2019

BROWNING, THE BRAND

The Browning brand is about the genius of a man born 160 years ago in a small town in the American West. John Moses Browning began inventing at an early age. He had a prolific mind, and revolutionised firearms design time and time again. From the Auto-5 and the B25 to the Bar and more, every one of his designs is a milestone; every work he created is a source of inspiration for future generations. Excellence has to follow a legacy like this.

And so, now as always, every shotgun, rifle, ammunition and item of equipment made by Browning undergoes a mandatory series of stringent tests so that you can be confident in the knowledge that they are reliable, high-performing and built to withstand the ravages of time.

THE PERFORMANCE

The quality of a firearm, of ammunition and the effectiveness of an item of clothing are down to observation, talent and hard work; three creative cornerstones that mean as much to Browning as its early legacy. The confidence that the Buckmark brand inspires can be traced directly to the people behind the name, and their attentiveness and desire to deliver the right solutions – our deeply held values.

Hunters and sports shooters alike are sure to find a Browning product that will take their passion to a new level.

The only thing that matters on the beat, in a hide, on the stalk, at the clay pigeon stand or in front of the target is the excitement that grips us when all the conditions are just right for turning great times into unforgettable memories.

So let us help you give it your best shot...

OUR VALUES

There is one devastatingly simple target that never leaves our sights: to bring you the best.

Our teams are relentless in applying their technical expertise and aesthetic acumen to find new ways of making our current guns, ammunition and other equipment even better.

Because our engineers have a passion for our sport and a deep understanding of the difficulties that occur during a hunt, they bring all their personal experience to the solutions they devise and develop.

This continual fine-tuning, this increasingly meticulous scrutiny to detail ultimately makes all the difference – these are Browning's signature touches, its distinctive hallmark among other manufacturers, the proof of its commitment to delivering ever-higher performance.

OUR PLEDGE

Every hunter and sports shooter should be able to purchase the equipment they need and which is right for them, whatever their budget and goals, regardless of whether they follow the latest technological innovations or succumb to the charms of the eternal classics, are or would like to be discerning amateurs, recent converts or old hands. This is our belief. This is our pledge.

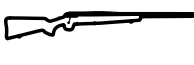

Browning has always adhered to this mindset when developing its product lines. The quality of our products is a true reflection of the exacting demands that drive us. What unites us is our pride.

The guns that leave our factory come with a ten-year warranty and a blend of reliability, sturdiness and effectiveness. From manufacturing to fitting and testing, and on to finishing, they each underline the uniqueness of a brand devoted to shooters who are driven by passion.

John M. Browning

John Moses Browning devoted his entire life to guns. That story continues today in the John M. Browning Collection, which duly bears the two hallmarks of his talent: groundbreaking mechanical systems and the handmade custom finish you want. He left a huge impression on the world of gunmaking, and on the gunmaker to which he gave his name. You will find the same devoted spirit lives on today in Belgium.

B25 SPECIAL FLOWERS

**B25 RENAISSANCE**

JOHN M. BROWNING COLLECTION

THE B25 – HANDMADE IN BELGIUM
BY EXPERTS FOR EXPERTS

The B25, king of the over-and-under shotgun, sports its exquisite, hand-engraved side-plates like a jewel in a crown. Similarly, the three-part fore-end perfectly demonstrates the craftsmanship of our gunsmiths. Sanded with extreme care, the walnut grips are attached to the barrels by means of three screws. Two plates of wood are seamlessly fitted to the barrels and held in position by three screws passing through the side ribs, with the ejector system fitted inside. Only the bottom piece moves in order to disassemble the barrels. Here are four examples of the B25 side-plate; the possibilities are endless.

There are four grades of enhancements for the B25 (the Contre-Platine, D Grades, C Grades and B Grades), of which the Contre-Platine is the best there is. It is the only grade that includes side-plates as an option.

The engraving is superb, and shown here is a small sample of the wide choice available.

**B25 D5G SIDE-PLATE**

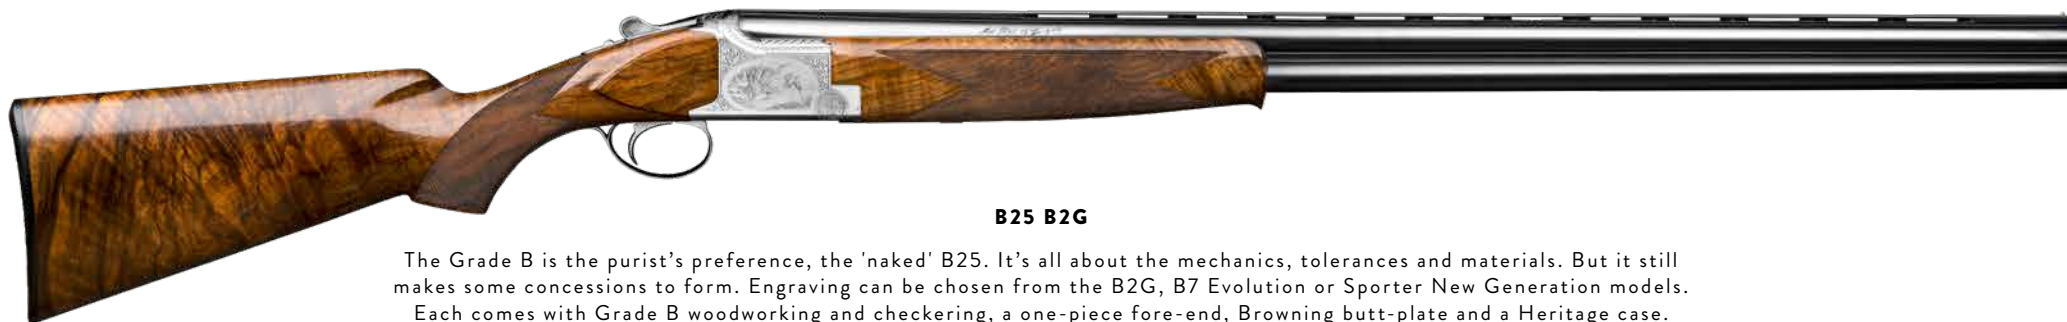

**B25 D5G**

As you would expect with the best superposed shotgun in the world, the standard of craftsmanship throughout is superb.

Among them is the Grade D, the ultimate range of box-lock. The frame has been hand-chiselled, filed and shaped by a Herstal master gunsmith to ensure the smoothest action, while the best quality wood has been sourced to balance elegance with hardness. The one-piece fore-end is tulip shaped. On the stock, teardrops have the effect of making the action frame appear longer and more refined. The checkering is elaborate and exact. You can choose your engraving from the D4G, D5G or the Special Autumn models.

**B25 DIANA**

There is a B25 for all tastes. The Grades B and C are made for those who hold that less is more, and that owning the best superposed shotgun in the world is beauty enough. The Grade C includes quality woodworking, checkering, teardrops, one-piece fore-end, black Browning butt-plate and a Heritage case. Choose your engraving from the C2G, C3, Special or Diana models.

**B25 B2G**

The Grade B is the purist's preference, the 'naked' B25. It's all about the mechanics, tolerances and materials. But it still makes some concessions to form. Engraving can be chosen from the B2G, B7 Evolution or Sporter New Generation models.

Each comes with Grade B woodworking and checkering, a one-piece fore-end, Browning butt-plate and a Heritage case.

JOHN M. BROWNING COLLECTION

B15 BEAUCHAMP GRADE E 12M

B15

THE LEGEND REINVENTED

The B15, the shotgun the Browning faithful has been waiting for, was developed in 2015, 90 years after the B25 changed the gun world forever. Like its illustrious predecessor, the hand-finished B15 was developed and refined by the gunsmiths at the Fabrique National in Herstal. That means you can expect balance and reliability. You can also expect precision engineering and the finest of aesthetic finishes. The B15 is available in four grades with a choice of exceptional engravings and wood quality.

B15 BEAUCHAMP GRADE D 12M

B15 BEAUCHAMP GRADE C 12M

B15 BEAUCHAMP GRADE B 12M

HAND FINISHED

B15

IN BELGIUM

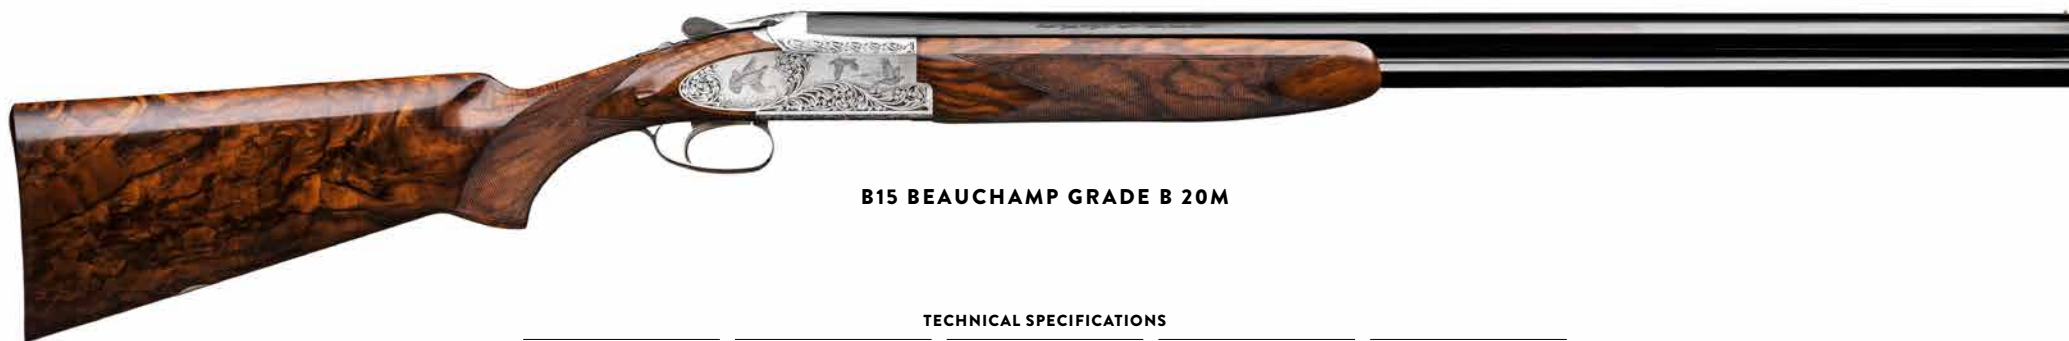

B15 BEAUCHAMP GRADE D 20M

B15 BEAUCHAMP GRADE C 20M

**B15 BEAUCHAMP GRADE E 20M**

Three years after it was developed, the B15 is now available in 20-gauge models. The engravings feature slight variations from the 12-gauge models, but the same DNA can be seen in the hunting scenes on Grades B and D and the chimæra on Grades C and E. And the philosophy is unchanged: sophisticated efficiency. True shotgun connoisseurs will be won over by the B15, appreciating its style for sure, but enjoying the technical quality even more.

