 & 25mm recoil pads. They will enable you to adjust the length of your stock without the slightest difficulty.

PRO TECHNOLOGY

B725 ProTrap

Performance / Excellence / Adaptibility



B725 PRO TRAP HIGH RIB

The new B725 Pro Trap High Rib is equipped with Pro Fit Balancer technology, it contributes to giving the finishing touches to the harmony between shooter and gun by proposing a raised battue rib that can be adjusted just as you like: this is the Pro Rib system designed for adjusting the barrels' point of impact. In addition, with its graduated shim-adjustable comb, its Monte Carlo stock most certainly makes it a really ergonomic firearm.

PRO TRAP MODELS INCLUDE EIGHT EXTENDED INVECTOR DS™ TUBES.

Be at one with your gun

2016 NEW

B725 PRO TRAP ADJUSTABLE

This sports shooting rifle includes all the special features that made the B725 PRO TRAP a success: the Back Bored Vector Pro barrels, 12 mm top rib, Hi Viz sights, and a wide selection of 8 Invector DS Extended chokes. Browning has pushed performance potential to the extreme by adding two striking innovative developments to this famous model's original qualities, and further enhancing the balance of this over-and-under shotgun that was designed to be an extension of the shooter's body: a fully adjustable cheek piece; and a stock and barrel assembly with the Pro Stock and Barrel Balancers technologies respectively. The result is a B725 PRO TRAP that is fully... adjustable!

PRO TRAP MODELS INCLUDE EIGHT EXTENDED INVECTOR DS™ TUBES.

VECTORPRO

STEEL SHOT proved

OPTIMAL BALLISTIC PERFORMANCES:
Browning® Barrels Include 3 Advanced Technical Solutions

1 Vector Pro™

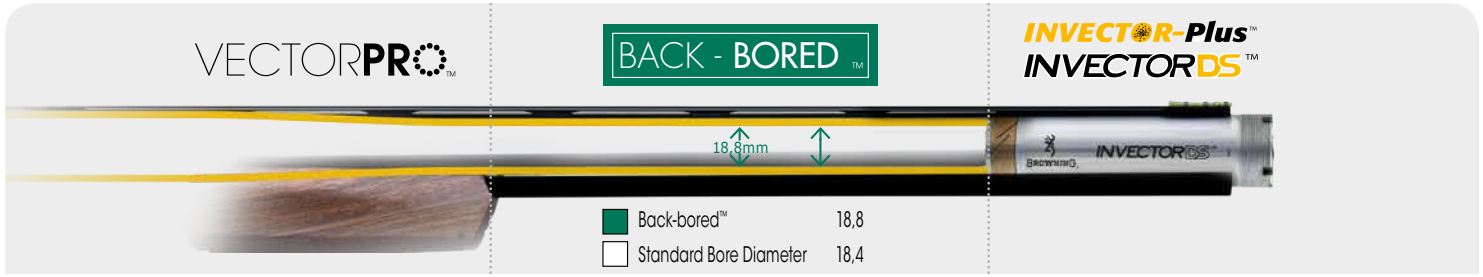
The new geometry of the extended Vector Pro™ forcing cone together with the Back-bored™ barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

2 Barrels

The principle of the Back-bored™ barrel is to increase the diameter of the barrel's bore by a standard value, from 18.4mm to 18.8mm.
Increasing the barrel bore diameter provides three benefits:
- increased speed and penetration
- better shot patterns
- less recoil

3 Chokes INVECTOR™

Adjustable Invector-Plus™ and Invector DS™ chokes have been specially developed by our Research and Development Department for our Back-bored™ barrel system. They have been designed to obtain "a perfect target" at different shooting distances.



A longer connecting cone | **Barrels** | **BROWNING® removable choke**

THE PERFECT TARGET

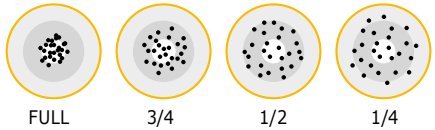
Our objective is:
- Shot pattern efficiency of 80% on target, i.e. 80% of the shot contained in the cartridge must be in a target area inside a diameter of 75cm.
- A perfect shot pattern: the shot pattern must be such that there is a minimum number of "empty" areas, i.e. areas in the target surface where there are no shot impacts.

