BROWNING
2018

BROWNING, THE BRAND

The Browning brand is about the genius of a man born 160 years ago in a small town in the American West. John Moses Browning began inventing at an early age. He had a prolific mind, and revolutionised firearms design time and time again. From the Auto-5 and the B25 to the Bar and more, every one of his designs is a milestone; every work he created is a source of inspiration to future generations. A legacy like this naturally demands that excellence follows.

And so, now as always, every shotgun, rifle, ammunition and item of equipment made by Browning undergoes a mandatory series of stringent tests so that you can be confident in the knowledge that they are reliable, high-performing and built to withstand the ravages of time.

THE PERFORMANCE

The quality of a firearm, of an ammunition and the effectiveness of an item of clothing are down to observation, talent and hard work: three creative cornerstones that mean as much to Browning as its earliest and most precious legacy. The confidence that the buckmark brand inspires can be traced directly to the people behind the name, and their attentiveness and desire to deliver the right solutions - our deeply held values.

Hunters and sports shooters alike are sure to find a Browning product that will take their passion to a new level.

The only thing that matters on the beat, in a hide, on the stalk, at the clay pigeon stand or in front of the target is the excitement that grips us when all the conditions are just right for turning great times into unforgettable memories.

So let us help you give it your best shot…

OUR VALUES

There is one devastatingly simple target that never leaves our sights: to bring you the best. And our teams are relentless in applying their technical expertise and aesthetic acumen to find new ways of making our current guns, ammunition and items of equipment even better.

Because our engineers have a passion for hunting and a deep understanding of the difficulties that occur during a hunt, they bring all their personal experience to the solutions they devise and develop.

This continual fine-tuning, this increasingly meticulous scrutiny to detail ultimately makes all the difference – these are Browning's signature touches, its distinctive hallmark among other manufacturers, the proof of its commitment to delivering ever-higher performance.

OUR PLEDGE

Every hunter and sports shooter should be able to purchase the equipment they need and which is right for them, whatever their budget and goals, regardless of whether they follow the latest technological innovations or succumb to the charms of the eternal classics, are or would like to be discerning amateurs, recent converts or old hands. This is our belief. This is our pledge.

Browning has always adhered to this mindset when developing its product lines. The quality of our products is a true reflection of the exacting demands that drive us. What unites us is our pride.

The guns that leave our factory come with a ten-year warranty and a blend of reliability, sturdiness and effectiveness. From manufacturing to fitting and testing, and on to finishing, they each underline the uniqueness of a brand devoted to shooters who are driven by passion.

John Moses Browning devoted his entire life to guns. That story continues today in the John M. Browning Collection, which duly bears the two hallmarks of his talent: groundbreaking mechanical systems and the handmade custom finish you want.

He left a huge impression on the world of gunmaking, and on the gunmaker to which he gave his name. You will find the same devoted and likeminded spirit lives on today in Belgium.

BROWNING, FOR THOSE IN THE KNOW

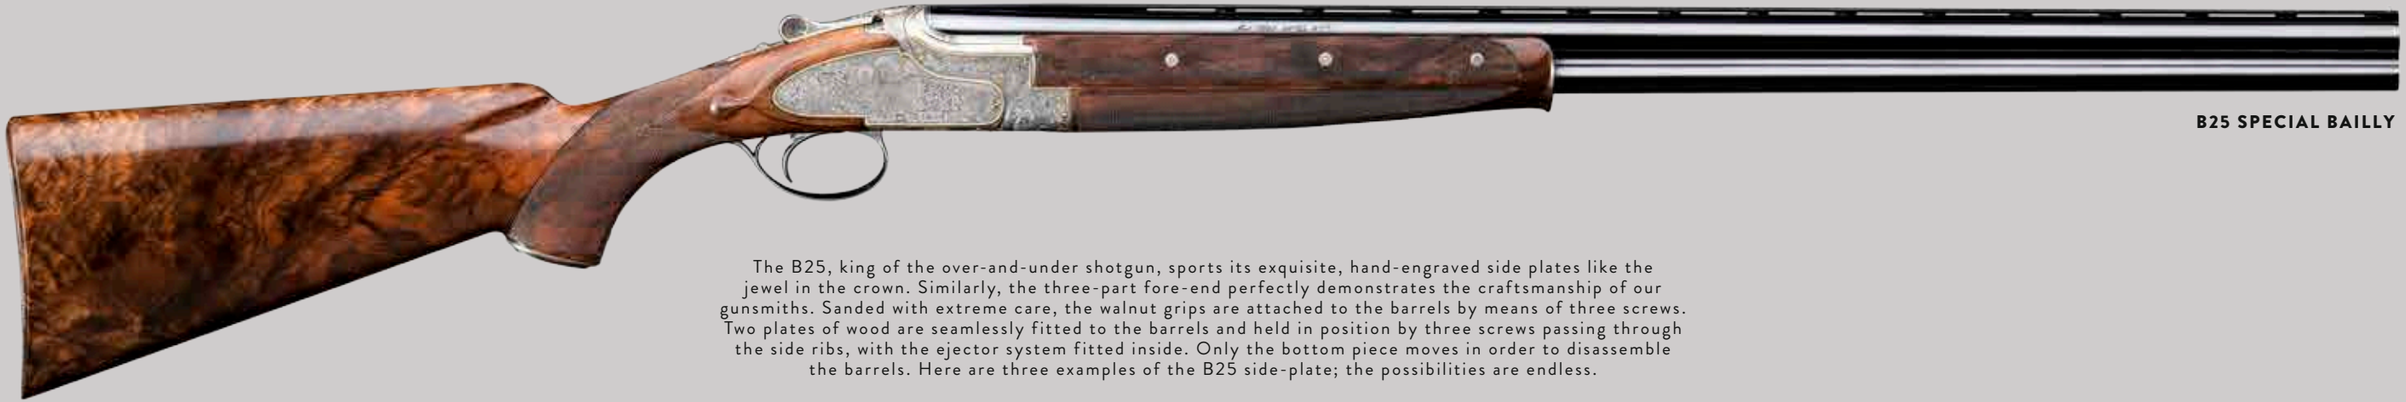
JOHN M. BROWNING COLLECTION

INTRODUCING THE JOHN M. BROWNING COLLECTION

B25 RENAISSANCE

There are four grades of enhancements for the B25 (the Contre-Platine, D Grades, C Grades and B Grades), of which the Contre-Platine is the best there is. It is the only grade that includes side-plates as an option. The engraving is superb, and shown here is a small sample of the wide choice available.

THE B25 - HANDMADE IN BELGIUM
BY EXPERTS FOR EXPERTS



B25 SPECIAL BAILLY

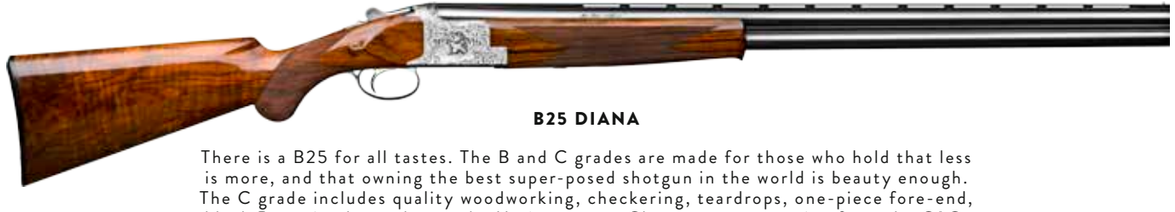
The B25, king of the over-and-under shotgun, sports its exquisite, hand-engraved side plates like the jewel in the crown. Similarly, the three-part fore-end perfectly demonstrates the craftsmanship of our gunsmiths. Sanded with extreme care, the walnut grips are attached to the barrels by means of three screws. Two plates of wood are seamlessly fitted to the barrels and held in position by three screws passing through the side ribs, with the ejector system fitted inside. Only the bottom piece moves in order to disassemble the barrels. Here are three examples of the B25 side-plate; the possibilities are endless.

B25 SPECIAL FLOWERS

B25 D5G SIDE PLATE

B25 D5G

As you would expect with the best super-posed shotgun in the world, the standard of craftsmanship throughout is superb. Among them is the Grade D, the ultimate range of box-lock. The frame has been hand chiseled, filed and shaped by a Herstal master gunsmith to ensure the smoothest action, while the best quality wood has been sourced to balance elegance with hardiness. The one-piece fore-end is tulip shaped. On the stock, teardrops have the effect of making the action frame appear longer and more refined. The checkering is elaborate and exact. You can choose your engraving from the D4G, D5G or the Special Autumn models.



B25 DIANA

There is a B25 for all tastes. The B and C grades are made for those who hold that less is more, and that owning the best super-posed shotgun in the world is beauty enough. The C grade includes quality woodworking, checkering, teardrops, one-piece fore-end, black Browning butt-plate and a Heritage case. Choose your engraving from the C2G, C3, Special or Diana models.