Browning is the name behind more than 500 FITASC competition medals since 2009. Champions trust us because our expertise is born of a long-standing tradition of excellence that never lets them down. But we don't rest on our laurels at Browning. Every year, we push the boundaries with our innovations to keep our shooters among the medals.

PERFORMANCE – EXCELLENCE – ADAPTABILITY

1

STOCK COUNTERWEIGHT

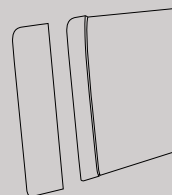

The Pro Balance System allows shooters to fine-tune the balance points for a perfect mount and swing. Adding counterweight to the stock helps balance the shotgun, aids follow-up shots and the additional mass reduces felt recoil (ref B133800079, see pages 22 and 144).

2

INTERCHANGEABLE RECOIL PAD

The B725 Pro range is supplied with interchangeable 15 or 25mm recoil pads. They will enable you to adjust the length of your stock without the slightest difficulty (see page 144).

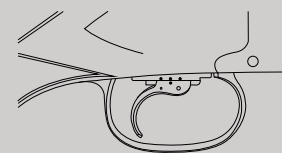

25 mm 15 mm

3

TRIPLE TRIGGER SYSTEM

The adjustable Triple Trigger System lets you make minute changes to the finger-trigger position on target shooting models. It includes three trigger shoes: wide checkered, narrow smooth and wide smooth canted.

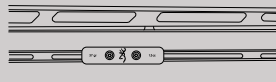

**B725 PRO SPORT ADJUSTABLE****SHOOTER AND GUN AS ONE**

The B725 Pro range has been designed to provide a perfect gun fit whether you're shooting Sporting or Compak. The advanced engineering of its adjustable comb, cutting-edge recoil pad and Invector DS™ Extended chokes are further enhanced by the groundbreaking Pro Balance System that lets you redistribute the weight of the stock and barrels to fine-tune the gun's balance just the way you want it.

4**BARREL COUNTERWEIGHT**

The barrel's counterweight is comprised of tungsten plates which enable the gun's centre of gravity to be moved up to 20mm forwards (ref B133800080, see pages 22 and 144).

**5****INVECTOR DS™ CHOKES**

The Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment (see page 142).

B725 PRO

B725 PRO TRAP ADJUSTABLE

This trap gun includes all the special features that made the B725 Pro Trap a success: the Back-Bored™ Vector Pro™ barrels, 12mm top rib, Hi-Viz sights, and a selection of eight Invector DS™ Extended chokes. Browning has pushed performance potential to the extreme by adding two striking innovative developments to this famous model's original qualities, and further enhancing the balance of an over-and-under shotgun that was designed to be an extension of the shooter's body: a fully adjustable cheek piece; and a stock and barrel assembly with the Pro Stock and Barrel Balancers technologies respectively. The result is a B725 Pro Trap that is fully... adjustable.

B725 PRO TRAP

This model is a new version of the B725 Pro Trap High Rib. It combines unmatched firing comfort with high performance. Its secret? The Pro Balance System, a brand new adjustment system for fine-tuning the gun's balance by modifying the weight of the stock and the barrels as required. Fitted with eight Invector DS™ Extended chokes, Hi-Viz CompSight fibre optic front sights and two extra triggers, it can be adapted to the requirements of the most demanding sport shooters.

B725 PRO TRAP ADJUSTABLE HIGH RIB

The B725 Pro Trap Adjustable High Rib is equipped with Pro Fit Balancer technology. The raised battue rib is the finishing touch to harmony between shooter and gun. It can be adjusted as you like to fine-tune the barrels' point of impact. In addition, with its graduated shim-adjustable comb, the Monte Carlo stock makes it an ergonomic firearm.

B725 SPORTER

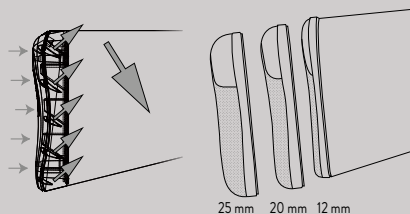

THE LEGENDARY STRENGTH IS NOW COMBINED WITH REVOLUTIONARY DESIGN AND FEATURES

1

INFLEX™ II RECOIL PAD

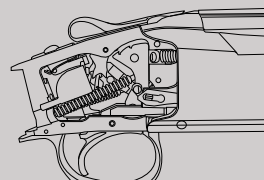

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun. Two other pads, 20mm or 25mm thick (available as an option), make it easy to adjust the length of your stock (see page 144).

2

HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

This firing system is shorter, faster and lighter giving more control over your shooting. Browning's innovative mechanical firing system provides great ease of use, guaranteeing that a second shot can be fired whatever the circumstance.

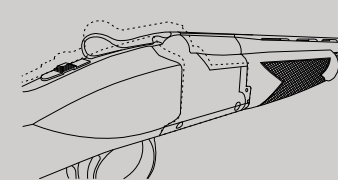

3

LOW ACTION FRAME

The low action frame provides the benefit of faster aiming and, therefore, more instinctive shooting. The frame's inline recoil reduces muzzle flip providing a more comfortable shooting position, making it highly manoeuvrable and effective when shooting.

ACTION FRAME GUARANTEED FOR TEN YEARS.

4

5

**B725 SPORTER G5**

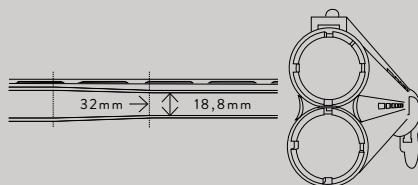

STYLE AND TECHNIQUE IN PERFECT BALANCE

The Browning B725 is an aesthetic and technical revolution in over-and-under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding over-and-under shotgun on the market.

4

BACK-BORED™ VECTOR PRO™ BARREL

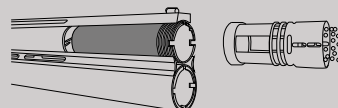

The Back-bored™ Vector Pro™ barrel has an increased internal bore diameter and longer forcing cone. One barrel, two features, three benefits: greater velocity and better penetration / shot grouping and reduced recoil.

5

INVECTOR DS™ CHOKES

The Invector DS™ chokes provide unrivalled performance due to the optimal length of 80mm, the exclusive internal shape and patented gas seal segment (see pages 34 and 142).

B525

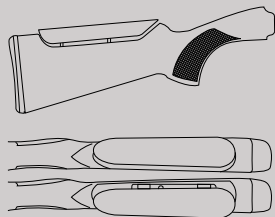

THE MOST RELIABLE AND BEST PERFORMING LINE

1

PRO FIT ADJUSTABLE COMB

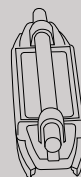

The Pro Fit adjustment system lets you position the comb just where you need it and use the adjustment screw to trim the drop and cast. Easily visible markings take the guesswork out of adjusting or refitting the comb after removal.

2

2.7 MM HI-VIZ GREEN FRONT SIGHT

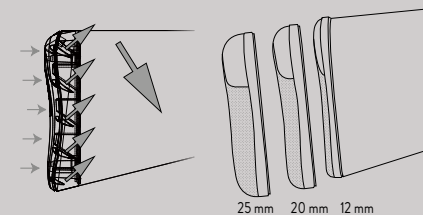

The Hi-Viz CompSight fibre optic front sight gives you a superior aim in daylight and low light conditions, and is available in a variety of colours. CompSight has been adopted by many shotgun competition shooters and is the sight of choice for national and Olympic champions.

3

INFLEX™ II RECOIL PAD

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun. Two other pads, 20mm or 25mm thick (available as an option), make it easy to adjust the length of your stock (see page 144).

NEW

B525 SPORTER LAMINATED ADJUSTABLE

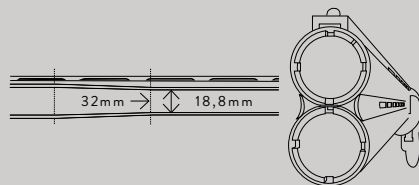

SHOOTER AND GUN AS ONE

This B525 SL adds another distinguishing feature to its hallmark sporty and aggressive style, with uniformly compact laminated wood that provides superior rigidity for a perfectly stable shot.

4

BACK-BORED™ VECTOR PRO™ BARREL

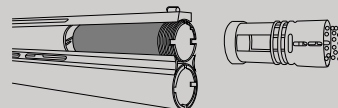

The Back-bored™ Vector Pro™ barrel has an increased internal bore diameter and longer forcing cone. One barrel, two features, three benefits: greater velocity and better penetration / shot grouping and reduced recoil.