AT DIFFERENT SHOOTING DISTANCES

Our objective is:
- To obtain the perfect target at different shooting distances. Depending on the type of choke used, the efficient shooting distance will be different. For example, at 15 m, with an Invector-Plus™ Cylindrical choke, we obtain target shot pattern efficiency of 80% with a minimum number of surfaces without any shot impacts.

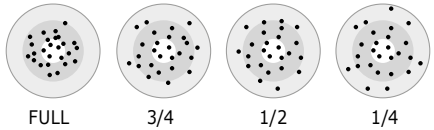
INVECTOR DS™ CHOKE TUBE SYSTEM

INVECTOR DS™



INVECTOR DS™ tubes even pattern percentage increments, offering just the right pattern for any shooting situation.

COMPETITOR



A competitor's choke tubes show little pattern difference between chokes constrictions.

THE BROWNING® CHOKE RECOMMENDED FOR DIFFERENT SHOOTING DISTANCES

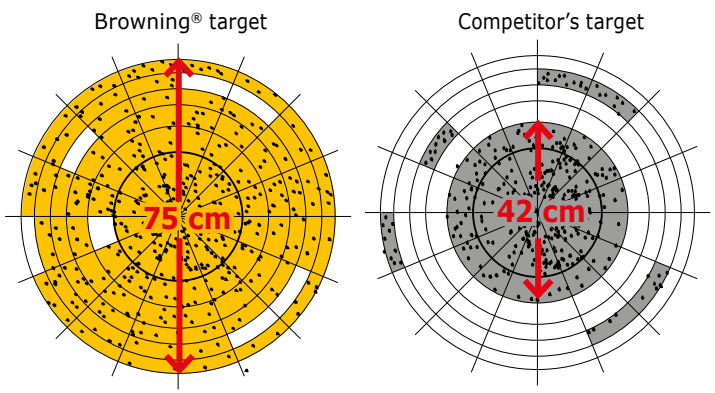
Depending on the Browning® choke you use, you can adapt your gun perfectly for the distances at which you shoot and the game you are hunting.

Full Choke = 35 m
3/4 Choke = 30 m
1/2 Choke = 25 m
1/4 Choke = 20 m

Cyl = 15 m

☐ Zones without any shot impact

1/2 CHOKE AT 25 m



See the full range of Invector DS™ and Invector-Plus™ chokes on pages 108 and 109.

T-BOLT
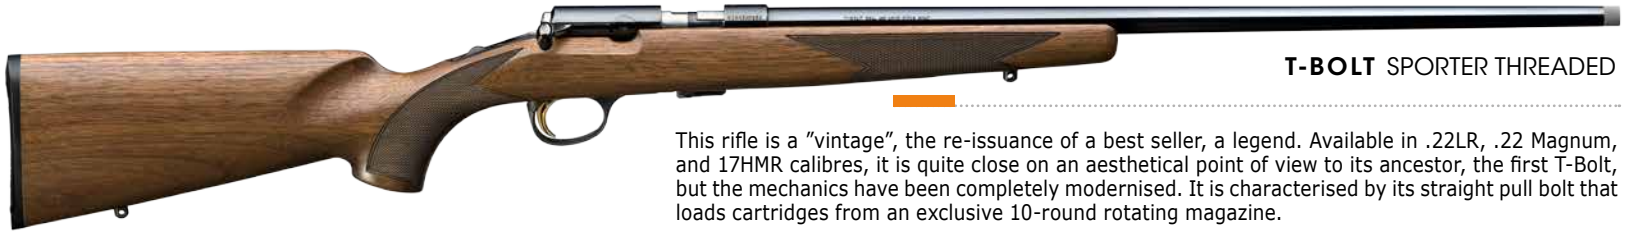
SPORTER

Rifles .22LR - 17HMR

T-BOLT SPORTER
COMPOSITE THREADED

This version is equipped with a buttstock made of highly-resistant ergonomic composite, allowing intense use in all conditions. Another very useful characteristic is an additional magazine integrated in the buttstock and, more particularly, in the pad.