B25 B2G

The B grade is the purist's preference, the "naked" B25. It's all about the mechanics, tolerances and materials. But it still makes some concessions to form. Engraving can be chosen from the B2G, B7 Evolution or Sporter New Generation models. Each comes with B grade woodworking and checkering, a one-piece fore-end, Browning butt-plate and a Heritage case.

HAND FINISHED B15 IN BELGIUM

B15

THE LEGEND REINVENTED

The B15, the shotgun the Browning faithful has been waiting for, was developed in 2015, 90 years after the B25 changed the gun world forever. Like its illustrious predecessor, the hand-finished B15 was developed and refined by the gunsmiths at the Fabrique National in Herstal. That means you can expect balance and reliability. You can also expect precision engineering and the finest of aesthetic finishes. The B15 is available in four grades with a choice of exceptional engravings and wood quality. Butt-plates and fore-end style are also included. But at its heart is the locking system and all the technical features of the legendary B25, as well as the new and innovative elements listed here.

B15 BEAUCHAMP GRADE E 12M

B15 BEAUCHAMP GRADE D 12M

B15 BEAUCHAMP GRADE C 12M

B15 BEAUCHAMP GRADE B 12M

NEW

B15 BEAUCHAMP GRADE E 20M

Two years after it was developed, the B15 is now available in 20-gauge models. The engravings feature slight variations from the 12-gauge models, but the same DNA can be seen in the hunting scenes on grades B and D and the chimera on grades C and E. And the philosophy is unchanged: sophisticated efficiency. True shotgun connoisseurs will be won over by the B15, appreciating its style for sure, but enjoying the technical quality even more.

Browning is the name behind more than 500 FITASC competition medals since 2009. Champions trust us because our expertise is born of a long-standing tradition of excellence that never lets them down.

But we don't rest on our laurels at Browning. Every year, we push back the boundaries with our innovations to keep our shooters among the medals.

BROWNING, FOR THOSE IN THE KNOW

B725 PRO

PERFORMANCE - EXCELLENCE - ADAPTABILITY

B725 PRO SPORT

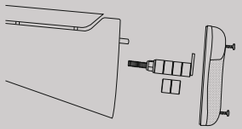
SHOOTER AND GUN AS ONE

The B725 Pro range has been designed to provide a perfect gun fit whether you're shooting sporting or compak. The advanced engineering of its adjustable comb, cutting-edge recoil pad and Invector DS™ Extended chokes are further enhanced by the groundbreaking Pro Balance System that lets you redistribute the weight of the stock and barrels to fine-tune the gun's balance just the way you want it.

1

STOCK BALANCE

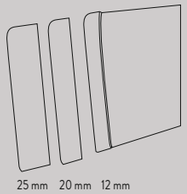
The Pro Balance System allows shooters to fine-tune the balance points for a perfect mount and swing. Adding weights to the stock helps balance the shotgun, aids follow-up shots and the additional mass reduces felt recoil (ref. B13380007, see page 81).



2

INTERCHANGEABLE RECOIL PAD

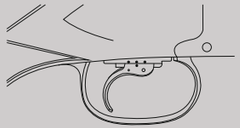
The B725 Pro range is supplied with interchangeable 12, 20 or 25mm recoil pads. They will enable you to adjust the length of your stock without the slightest difficulty (see page 81).



3

TRIPLE TRIGGER SYSTEM

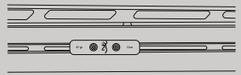
The Triple Trigger System fine tunes finger-to-trigger reach on target models. It includes three trigger shoes: wide checkered, narrow smooth and wide smooth canted.



4

BARREL WEIGHT

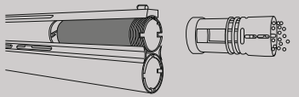
The barrel's counterweight is comprised of tungsten plates which enable the gun's centre of gravity to be moved up to 20mm forwards (ref. B133800080, see page 81).



5

INVECTOR DS™ CHOKES

The Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment (see pages 80 and 146).



B725 PRO TRAP ADJUSTABLE

This trap gun includes all the special features that made the B725 Pro Trap a success: the Back Bored Vector Pro barrels, 12mm top rib, Hi-Viz sights, and a selection of eight Invector DS™ Extended chokes. Browning has pushed performance potential to the extreme by adding two striking innovative developments to this famous model's original qualities, and further enhancing the balance of an over-and-under shotgun that was designed to be an extension of the shooter's body: a fully adjustable cheek piece; and a stock and barrel assembly with the Pro Stock and Barrel Balancers technologies respectively. The result is a B725 Pro Trap that is fully... adjustable!

B725 PRO TRAP INV DS

This model is a new version of the B725 Pro Trap High Rib. It combines unmatched firing comfort with high performance. Its secret? The Pro Balance System, a brand-new adjustment system for fine-tuning the gun's balance by modifying the weight of the stock and the barrels as required. Fitted with eight Invector DS™ Extended chokes, Hi-Viz sights and two extra triggers, it can be adapted to the requirements of the most demanding sport shooters.

B725 PRO TRAP HIGH RIB

The B725 Pro Trap High Rib is equipped with Pro Fit Balancer technology. The raised battue rib is the finishing touch to harmony between shooter and gun. It can be adjusted as you like to fine-tune the barrels' point of impact. In addition, with its graduated shim-adjustable comb, the Monte Carlo stock makes it an ergonomic firearm.

DISCOVER THE B725 HUNTER VERSION ON PAGES 30-33 – ACCESSORIES SEE PAGES 80-81

B725 SPORTER

THE LEGENDARY STRENGTH IS NOW COMBINED
WITH REVOLUTIONARY DESIGN AND FEATURES

B725 SPORTER GRADE 5

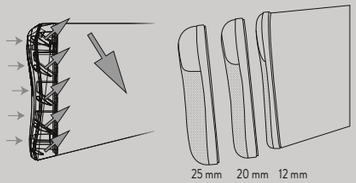
STYLE AND TECHNIQUE IN PERFECT BALANCE

The Browning B725 is an aesthetic and technical revolution in over-and-under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding over-and-under shotgun on the market.

1

INFLEX II RECOIL PAD

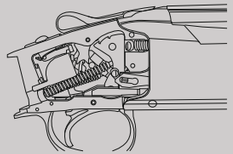
An Inflex II recoil pad is fitted on all B725 shotguns as standard. This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. This exclusive material makes shouldering easier. Two other pads, 20mm or 25mm thick (available as an option), make it easy to adjust the length of your stock.
In this way, you can adapt your B725 to your own physique and also adapt it depending on the hunting season (see page 81).



2

HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

This firing system is shorter, faster and lighter giving more control over your shooting. Browning's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

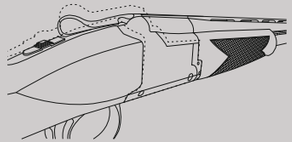


3

LOW ACTION FRAME

The low action frame provides the benefit of faster aiming and, therefore, more instinctive shooting. The frame's inline recoil reduces muzzle flip providing a more comfortable shooting position, making it highly manoeuvrable and effective when shooting.

Action frame guaranteed for ten years.

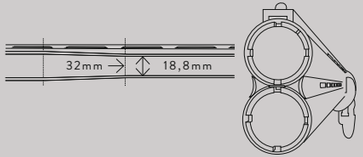


4

BACK-BORED™ VECTOR PRO™ BARREL

The principle of the Back-bored™ Vector Pro™ barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone which provides three advantages:

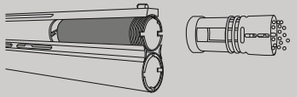
- increased speed and improved pellet penetration
- improved pellet grouping
- reduced recoil.



5

INVECTOR DS™ CHOKES

The Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment (see pages 80 and 146).



B725 SPORTER II ADJUSTABLE

This B725 is supplied with an adjustable comb that lets you alter the drop and cast the way you want it. You can also adjust the gunstock with mm precision for accurate aiming. The gunstock is also ready to accommodate counterweights (not included). At the other end, this model also comes with a new tulip fore-end.

B725 SPORTER II

This version of the B725 retains the main technical qualities of the line and is fitted with a counterweight-ready gunstock (counterweights not included). The new tulip fore-end is certain to be a popular addition.

B725 SPORTER II TRAP FOREARM

This version of the B725 Sporter II features a fore-end contoured to suit the demands of trap shooting.

B725 SPORTER BLACK EDITION

This version of the B725 has an entirely black receiver with special Browning engravings on it. The new Browning B725 is an aesthetic and technical revolution in over-and-under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding over-and-under shotgun on the market.

STOCK BALANCE

The Pro Balance System allows shooters to fine-tune the balance point for a perfect mount and swing. Additional weight at the butt improves the gun's balance and makes your second shot easier. The added mass also helps absorb recoil impact.

B525

THE PERFECT BLEND OF RELIABILITY AND PERFORMANCE

B525 SPORTER ONE 12M

HAND FITTED TO CREATE THE BEST THERE IS

The B525 is the only shotgun to be hand-fitted. Fitting important parts is done employing traditional methods (using red ochre) so as to make the Browning B525 the reference in shotguns. The attention to detail is unique, just like the “Browning feeling” when the gun locks on closing.