5

INVECTOR-PLUS™ EXTENDED CHOKES MIDAS

Adjustable Invector-Plus™ Extended chokes Midas have been specially developed for our Back-bored™ barrel system. They have been designed to obtain 'a perfect target' at different shooting distances. Depending on the Browning choke you use, you can adapt your gun perfectly for the distances at which you shoot and the game you are hunting (**Cyl** = 15m, **1/4 Choke** = 20m, **1/2 Choke** = 25m, **3/4 Choke** = 30m).

B525

B525 TRAP ONE

The guiding principle of the B525 Trap One is to make efficiency available to all. And the price is intended to let everyone enjoy Browning's sports shooting expertise. The stock and the fore-end have been shaped to meet the specific requirements of clay shooting in full. This model - with "Trap One" proudly engraved on the action frame - also comes with four Invector-Plus™ chokes.

B525 SPORTER ONE 20M

This model retains all the original features that made the B525 Game One a success and tailors them to the specific requirements of sports shooting. The Auto Safety system and an Inflex™ II recoil pad are available, while the 10mm-width ventilated top rib offers faster, more instinctive target acquisition. This attractively priced 20 Magnum is made from Grade 2 American walnut and is engraved with the same designs as its hunting counterpart.

ULTRA XS PRO ADJUSTABLE COMB

It is supplied with eight Invector Titanium extended chokes, two spacers, three Inflex™ recoil pads and three trigger shoes. The Ultra XS Pro Adjustable Comb can thus be balanced on demand thanks to a clever weight and counterweight system (gunstock and barrel). The Ultra XS Pro Adjustable Comb is equipped with an adjustable cheek-piece and a trap fore-end. Its technical innovation in no way impairs its elegance, as can be seen in the new engraving decorating its action frame and the T4 wood with oiled finish.

B525 SPORTER ONE 12M

The B525 is the only shotgun to be hand-fitted. Fitting important parts is done employing traditional methods (using red ochre) so as to make the Browning B525 the reference in shotguns. The attention to detail is unique, just like the 'Browning feeling' when the gun locks on closing. This model is also available in short stock and Trap fore-end versions.

HERITAGE HUNTER 20M INV

WHEN HUNTING BECOMES AN ART

This Heritage Hunter 20M Inv model is equipped with a buttstock made from carefully oiled, high-quality walnut, while its pistol grip and tulip fore-end pay full tribute to its predecessor, the B25.

HERITAGE SPORTER II

The Heritage Sporter combines the performance of a modern shotgun with the elegance of a true deluxe gun. It has the lines of the hunting model with its magnificent side plates, but with the specifications of the Sporter versions. The pistol gunstock and tulip forearm are made from beautiful, oil-finished walnut. Each gun is beautifully engraved.

B725 HUNTER

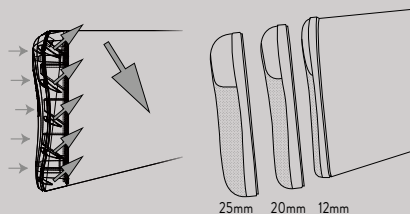

THE LEGENDARY STRENGTH IS NOW COMBINED WITH REVOLUTIONARY DESIGN AND FEATURES

1

INFLEX™ II RECOIL PAD

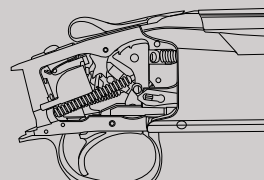

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun. Two other pads, 20mm or 25mm thick (available as an option), make it easy to adjust the length of your stock (see page 144).

2

HIGH-PERFORMANCE MECHANICAL TRIGGER SYSTEM

This firing system is shorter, faster and lighter giving more control over your shooting. Browning's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

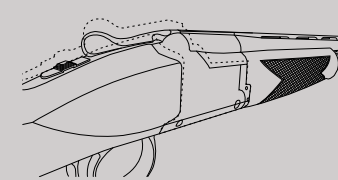

3

LOW ACTION FRAME

The low action frame provides the following benefits when shooting. It enables faster aiming and therefore more instinctive shooting. Thanks to the frame's inline recoil providing a more comfortable shooting position, it reduces muzzle flip and makes for good manoeuvrability and effectiveness when shooting.

ACTION FRAME GUARANTEED FOR TEN YEARS.

4

5

**B725 HUNTER G5 12M INV DS**

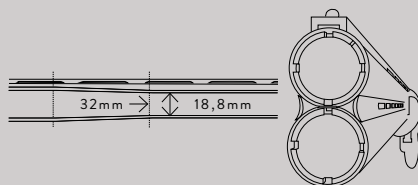

'LEGENDARY RELIABILITY' AND 'INNOVATION' ARE THE B725'S WATCHWORDS

The Browning B725 is an aesthetic and technical revolution in over-and-under shotguns. Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding over-and-under shotgun on the market.

4

BACK-BORED™ VECTOR PRO™ BARREL

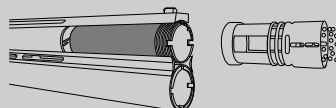

The Back-bored™ Vector Pro™ barrel has an increased internal bore diameter and longer forcing cone. One barrel, two features, three benefits: greater velocity and better penetration / shot grouping and reduced recoil.

5

INVECTOR DS™ CHOKES

The Invector DS™ chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment (see pages 34 and 142).

B725 HUNTER

B725 HUNTER UK PREMIUM II 12M & 20M INV DS

The B725 UK Premium II range reaches new aesthetic heights with beautifully honed contours. It sports a new gunstock delightfully complemented by a rounded pistol grip, and the spirit of feathered game remains eternal through a new series of animal engravings depicting partridges and pheasants on the 12-gauge model, and pheasants and woodcock on the 20-gauge version.

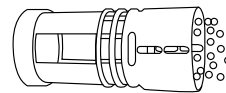

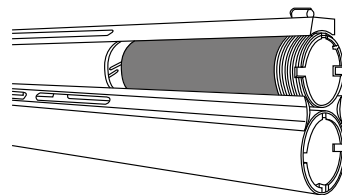

B725 HUNTER UK BLACK GOLD II 12M & 20M INV DS

This B725 is available in both 20-gauge and 12-gauge versions, and now comes with a rounded pistol grip buttstock. Its elegant black action frame features new hunting scenes with partridges, prominently highlighted in gold to eye-catching effect, alongside pheasants (12-gauge) and woodcock (20-gauge).

INVECTOR DS™ CHOKES

Invector DS™ chokes offer the best performance on the market. At 80mm long and with an exclusive internal shaping, they are designed to deliver the finest performance at any shooting distance. They also ensure better pattern consistency for lead and steel shot. Finally, after an intensive session firing off 500 of the most dirt-encrusting rounds, they also keep the choke clean by restricting the spread of gases, while the patented gas seal makes the choke easier to remove (see page 142).

INVECTOR DS™

B725 HUNTER LIGHT PREMIUM 12M & 20M INV DS

The B725 Hunter Light Premium exemplifies Browning's combination of efficiency, weight and design. Its action frame in lightweight aluminium reduces the weight of the gun by over 300g for an even easier swing. Shouldering, tracking and hitting the target become a single motion, because this gun is a featherweight in the literal sense only. Its Back-bored™ barrels, five Invector DS™ chokes, and 20mm recoil pad are a credit to modern technological progress, while the exquisitely designed nickel-plated aluminium receiver and Grade 3 walnut woodwork make it an over-and-under shotgun of great distinction.

B525

A PERFECT MECHANISM AND A REAL FEELING OF FREEDOM

1

STOCK OF THE B525 LIBERTY LIGHT 12M INV+

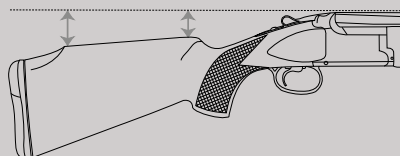

This is a new stock developed for ladies, young people and shooters who are not completely satisfied with standard measure stocks.

2

DROP

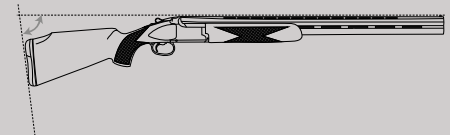

The drop is the height of the back of the stock in relation to the top rib. The drop of the B525 Liberty Light 12M Inv+ is higher than standard stocks. This feature allows the shooter improved cheek contact on the back of the stock and thus limits recoil impact.

3

PITCH

Pitch is the angle of the recoil pad in relation to the axis of the top rib. Set to 80°, this angle limits the contact of the stock rib to the shooter's chest, a notable improvement in comfort when firing.

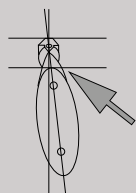

**B525 LIBERTY LIGHT 12M INV+****BALANCE AND LIGHTNESS**

Designed for women, youngsters and hunters that are not fully satisfied with regular buttstocks, such is the main characteristic of the 12 Magnum shotgun. It has an aluminium action frame decorated with new engravings and possesses a Monte Carlo style stock with an adapted pitch, a pistol grip and two recoil pads supplied in the box. Well balanced and light, its level of technical perfection will give you a feeling of real liberty.

4**ADVANTAGE OF 4-10 MM**

The advantage is in the tilt of the recoil pad in relation to the axis of the top rib. This advantage has been modified with respect to standard models and will be clearly preferable for ladies without impairing men's comfort when shooting.

**5****LENGTH OF RECOIL PADS**

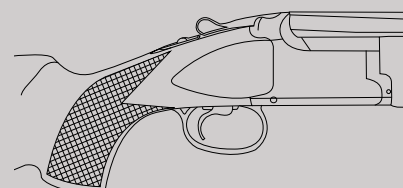

The B525 Liberty Light 12M Inv+ is delivered with three Inflex™ II recoil pads, combined with a grip that is adapted for small hands and a trigger system, both of which are adjustable. It will be easy to configure it for perfect ergonomics (see page 144).