T-BOLT SPORTER THREADED

This rifle is a "vintage", the re-issuance of a best seller, a legend. Available in .22LR, .22 Magnum, and 17HMR calibres, it is quite close on an aesthetical point of view to its ancestor, the first T-Bolt, but the mechanics have been completely modernised. It is characterised by its straight pull bolt that loads cartridges from an exclusive 10-round rotating magazine.

T-BOLT TARGET
VARMINT THREADED

The new T-Bolt Target Varmint Threaded rifle, specially designed for hunting vermin and pests from a hide, has added a wooden Monte Carlo Varmint stock to the heavy threaded barrel that guarantees its accuracy. Provided with mounting bases for scopes, this model, with its pleasantly traditional look, renews all the pleasure of shooting with a small calibre rifle.

.22LR 17HMR

ADDITIONAL MAGAZINE INTEGRATED IN THE BUTTSTOCK FOR THE COMPOSITE VERSION

An additional magazine integrated in the buttstock and, more particularly, in the pad.

During intense shooting, it is therefore very easy to quickly replace the first empty magazine.

BUCK MARK BLACK LABEL SUPPRESOR READY

2016 NEW

The main feature of this new model in the BUCK MARK BLACK LABEL range is the threaded barrel.

Browning® Buck Mark rim-fire pistols are very highly valued due to their quality, reliability and accuracy. These pistols have a receiver made from a single aluminium block machined using numerical control. The barrel is machined in a single top-quality steel block and the chamber is hand-bored for guaranteeing optimal accuracy.

BUCK MARK
STANDARD STAINLESS URX

Every Buck Mark pistol has fully adjustable sights. Breaks are light accurate and crisp. Grips, URX version in rubber or UDX in wood are perfectly ergonomic. Your hand positions itself systematically in the same place on the grip every time you fire. This allows more instinctive firing and improves accuracy.

1911-380 BLACK LABEL

Developed on the basis of the mythical arm created by the genial inventor John-Moses Browning® at the beginning of the 20th century, the Model 1911 (version reduced to 85% of the size of the original model in 45 ACP) range of pistols has now been enriched by the arrival of two newcomers soberly christened Black Label. Available in calibre 380, the first model has a pure, effective design: slide receiver and side panels are mat black, the 11cm barrel is in stainless steel, the magazine holds seven cartridges.
The second model , the 1911 Black Label Cal 22 LR is a well-balanced, supple, intuitive-in-use pistol. All in black with a 10-shot magazine, has been specially developed for perfect handling, the necessary prerequisite for firing accurately and safely. With its side slots, its laminated plywood side plates, its ambidextrous thumb-operated safety catch, its fixed sights and its rail beneath the barrel for fitting different accessories – the 1911 Black Label Laminated 22LR remains faithful to all the qualities of its renowned line of predecessors, whilst transcending them at the same time.

INCLUDES ABS CASE
The 1911-380 pistol is shipped in a rugged ABS carry case.

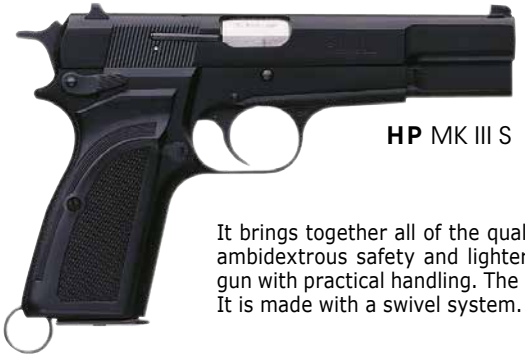
HP

Hand Guns

HP SILVER CHROME

The HP exists in the Silver Chrome version, which is equipped with a rear sight that is adjustable in elevation and direction and a sport front sight with a rounded base plate.

The slide and the receiver are nickeled, and the rubber grip is made by Pachmayr, for sure and efficient handling.



HP MK III S

It brings together all of the qualities found in the HP, yet with an additional ambidextrous safety and lighter weight (910g), which make it an accurate gun with practical handling. The Pachmayr handles ensure the best handling. It is made with a swivel system.

ADJUSTABLE **HP** PRACTICAL

The HP Practical meets the demands of Practical Shooting.
It has undergone several improvements, such as:
- adjustable, low profile sights
- particularly crisp trigger pull
- extremely comfortable handling due to its Pachmayr chequered rubber grips.