B525 SPORTER ONE 20M

This model retains all the original features that made the B525 Game One a success and tailors them to the specific requirements of sports shooting. The Auto Safety system and an Inflex II recoil pad are available, while the 10mm-width ventilated top rib offers faster, more instinctive target acquisition. This attractively priced 20 Magnum is made from grade 2 American walnut and is engraved with the same designs as its hunting counterpart.

B525 TRAP ONE

The guiding principle of the B525 Trap One is to make efficiency available to all. And the price is intended to let everyone enjoy Browning’s sports shooting expertise. The stock and the fore-end have been shaped to meet the specific requirements of clay shooting in full. It has the name Trap One proudly engraved on the sides of the receiver and the four Invector-Plus chokes.

B525 ULTRA XS PRO ADJUSTABLE

In 2018, the Ultra XS range is being extended with this latest model that is certain to delight sporting shooters. It is supplied with eight Invector Titanium extended chokes, two spacers, three Inflex recoil pads and three trigger shoes, and can thus be balanced on demand thanks to a clever weight and counterweight system (gunstock and barrel). The B525 Ultra XS Pro Adjustable is equipped with an adjustable cheek-piece and a trap fore-end. Its technical innovation in no way impairs its elegance, as can be seen in the new engraving decorating its action frame and the T4 wood with oiled finish of which it is made.

HERITAGE HUNTER 12M

Available in 12M calibre, the Heritage Hunter 12M is a model of perfect balance, delicacy and ease of handling. It possesses a rounded half-pistol stock in superb oil-rubbed walnut. Partridge and woodcock are magnificently represented and enhanced on its low, thoroughbred action frame.

HERITAGE SPORTER II 12M

The Heritage Sporter combines the performance of a modern shotgun with the elegance of a true deluxe gun. It embodies the line of the hunting model with its magnificent side plates, but with the specifications of the Sporter versions.
The pistol gunstock and tulip forearm are made from beautiful, oil-finished walnut.
Each gun is beautifully engraved.

B725 HUNTER

THE LEGENDARY STRENGTH IS NOW COMBINED
WITH REVOLUTIONARY DESIGN AND FEATURES

B725 HUNTER GRADE 5 12M & 20M

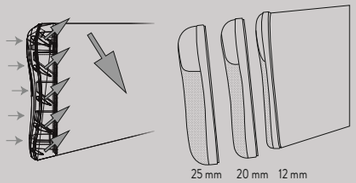
"LEGENDARY RELIABILITY" AND "INNOVATION" ARE THE B725'S WATCHWORDS

The Browning B725 is an aesthetic and technical revolution in over-and-under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding over-and-under shotgun on the market.

1

INFLEX II RECOIL PAD

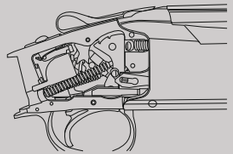
An Inflex II recoil pad is fitted on all B725 shotguns as standard. This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. This exclusive material makes shouldering easier. Two other pads, 20mm or 25mm thick (available as an option), make it easy to adjust the length of your stock.
In this way, you can adapt your B725 to your own physique and also adapt it depending on the hunting season (see page 81).



2

HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

This firing system is shorter, faster and lighter giving more control over your shooting. Browning's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

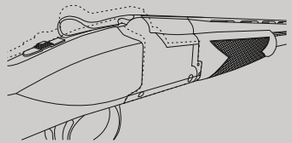


3

LOW ACTION FRAME

The low action frame provides the following benefits when shooting. It enables faster aiming and therefore more instinctive shooting. Thanks to the frame's inline recoil providing a more comfortable shooting position, it reduces muzzle flip and makes for good manoeuvrability and effectiveness when shooting.

Action frame guaranteed for ten years.

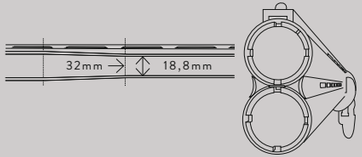


4

BACK-BORED™ VECTOR PRO™ BARREL

The principle of the Back-bored™ Vector Pro™ barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone which provides three advantages:

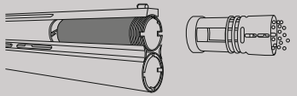
- increased speed and improved pellet penetration
- improved pellet grouping
- reduced recoill.



5

INVECTOR DS™ CHOKES

The Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment (see pages 80 and 146).



B725 HUNTER UK PREMIUM II 12M & 20M

The B725 Premium II UK range reach new aesthetic heights with beautifully honed contours. It sports a new gunstock delightfully complemented by a rounded pistol grip, and the spirit of feathered game remains eternal through a new series of animal engravings depicting partridges and pheasants on the 12-gauge model, and pheasants and woodcock on the 20-gauge version.

B725 HUNTER UK BLACK GOLD II 12M & 20M

This B725 is available in both 20-gauge and 12-gauge versions, and now comes with a rounded pistol grip buttstock. Its elegant black action frame features new hunting scenes with partridges, prominently highlighted in gold to eye-catching effect, alongside pheasants (12-gauge) and woodcock (20-gauge).

B725 HUNTER PREMIUM 12M & 20M

Slim, elegant, this B725 (12 or 20-bore) is remarkably effective. Its rapid, accurate swing associated with its Back-bored™ Vector Pro™ barrels and Invector DS™ chokes, will give you outstanding performance and perfect balance. This elegant model with its pistol grip is your faithful companion when hunting small game, and will bring you complete satisfaction.

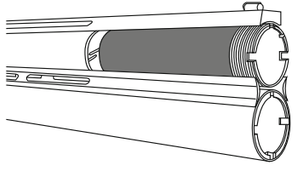
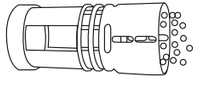
B725 HUNTER LIGHT PREMIUM 12M & 20M

The B725 Hunter Light Premium exemplifies Browning's combination of efficiency, weight and design. Its action frame in lightweight aluminium reduces the weight of the gun by over 300g for an even easier swing. Shouldering, tracking and hitting the target become a single motion, because this gun is a featherweight in the literal sense only. Its Back-bored™ barrels, five Invector DS™ chokes, and 20mm recoil pad are a credit to modern technological progress, while the exquisitely designed nickel plated aluminium receiver and grade 3 walnut woodwork make it an over-and-under shotgun of great distinction.

INVECTOR DS™ CHOKES

Invector DS™ chokes offer the best performance on the market. At 80mm long and with an exclusive internal shaping, they are designed to deliver the finest performance at any shooting distance. They also ensure better pattern consistency for lead and steel shot. Finally, after an intensive session firing off 500 of the most dirt-encrusting rounds, they also keep the choke clean by restricting the spread of gases, while the patented gas seal makes the choke easier to remove.