25 mm 20 mm 12 mm

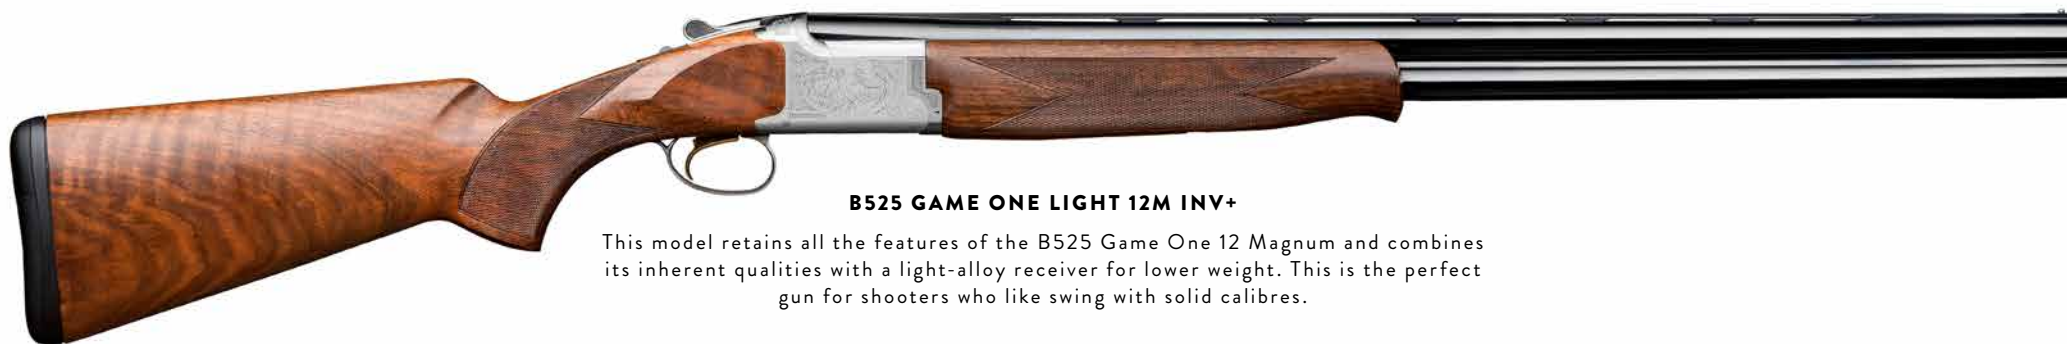

6**ALUMINIUM ACTION FRAME AND VENTILATED RIBS**

The alloy action frame and the ventilated ribs of the B525 Liberty Light 12M Inv+ give a lightweight gun. Its 8mm ventilated rib allows it to be used for both all kinds of sporting shooting.

STEEL SHOT PROVED

B525 GAME ONE

B525 GAME ONE LIGHT 12M INV+

This model retains all the features of the B525 Game One 12 Magnum and combines its inherent qualities with a light-alloy receiver for lower weight. This is the perfect gun for shooters who like swing with solid calibres.

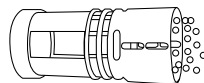

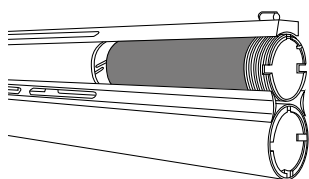

B525 GAME ONE LIGHT 20M INV

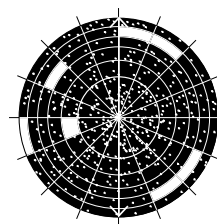

The special features of the 20 Magnum calibre B525 Game One Light that make it so successful are: Grade 2.5 wood with oiled finish, a pistol grip combined with a tulip fore-end, four Invector chokes and a fine 6mm ventilated rib. What is more is actually less. This light version, equipped with an aluminium action frame, now weighs only 2.7kg. With this light weight gun, you can walk up game without getting over-tired.

INVECTOR-PLUS™ AND INVECTOR-DS™ CHOKES

Adjustable Invector-Plus™ and Invector-DS™ chokes have been specially developed for our Back-bored™ barrel system. They have been designed to obtain 'the perfect target' at different shooting distances. Depending on the Browning choke you use, you can adapt your gun for the distances at which you shoot and the game you are hunting (**Full Choke** = 35 m, **3/4 Choke** = 30 m, **1/2 Choke** = 25 m, **1/4 Choke** = 20 m, **Cyl** = 15 m, see page 142).

B525 GAME ONE 12M INV+

The B525 Game One is your ideal hunting partner. Reasonably priced, it is the basic model Browning over-and-under hunting gun. Its action frame is made from a single block of forged steel. Available with the Auto Safety system, its lightweight Back-bored™ barrels and Invector-Plus™ chokes make it a great choice for bird shooting.

B525 GAME ONE 20M INV

We have followed up on the success of the B525 Game One with a small-gauge version. This is the entry-level 20-gauge over-and-under shotgun and it comes at a highly affordable price.

A5

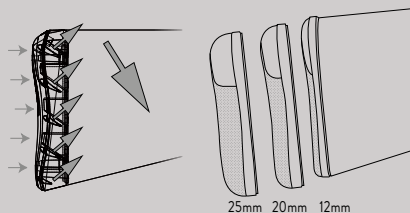

THE KINEMATIC DRIVE™ SYSTEM IS YOUR 100,000-ROUND WARRANTY*

1

INFLEX™ II RECOIL PAD

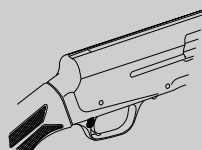

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun. Two other pads, 12mm or 25mm thick (available as an option), make it easy to adjust the length of your stock (see page 144).

2

HUMPBACK

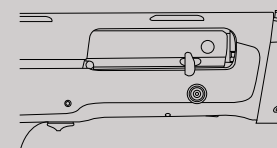

Made from lightweight, aeronautic quality aluminium alloy, the A5's receiver is sturdy and its characteristic shape is much more than just a nostalgic return to the past. The receiver's familiar humpback shape fits perfectly with the rib for lengthening your line of sight, which helps you to aim naturally with faster targeting.

3

LOADING AND UNLOADING SYSTEM

Rapid loading systems have been used on Browning semi-automatic shotguns for decades. Our patented Speed Load Plus system chambers the first round straight from the magazine, and unloads quickly without having to run the bolt to chamber each shell.

BUILT TO LAST: 100,000-ROUND WARRANTY*

The A5 was developed to be the most reliable, fastest and gentlest inertia-driven semi-automatic shotgun on the market. The new, indefatigable Kinematic Drive™ system is what makes it so unfailingly reliable, while further innovative features such as the Invector DS™ chokes, Inflex™ II recoil pad and Speed Load Plus load/unload system add to the A5's technological punch.

4

KINEMATIC DRIVE™ SYSTEM

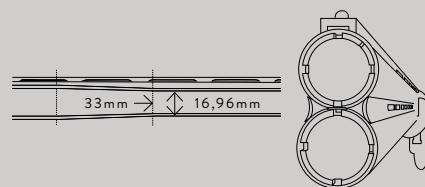

The system accumulates recoil energy and converts it into a mechanical movement for actuating moving parts. The beauty of the Kinematic Drive™ system resides in its simplicity of design, which enables it to operate in a regular, reliable way, with any type of load, and under all extreme conditions of weather, temperature, moisture or fouling.

5

BACK-BORED™ VECTOR PRO™ BARREL

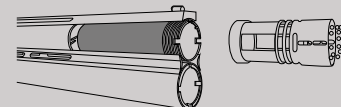

The Back-bored™ Vector Pro™ barrel has an increased internal bore diameter and longer forcing cone. One barrel, two features, three benefits: greater velocity and better penetration / shot grouping and reduced recoil.

6

INVECTOR DS™ CHOKES

The Invector DS™ chokes offer unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment (see pages 34 and 142).

TECHNOLOGY

A5 GRAND PASSAGE INV DS

Here is the terror of all wildfowl and pest birds! The A5 is available in 12/89 and with its famous Invector DS™ chokes – but now featuring ceramic-based protective technology in the form of a Cerakote-treated barrel, receiver and breech handle to safeguard against natural wear and corrosion... Moreover, its Camo Max 5 composite gunstock and fore-end continue to make it the duck and pigeon shooter's ideal companion!

A5 ONE 16 INV DS

The A5 One 16 Inv DS is weighted close to a 20-gauge, for greater ease of handling. But the barrel can handle heavier loads than a 20-gauge, giving it near 12-gauge performance. The A5 One 16 Inv DS also has a surprisingly gentle recoil, is light, available with a 26in or 28in barrel, and comes with two Invector DS™ chokes.

A5 ONE INV DS

The A5 ONE Inv DS is the starter version of the A5 family, with an understated receiver that is enhanced by the walnut stock and fore-end. It features all the technical specifications behind the success of the A5. It is available in 12 and 16-gauge.

MAXUS

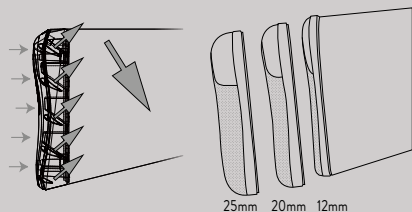

COMFORT AND LIVELINESS WITH OPTIMAL PERFORMANCE

1

INFLEX™ TECHNOLOGY

Much more than a recoil pad in a recoil-absorbing material, the Inflex™ II has been designed with an internal structure that lowers the gunstock and pushes it away from the shooter's face after each discharge, which allows a second shot that is even more comfortable and faster (see page 144).

2

LOADING AND UNLOADING SYSTEM

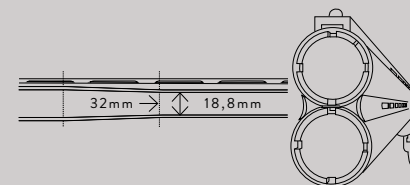

Rapid loading systems have been used on Browning semi-automatic shotguns for decades. Our patented Speed Load Plus system chambers the first round straight from the magazine, and unloads quickly without having to run the bolt to chamber each shell.