Before they are put on the market, Browning's guns have to undergo a wide range of extremely rigorous tests. These are B.A.C.O. (Browning Arms Company) internal tests.

None of its products will be approved unless it clearly meets the following 6 requirements.

In addition, we carry out a systematic inspection process of all all Browning® machines made guns, which involves many checks to ensure that every gun sold meets Browning's exacting criteria with regard to quality, performance and reliability.

B.A.C.O. Tests

BROWNING ARMS COMPANY

1 TESTS OF FUNCTIONING AND ENDURANCE

The purpose of these highly-demanding tests, which are conducted on both shotguns and rifles, is to ensure they operate correctly whatever types of cartridges are used. Thousands of cartridges are therefore fired to ensure the guns reliability; no broken or excessively worn parts are tolerated during this test. If such faults are found, they are returned on a systematic basis to Research and Development.

2 TESTS IN EXTREME CONDITIONS

When developing a new product, the purpose of this test is to try out the guns in the worst possible weather conditions, using polar temperatures of –30°C and very high temperatures of up to +50°C. The gun has to operate perfectly at these temperatures, using a wide range of cartridges. You can therefore use our guns in the most testing conditions, in all circumstances and with complete confidence.

3 "TORTURE TESTS"

When a new product is being developed, it undergoes a wide variety of tests, which are generally more demanding than applicable C.I.P. norms, including a set of "torture tests". A set of guns are subjected to excessive pressure tests and obstruction tests to ensure the strength and reliability of our guns. In addition, we conduct safety tests, which consist of dropping the gun onto its different sides to check its reliability and safety. The legendary strength and reliability of Browning's guns is largely due to their completing all these tests successfully.

4 GUN CHECKS

When they are manufactured, every gun is subject to a very wide variety of visual inspections and measurements, and has to meet the requirements of the specifications in every respect.

5 GUN TESTS

All guns manufactured are fired to ensure their precision and that they are operating properly.

6 ACCURACY TESTS

We check the precision of every gun which emerges from our workshops. For shotguns, we check the quality of the shot patterns as well as the proper convergence of the barrels at 35 metres. For rifles, we check the precision and pattern of every gun.

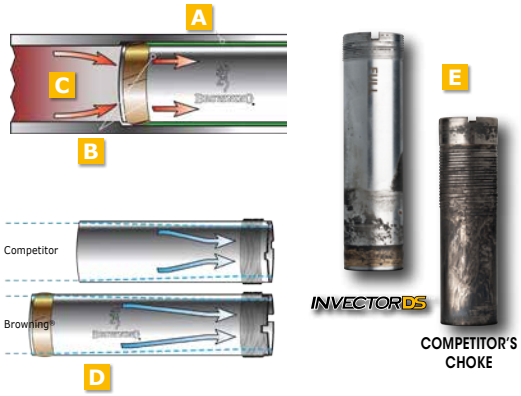
INVECTOR DS™

Invector DS™ chokes offer the best performance on the market. At 80 mm long and with an exclusive internal shaping, they are designed to deliver the finest performance at any shooting distance. They also ensure better pattern consistency for lead and steel shot.

Finally, after an intensive session firing off 500 of the most dirt-encrusting rounds, they also keep the choke clean by restricting the spread of gases, while the patented gas seal makes the choke easier to remove.



A Area between tube and barrel stays clean.

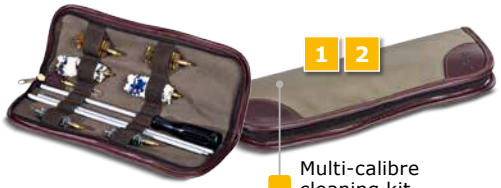
B Special brass seal has multiple cuts that allow it to compress tightly against the barrel wall and completely seal against gas leakage.

C Gas exits completely through tube.

D Longer over all length, as much as 1 1/8 over a leading competitor, allows a more gradual choke taper for denser shot patterns, better pattern percentages and faster shot velocities.

E Extensive shooting of 500 rounds.

ACCESSORIES



Multi-calibre cleaning kit

Combination lock

Browning® treatments are environment friendly and OEKO-TEX® Standard 100 certified.