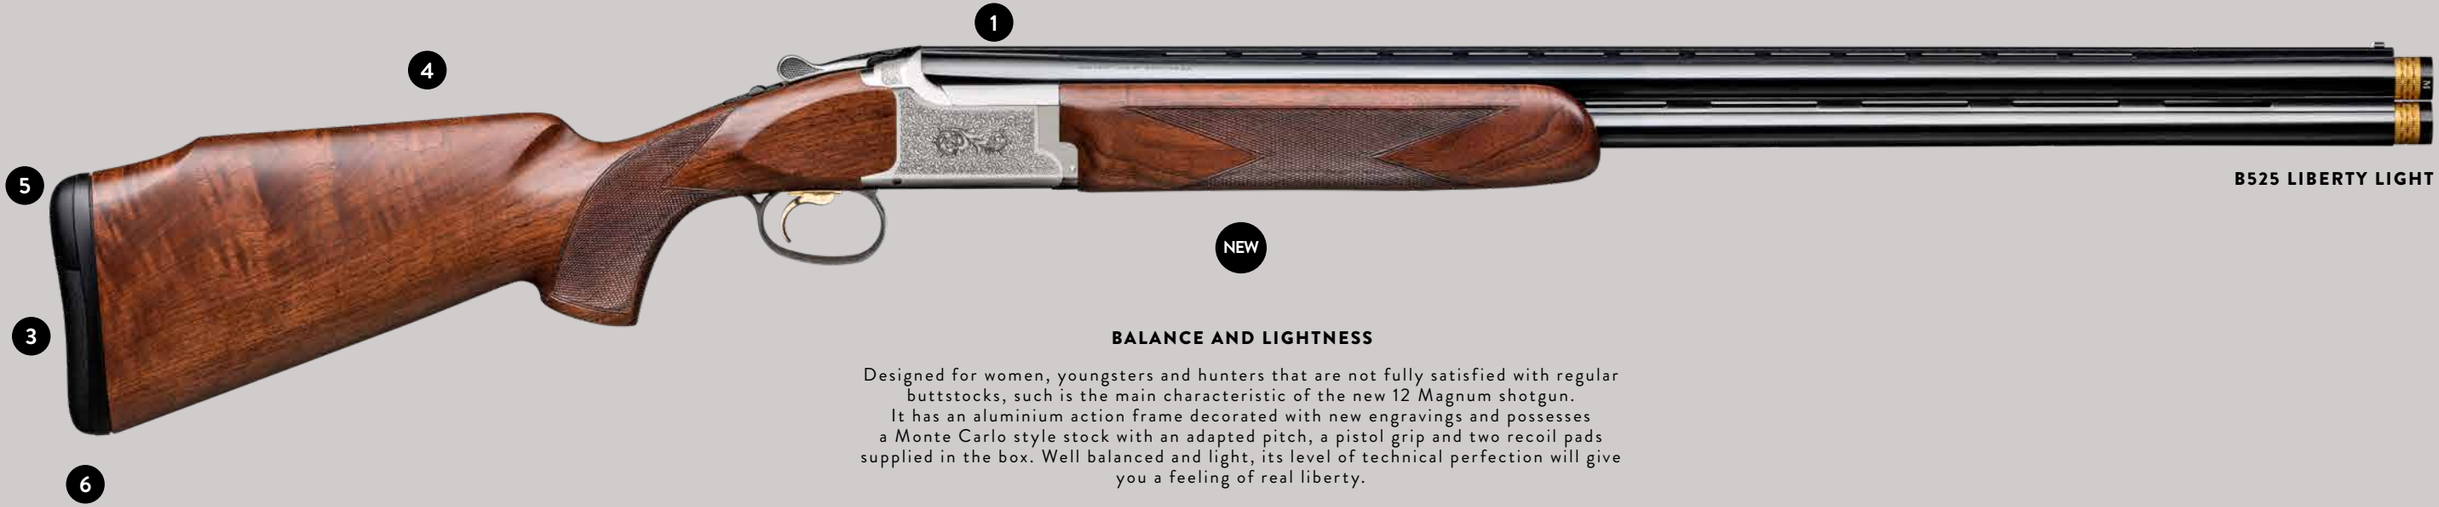


INVECTOR DS™

DISCOVER THE B725 SPORTER VERSION ON PAGES 20-23 – ACCESSORIES SEE PAGES 80-81

B525

A PERFECT MECHANISM
AND A REAL FEELING OF FREEDOM



B525 LIBERTY LIGHT

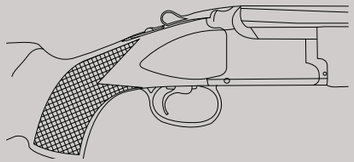
BALANCE AND LIGHTNESS

Designed for women, youngsters and hunters that are not fully satisfied with regular buttstocks, such is the main characteristic of the new 12 Magnum shotgun.
It has an aluminium action frame decorated with new engravings and possesses a Monte Carlo style stock with an adapted pitch, a pistol grip and two recoil pads supplied in the box. Well balanced and light, its level of technical perfection will give you a feeling of real liberty.

1

ALUMINIUM ACTION FRAME AND VENTILATED RIBS

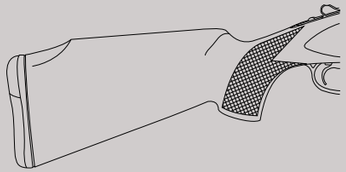
The alloy action frame and the ventilated ribs of the B525 Liberty Light give a lightweight gun.
Its 8mm ventilated rib allows it to be used for both hunting and sports shooting.



2

STOCK OF THE B525 LIBERTY LIGHT

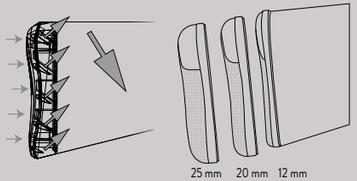
This is a new stock developed for ladies, young people and shooters who are not completely satisfied with standard measure stocks.



3

LENGTH OF RECOIL PADS

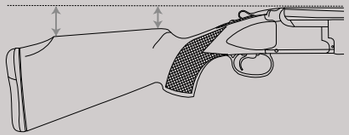
The B525 Liberty Light is delivered with three Inflex II recoil pads, combined with a grip that is adapted for small hands and a trigger system, both of which are adjustable. It will be easy to configure it for perfect ergonomics.



4

DROP

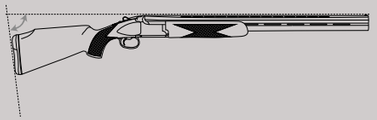
The drop is the height of the back of the stock in relation to the top rib.
The drop of the B525 Liberty Light is higher than standard stocks. This feature allows the shooter improved cheek contact on the back of the stock and thus limits recoil impact.



5

PITCH

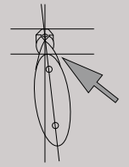
Pitch is the angle of the recoil pad in relation to the axis of the top rib. Set to 80°, this angle limits the contact of the stock rib to the shooter's chest, a notable improvement in comfort when firing.



6

ADVANTAGE OF 4-10 MM

The advantage is in the tilt of the recoil pad in relation to the axis of the top rib. This advantage has been modified with respect to standard models and will be clearly preferable for ladies without impairing men's comfort when shooting.



NEW

B525 GAME ONE LIGHT 20M

The 20 Magnum calibre B525 Game One Light retains all the special features that have made it so successful: grade 2.5 wood with oiled finish, a pistol grip combined with a tulip fore-end, four Invector chokes and a fine 6mm ventilated rib. What is more is actually less: this light version, equipped with an aluminium action frame, now weighs only 2.7 kilogrammes. With this light weight, you can walk up game without getting over-tired.

B525 GAME ONE LIGHT 12M

This model retains all the features of the B525 Game One 12 Magnum and combines its inherent qualities with a light-alloy receiver for lower weight. This is the perfect gun for shooters who like swing with solid calibres.

B525 GAME ONE 12M

The B525 Game One is your ideal hunting partner. Reasonably priced, it is the basic model Browning over-and-under hunting gun. Its action frame is made from a single block of forged steel, its lightweight Back-bored™ barrels and Invector-Plus chokes make it a great hunting gun. It is available with the Auto Safety system.

B525 GAME ONE 20M

We have followed up on the success of the B525 Game One with a small-gauge version. This is the entry-level 20-gauge over-and-under shotgun and it comes at a highly affordable price.

INVECTOR-PLUS CHOKES

Adjustable Invector-Plus™ chokes have been specially developed for our Back-bored™ barrel system. They have been designed to obtain “a perfect target” at different shooting distances. Depending on the Browning choke you use, you can adapt your gun perfectly for the distances at which you shoot and the game you are hunting.
(**Full Choke** = 35 m, **3/4 Choke** = 30 m, **1/2 Choke** = 25 m, **1/4 Choke** = 20 m**, Cyl** = 15 m)

A5

THE KINEMATIC DRIVE™ SYSTEM
IS YOUR 100,000 ROUND GUARANTEE*

A5 ONE SWEET 16

BUILT TO LAST: 100,000-ROUND WARRANTY*

The A5 has been designed to offer unmatched reliability, speed and low-recoil feel in a semi-automatic inertia shotgun. The latest newcomer is the A5 One Sweet 16, which also shoots with amazingly gentle recoil. This is a gentleman's semi-auto, and comes in a choice of 26- or 28-inch barrel and with two Invector DS chokes. You'd be right in thinking that the A5 One Sweet 16 strikes the magical balance between the traditional and the modern.

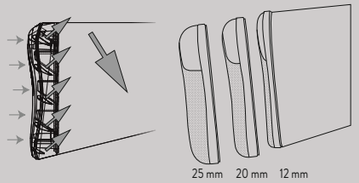
* or 7 years.

1

INFLEX II

The Inflex II Technology recoil pad is the next generation of the most recoil absorbing pad available.

A softer new outer material provides even better recoil absorbing performance and is super slippery to prevent snagging on clothing when shouldering. This second generation has added a new absorbent material that slips perfectly on clothing (see page 81).

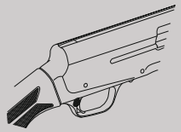


2

HUMPBACK

Made from lightweight, aeronautic quality aluminium alloy, the A5's receiver is sturdy and its characteristic shape is much more than just a nostalgic return to the past.

The receiver's familiar humpback shape fits perfectly with the rib for lengthening your line of sight and in this way helps you to aim naturally with faster targeting.



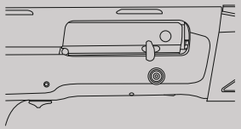
3

RELOADING SYSTEM

Rapid loading systems have been used on Browning semi-automatic shotguns for decades.

Our patented Speed Load Plus loading system sends the first shell in the magazine directly into the chamber.

In addition, thanks to the rapid unloading system, unloading operations are both simple and fast, without needing to operate the bolt to send each shell into the chamber.

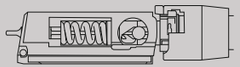


4

KINEMATIC DRIVE™ SYSTEM

The system accumulates recoil energy and converts it into a mechanical movement for actuating moving parts.

The beauty of the Kinematic Drive™ system resides in its simplicity of design, which enables it to operate in a regular, reliable way, with any type of load, and under all extreme conditions of weather, temperature, moisture or fouling.