3

BARREL ASSEMBLY

The new geometry of the extended Vector Pro™ forcing cone together with the Back-bored™ barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

3

**MAXUS SPORTING BLACK CARBON FIBER INV+**

NEW

5

LIKE THE OTHER BROWNING BRAND GUNS,
THE MAXUS RANGE CONTINUES TO DEVELOP

This gun has been specially designed for sports shooting. The ventilated rib, tapered from 6mm to 8mm, gives faster targeting. Its carbon finish gives a particularly unique style. Unlike the hunting Maxus, the Maxus Sporting Black Carbon Fiber Inv+ does not have a magazine Cut-Off.

4

'CUT-OFF'

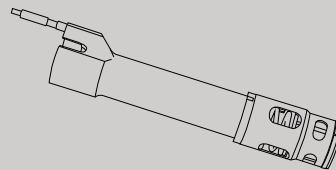

The Maxus is equipped with a 'Cut-Off' for the magazine to allow the shooter to unload the chamber easily, and thus change the type of shell without having to chamber a shell from the magazine.

5

POWER DRIVE GAS SYSTEM

The Power Drive Gas System uses larger escape valves to remove gas more quickly with heavy loads. A brand new patented design for an integrated valve keeps residue outside the mechanism for cleaner functioning. A 20% increase in the piston run increased makes it even more reliable with light charges. The system works with loads of 24g to 64g.

MAXUS

MAXUS ULTIMATE PARTRIDGES INV+

The delicate engraving representing partridge hunting scenes on one side and pheasants on the other gives it a real up-market feel. Its brushed nickel-coated receiver is a little gem. Its stock and fore-end are made from Grade 3 oil-rubbed walnut.

MAXUS ONE INV+

Maxus One Inv+ is the entry level semi-automatic gas operated rifle by Browning. It features all of the technical characteristics that make Maxus such a success and is sold at an affordable price, which makes it your perfect value hunting shotgun.

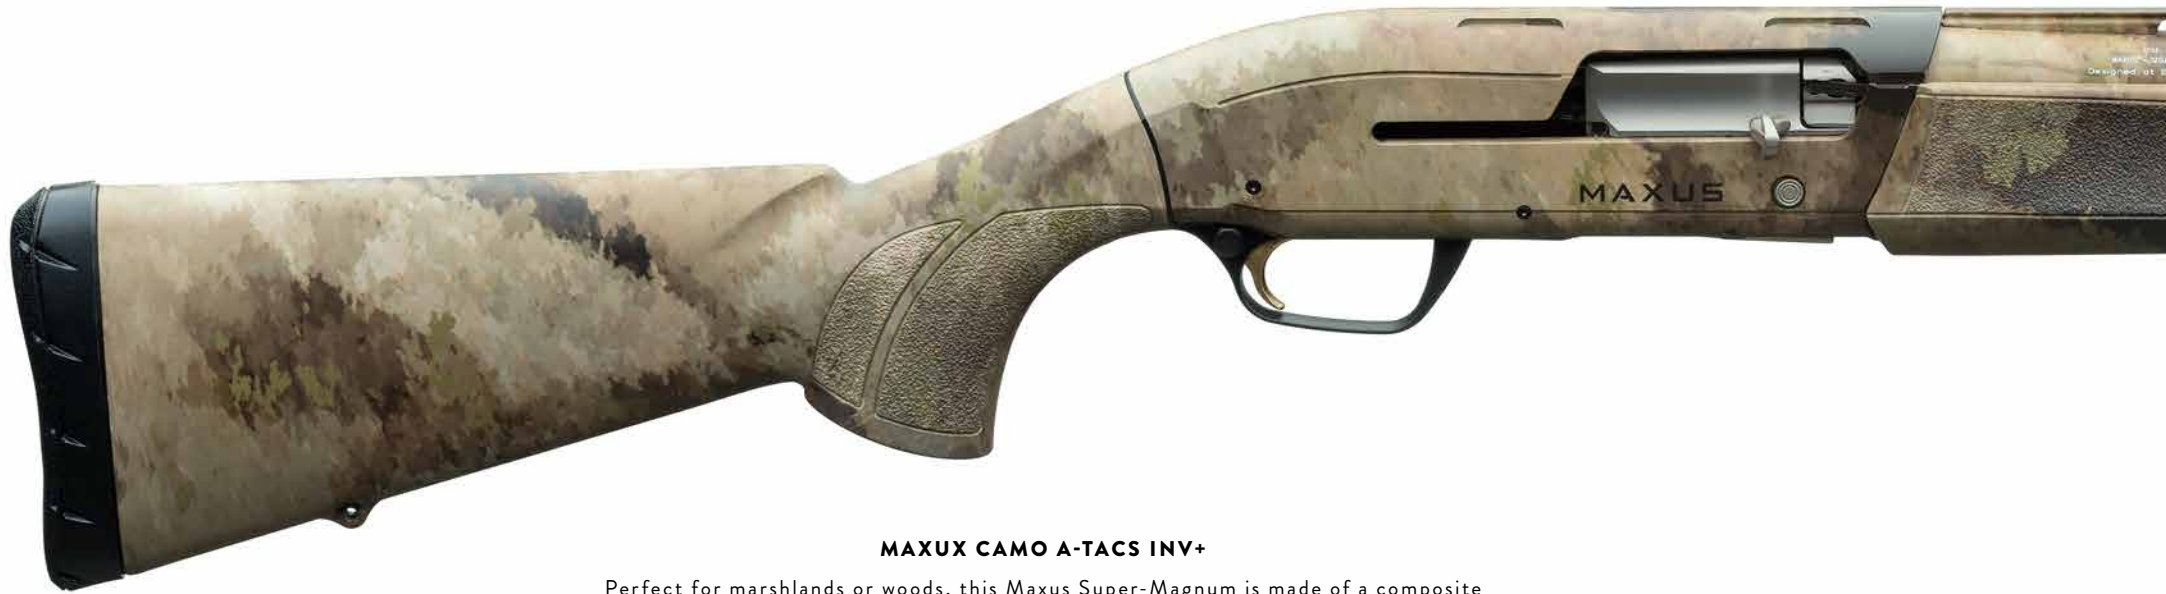

MAXUS BLACK GOLD INV+

The Black Gold version further refines the lines of the Maxus semi-automatic with an anodised black receiver from which two engraved gilt ducks loom like hope, seemingly about to land... Not to be outdone, the gunstock and fore-end are fashioned in attractive Grade 3 wood.

2

HAND COCKING SYSTEM SAFETY GUARANTEED

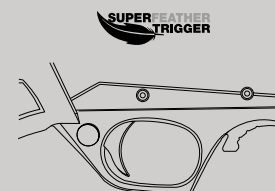

The manual cocking system lets you literally cock your rifle, by moving the arming plunger forwards, which puts the hammer springs under load. Your gun is now ready to fire. You can disarm your gun just as easily by pushing the button.

3

TRIGGER SYSTEM IS A GLASS-BREAKER

When you want absolute precision, this trigger system is crisper, shorter and incredibly direct. The trigger system offers you that rewarding sense of breaking a glass bar as you squeeze into a shot.

BAR MK3 A-TACS CERAKOTE KITE COMBO HAND COCKING

6

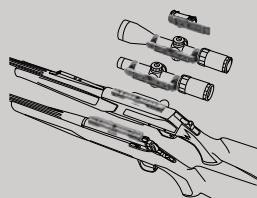

OVER 50 YEARS OF EXPERIENCE

This model is a real symbol because it combines the formidable Bar Mk3 with the recent range of telescopic scopes developed by Kite Optics in collaboration with Browning. Equipped with Cerakote coating on its metal parts (including the optical elements), the rifle has increased resistance to any form of friction or abrasion. Its Nomad Hybrid base rail (see pages 140-141) allows the scope to be mounted and dismounted surprisingly quickly. Equipped with an adjustable cheek-piece, this Bar, which will adapt to your needs, will also keep you hidden thanks to its A-TACS AU camo finish.

4

BROWNING NOMAD MOUNTS

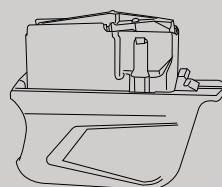

Ultra-accurate and fast removable mount system. On or off in five seconds flat (see pages 140-141)!

5

REMOVABLE OR FIXED 2-, 3-, 4- OR 10-ROUND MAGAZINES

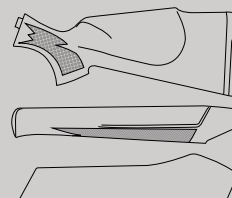

These chargers are vital accessories for your Bar. They are available in a number of versions and are designed to suit your hunting style and comply with local laws (see page 143).

6

AESTHETIC, SOPHISTICATED, ELEGANT

Customise your Bar Zenith with a range of options: a selection of receiver plates and a number of different types of stock and fore-end are available. Make your gun one of a kind (see pages 64-65).

BAR MK3

BAR MK3 COMPOSITE BROWN HAND COCKING THREADED

The Bar Mk3 Composite is dressed in matte black with a beautiful brown gunstock and fore-end. This semi-automatic with fully adjustable comb comes with a Nomad scope rail (see pages 140-141) and is sure to be a hit when hunting large, moving game.

BAR MK3 TRACKER HAND COCKING FLUTED

This model will delight driven hunt enthusiasts. Safety comes first in this model as it features orange inserts on the gunstock and fore-end. Then there is the 18½in fluted-barrel profile and Super Feather Trigger combination to guarantee unprecedented accuracy and faster action.