3 in 1 **water-proofing** spray for hunting wear

- Waterproofing
- Absorbs odoursr
- Absorbs UVs

3 in 1 **washing product** for hunting wear

- Cleans without damaging
- Cares for the membrane
- Absorbs odoursr
- Absorbs UVs

Holds up to 100 12-cal. cartridges

Absorbs recoil impacts

- Provides anti-corrosion protection by forming a vapour envelope around the gun. Using a VCI sleeve inside a cabinet provides added protection for the gun's metal components.
- Available in 1 or 2 pieces

Padded straps

3 side pockets

Holds 10 rifle rounds

Holds 25 cartridges

LEGIA SPRAY NEW FORMULA

New formula Legia oil is ideal for looking after your gun and giving it total protection. The new improved formula cleans and lubricates not only metal parts, but also wooden and plastic elements down to temperatures of -40°C. Available in 200ml and 750ml spray versions (with propellant)

A means for protecting both firearms and accessories. The soft imitation felt fabric does not damage firearms and includes a Zorb Tech™ waterproof top. Zorb Tech™ keeps spills from spreading and cleansing agents from soaking through. This mat is also washable, dryable, and treated to be stain resistant

Browning® Pro Steel safes: safety made safer

PICTOGRAMS NEXT TO THE SAFES ON THIS PAGE HIGHLIGHT THE MAIN TECHNICAL FEATURES OF EACH SAFE.

While many gun safes will secure your guns from unauthorized hands, a Browning ProSteel safe offers style, security, fire protection and storage solutions for real protection from determinated criminals and the ravage of fire.

Our unmatched interiors configurations are the most versatile on the market, allowing you to store more of your guns and valuables.

Browning safes give you:

1 SAFETY
Browning safes are certified for their resistance against forced entry (UL RSC) and for their manufacturing standards (VDMA).

2 FIRE RESISTANT
All Browning safes are fire-resistance rated for 30 to 60 minutes at 760°C, providing one of the most effective levels of protection on the market.

3 EASY ON THE EYE, GENTLE ON THE GUN
For us hunters, our guns come first. Browning safes and their fine interior fittings are the perfect storage solution for your firearms and valuables.

FORCE DEFLECTOR
This exclusive system prevents the handle from being forced by causing it to spin freely if excessive force is applied.

3.5 MM STEEL DOOR
Thick, reinforced door provides increased safety and protection against forced entry.

3 MM STEEL BODY
Thickness of the steel: 3 mm.

9 HINGES
9 door-mounted locking bolts.

PERMANENT AND REMOVABLE BOLTS
1-inch thick active locking bolts on the top, bottom and right sides of the door.
Permanent locking bolts on the left side of the door.

UL STANDARD
American burglary-resistance standard.

VDMA STANDARD
Browning safes meet VDMA 24 992 Level A standard.

180° DOOR OPENING ANGLE

The door opens fully, i.e. to 180°.

INTERIOR LAYOUT

The stylish modular shelves can be repositioned up and down and from side to side.

DPX SYSTEM

The DPX door rack system provides the storage solution for all hunting accessory items.

REINFORCED DOOR

Profiled steel door frame provides even better protection against forced entry.

AMMUNITION BOX

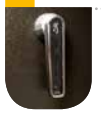
Safe includes a removable ammunition box.

ELECTRONIC LOCK

Door is closed by an electronic combination.

3-SPOKE HANDLE

Safe comes with a chrome-finish 3-spoke handle.

1-SPOKE HANDLE


Safe comes with a 1-spoke handle.

QUICK STORAGE

System offers quick retrieval and storage of guns in the door.

THERMABLOCK

30- to 60-minutes fire protection.

Browning, clothing designed by hunter for hunters

At Browning, our clothes are designed by hunters for hunters: each item of clothing starts from a passion for the hunt, years of experience and field tests, and the expertise that all this brings.

Hih-performance materials are combined with cutting edge technology to offer full-body protection against the forces of nature - and not just against the wind, rain and cold, but also thorny thickets and other bramble bushes.

While Browning's clothing is tough enough to resist any challenge, it is also comfortable for hunters, leaving them free to indulge their passion to the full. The materials we use are supple enough for the clothes to adapt to any body shape, making them not just hard-wearing and elegant but more efficient as well.