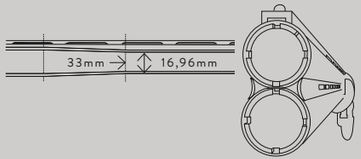


5

VECTOR PRO™ BARREL

The diameter of the barrels on the A5 One Sweet 16 is a standard 16.96mm. The 33mm forcing cone has three advantages:

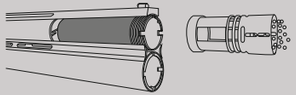
- increased speed and improved pellet penetration
- improved pellet grouping
- reduced recoill.

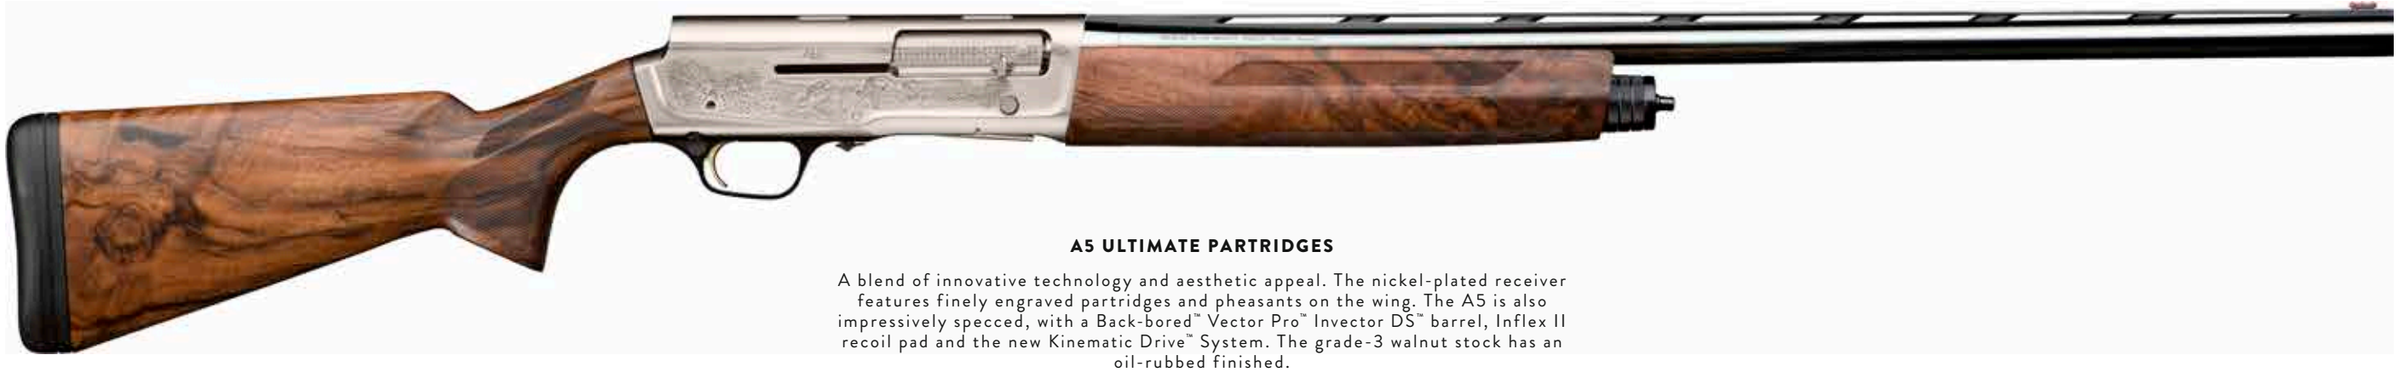


6

INVECTOR DS™ CHOKES

The Invector DS™ Cal 16 chokes offer unrivalled performance by providing an optimal length of 72mm, an exclusive internal shape and a patented gas seal segment (see page 80).





A5 ULTIMATE PARTRIDGES

A blend of innovative technology and aesthetic appeal. The nickel-plated receiver features finely engraved partridges and pheasants on the wing. The A5 is also impressively specced, with a Back-bored™ Vector Pro™ Invector DS™ barrel, Inflex II recoil pad and the new Kinematic Drive™ System. The grade-3 walnut stock has an oil-rubbed finished.

A5 ONE

The A5 One is the starter version of the A5 family, with an understated receiver that is enhanced by the walnut stock and fore-end. It features all the technical specifications behind the success of the A5. It is available in 12 and 16-gauge.

A5 ONE COMPOSITE

Designed for the toughest conditions, the A5 One Composite is equipped with a stock in high resistance, composite material. With a super-magnum chamber, it is both discreet and futuristic. A real shooting machine, it possesses all the features of the A5 family.

NEW

A5 GRAND PASSAGE

Here is the terror of all wildfowl and pest birds! The A5 is back this year, still in 12/89 and equipped with its famous Invector DS™ chokes but now with the Cerakote coating: the barrel, receiver and breech handle have all been treated with this ceramic-based technology that protects them against natural wear and corrosion. Moreover, its Camo Max 5 composite gunstock and fore-end continue to make it the duck and pigeon shooter's ideal companion!

MAXUS

COMFORT AND LIVELINESS
WITH OPTIMAL PERFORMANCE

MAXUS BLACK GOLD

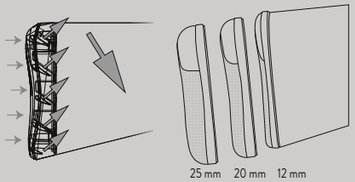
**LIKE THE OTHER BROWNING BRAND GUNS,
THE MAXUS RANGE CONTINUES TO DEVELOP.**

The Black Gold version on offer this year further refines the features of this semi-automatic by opting for an anodised black receiver from which arise auspiciously two engraved, gilt ducks that seem ready to land. Not to be outdone, the gunstock and fore-end are fashioned in attractive grade 3 wood.

1

INFLEX TECHNOLOGY

Much more than a recoil pad in a recoil-absorbing material, it has been designed with an internal structure that lowers the gunstock and pushes it away from the shooter's face after each discharge, which allows a second shot that is even more comfortable and faster (see page 81).



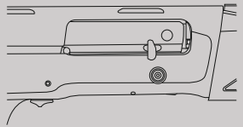
2

RELOADING SYSTEM

Rapid loading systems have been used on Browning semi-automatic shotguns for decades.

Our patented Speed Load Plus loading system sends the first shell in the magazine directly into the chamber.

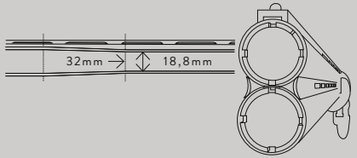
In addition, thanks to the rapid unloading system, unloading operations are both simple and fast, without needing to operate the bolt for sending each shell into the chamber.



3

BARREL ASSEMBLY

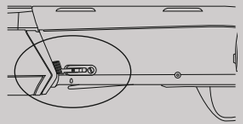
The new geometry of the extended Vector Pro™ forcing cone together with the Back-bored™ barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.



4

CUT OFF

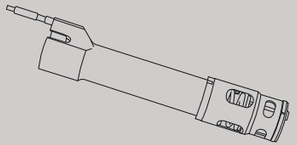
The Maxus is equipped with a Cut Off for the magazine to allow the shooter to unload the chamber easily, and thus change the type of shell without having to chamber a shell from the magazine.



5

POWER DRIVEN GAS SYSTEM

The Power Drive Gas System uses larger escape valves to remove gas more quickly with heavy loads. A brand new patented design for an integrated valve keeps residue outside the mechanism for cleaner functioning.
The piston has a run increased in length by 20% to make it even more reliable with light charges.
The system works with loads of 24g to 64g.



MAXUS ULTIMATE PARTRIDGES

The delicate engraving representing partridge hunting scenes on one side and pheasants on the other gives it a real up-market feel. Its brushed nickel-coated receiver is a little gem. Its stock and fore-end are made from grade 3 oil-rubbed walnut.

MAXUS ONE

Maxus One is the entry level semi-automatic gas operated rifle by Browning.
It features all of the technical characteristics that make Maxus such a success and is sold at an affordable price, which makes it your perfect value hunting shotgun.

MAXUS ONE COMPOSITE

The all-terrain version of the Maxus One is chambered in Super Magnum.
The gunstock and the forearm of this model have a careful ergonomic design, with all the handling surfaces specially developed by Browning.

MAXUS CAMO MAX 5

A model designed *par excellence* for waterfowl hunters. The gun is coated with the Max 5 camouflage film, the most effective camouflage for waterfowl. It has a super-magnum chamber so you can shoot with 70mm-89mm steel shot.

MAXUS SPORTING CARBON FIBER

This gun has been specially designed for sports shooting. The ventilated rib, tapered from 6mm to 8mm, gives faster targeting. Its carbon finish gives a particularly unique style. Unlike the hunting Maxus, the Maxus Sporting does not have a magazine cut-off.

ACCESSORIES

BROWNING NOMAD REMOVABLE MOUNT	78-79
CHOKES	80
ACCESSORIES	81

The intensive shooting and sometimes harsh hunting conditions from woodland deerstalking and hillstalking to driven big game are tough on your rifle. When you get a Browning gun you also get our double promise of effectiveness and reliability.