Available in a left-handed version

NEW

Available in a left-handed version

BAR MK3 COMPOSITE FLUTED HAND COCKING

In addition to the extremely consistent contours, the Bar Mk3 Composite HC boasts a fluted barrel with a profile for outstanding accuracy on driven hunts and in blinds. Safety is guaranteed by the hand-cocking system that is as intuitive as it is reliable. Finally, the rubber grips ensure perfect handling. The Bar Mk3 Composite HC – understated and effective at an eye-catching price.

BAR MK3

BAR MK3 LIMITED EDITION WILDBOAR G4

The Bar MK3 Limited Edition Wildboar G4 is a limited-series gem, with only 500 available. This version is furnished in grade 4 Turkish walnut with an oil-rubbed finish, features special boar engravings, and includes all the inherent technical qualities of the Bar MK3 range.

BAR MK3 ECLIPSE FLUTED

This version, which possesses all the technical specificities of the Bar Mk3 range, is also exceptional due to the remarkable grace of its aesthetic qualities. Its piped, satin barrel and its delicately nickel-plated receiver – adorned by a new engraving representing roe deer and wild boar – undoubtedly pay homage to the rustic charms of hunting.

NEW

BAR MK3 HUNTER FLUTED

An anodised black receiver, brushed side-faces, top and bottom and the stock and fore-end in grade 2 oil-rubbed walnut, the Bar Mk3 Hunter is the end result of particularly neat and inventive work. Fitted with an adjustable foresight, its 53cm piped barrel possesses a profile that emphasises the accuracy of a gun that also offers excellent firing capabilities thanks to its Super Feather Trigger system.

BAR ZENITH

BAR ZENITH PLATINUM HAND COCKING

Scope not supplied (see below for more information about Kite optics)

Incorporating all the technical characteristics of the Bar Zenith range, and equipped with a classic cheek piece stock, this model stands out because of its elegance: all the wood parts are grade 5 walnut, and the receiver, nickelled, is superbly engraved with scroll designs in a classic style.

Platinum plugs for Kite KSP KD2 provided

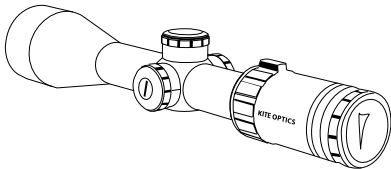

BAR ZENITH WOOD FLUTED HAND COCKING

The Bar Zenith Wood Fluted Hand Cocking possesses a longer piped barrel that offers a more accurate line of sight. The manual cocking system located on the top of the pistol grip offers an extra degree of safety.

KITE OPTICS, THE UNCONDITIONAL PERFORMANCE

Browning has joined forces with famous optics specialist, Kite Optics, to develop a range of high-performance hunting scopes. The KSP HD2 range has been developed by hunters, for hunters. The scopes combine best optics performance (more than 93% light transmission) solid construction, metal throughout, a fine and precise mechanism, as well as easy handling, even when wearing gloves. All scopes carry a lifetime guarantee. Find out more about the features of Kite Optics scopes and binoculars at www.kiteoptics.com.

MARAL SF

THE MOST EFFECTIVE STRAIGHT-PULL ACTION RIFLE: SURER, MORE ERGONOMIC, FASTER

MARAL SF COMPOSITE BROWN ADJUSTABLE FLUTED HAND COCKING LEFT HAND

Available in a right-handed version

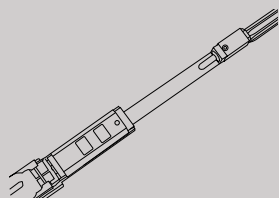

THE MARAL SF COMPOSITE BROWN ADJUSTABLE FLUTED HAND COCKING
IS NOW AVAILABLE IN A COMPOSITE VERSION!

Here, buttstock, grip and fore-end are brown in contrast to the black of the barrel and the receiver, giving it discretion and distinction. This fine straight-line action rifle with a threaded barrel (M14x1) and an adjustable cheek-piece also has a muzzle brake (T1), which can significantly reduce recoil and the extent of muzzle rise in case of successive shots. Offered in 30-06 and 308W calibres, the Maral SF Composite Brown Adjustable Fluted Hand Cocking is designed to receive a telescopic sight with its Nomad Hybrid base rails (see pages 140-141).

1

QUICK RELOADING SYSTEM

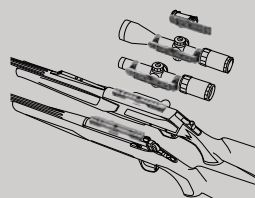

The servo bolt return system combines maximum safety, speed and efficiency. Thanks to the time gained in the reloading phase, shooters can concentrate on their shooting.

2

BROWNING NOMAD MOUNTS

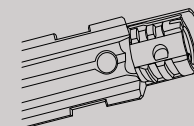

Ultra-accurate and fast removable mount system. On or off in five seconds flat! (see pages 140-141).

3

SAFETY GUARANTEED

- Hand cocking system.
- Breech contained inside its casing: no inconvenience when reloading.
- Seven-lug bolt: a bolt renowned for its sturdiness, which guarantees exceptional safety and accuracy.

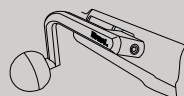

4

PERFECT ERGONOMICS

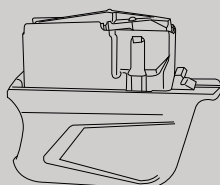

- Fibre optic open sights.
- Easy and ergonomic handling.
- New cocking handle for improved firing comfort.

5

REMOVABLE 3-, 4-ROUND MAGAZINE OR EXTENDED CAPACITY 9 OR 10 ROUNDS

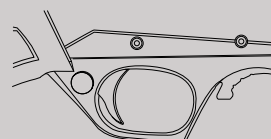

You can get these vital accessories for your Maral in 3+1 and 4+1 removable versions, and 9+1 and 10+1 extended-capacity versions (see page 143).

6

TRIGGER SYSTEM IS CRISPER, SHORTER AND INCREDIBLY DIRECT

When you want absolute precision the trigger system is crisper, shorter and incredibly direct. The trigger system offers you that rewarding sense of breaking a glass bar as you squeeze into a shot.

BLR

EXCELLENCE BUILT TO LAST

BLR LIGHTWEIGHT TRACKER PISTOL GRIP BATTUE

The Tracker version of this lever-action rifle includes a laminated wood stock. It has been treated to a ultra-strength Cerakote surface treatment for unbeatably long-service life. The sights and short barrel make this an excellent gun for driven hunts and tracking.

BLR LIGHTWEIGHT HUNTER LAMINATED BROWN THREADED

Sight rib, perforated butterfly

NEW

THE PERFECT PARTNER ON DRIVEN HUNTS

The BLR is the only lever-action rifle developed in magnum calibres. Its mechanics are impeccable and characterised by the exceptional smoothness of its operation. It has a removable magazine and a high quality barrel and is ready for fitting a scope.

X-BOLT SF

NEW X-BOLT SF: MISSING IS NO LONGER AN OPTION

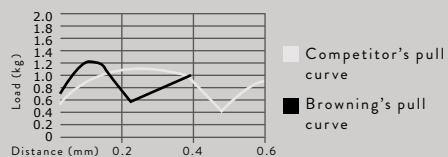

1

THE X-BOLT SF RANGE FEATURES A SHORT, CRISP AND DIRECT TRIGGER PULL

Firing action with a triple guarantee:

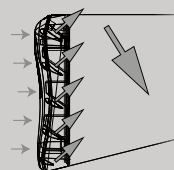

- Zero take-up.
- Minimum break.
- Limited overtravel.

2

INFLEX™ ANTI-RECOIL BUTT-PLATE

This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the gunstock slightly away from your face in order to reduce the recoil and upward motion of the gun (see page 144).

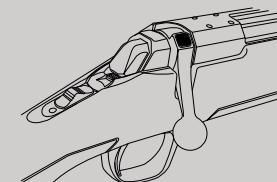

3

BOLT-UNLOCKING BUTTON

The bolt-unlocking button works in conjunction with the safety to provide an added degree of safety.

ROTATING MAGAZINE

Made in light ultra-resistant polymer, it gives exclusive protection to bullet noses (see page 143).

X-BOLT SF A-TACS AU CERAKOTE THREADED M14X1 + KITE KSP HD2, 2-12x50i COMBO

5

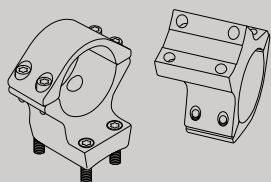

RUGGED RELIABILITY AND EXTREME PRECISION

This bolt action rifle for stalking big game needs no introduction. It is now available with the Kite Optics KSP HD2, 2-12x50i scope. With its A-TACS AU composite gunstock and its Kite scope in Cerakote finish, it has the double advantage of rugged reliability and extreme precision.

4

INTEGRATED MOUNTING SYSTEM

The integrated scope-mounting system has four screws per fixing point. Therefore it is more stable and provides higher accuracy (see page 141).

5

UTMOST ACCURACY

A free-floating barrel is essential for utmost accuracy. The X-Bolt SF's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel/breech block assembly at two points with respect to the forearm, at the front and at the rear.

X-BOLT SF HUNTER ECLIPSE BROWN THREADED

The styling isn't the only distinguishing feature on the X-Bolt SF Hunter Eclipse Threaded: the laminated wood stock is graced with a thumbhole that provides a natural fit to guarantee a firm but flexible grip for easier movement. Equipped for fitting a scope, and with the Super Feather Trigger system, the X-Bolt Hunter Eclipse Threaded rifle has a threaded barrel (M14x1).

X-BOLT SF ECLIPSE VARMIN'THREADED

The stand-out feature of the Eclipse Varmint version of the highly popular X-Bolt is its 61-cm heavy barrel with a threaded end (M18x1). It also continues the excellent principle of a thumbhole stock where the thumb slips naturally into place for an easier grip; and the laminated grey wood stock combines with the ultra-high performance Super Feather Trigger system to take comfortable shooting to a whole new level. The X-Bolt Eclipse Varmint – a vital ally when stalking vermin.