Peak protection

"Our clothing range is sure to be a winner, even with the most demanding users: odor-resistant, stain-resistant, silent, and more. Because a hunter's «second skin» has to be more than just good enough"

ODORSMART™

FEWER ODOURS EMITTED ADVANCED SCENT CONTROL

Odour is caused by specific bacteria that thrive on human skin.

When bacteria metabolise, their waste produces odours that can be detected by deer and other big game animals.

HOW DOES ODORSMART™ ADVENCED WORK?

Simply stated, Odorsmart™ attacks the bacteria on the skin and in the "microclimate" immediately around the skin, killing them BEFORE they have a chance to develop odours.

Then the remaining molecules of odour are captured in the material without escaping into the open air.

With just normal use and care, Odorsmart™ will last for the life of the garment and does not require recharging, changing or other special care other than the normal washing cycle.

ZIP'IN SYSTEM

FLEXIBLE INSULATION SYSTEM

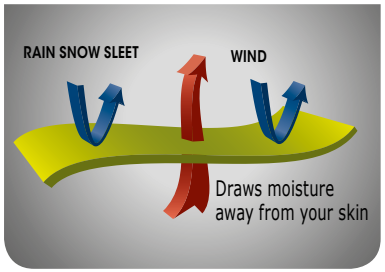
Zip'In™ is a zip fastening system that can be used to insert insulating clothing inside a jacket.

This enables hunters to adjust the insulation level of their jacket depending on outside conditions or to use each product separately.

PRE-VENT

WATERPROOF - WINDPROOF - BREATHABLE

YOUR BAD-WEATHER PROTECTION



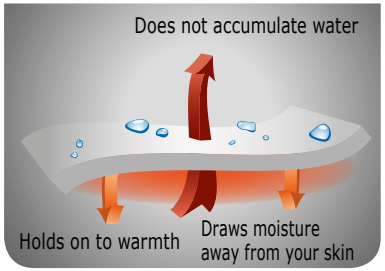
PreVent™ is our watertight, windproof and breathable techno-material.

The impermeability rating at 10.000mm and the care taken in product design for preventing all water infiltration guarantees that our PreVent™ wear is of the very highest quality. PreVent™ marked clothing is designed to resist rain, snow, wind squalls whilst remaining breathable and comfortable for the hunter at the same time.

TECHNICALITY

Browning® hunting wear uses the **latest technologies** giving hunters **unmatched comfort** and **effectiveness**.

THE BEST INSULATION FOR ALL WEATHER CONDITIONS



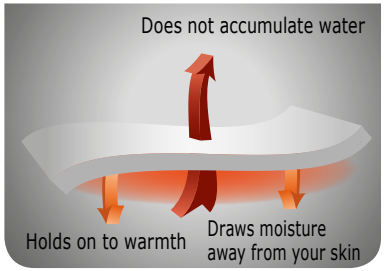
PrimaLoft™ is a premium performance insulation engineered for superior warmth, water resistance, loft, softness and compressibility.

These fibres are the finest in the industry and are densely packed to retain heat better for improved thermal efficiency. PrimaLoft™ fibres are specially treated to repel water molecules and absorb less water to make it more water-resistant and faster drying than other polyester alternatives.

Tightly-compressed fibres also make PrimaLoft™ highly wind-resistant as the smaller, finer fibres compress more and are lighter, less bulky, more breathable and extremely compressible.

That's what makes our clothing with PrimaLoft™ insulation so exceptional.

WARMTH-WITHOUT-BULK INSULATION



Thinsulate™ Insulation is used in your jackets, pants or gloves to help keep you warm when it's cold outside.

The unique microfibres or fine fibres that make up Thinsulate insulation work by trapping air molecules between you and the outside.

The more air a material traps in a given space, the better it insulates you from the cold outside air. B

ecause the fibres in Thinsulate insulation are finer than the fibres used in most other synthetic or natural insulation, they trap more air in less space, which naturally makes Thinsulate insulation a better insulator.

A KEVLAR® BASED FABRIC FOR EXTREME RESISTANCE.

Armortex™ is the fruit of the latest innovations in textiles that are ultra-resistant to abrasion and puncturing.