Our mechanisms are forged by decades of tried-and-tested experiences in the field and will never let you down.
Give yourself the best there is.

BROWNING, FOR THOSE IN THE KNOW

BAR

EFFICIENCY - RELIABLE - SAFE

BAR MK3 A-TACS AU CERAKOTE HC + KITE COMBO

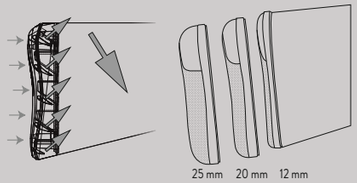
OVER 50 YEARS OF EXPERIENCE

This new model is a real symbol because it combines the formidable Bar Mk3 with the recent range of telescopic scopes developed by Kite Optics in collaboration with Browning. Equipped with Cerakote coating on its metal parts (including the optical elements), the rifle has increased resistance to any form of friction or abrasion. Its Nomad Hybrid base rail (see pages 78-79) allows the scope to be mounted and dismounted surprisingly quickly. Equipped with an adjustable cheek-piece, this Bar, which will adapt to your needs, will also keep you hidden thanks to its A-TACS AU camo finish.

1

INTERCHANGEABLE BUTT-PLATE

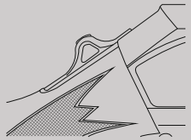
Bar rifles are fitted with interchangeable anti-recoil butt-plates Inflex II of different thicknesses are available: 12, 20 or 25mm.
These butt-plates enable you to adjust the length of your stock without difficulty (see page 81).



2

HAND COCKING SYSTEM SAFETY GUARANTEED

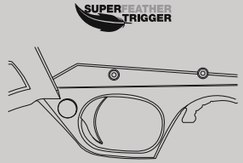
The manual cocking system lets you literally cock your rifle, by moving the arming plunger forwards, which puts the hammer springs under load. Your gun is now ready to fire. You can disarm your gun just as easily by pushing the button.



3

NEW TRIGGER SYSTEM IS CRISPER, SHORTER AND INCREDIBLY DIRECT

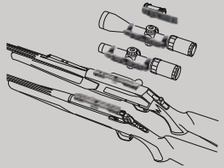
When you want absolute precision the new trigger system is crisper, shorter and incredibly direct. The trigger system offers you that rewarding sense of breaking a glass bar as you squeeze into a shot.



4

BROWNING NOMAD MOUNTS

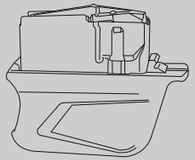
New ultra-accurate and fast removable mount system. On or off in five seconds flat!
(see pages 78-79)



5

REMOVABLE OR FIXED 2, 3, 4, 5 OR 10 ROUND MAGAZINES

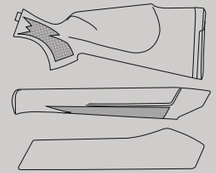
These chargers are vital accessories for your Bar. They are available in a number of versions and are designed to suit your hunting style and comply with local laws
(see pages 81 and 146).



6

AESTHETIC, SOPHISTICATED, ELEGANT

Customise your Bar Zenith with a range of options: a selection of receiver plates and a number of different types of stock and fore-end are available. Make your gun one of a kind
(see pages 60-61).



BAR MK3 COMPOSITE BROWN HC ADJUSTABLE

The Bar Mk3 Composite is dressed in matte black with a beautiful brown gunstock and fore-end. This semi-automatic with fully adjustable comb comes with a Nomad scope rail (see pages 78-79) and is sure to be a hit when hunting large, moving game.

BAR MK3 COMPOSITE HC TRACKER

This new model will delight driven hunt enthusiasts. Safety comes first in this model as it features orange inserts on the gunstock and fore-end. Then there is the all-new 18.5-inch fluted-barrel profile and Super Feather Trigger combination to guarantee unprecedented accuracy and faster action.

BAR MK3 COMPOSITE HC

In addition to the extremely consistent contours, the Bar Mk3 Composite HC boasts a fluted barrel with a new profile for outstanding accuracy on driven hunts and in blinds. Safety is guaranteed by the hand-cocking system that is as intuitive as it is reliable. Finally, the rubber grips ensure perfect handling.
The Bar Mk3 Composite HC – understated and effective at an eye-catching price.

*** More details on Kite Optics on page 55 (www.kiteoptics.com).

BAR MK3 ECLIPSE FLUTED

This version, which possesses all the technical specificities of the new Bar Mk3 range, is also exceptional due to the remarkable grace of its aesthetic qualities. Its piped, satin barrel and its delicately nickel-plated receiver – adorned by a new engraving representing roe deer and wild boar – undoubtedly pay homage to the rustic charms of hunting.

BAR MK3 HUNTER FLUTED

An anodised black receiver, brushed side-faces, top and bottom and the stock and fore-end in grade 2 oil-rubbed walnut, The Bar Mk3 Hunter is the end result of particularly neat and inventive work. Fitted with an adjustable foresight, its 53cm piped barrel possesses a new profile that emphasises the accuracy of a gun that also offers excellent firing capabilities thanks to its Super Feather Trigger system.

NEW

Classic cheek piece

BAR ZENITH SF PLATINUM GR5 HC

Scope not supplied / Platinum plugs for Kite scope provided

Incorporating all the technical characteristics of the Bar Zenith range, and equipped with a classic cheek piece stock, this model stands out because of its elegance: all the wood parts are grade 5 walnut, and the receiver, plated and nickelled, is superbly engraved with scroll designs in a classic style.

BAR ZENITH SF WOOD FLUTED HC

The Bar Zenith SF Wood Fluted HC possesses a longer piped barrel that offers a more accurate line of sight. The manual cocking system located on the top of the pistol grip offers an extra degree of safety.

BAR ZENITH SF WOOD FLUTED HC AFFÛT

The Bar Zenith SF Wood Fluted HC Affût possesses a longer piped barrel that offers a more accurate line of sight. The Franche word « affût » describes the action of a hunter lying in wait for game, as on a driven hunt.

KITE OPTICS, UNCONDITIONAL PERFORMANCE

Browning has joined forces with famous optics specialist, Kite Optics, to develop a range of high-performance hunting scopes. The KSP HD2 range has been developed by hunters, for hunters. The scopes combine best optics performance (more than 93% light transmission,...) solid construction, metal throughout, a fine and precise mechanism, as well as easy handling, even when wearing gloves. All scopes carry a life-time guarantee. Find out more about the features of Kite Optics scopes and binoculars at www.kiteoptics.com.

MARAL SF

THE MOST EFFECTIVE STRAIGHT-PULL ACTION RIFLE:
SURER, MORE ERGONOMIC, FASTER

MARAL SF COMPOSITE BROWN HC

Scope not supplied (more details on Kite Optics on page 55)

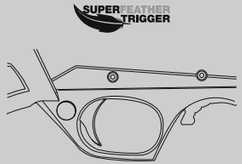
THE MARAL IS NOW AVAILABLE IN A COMPOSITE VERSION!

Here, buttstock, grip and fore-end are brown in contrast to the black of the barrel and the receiver, giving it discretion and distinction. This fine straight-line action rifle with a threaded barrel (M14x1) and an adjustable cheek-piece also has a muzzle brake (T1), which can significantly reduce recoil and the extent of muzzle rise in case of successive shots. Offered in 30-06 and 308W calibres, the Maral SF Composite Brown HC is designed to receive a telescopic sight with its Nomad Hybrid base rails.

1

NEW TRIGGER SYSTEM IS CRISPER, SHORTER AND INCREDIBLY DIRECT

When you want absolute precision. The new trigger system is crisper, shorter and incredibly direct. The trigger system offers you that rewarding sense of breaking a glass bar as you squeeze into a shot.



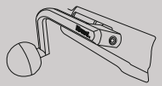
2

HAND COCKING SYSTEM

Safety guaranteed.

EASY, ERGONOMIC HANDLING

NEW COCKING HANDLE FOR IMPROVED FIRING COMFORT



3

BREECH CONTAINED INSIDE ITS CASING

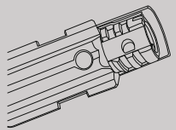
No inconvenience when reloading.

“BATTUE” TYPE RIB WITH OPTIC FIBRE

Also delivered with a rear-sight.

SEVEN-LUG BOLT SAFETY GUARANTEED

A bolt renowned for its sturdiness, which guarantees exceptional safety and accuracy.

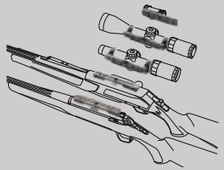


4

BROWNING NOMAD MOUNTS

New ultra-accurate and fast removable mount system. On or off in five seconds flat!

(see pages 78-79)

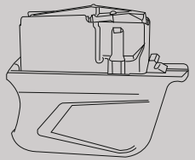


5

REMOVABLE 3-, 4-ROUND MAGAZINE OR EXTENDED CAPACITY 8, 9 OR 10 ROUNDS

You can get these vital accessories for your Maral in 3+1 and 4+1 removable versions, and 8+1, 9+1 and 10+1 extended-capacity versions

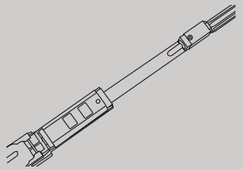
(see pages 81 and 146).