X-BOLT SF

X-BOLT SF CHASSIS MDT FLUTED THREADED BLACK

Long Picatinny rail not included, available as optional extra

A resolutely modern look, extreme precision and excellent ergonomics: that's how we sum up the new X-Bolt SF Chassis. With a full aluminium MDT HS3 chassis stock with polymer inserts, this rifle is equipped with three Picatinny side rails, a Hogue pistol grip, a skeleton adjustable stock and a heavy 61cm fluted and threaded M18x1 barrel, with T2 muzzle brake. This arm, destined for sport shooting, includes numerous accessories (muzzle brake, five-shot magazine and tactical ABS case).

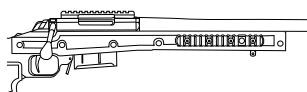

X-BOLT SF CHASSIS MDT FLUTED THREADED FLAT DARK EARTH

The X-Bolt SF Chassis MDT Fluted Threaded Flat Dark Earth inherits all the characteristics of the X-Bolt SF Chassis MDT Fluted Threaded Black apart from its colour.

1

ALUMINIUM CHASSIS

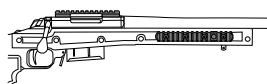

A beautifully-engineered MDT HS3 aluminium chassis stock with polymer inserts.

2

PICATINNY RAILS

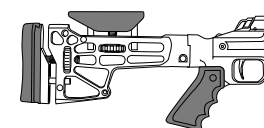

Arm includes three Picatinny rails: an optical sight mounting rail and two lateral rails for your accessories.

3

HOGUE PISTOL GRIP AND ADJUSTABLE SKELETON

Grip and buttstock are designed for perfect ergonomics.

X-BOLT SF LONG RANGE MC MILLAN FLUTED CERAKOTE RECOIL REDUCER THREADED

This gun features an original Cerakote finish on the metal components, together with a McMillan fibreglass Game Scout buttstock. The outstanding qualities that make this an ideal bolt-action rifle for hunting big game from blinds and long-range shooting have been nicely enhanced with a muzzle brake and a thread in the same diameter as the barrel.

X-BOLT SF VARMIN'T COMPOSITE ADJUSTABLE DURA TOUCH THREADED

Scope not supplied (more details on Kite Optics on page 58 and 82)

Browning welcomes the X-Bolt Varmint. It features a heavy, threaded barrel (M18x1), an adjustable comb, and two 7mm gunstock inserts designed to deliver outstanding accuracy. Steel scope mounting bases are also included.

X-BOLT PRO

THE BENCHMARK FOR BOLT ACTION RIFLES

1

HIGH-PRECISION BARREL

The fluted barrel on the X-Bolt Pro ensures it stays cool and reduces weight. The barrel lapping process polishes away any traces of machining work, improving accuracy and reducing fouling.

2

FLUTED BOLT AND BOLT HANDLE

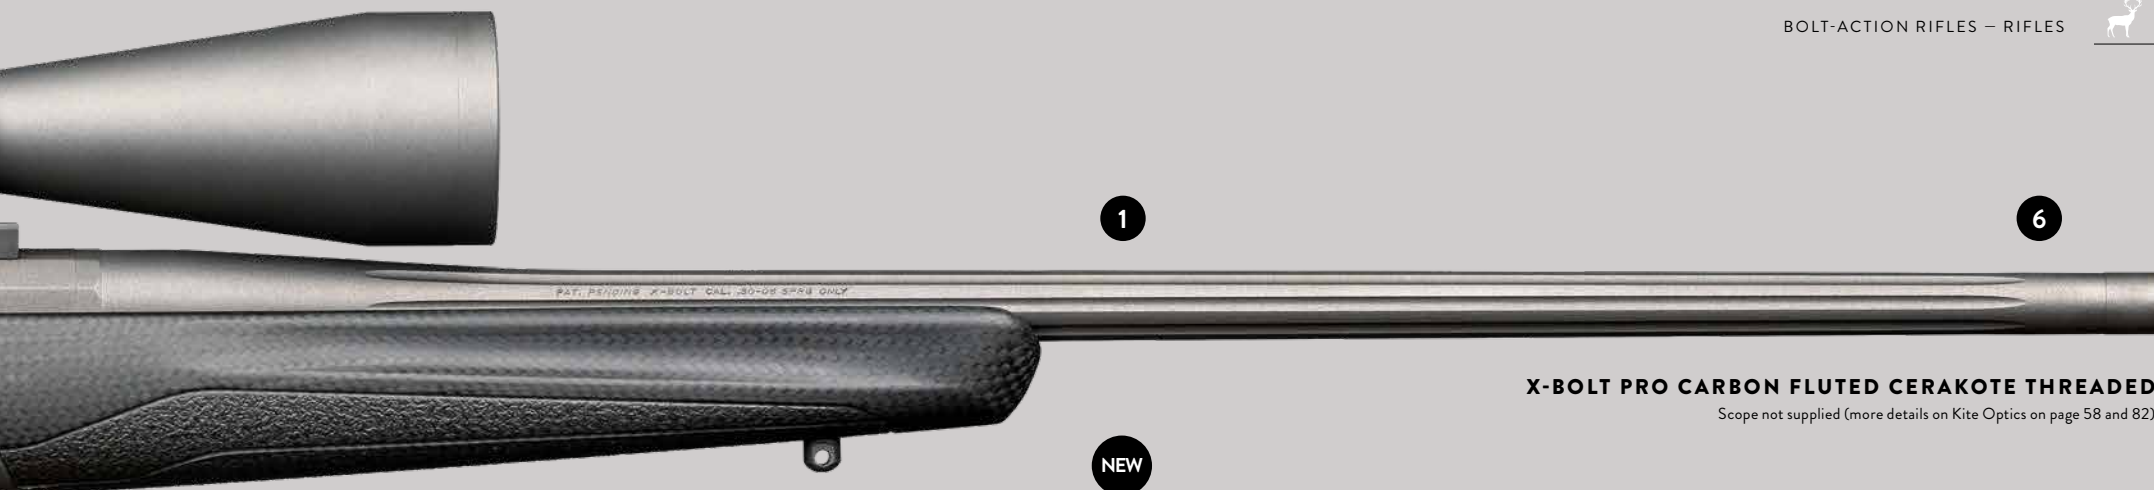

The externally fluted bolt and bolt handle provide smoother action for a rapid shot.

NEW

3

CERAKOTE "TUNGSTEN" FINISH

The X-Bolt pro is Cerakote finished on all its metal components (including the optics) and on the magazine floor plate. The result is better resistance against any type of friction, abrasion and corrosion.

X-BOLT PRO CARBON FLUTED CERAKOTE THREADED

Scope not supplied (more details on Kite Optics on page 58 and 82)

ULTRA-LIGHT, ULTRA-RIGID, PINPOINT ACCURACY

Your high standards are your greatest attribute. You won't accept failure. You need a gun that reflects your character: effective and results-oriented. You never look for excuses. The X-Bolt Pro Carbon is designed for you. It handles like a featherweight, allowing you to push your active hunting limits. The rigidity of the stock gives you even greater accuracy.

4

CARBON-FIBRE STOCK

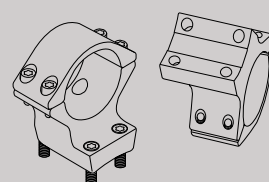

The X-bolt Pro Carbon is:

- Ultra-light and 200 grams lighter.
- Ultra-rigid for uniform recoil distribution.
- Ultra-solid, compression-moulded carbon-fibre construction with a high-density foam core.

5

INTEGRATED MOUNTING SYSTEM

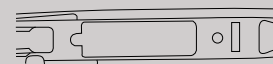

The integrated scope-mounting system has four screws per fixing point. Therefore it is more stable and provides higher accuracy (see page 141).

6

DOUBLE BEDDING

A free-floating barrel is essential for utmost accuracy. The X-Bolt SF's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel/breech block assembly at two points with respect to the forearm, at the front and at the rear.

X-BOLT PRO

X-BOLT PRO LONG RANGE GRS

The X-Bolt Pro Long Range GRS is a perfect blend of accuracy, design and ergonomics, whose intricately crafted, adjustable length and pitch laminated-wood stock and even greater firing comfort give you an aggressive style.

X-BOLT PRO HUNTER G5 THREADED

Scope not supplied (more details on Kite Optics on page 58 and 82)

The X-Bolt Pro Hunter Grade 5 Threaded is packed with proprietary technical features that deliver a near "custom" rifle shooting experience: the bolt body and handle are fluted for a killer look. The barrel is hand-lapped to "custom" quality levels. Finally, all the metal components are given a Tungsten Cerakote finish for guaranteed friction, abrasion and corrosion resistance.

A-BOLT 3

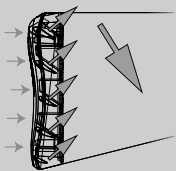

A LEGEND IN THE MAKING

1

INFLEX™ ANTI-RECOIL BUTT-PLATE

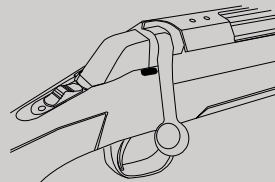

This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun.

2

UNLOCKING BUTTON FOR THE BOLT

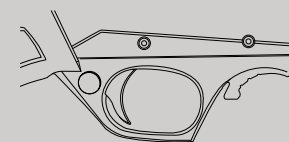

The unlocking button for the bolt ensures optimum security and is ideally placed on the back of the pistol grip. Can be opened in the safety 'on' position.

3

NEW PERFECT TRIGGER

For firing with absolute accuracy, there is no alternative to the A-Bolt 3 trigger action, sharper, short and ultra-direct. The trigger gives you a clean, fast pull with exceptional sensitivity.