Armortex™ is an aramid fibre based fabric (Kevlar®) and is used by numerous professionals in domains as varied as forestry work clothing and protective clothing for motorcyclists together with many other fields where protection is a vital element in clothing.

Armortex™ forms a real barrier for protecting you against bramble, thorns and nature's other forms of aggression.

AN EXTRA-TOUGH, LIGHTWEIGHT FABRIC

Hydura™ is a fabric made from ultra-resistant polyamide fibres.

Its weave and the fibres' special treatment give extra resistance to abrasion, whilst keeping them sufficiently flexible and lightweight for maximum comfort at the same time.

PPE

This abbreviation shows that the product conforms to the following standards:

- EN 166: for glasses
- EN 352: for ear defenders
- NF S 74-567:2014 and EN 89-686-CEE: for hi-viz vests and jackets

MASTERS II

The **benchmark range,** made **even better** for the most demanding sports shooters.

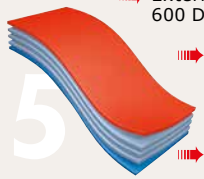
PROTECT HUNTER/ONE

The **5-layer** composition of the **PROTECT HUNTER** and **PROTECT ONE** jacket is resistant to perforation up to a weight in excess of 2100 N, ie 210 KG approx.

PROTECT PRO/PRO EVO

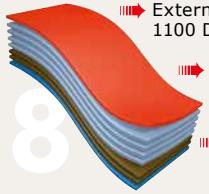
The **8-layer** composition of the **PROTECT PRO** jacket is resistant to perforation up to a weight in excess of 3000 N, ie 300KG approx.

5 LAYERS



- External side Cordura 600 DTEX
- Anti-perforation DYNEEMA® 3 layers
- Tear resistant to 210kg
- 1 interior surface of the vest

8 LAYERS



- External side Cordura 1100 DTEX
- Anti-perforation DYNEEMA® 4 layers
- 2 thermo regulating layers
- 1 interior surface of the vest
- Tear resistant to 300kg

HOW TO CHOOSE THE RIGHT SIZE OF THE JACKET ?

Sizes	T45	T50	T55	T60	T65	T70	T75	T80	T85
Chest Sizes	45 cm	50 cm	55 cm	60 cm	65 cm	70 cm	75 cm	80 cm	85 cm

The size of the jacket is proportional to the chest size.
The Velcro neck and belly straps are adjustable.

Do not overtighten, and choose the right size to avoid hurting your dog.

BROWNING® PARTNER LODGES

A Unique Sporting Challenge Awaits You !

www.magicsafarilodges.com

Browning has teamed up with Magic Safari Lodges to offer you a selection of prime destinations for a hunting experience you won't forget. Find out about our Browning Partner Lodges, where Browning rifles and/or shotguns are available free of charge so that you can hunt with the most formidable and reliable guns, without the administrative hassle of taking a gun on a commercial flight.

Book your next trip now and get ready for one of your greatest ever hunting experiences!

LES COLVERTS DE SABOURNAC – FRANCE

www.sabournac.com

Unique in Europe, Sabournac is a private hunting estate that has been organising mallard shoots over the last twenty years or so on the principles of the large "English style shoots". This type of hunting surprises and appeals to many hunters, who like shooting a few hundred cartridges on high-flying mallards. The birds fly over surprisingly high, which challenges top-shooters to equip themselves with full-choke guns. The estate is open from September 1st to January 31st and may be reserved by a single group of 4 to 12 guns.

GREAT SPANISH HUNT – MADRID, SPAIN

www.greatspanishunts.com

Only 45 minutes from Madrid, outstanding red-legged partridge shooting in Spain is at its very best on the La Fnca and Fuensauco estates, run by Javier Corsini who is one of the most respected shoot owners in Spain with his 30 years of experience. His professionalism, his rigour and his expertise are a guarantee that you will have a magnificent stay with a booty of between 500 and 2,000 birds, depending on the size of the party. Surrounded by an estate of 3,000 hectares, a luxury hunting lodge is ready to welcome you, with its gastronomic creations and top-quality Spanish wines that will really make your stay unforgettable.

"Magic Safari Lodges" is the premier guide to exceptional hunting destinations specially conceived for those looking for better experiences, blending deluxe facilities with unforgettable locations.