6

QUICK RELOADING SYSTEM

The servo bolt return system combines maximum safety, speed and efficiency. Thanks to the time gained in the reloading phase, shooters can concentrate on their shooting.



MARAL SF FLUTED THREADED HC

Scope not supplied (more details on Kite Optics on page 55)

This model comes with a threaded barrel for fitting a silencer or muzzle brake.

MARAL SF FLUTED HC

The Maral is available in the following calibres: 30-06, 308 Win, 9.3 x62 and 300 Win Mag. Its main assets are its seven-lug bolt, its breech which is always contained inside the bolt and its patented Quick Reloading System. Ideal for both driven hunt and stalking, it is equipped with a fluted barrel, a drop-down magazine and a quickly removable stock.

MARAL SF BIG GAME FLUTED HC

The Maral Big Game Fluted HC includes side plates engraved with hunting scenes. With the wide range of optional extras, each Maral Big Game rifle can be customised to your taste (see pages 60-61).

BLR

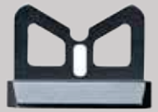
EXCELLENCE BUILT TO LAST

BLR TRACKER

THE PERFECT PARTNER ON DRIVEN HUNTS

This grey lever-action rifle comes with a laminated plywood stock, and has been treated to a new ultra-strength “Cerakote” surface treatment for unbeatably long service life. The sights and short barrel make this an excellent gun for driven hunts and tracking.

BLR TRACKER - SIGHT RIB, PERFORATED BUTTERFLY:



BLR — MODELS:		cm			mm		Std	Mag	kg				
BLR TRACKER	308 Win-300 WM-30-06	47	adjustable fibre optic	perforated rear sight	362	removable magazine	4	3	3 > 3.5	Cerakote	plywood	fold-down hammer in half-cock position	cardboard box

BLR LIGHTWEIGHT	30-06	56	gold bead	affect rear-sight	362	removable magazine	4	3	3 > 3.5	black anodised	gloss varnish	fold-down hammer in half-cock position	cardboard box

BLR LIGHTWEIGHT

The BLR is the only lever-action rifle developed in magnum calibres. Its mechanics are impeccable and characterised by the exceptional smoothness of its operation. It has a removable magazine and a high quality barrel and is ready for fitting a scope.

ACCESSORIES SEE PAGES 78-81

X-BOLT SF

NEW X-BOLT SF: MISSING IS NO LONGER AN OPTION

X-BOLT SF A-TACS AU CERAKOTE + KITE 2-12X50 COMBO

RUGGED RELIABILITY AND EXTREME PRECISION

This bolt action rifle for stalking big game needs no introduction. It is now available with the Kite Optics KSP HD 2 scope. With its A-TACS AU composite gunstock and its Kite Optics 2-10x50 scope in Cerakote finish, it has the double advantage of rugged reliability and extreme precision. The variety of calibres available also allows users to make the best choice possible, in terms of their own preferences and kind of hunt they practise.

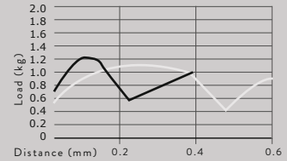
1

3 X MORE EFFICIENT THAN COMPETITION IN TRIGGER SENSITIVENESS

- zero take-up
- minimum overtravel
- minimum creep.

Super Feather Trigger with its perfect action: clean, short, crisp and direct.

Typical curve trigger shoe movement – load on trigger shoe.

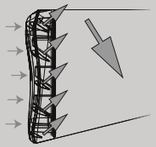


Competitor's pull curve
Browning's pull curve

2

INFLEX ANTI-RECOIL BUTT-PLATE

This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the gunstock slightly away from your face in order to reduce the recoil and upward motion of the gun (see page 81).



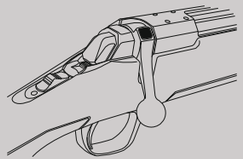
3

BOLT-UNLOCKING BUTTON

The bolt-unlocking button works in conjunction with the safety to provide an added degree of safety.

ROTATING MAGAZINE

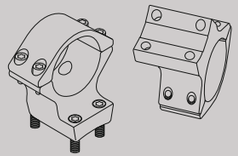
Made in light ultra-resistant polymer, it gives exclusive protection to bullet noses (see page 81).



4

X-LOCK MOUNTING SYSTEM

The X-Lock scope-mounting system has four screws per fixing point. Therefore it is more stable and provides higher accuracy.



5

UTMOST ACCURACY

A free-floating barrel is essential for utmost accuracy. The X-Bolt SF's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel/breech block assembly at two points with respect to the forearm, at the front and at the rear.

X-BOLT SF STAINLESS FLUTED ADJUSTABLE THREADED

With an M14x1 threaded barrel, this X-Bolt is as hard-wearing and low-key as its composite cousins, but what sets it apart are its fully adjustable comb and fluted barrel.

X-BOLT SF STAINLESS THREADED

This bolt-action rifle with its elegant yet hard-wearing stainless steel barrel now includes a composite gunstock with Dura-Touch coating technology. The new, reinforced thread and Super Feather Trigger system make this an accurate and formidable gun when hunting from a hide.

X-BOLT SF COMPOSITE THREADED

This year, the X-Bolt Composite comes with an M14x1 threaded barrel to add to its wide range of calibres. The gunstock has Dura-Touch coating for excellent grip, and an extra 7mm insert is included for perfect shoulder mounting and reduced recoil effect.

X-BOLT SF EUROPE

The X-Bolt SF Europe is a close technical relation of the X-Bolt SF Hunter. It differs in its stock, which is longer, in grade 4/5 American walnut with oiled finishing. It has been worked more traditionally, without machining on its sides. This gives the rifle a pure line that can be felt even in the roundness of the fore-end.

X-BOLT SF HUNTER

With sighting system

This version is characterised by a sighting system of a battue rib and a fibre optic front sight; a rear sight is also supplied. Once mounted to replace the battue rib, this rear sight offers you superior accuracy and quality of sight for long-distance shooting.

X-BOLT SF HUNTER

Without sighting system

This version is available without sights and the barrel is not prepared for their mounting. It is available in a lefthanded version in calibres 243 Win, 30-06, 308 Win, 300 WM.

X-BOLT SF HUNTER ECLIPSE THREADED

The design of this gun is not the only sign of its originality: the pistol grip on its stock in laminated plywood possesses a cavity for your thumb to place itself naturally, guaranteeing a grip that is firm, but sufficiently flexible to provide freedom of movement. Equipped for fitting a scope, and with the Super Feather Trigger system, the X-Bolt Hunter Eclipse Threaded rifle has a threaded barrel (M14x1).

* Left-hand version only available in 308 Win-30-06-270 WSM-300 WM.

Scope not supplied (more details on Kite Optics on page 55)

Browning welcomes the X-Bolt Varmint to its range of composite bolt-action rifles. It features a heavy, threaded barrel (M18x1), an adjustable comb, and two 7mm gunstock inserts designed to deliver outstanding accuracy. Steel scope mounting bases are also included.

X-BOLT SF ECLIPSE VARMINT

This latest incarnation of the much-loved X-Bolt is available in four calibres, and sports a distinctive 61cm heavy barrel with a threaded end (M18x1). It also continues the excellent principle of having a thumbhole in the stock for an easier grip; when combined with the ultra-high performance of the Super Feather Trigger system, the laminated grey wood stock takes comfortable shooting to a whole new level. The X-Bolt Eclipse Varmint - a vital ally when stalking vermin.

A-BOLT 3

THE NEW A-BOLT 3 CARBINE,
A LEGEND IN THE MAKING

A-BOLT 3 HUNTER BATTUE

EXTREME PRECISION AND RUGGED RELIABILITY

Originally intended for hunting big game from a hide, the A-Bolt 3 now comes with a shorter barrel and a top rib suitable for *battue* shoots. This innovation will certainly find the approval of bolt-action rifle enthusiasts, especially since the rifle, available in 30-06 Spr or 308 Win calibre, is accessible at a very, very reasonable price!

TECHNICAL SPECIFICATIONS:

INFLEX II TECHNOLOGY

KITE OPTICS*

ALL A-BOLT 3 RIFLES ARE SOLD WITH STEEL BASE MOUNTS.

A-BOLT 3 HUNTER

Scope not supplied (more details on Kite Optics on page 55)

The A-Bolt 3 Hunter is the big-game addition to the Browning bolt-action rifle range. This new high-precision version includes all the special features of the A-Bolt 3 Composite. It also comes in six calibres, and with steel bases for secure scope mounting. The A-Bolt 3 Hunter's wood is walnut, guaranteed to add natural beauty to a hunting rifle. Here it enhances elegance without sacrificing the rifle's rugged qualities.

A-BOLT 3 COMPOSITE THREADED

First-class barrel, fast and safe locking/unlocking system, drop box magazine and Inflex Technology anti-recoil pad – the A-Bolt 3 has it all. This rifle is intended for hunting from blinds and combines pinpoint accuracy and a rock-solid build with excellent value for money.