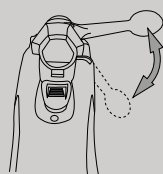

**A-BOLT 3 HUNTER LAMINATED BROWN THREADED****NEW****SOLID BUILD, STYLISH AND ERGONOMIC**

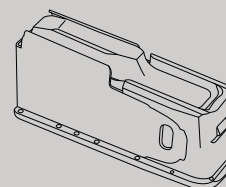

This model of the A-Bolt 3 rifle shares the same special features as the A-Bolt 3 Hunter and includes a laminated stock for a modern style that doesn't compromise on efficiency.

4**BOLT AND HOUSING**

The A-Bolt 3 features a three pin bolt that offers extreme precision. The 60° opening of the bolt allows for a rapid and efficient cycle.

**5****DROP BOX MAGAZINE**

The essential accessory, the A-Bolt 3 is fitted with a state of the art drop box magazine. Its synthetic and steel construction can withstand any conditions (see page 143).

 TECHNOLOGY

KITE OPTICS

A-BOLT 3

A-BOLT 3 HUNTER

Scope not supplied (more details on Kite Optics on page 58 and 82)

This high-precision version includes all the special features of the A-Bolt 3 Composite. It also comes in six calibres, and with steel bases for secure scope mounting. The A-Bolt 3 Hunter's wood is walnut, guaranteed to add natural beauty to a hunting rifle. Here it enhances elegance without sacrificing the rifle's rugged qualities.

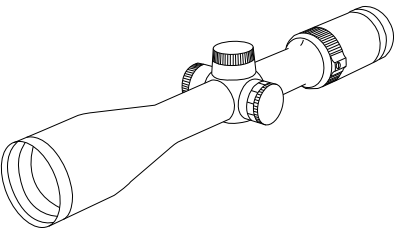

A-BOLT 3 HUNTER BATTUE

Originally intended for hunting big game from a hide, the A-Bolt 3 now comes with a top rib suitable for *battue* shoots. This innovation will certainly find the approval of bolt-action rifle enthusiasts, especially since the rifle, available in 30-06 Spr or 308 Win calibre, is accessible at a very, very reasonable price!

KITE OPTICS, UNCONDITIONAL PERFORMANCE

Browning has joined forces with famous optics specialist, Kite Optics, to develop a range of high-performance hunting scopes. The new Kite range has been developed by hunters, for hunters. The scopes combine best optics performance (more than 93% light transmission) solid construction, metal throughout, a fine and precise mechanism, as well as easy handling, even when wearing gloves. All scopes carry a lifetime guarantee. Find out more about the features of Kite Optics scopes and binoculars at www.kiteoptics.com.

T-BOLT & BL-22

T-BOLT TARGET VARMINT COMPOSITE THREADED

This version is equipped with a gunstock made of highly-resistant ergonomic composite, allowing intense use in all conditions. The heavy, threaded barrel also includes scope-mounting bases.

T-BOLT TARGET VARMINT STAINLESS GREY LAMINATED THREADED

This vermin rifle is now available with a stainless steel barrel and a laminated grey Monte Carlo buttstock. The heavy, threaded barrel also includes scope-mounting bases.

Available in a left-handed version

T-BOLT SPORTER COMPOSITE THREADED

This version is equipped with a gunstock made of highly-resistant ergonomic composite, allowing intense use in all conditions. Another very useful characteristic is an additional magazine integrated in the gunstock and, more particularly, in the pad.

T-BOLT SPORTER THREADED

This rifle is a vintage, the reissue of a best seller, a legend. Available in .22LR, .22 Magnum, and 17HMR calibres, it is aesthetically close to its ancestor, the first T-Bolt, but the mechanics have been completely modernised. It is characterised by its straight-pull bolt that loads cartridges from an exclusive 10-round rotating magazine.

BL G2 22 LR

This is a jewel from the era of the pioneers, back in the Wild West. With its short movement action-lever (33°), external hammer, and magazine tube, the BL-22 enables you to mix all types of cartridges (long and short) with no risk of jamming.

BUCK MARK

ACCURATE AND RELIABLE IN ONE

Browning Buck Mark rimfire pistols are highly valued due to their quality, reliability and accuracy. These pistols have a receiver made from a single aluminium block machined using numerical control. The barrel is machined in a single top-quality steel block and the chamber is hand-bored to guarantee optimal accuracy.

MONOLITHIC LEAD-FREE

Lead-free

BXS

The Browning BXS is ideal against big game. Its monolithic copper construction provides near-100% mass retention. This means all its energy is saved to penetrate deep into even the thickest hides and ensure overwhelmingly lethal knockdown power. The polymer tip expands faster for maximum impact shock. The nickel-coated casings are corrosion resistant and make loading easier, promising a fast shot backed by guaranteed devastating knockdown power. And because Browning's BXS is lead-free, it can be fired in hunting zones that have lead restrictions in place.

- 1 Polymer tip**
 - Better long-range speed and energy retention
 - Faster expansion
- 2 Hollow Point**
 - Immediate expansion and massive energy transfer
- 3 Monolithic construction (copper)**
 - Near-100% mass retention
 - Deep penetration
 - Lead-free

CONTROLLED EXPANSION

BXC

The new Browning BXC bullet is designed for heavy game where devastating knock down power and deep penetration are required. The bonded bullet design with a residual weight of almost 100% and the Terminal Tip allows for deep penetration through tough hide and bones. The brass tip, heavy bullet weight and boat-tail are integral components to delivering precision accuracy, maximum downrange velocity and long-range, on-target performance.

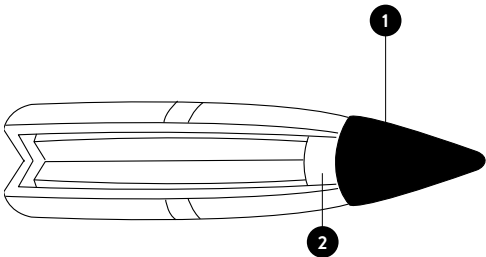

- 1 Bonded Bullet**
 - Controlled expansion
 - Higher weight retention for maximum energy transfer and deeper penetration
- 2 Terminal Tip (aluminium)**
 - Penetrates tough hide and breaks through strong bones
- 3 Heavy Weight and Boat Tail Design**
 - Increase downrange velocity, accuracy and energy

RAPID EXPANSION

BXR

BXR Rapid Expansion Matrix Tip is designed specifically for use on medium game such as roe deer or wild boar. The proprietary matrix tip design allows for high downrange velocity and energy retention while also initiating rapid positive expansion. The jacket and tip combination yields precision accuracy, rapid energy transfer and generates massive knockdown power.

- 1 Matrix Tip (Mix of Copper and Polymer)**
 - High downrange velocity and energy retention
 - Initiates rapid expansion
- 2 Exclusive Fragmenting Tip**
 - Large expanding hollow point for rapid expansion and maximized energy transfer on medium game

At Browning, each item of clothing starts from a passion for the hunt, our years of experience and field tests, and the expertise that all this brings. We combine high-performance materials with cutting edge technology to offer full body protection against the wind, rain and cold, as well as thorny thickets and bramble bushes. While our clothing is tough enough to resist any challenge, it is also comfortable for hunters. The supple materials we use adapt to any body shape, making our hard-wearing yet elegant clothes more efficient as well.

HOW TO CHOOSE THE RIGHT SIZE OF THE JACKET ?

The size of the jacket is proportional to the chest size.
The Velcro neck and belly straps are adjustable.
Do not overtighten, and choose the right size
to avoid hurting your dog.

BROWNING NOMAD

ULTRA-HIGH-PERFORMANCE REMOVABLE MOUNT

A full mount consists of a base rail **A** (single or multiple) matched to the gun and a top rail **B** that is specific to the scope.
The base rails are available in SINGLE or MULTIPLE versions.
The multiple is adjustable in windage and elevation, and let you use the same scope on a second gun.

MULTIPLE SCOPES ON MULTIPLE GUNS

PRECISE

The patented bolt technique gives perfect attachment, exceptional resistance and constant precision, whatever the scope used.

FAST

Using the thumbwheel attachment, change scopes fast, without running the risk of losing alignment.

VERSATILE

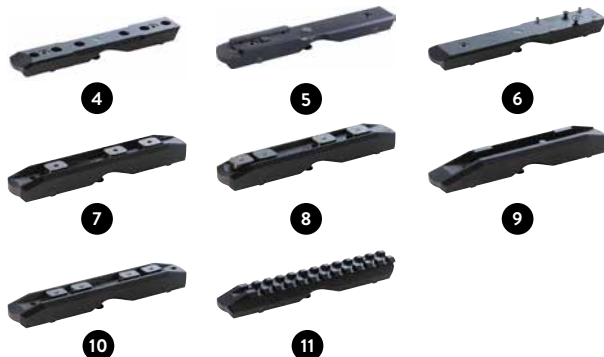

With the NOMAD MULTIPLE base rail, adjustable in windage and altitude, you can now use all your scopes on any gun, without having to adjust your aim before each change.

ACCESSORIES FOR RIFLES

BROWNING INTEGRATED SCOPE MOUNTS

Our integrated scope mount system eliminates alignment problems and the possibility of a loose connection between the base and ring. The ring and base become a single, ultra-rigid unit machined from 7000 series aluminium alloy.

Scope ring system height selection guide (for rifles without open sights)

Standard (low) ring height for scopes up to a 44mm objective with a standard barrel contour.

Intermediate (medium) ring height for scopes up to a 50mm objective with a standard barrel contour.

High ring (high) height for scopes up to a 56mm objective with a standard barrel contour.

SIZING TABLE FOR DOGS

HOW TO CHOOSE THE RIGHT SIZE OF THE JACKET ?

The size of the jacket is proportional to the chest size.
The Velcro neck and belly straps are adjustable.
Do not overtighten, and choose the right size to avoid hurting your dog.