ACCESSORIES SEE PAGES 78-81

* More details on Kite Optics on page 55 (www.kiteoptics.com).

T-BOLT TARGET VARMINT STAINLESS THREADED

This vermin rifle is now available with a stainless steel barrel and a laminated grey Monte Carlo buttstock. The heavy, threaded barrel also includes scope-mounting bases.

T-BOLT SPORTER COMPOSITE THREADED

This version is equipped with a gunstock made of highly-resistant ergonomic composite, allowing intense use in all conditions. Another very useful characteristic is an additional magazine integrated in the gunstock and, more particularly, in the pad.

T-BOLT SPORTER COMPOSITE THREADED LEFT HAND

This is a carbon copy of the T-Bolt Sporter Composite Threaded, retaining all of its features, but adapted to lefthanded shooters.

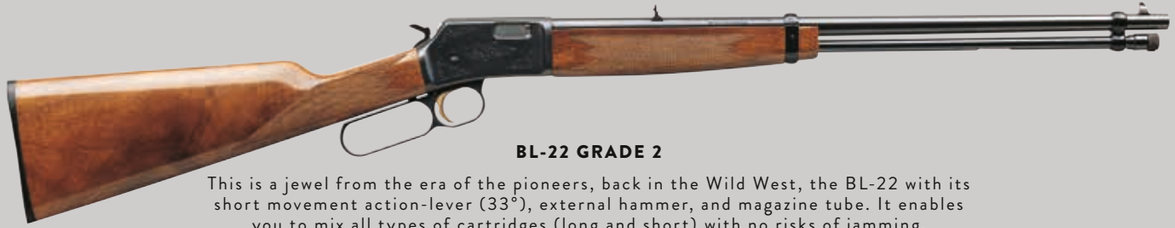
T-BOLT SPORTER THREADED

This rifle is a "vintage", the re-issuance of a best seller, a legend. Available in .22LR, .22 Magnum, and 17HMR calibres, it is aesthetically close to its ancestor, the first T-Bolt, but the mechanics have been completely modernised. It is characterised by its straight pull bolt that loads cartridges from an exclusive ten-round rotating magazine.



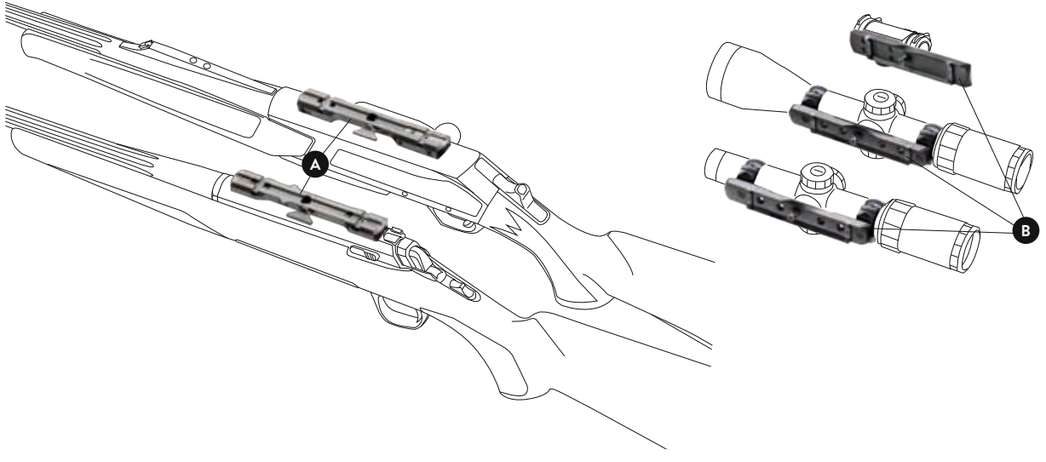
BL-22 GRADE 2

This is a jewel from the era of the pioneers, back in the Wild West, the BL-22 with its short movement action-lever (33°), external hammer, and magazine tube. It enables you to mix all types of cartridges (long and short) with no risks of jamming.

ACCESSORIES SEE PAGES 78-81

BROWNING NOMAD REMOVABLE MOUNT

HUNT IN TOTAL FREEDOM THANKS TO AN ULTRA-HIGH-PERFORMANCE REMOVABLE MOUNT
AND A REVOLUTIONARY SYSTEM WHICH ALLOWS YOU TO CHANGE YOUR SCOPE EASILY FROM ONE GUN TO ANOTHER



MULTIPLE SCOPES ON MULTIPLE GUNS

Combine single or multiple base rails A with a mount rail B for a complete, removable mount system.

BASE RAIL
BROWNING NOMAD

Fast. Using the thumbwheel attachment, change scopes fast, without running the risk of losing alignment.

Precise. The patented bolt technique gives perfect attachment, exceptional resistance and constant precision, whatever the scope used.

Versatile. With the NOMAD MULTIPLE base rail, adjustable for windage and altitude, you can now use all your scopes on any gun, without having to adjust your aim before each change. By adjusting the base rail of your second gun during your first aim, you keep the adjustment of your scopes for your first gun. Your scopes are now interchangeable in under five seconds, without any need to adjust before each change.

The base rail is specific to each gun and accepts all Browning Nomad upper rails. Available in three versions:
NOMAD SINGLE: the base rail for your first gun (master gun). Exchange your scopes in a single gesture with its ultra-rapid fixing thumbwheel.
NOMAD SINGLE HYBRID: a variant of the Single that also accepts Weaver rings, directly on the rail. Requires a coin to fix the upper rail.
NOMAD MULTIPLE: adjustable for windage and altitude, it allows you to use your scopes on your other guns without losing the adjustment on the master gun.

* Browning Nomad upper rail, compatible with the Basis lower rails of the Dentler

UPPER RAIL
BROWNING NOMAD

Compatible. Browning Nomad upper rails are compatible with all base rail versions (Single, Single Hybrid and Multiple), for perfect interchangeability between all your guns*.

There is an upper rail for every type of scope:

- Rail for rings: using the different positions for rings, and the numerous diameters and heights of the rings (sold separately), you will easily mount all your tubular scopes at the optimum eye distance and height
- Rail for rail scope: available for Swarovski, Zeiss, Schmidt & Bender and Prisma 70 rails
- Rail for Aimpoint Micro
- Rail for Docter Sight
- Weaver/Picatinny rail, for all your more specific scopes

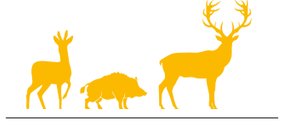
AMMUNITION



AMMUNITION

BXC	84
BXR	84

Browning is a benchmark in the world of guns. For more than a century, we have been developing revolutionary guns that deliver unparalleled results.

We have now decided to use all the know-how of our best engineers to develop a range of ammunition, simply because exceptional guns deserve equally high-level ammunition.

BROWNING, FOR THOSE IN THE KNOW

BROWNING AMMUNITION

« THE AMMUNITION THAT EARNED THE BUCKMARK »

CONTROLLED EXPANSION.

The new Browning BXC bullet is designed for heavy games where devastating knock down power and deep penetration are required. The bonded bullet design with a residual weight of almost 100 % and the Terminal Tip allows for deep penetration through tick , tough hide and bones. The brass tip, heavy bullet weight and boat-tail are integral components to delivering precision accuracy, maximum downrange velocity and long range on target performance.

NEW

RAPID EXPANSION.

BXR Rapid Expansion Matrix Tip is designed specifically for use on medium game such as roe deer or wild boar. The proprietary matrix tip design allows for high downrange velocity and energy retention while also initiating rapid positive expansion. The jacket and tip combination yields precision accuracy, rapid energy transfer and generates massive knockdown power.

Our know-how in semi-automatic pistols, the legacy of John Moses Browning since 1915, is our guarantee of reliable and accurate products for your sports shooting needs.

Buck Mark pistols use the most modern of manufacturing methods for unequalled shooting comfort.

BROWNING, FOR THOSE IN THE KNOW

BUCK MARK

ACCURATE AND RELIABLE IN ONE

Browning Buck Mark rimfire pistols are very highly valued due to their quality, reliability and accuracy. These pistols have a receiver made from a single aluminium block machined using numerical control. The barrel is machined in a single top-quality steel block and the chamber is hand-bored for guaranteeing optimal accuracy.

DOG PROTECTION AND ACCESSORIES

MAXIMUM PROTECTION FOR HUNTING DOGS

HOW TO CHOOSE THE RIGHT SIZE OF THE JACKET ?

The size of the jacket is proportional to the chest size.
The Velcro neck and belly straps are adjustable.
Do not overtighten, and choose the right size to avoid hurting your dog.

At Browning, each item of clothing starts from a passion for the hunt, our years of experience and field tests, and the expertise that all this brings. We combine high-performance materials with cutting edge technology to offer full body protection against the wind, rain and cold, as well as thorny thickets and bramble bushes.

While our clothing is tough enough to resist any challenge, it is also comfortable for hunters. The supple materials we use adapt to any body shape, making our hard-wearing yet elegant clothes more efficient as well.
